VOLUME TWO - B

# INTRODUCTION

Welcome to Volume Two of my complete low down of Amiga games. This covers the letter B, and cor there is a lot of games beginning with that letter!! But also what classic games there are, with some of my all time favourite games to be found here.

I am still having a blast putting together this, ridiculously ambitious project, to catalogue and play every Amiga game I can find. I realise of course, there are a number of online sites that have done this already, but I hope that by pooling all that knowledge in one place and making it easy to read on a Tablet or Kindle Fire will be useful to some people, who like me, like to have things to read offline at times.

Anyway I hope you enjoy, the book is totally free and done simply because I am enjoying putting it together and had failed to find any book out there that focussed on the gaming side of the Amiga.

If you enjoy then all I ask is you come find me on my You Tube channel and say hi.

<https://www.youtube.com/user/TheDrisk>

I don't make money from any of this stuff, but it's still nice to have feedback from everyone.

Hope to speak to you soon

Paul Driscoll (AKA TheDrisk)

# ACKNOWLEDGEMENTS

I love retro gaming, and one of the things I particularly love is the retro community and how nice everyone is.

Special greets go out to...

<http://www.retrogamesquad.com> – A great US podcast and a really friendly close nit community. Particular greets go out to the Alex, Jon, Jeff, Madsdk, Trantor and Yakuza963.

<http://retroasylum.com> – A great UK podcast and great community. Thanks everyone there for giving a UK based retro gaming hub for people like me to be part of.

Of course this book has pooled on the fantastic work and efforts of the following websites...

<http://amr.abime.net> – An amazing scanned catalogue of all those Amiga Mags. I can't thank the site enough for keeping such an important part of the Amiga history alive, and has bought me countless hours of re-reading the magazines of my youth. (I just wish you added scan of all the adverts as well).

<http://hol.abime.net> – The definitive go to place for all Amiga related stuff. This fantastic collection is immense.

<https://www.youtube.com/user/cubex55> - This person recorded entire play throughs of most Amiga games and is a fantastic place to go to see a game in all its glory.

<http://www.mobygames.com> – An authoritative gaming database that has been my go to place to find out what did people go onto do after the Amiga days. They also have some box art and adverts that HOL (Hall of Light) don't have.

<http://www.exotica.org.uk> – A wonderful resource, I love their Box Scan collection and that they don't watermark everything.

<http://www.lemonamiga.com> – Kim Lemons wonderful site, cataloguing all Amiga games and allowing user reviews.

# The Magazines

Of course the real stars of these books are the magazines and their reviewers. I spent so much time in my youth reading these magazines, and it was one of the highlights of doing this book series was being able to reread all these great magazines again.

This is why I have given so much focus to the reviews, as opposed to my own views. After all these guys were the professionals and great witty writers to boot. So it was only fitting I give their views and not mine the main focus of each game.

I wont site particular reviewers or magazines as there was so many...but I wish to thank all these magazines for helping me in my youth make gaming choices with where to spend my pocket money.

# HISTORY OF THE AMIGA (part one)

To tell the story of the Amiga one must start right at the beginning of Commodore itself, and also briefly tell the story of the Atari ST alongside the Amiga as it will explain the deep-set rivalry between the two firms, beyond being mere rivals.

Our story starts with Polish born Jack Tramiel who in a living testament to the American Dream, Jack had migrated to America shortly after World War 2, having been sent to Auschwitz and losing his father during their time at Ahlem labor camps. So when he arrived to America in 1947 for a new start with only his wits and a willingness to work.

Thankfully this was a time of prosperity for America and soon after he got a job in the US military fixing office equipment. In 1953, thanks to an agreed secured loan of \$25,000 from the US military, Jack bought a little shop in the Bronx area to continue to repair office equipment and specifically typewriters. He called his firm Commodore Personnel Typewriters.

He chose the name Commodore after wanting to acknowledge the US military in some way, who had given him his first break and put up the loan for the shop. In 1962 Jack decided to branch out in selling electronic calculators and then manufacturing them. The calculators were being well received, although Commodore was still regarded as one of the little guys.

