JOURNAL OF geoCLUB

ISSUE No 1

SEPTEMBER 1991

EDITOR'S COMMENT

This is an attempt to see how many people I can get together who are interested in maybe forming a Geos group. I am sure we can be of help to one another and especially to newcomers to GEOS. I have had contact with about 15 Geos users some of whom find it harder to get going in Geos than others. We must also have a wealth of PD and Shareware Geos software between us so we could probably make up a library for newcomers. I have had contact with a guy in Germany who is a member of a group there with 1800 members with some very good and active programmers, he will try to obtain permission to send us some of their software complete with English translation. There are also two of us that I know with contacts in the USA which has to be of benefit to us all. So, it's up to us, do we want a group or not. On one of the following pages is a

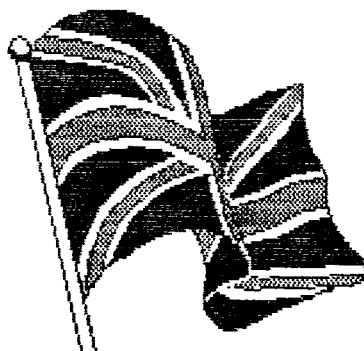

short questionnaire, if you want to have a go, fill it in and post it to me, if you know anyone else interested make a photo copy and get them to fill that in, then we will have a complete record.

HELP!

Has anyone got access to a photocopier who could deal with making copies from the master. At present I don't know how many pages it will be nor how many copies but the results of the questionnaire should settle that, as long as everyone replies PROMPTLY.

Where did he get that Union Jack from ?

DISKART 11

SUBSCRIPTIONS

This small issue has been produced and paid for by me because it is just something I wanted to do and it has come to you un-solicited. Obviously I cannot keep this up for too long so at least to begin with for the next issue would appreciate it if when you send your questionnaire back if you would stick the corner of an unused stamp to it to cover the postage of issue 2 which I hope will be much bigger.

CONTRIBUTIONS

If you'd like to contribute an article, review, letter or whatever, it would be of great help if you sent it as a GeoWrite file on a disk that way I will not have as much typing to do. You'll get your disk back with your next copy of geoNEWS. There may even be a new Geos program on it as a reward for your help.

DISKART DISK'S

Those Designers who publish DiskArt ready made Geos graphics have a couple of newish disks out, they are numbers 14 and 15. I have just purchased No. 14 and for those of you who like me are an air plane freak, you'll like it, there are some very good pictures of US jets. I have in my collection the following DiskArt disks no's 1, 2, 3, 4, 5, 6, 7, 9, 11, 12, 14, Music Kit, Disk Forms. These disks are not shareware so I cannot distribute them around as they are copywrite, but what I will do if anyone would like to see

from DISKART 9

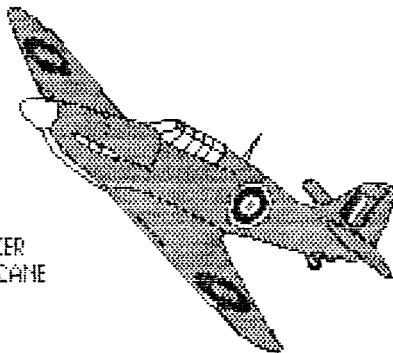

General Dynamics
F-16
Air Superiority
Fighter

Copyright 1989 THOSE DESIGNERS

DISKART 9 which contains amongst others, F-16, F-14 Tomcat, and A-10A Thunderbolt, recently made famous in the Gulf War as the SCUD-BUSTER and, faithfully reproduced for you here. These disks cost £7:95 each from FSSL, you may think that's a bit pricey, but if you bought them in the States it would cost you \$9:00, then there's the postage both ways and the risk, so it's not that bad really, like they say these days, CHECK IT OUT.

There are another couple of disks with aircraft on, DISKART 9 has some US jets and also some World War Two which are quite good and DISKART 3 which contains amongst them the DC-3 "DAKOTA" for which I give 10 out of 10. Any of these graphics can be modified and utilized however you want them. I use the DC-3 has a letterhead with just a few modifications on it, but they are for single user only and so even modified ones are still covered by copyright. Anybody want to right a few words about your favorite DISKART disk or any other disk for that matter then send in a geoWrite file and get yourself in print. I'll even add some graphics to it if you like.

from DISKART 11

HANDKER
HURRICANE

France Concorde, BA Air Bus, TWA L-1011, AA MD-11, Lufstansa 737 and Swiss Air 737. The US jets are EA6 Prowler, AV-8B Harrier II, F-15C Eagle and A-4F Hawk. To non aircraft buffs that lot will mean nothing. There are also 2 A4 sheets of military vehicles which are quite good and up to the usual standard and finally an A4 sheet of sports figures. Another good aircraft disk is

a sample off any of the disks I will send a printout with sample from the disk on, but please not all at once and not a sample from each disk. This is a service for you to see what you are buying before you buy. I DO NOT by the way sell software so you'll have to go to FSSL for them. For those of you who have never seen DiskArt graphics I'll scatter a few about this issue and put the disk number underneath them, 'arnt I the helpful sort. DISKART 14 has commercial aircraft on, namely Air
