

# **SPECIAL INSTRUCTIONS**

## **FOR THE COMMODORE 64**

### **Loading Disk:**

Insert disk into the drive. Be certain both the drive and the computer are powered up — when the monitor screen is lit, type **LOAD**, press the space bar, then type **“\*”**, **8**, **1** then press return.

If you have any problems booting the disk, remove it from the drive, flip it over and repeat the disk loading instructions.

### **Loading Cassette:**

Place cassette in player. Press play button. Hold down shift key on keyboard. Press run/stop button once. Release shift key. When monitor screen reads **“Found”**, push Commodore key.

If you have any trouble loading the cassette, simply remove the cassette, flip it over and repeat the cassette loading instructions.

### **Options:**

Press **[F3]** for option menu. Press **[F5]** to change your selection, and **[F7]** to start the game.

### **Special Instructions:**

Connect your joystick to Port 2.