In the early 70's Chuck Peddle (pictured) had been working for Motorola on the popular, but expensive 6800 chip. As impressive as that chip was Chuck had realised that at \$300 the chip would have limited applications it could be used for and so wanted to design a budget chip to capture that market. Motorola didn't like the idea however, and told him to drop the project. So Chuck left and started to work for a microprocessor firm called MOS Technology. By 1975 had designed the impressive chip 6501 and 6502 which could be made far cheaper than any of it's rivals. Jack seeing the companies potential and knowing he needed to start manufacturing chips to be competitive in the calculator market quickly bought the company outright and so renaming the company Commodore Semiconductor Group. It was during this time that Chuck Peddle convinced Jack Tramiel that computers would be the future and so he agreed for Chuck to work on designing a new computer for Commodore. That computer Chuck designed, would be completed and released in 1977 and would forever associate Commodore with the world of computing. called the Commodore Pet 2001 it was a beautiful machine that was a phenomenal success for the company, becoming the main computer used by schools across America. The Commodore Vic-20 wold quickly follow in 1980 More geared towards graphics and the home market the machine was another major hit the firm. But it was the next machine that would make Commodore the de-facto name for home computers

That machine was the Commodore 64 and released in 1982. With its impressive graphics and wonderful SID chip to play music it was a wonderful machine for the home and especially for playing games. Consequently in the US in particular it became the main home computer of choice and out selling their main rivals the Atari 400 and 800 machines. Despite such success, in the boardroom of Commodore things weren't smelling of roses with Jack Tramiel and the CEO Irving Gould (who Jack had turned to in getting the money to buy MOS) were having major disagreements on how to run the company. In particular with Jack wishing to give his sons positions in the firm.

In January 1984, Jack resigned the company he had created and set up his new firm Tramel Technology Ltd (purposely misspelling his name to ensure correct pronunciation) to design a new computer to rival his old firm. After a few months, with the collapse of Atari consumer division due to the video game crash. Seeing his opportunity he bought Atari, the main rivals to his old firm.

Rewind back to the mid 70's and in Atari an extremely talented engineer Jay Miner (pictured) had joined the company. He would be instrumental in creating the TIA display hardware used in the Atari VCS (Atari 2600) and then would lead designer on the chip designs used by both the Atari 400 and 800 computers

But by 1979 Jay was frustrated with both the management style and short sightedness of the company in not investing in research and development of better more powerful hardware. So he left to join a firm making pace makers. In 1982 over in Activision Larry Kaplan one of the co founders was also frustrated in the fact that the company was still only making games for Atari. So in 1982 Larry phoned up Jay asking him to join him starting a new company with the brief to design the ultimate home games console. So with David Moor as CEO and other fellow ex Atari staff they set about to design the ultimate games console. Calling the company Hi-Toro, for no other reason than High bull was a funny name they setup in a little office in Santa Clara and set about designing the Dream games Console under The project name Lorraine.

Larry Kaplan

Jay Miner

But Jay was really far more interested in designing a business computer than a games machine, seeing there being real potential to take on the IBM and Apple computers. But investors wanted a games console and so Jay would design that, all be it including much in his design that allowed it to expand and become a home or business computer very easily, should it be required.

*Early concept designs of the machine, that would eventually become the Amiga.*

But designing a new machine for a start up company was a slow process and Larry Kaplan was beginning to get frustrated with them still so far away from seeing the fruits of their labour and some returns to their finances. To help with the finances they turned to Nolan Bushnell (he who founded Atari and had also left after the Warner take over at a similar time to Jay Miner). They offered him the position of CEO of their company, but instead Nolan turned the offer down and offered Larry Kaplan to instead leave Hi-Toro and join him on a venture instead. Larry did this and so left Hi-Toro, well very Hi-Bullshit indeed. Incidentally the venture Larry had left to join Nolan on didn't succeed and he would end up going back to Atari to work for them again. Hi-Toro need funds to keep afloat and so decided to write some games for the Atari 2600 console calling this sub company Amiga.

