Call-A.P.P.L.E.™

## Apple Pugetsound Program Library Exchange

GBBS Pro Bulletin Board System:
Version 2.2

The Software – tcpser

tcpser is referenced in the "Internet Setup Guide" in the *GBBS Pro 2.2* book. If using Windows for your *tcpser* host, this pre-compiled binary is helpful. The zip file contains the "tcpser.exe" program as well as two DLLs that are required for it to function. Please put the DLLs in the same directory that tcpser.exe is in, otherwise the program may not work.

About the Book

The book *GBBS Pro Bulletin Board System: Version 2.2* is a significantly expanded and improved edition published by Apple Pugetsound Program Library Exchange (A.P.P.L.E.), and is available in paperback and hardback at: www.callapple.org/books. It contains over 240 pages of expanded documentation, tutorials, *GBBS* development history, as well as forwards from Kevin M. Smallwood, Andrew Wells, and experienced BBS sysops.

GBBS Pro is a user-friendly, highly-modifiable Bulletin Board System (BBS) for communications and entertainment. It has advanced features that can be configured by a novice, yet challenge advanced programmers. Experience the world of BBS's from days gone by and start your own BBS system!

Disclaimer

This software is available at official *GBBS Pro* Web site http://gbbs.applearchives.com. The new and expanded *GBBS Pro Bulletin Board System: Version 2.2* book is a copyrighted production of Apple Pugetsound Program Library Exchange (A.P.P.L.E.) and has been produced with permission of and in coordination with Kevin M. Smallwood.
