For Children Ages 5 to 10

The Educator 2 ™

Cat. No. VED103

Hickory-Dickory-Dock™

A lighthearted, educational approach to teaching children how to tell time.

Features: This program uses a combination of classic nursery rhymes, colorful graphics, and carefully planned exercises to capture your child's imagination as it introduces them to clocks, clock numbers, and the basics of telling time.

Ages: 5-10

Number of Lessons: 3

Joystick: Not Required

Spellbound™

An educational spelling game with arcade action.

Features: The screen is sprinkled with the letters of one of 20 words of your choice, along with other random letters. Using your joystick, guide your bee around the screen and sting the letters of your word in proper order. But look out! If you sting the wrong letter, your bee explodes and you must start all over again.

This Adventure-In-Learning spelling game will help reinforce the essentials of good spelling. Words can be continually changed as skill levels develop.

Ages: 5-10

Number of Skill Levels: 10

Joystick: Required

Muggin™

A fun way to teach children the basic skills of how to use traffic lights when crossing streets.

Features: Colorful graphics and a competitive game format are used to maintain your child's interest as he learns the correct response to red, yellow, and green traffic lights.

One or two players can compete in this educational game. When the light is green, they will be able to proceed. The light will then turn yellow for a moment. When it turns red, they'd better not move or they will fall behind in the race.

Muggin will help your children understand how to use traffic lights and to cross streets properly and safely.

Ages: 5-10

Number of Players: 1 or 2

Joystick: Not Required