They created games that were nothing special and also a Joyboard peripheral that allowed you to control the onscreen action by shifting your body on the board. So a bit like the rudimentary Wii-Fit board released recently.

Sadly due to incredibly bad luck with timing, most of the games didn't sell well or even get released due to the video game crash occurring and the market going through meltdown.

**Look out for Part Two in Volume 3.**

# THE HARDWARE

The hardware descriptions is taken from Amiga History. A fantastic website, and I personally wouldn't have a clue of all the chips and stuff in the Amiga ☺ <http://www.amigahistory.co.uk>

# MEET THE COMMODORE FAMILY

### 64C PERSONAL COMPUTER\*\*

- Large 64K RAM memory
- Sprite graphics for games and education
- 2 ports for joysticks, light pen
- Optionally expandable built-in high resolution graphics
- 16 colours
- State of the art low cost/low power supply
- Used with monitor or Hi-Fi TV
- Output for external applications
- Accepts plug-in application cartridges

### 128D PERSONAL COMPUTER\*\*

- Built-in 128K video application
- 128K RAM for advance application
- Carry handle
- Other selectable 4080, 640x400 and composite video output
- Commodore 64 software
- Fully compatible with Commodore 8 software
- Runs off the standard CPW\*\* software

### PC5\*\*

A new generation of entry level low cost home/office computers.

The PC5 brings IBM compatibility into the reach of home computer buyers.

Compatibility to run all popular IBM PC software.

Standard monochrome text card for crisp high resolution.

Single 380K 5 1/4" floppy disk with optional second drive of 380K.

More than 1MB of ROM available for software.

Five IBM PC Compatible expansion slots to let your system grow with you (one occupied).

MS-DOS 3.2 and GW-Basic (Industry standards).

Included floating point processor (optional).

Parallel printer port.

RS-232C Port.

### PC10\*\*

Compatibility to run all popular IBM PC software.

640K RAM to run the largest programmes.

Advanced Graphics Adapter card for stunning colour.

Functions as: 1. IBM colour graphics adaptor

2. Hercules graphics adaptor
3. Hercules colourbus adaptor
4. Hercules colourbus text adaptor.

Dual 300K 5 1/4" floppy disk drive.

Five IBM PC Compatible expansion slots to let your system grow with you (two occupied).

MS-DOS 3.2 and GW-Basic (Industry standards).

Included floating point processor (optional).

Parallel printer port.

RS-232C Port.

### PC20\*\*

Compatibility to run all popular IBM PC software.

80287 arithmetic co-processor (optional).

1 MB RAM as standard, configured as 512K Base and 256K Expansion Memory.

200W power supply.

1.2Mb floppy disk drive 5 1/4" — 380K second floppy disk drive.

8 fully PCAT compatible expansion slots:

- 2 slots with A26 and 32 pin connector, 16 bit bus.
- 2 slots with A62 and 32 pin connector, 16 bit bus.
- 1 slot with A62 and 32 pin connector, 8 bit bus.

Serial interface: HardFloppy Disk Controller

RS-232 Serial interface — 9 pin sub-d connector.

2 parallel printer ports: primary printer port, secondary printer port.

Real time clock/calendar, battery buffered.

Keyboard/switch.

Advanced Graphics Adapter Card for stunning colour.

Functions as: 1. IBM Graphics Adaptor, 2. Hercules Graphics Adapter, 3. Penmetrics Colourbus Adaptor, 4. IBM Monochrome Text Adaptor.

### PC40\*\*

Compatibility to run all popular IBM PC software.

80387 arithmetic co-processor (optional).

1 MB RAM as standard, configured as 512K Base and 256K Expansion Memory.

200W power supply.

1.2Mb floppy disk drive 5 1/4" — 380K second floppy disk drive.

8 fully PCAT compatible expansion slots:

- 2 slots with A26 and 32 pin connector, 16 bit bus.
- 2 slots with A62 and 32 pin connector, 16 bit bus.
- 1 slot with A62 and 32 pin connector, 8 bit bus.

Serial interface: HardFloppy Disk Controller

RS-232 Serial interface — 9 pin sub-d connector.

2 parallel printer ports: primary printer port, secondary printer port.

Real time clock/calendar, battery buffered.

Keyboard/switch.

Advanced Graphics Adapter Card for stunning colour.

Functions as: 1. IBM Graphics Adaptor, 2. Hercules Graphics Adapter, 3. Penmetrics Colourbus Adaptor, 4. IBM Monochrome Text Adaptor.

### AMIGA 500\*\*

- CPU: Motorola 68000, 16.32 Bit
- Clock Speed: 7.14 MHz.
- Co-Processor: 3 chip co-processor system for DMA, memory, graphics and sound.
- Memory: 1Mb (1000K) RAM as standard. Internally expandable with an additional 8 Mb, total max 9 Mb.
- ROM: 256K of Read Only Memory containing the Boot (Kickstart).
- Keyboard: Integral 96-keys including 10 function keys and low level Operating System routines
- Key-board: Separate numeric keypad, separate cursor keys
- External Drives: Power supply supports one extra drive 5 1/4" (with integral power source).
- Video Display: 625 lines, 512 KB to video memory soundbuffer up to 512K, 8 scan colours, 8 sprites per frame
- Graphic Modes: 320 x 256 pixels, palette of 32 colours, palette of 32 x 512 pixels, palette of 32 colours, palette of 320 x 512 pixels, palette of 32 colours, interlaced, 640 x 400 colours, interlaced.

### AMIGA 1000\*\*

The Amiga range of personal computers is the ultimate in microcomputer technology. The machines will essentially set the standard for computers in the future. Amiga offers you the same benefits as the PC but with a much wider range as well as providing the Power you will need to improve the quality of your work.

Internal Expansion: Slot for advanced applications and software.

Expandable to 8 megabytes externally.

Superior Graphics, Sound and Animation capabilities. Simultaneously running many applications.

4 channel stereo sound.

Video interface (RGBComposite).

IBMPC compatible — to run most popular IBM software.

with optional Statecar accessory

A revelation when released, the Amiga 1000 had some truly stunning hardware design, a ground breaking operating system (Workbench) and a beautiful sleek design. Nice touches such as the case being elevated to house the keyboard underneath. Sadly the device didn't sell particularly well due to a confusing advertising campaign from Commodore

SPECIAL REPORT

# The Everything Machine?

AMIGA BY COMMODORE

**L**ike its name, the Amiga 1000 promises to be the ultimate machine for the home. It's a computer that can do everything. It can play music, draw pictures, and even play games. It's a machine that can do it all. It's a machine that can do it all. It's a machine that can do it all.

The Amiga 1000 is the ultimate machine for the home. It's a computer that can do everything. It's a machine that can do it all. It's a machine that can do it all. It's a machine that can do it all.

Who were advertising it as a school kids PC with emphasis on gaming. But with an asking price of \$1,295 about £870 it was far more suited as a business machine, that could also offer stunning graphic capabilities for presentations and the like, with gaming simply being an additional bonus. In fact it one of the great What if? Questions... What if Commodore had handled the advertising better for the Amiga 1000? Would the Amiga and not the IBM compatible PC be the dominant force? I think the answer is still no, but it certainly would have had more impact on the business world and especially in the graphic design world.

It was an impressive highly specked out computer, light years ahead of its time, and showing its original gaming console roots, with 256kb ram and with an option to expand that to 512kb. It had a mighty 7.159 MHz Motorola 68000 CPU and ability to display 4096 colours at one time all though 16 colours was the more practical option. Sound as well hadn't be forgotten either, with it have 2 stereo channels, allowing for an unparalleled audio experience. All in all it was the Dogs nuts (maybe Mitchy's?). I conclusion in 1985 it wanted a business machine that was brilliant at multitime then the Amiga was your go to machine... even beyond, dare I say The Apple Macintosh.

The game had love poured over inch of the Amiga and it showed, from it's clever, intelligent design, right down to the back of the case that had all those from the Amiga family in producing the machine... Right down to the paw print of Jay Miner's dog Mitchy. It is an attention to detail and genuine love and care of a product, sadly missing in todays world of only profits and the bottom line matter. So it must have been heart wrenching to Jay and the team when the Amiga 1000 only sold around 35 thousand machines before ceasing production in 1987. Especially when the design was so sound and that it was the confusing marketing mainly to blame.

The underside of the Amiga 1000 case that shows the love and care and pride the Amiga Team took in their creation.

## Amiga under \$2,000. Anybody else up to \$20,000.

This "painting" was created on the Amiga™ computer using Electronic Arts' Deluxe Paint™ software. No PC, anywhere, can create this kind of graphic dazzle for the price of an Amiga.

But there's more to the Amiga than whiz bang graphics. It's also a top-of-the-line PC ready to solve problems, business and personal.

The incredible power that brings Tia back to life can also make gigantic spreadsheets sit up and beg, can make eloquent the word-just of word-processing tasks, and thanks to the Amiga's unique multi-tasking capabilities, it can do

word processing and spreadsheet analysis and graphics and more simultaneously.

No other PC past, present or in the near future has done it, is doing it or is likely to do it.

**CPU:** MC68000 32 bit internal bus, 16 bit data bus, 7.16MHz clock speed

**RAM:** 512K internally and 1mb model

**Launch date:** 1987

**Discontinued:** 1991

**Price:** Originally £499.99

In 1987 Commodore released the A500 - a cheaper version of the A1000 - which came in the "distinct" Commodore box. The basic system still used the 68000 processor, 512k ram, and OCS chipset but had got rid of the ZORRO slots in favour of a DMA slot at the side of the machine. The operating system had been upgraded to version 1.3, which included the Amiga Command Line Interface (Shell) allowing the user more functionality. This is the machine that kicked the entire Amiga world into focus and brought more people to the Amiga than has been done since.

There are two different revisions of the A500 motherboard:

**500P** - 'Productivity' edition - 1Mb memory (512k Chip, 512k Fast).

**500C** - improved version that incorporated the new Agnus chip, providing 1Mb Chip RAM (corresponds to the Amiga 2000C)

## ONLY COMMODORE AMIGA MAKES ALL THIS POSSIBLE.

When you first see a Commodore Amiga you'll be amazed at how much it can do. After you've seen its capabilities you won't be surprised that over a million Commodore Amigas have been sold worldwide.

That's because Commodore Amiga is the world's most advanced home and small business computer. It is also the leader in specialised applications such as Desktop Publishing, video graphic design and music.

It talks, animates, educates. Whether you're nine or ninety, student or teacher, Commodore Amiga has the software to aid learning. As well as these applications, it offers a wealth of entertainment with the latest hi-tech video games.

The potential of the Commodore Amiga doesn't stop there. Commodore Amiga has thousands of software packages available as well as a huge range of supporting magazines.

The Commodore Amiga 500 and 2000 make so much possible you're limited only by your imagination.

**AMIGA**

The new Commodore® Amiga® 500 is everything you never expected from a home computer. That's because we designed it to excite you. To dazzle your senses with 4096 colors and stereo sound. To unleash your creativity. To allow things you never dreamed possible in a home computer. Because until now, they really weren't.

Like built-in speech synthesis, so you'll always have someone to talk to. Pro-quality 3-D animation that lets even beginners put their ideas in motion. Colorful educational programs that make lessons fun and memorable. A complete home office with powerful spreadsheet and database programs—even word processing with WordPerfect.\* And unlike any other home computer, the Commodore Amiga 500 can multi-task, so you can run several programs *at the same time*.

Hook it to your VCR with an optional RF modulator, and the Commodore Amiga 500 becomes a home video production center. Paint graphics over video images. Create moving 3-D titles. Produce your own animated feature.

And for pure fun, enter the incredible world of stereo Amiga video games. With graphics so good, major video game makers use them in their coin arcade machines.

**AND NOW YOU CAN SEE IT ALL, FREE.**

We captured the excitement, beauty, and power of the Commodore Amiga 500 on a special VHS video cassette called *The Amiga 500 Video Test Flight*. # Amiga 2500

**Launched:** 1989

**Discontinued:** 1990

The Amiga 2500, also known as the A2500, was not a distinct model, but simply a marketing name for an Amiga 2000 bundled with a Motorola 68020 or 68030-based accelerator card.[9] The accelerator cards used by the A2500 (the A2620 and A2630) were also available separately as upgrades for the A2000. 68030 versions were referred to as A2500/30 – *Taken from Wikipedia*

# Amiga 1500

**Launched:** 1990

**Discontinued:** 1991

*In 1990, Commodore UK sold a variant of the A2000, the A1500, for £999. The model designation was not officially sanctioned by Commodore International. The A1500 shipped with dual floppy drives, and 1 MB of RAM as standard, along with the ECS chipset and AmigaOS 2.04. The second floppy drive replaced the hard disk drive. The A1500 had no hard disk drive as standard.*

*A1500s were easily convertible into A2000s by addition of a hard disk controller (and associated drive), and then simply peeling off the A1500 label revealing the A2000 label beneath.*

*The reason for the UK-only release may have been the existence of a desktop upgrade kit for the Amiga 500 made by Checkmate Digital and also called A1500,[8] and Commodore trying to keep the name for themselves. – Taken from Wikipedia*

# Amiga CDTV

**Launched:** June 1990

**Discontinued:** 1993

Sold for £699. Commodore launched a machine as ground-breaking as the original Amiga, the CDTV. It was basically an A500 in a black video-style case without the keyboard or disk drive and a CD-ROM drive "stuck on". But this was not made it special- it was the approach that Commodore took to selling the machine that set it apart from the Amiga.

Rather than a computer it was sold as a consumer device in order to compete with the Philip's CDi. It was criticised by the Amiga fraternity for the lack of expandability or support from third parties. Until recently it was impossible to upgrade the machine beyond version 1.3 of the OS. It is possible to turn the console into a fully fledged computer by adding a keyboard and disk drive . Nolan Bushnell (He who started Atari was involved and had this to say of the device... "CDTV will truly change the way people learn and are entertained. It's the real new media of the nineties." - Nolan Bushnell, CDTV Project Manager

The only competition was the Phillips CD-i; Even Commodore could have influenced the development of the CD market to favour their machine, right? However, the CD market was still an unknown that had different requirements to the standard Amiga. To investigate this further, Commodore hired a study group to research the area and make recommendations. This resulted in the

decision to distance the CDTV from the computer, promoting it as the next generation VCR. Commodore insisted that retailers did not physically place it near to other computers. This led to mass confusion, computer people did not buy it because "it wasn't a computer", while non-computer people said it was "too much like a computer." It only sold in small numbers but did introduce the Amiga to the advantages of CD as a storage method. - Taken from <http://www.amigahistory.co.uk>

How about that for a game controller ☺

 SOUND AND VISION  
 IT'S NOTHING SHORT OF REVOLUTIONARY

Imagine a compact disc that not only gives great quality sound. It also plays books, photographs, graphics and the written word. **▶** CDTV is like nothing you've experienced before. And it's everything you could want for entertainment, education and excitement. **▶** Pictures, for instance, a child asking the question, "Who was Martin Luther King?" **▶** Easy. You just turn on the TV, put in a political history CD and not only can you read everything about King's life, you'll also see his face, hear the crowds and feel the emotion in his voice as he tells you his dream. But that's only one way of looking at it. **▶** With CDTV in your sitting room, suddenly your TV isn't just for watching, it's a mine of information. A book that talks back. The world's best teacher. A CD quality home karaoke. Or a most talented games player. **▶** And if you're happy changing channels on your TV remote, you could work CDTV in seconds. Just select your choice of title from the 150 available and you're away. **▶**

Take music. Of course, you can play your audio CDs. But by pressing the buttons on your remote, you

could also play drums with Hendrix. No experience required. Or remix any of your CDs to create your own versions. If your tastes are more classical, listen to Beethoven's music while you see a picture of the composer and read about his life's works. That's multimedia in its truest sense. **▶** "Switch off the TV while you're doing your homework!" That phrase could soon all but disappear. Because what better way to sweet up on Shakespeare than by acting in a play and speaking the part of, say, Romeo with CDTV as your prompt. **▶** For sheer entertainment, there's nothing to touch CDTV. With Trivial Pursuits, you're not just answering questions on a card. You can ask, for example, "Who is the person singing this song?" **▶** Whatever your interest, whatever your age, CDTV is a totally new way of looking at every subject under the sun. **▶** For only £499.99 including VAT, the price of a good CD it's a whole new ball game.

# Amiga 3000

**Launched:** April 24<sup>th</sup> 1990

**Discontinued:** 1992

The A3000 is a powerhouse in comparison to previous Amiga, it was sold as a high-end graphics workstation. For a time it was used by W Industries as the basis of their highly acclaimed Virtuality machines. At the heart of the A3000 was the powerful 68030 (described in ST/Amiga Format as a 'mainframe on a chip'). In addition the A3000 was the first Amiga to feature the new Kickstart 2 upgrade and Zorro III slots. - Taken from <http://www.amigahistory.co.uk>

# Amiga 3000T

**Launched:** Oct 1991

**Discontinued:** 1992

In October 1991, Commodore introduced the A3000T, a tower version of their popular A3000 machine. The A3000T uses a 25Mhz 68030 processor, with a 68882 maths-coprocessor, as well as 2MB of 32-bit ram as standard, expandable up to 18MB actually on the motherboard. As it was released before SIMMs became a standard it uses Zip ram, a slower alternative. If you want an SIMM adapter, you will need to buy a device from mail order. The workstation was aimed at the professional multimedia market, as reflected in the price of the machine- \$4498 for an A3000T with a 100MB SCSI hard drive, or \$4998 for the 200MB version. It also came with key switch on the case. These are used in the commercial market to disable a machine when it is not being used, locking the mouse and keyboard. - Taken from <http://www.amigahistory.co.uk>

# Amiga 500 Plus

**Launched:** 1991

**Discontinued:** 1992

This is widely known as the shortest-lived Amiga ever, lasting only 6 months until it was phased out by the A600. This was yet another of Commodore's secrets with many people opening their Amigas at Christmas expecting to find an A500 only to find something much better. It looked physically similar to the A500, but updated it with 1mb of ram, Enhanced Chip Set (ECS) and Workbench 2.0 which turned the horrible blue interface of workbench 1.3 into a much more lovely grey and blue.

It also allowed the user to see files that did not have icons without resorting to the CLI and put among other things the FastFileSystem into ROM (Kickstart) allowing you to boot from FFS disks containing 880k of data.

# Amiga 500 Plus Game Bundles

**Released:** July '92 – Sept '92 - £359

## “Cartoon Classics”

Came with included Workbench 2.04, The Simpsons, Captain Planet, Lemmings and Deluxe Paint 3.

**Released:** 1990 - £521.70

## “Class of the 90's”

Designed for schools or parents under the belief they were buying an educational system. Came with Deluxe Paint 2, Maxiplan, ProWrite 2.5, Deluxe Paint & Deluxe Print 2, Let's Spell, Amiga Logo, Dr. T music composition software and a BBC emulator for compatibility with older education applications.

# HAVE YOU SEEN THE LIGHT?

Why is it everyone wants an Amiga? Well, for starters there's the massive 1 mega-byte memory, legendary graphics and mind-blowing sound.

Then there's an incredible 2,000 games to choose from, with dozens more released each month.

 **Commodore**

As soon as you taste the action, you'll understand why the Amiga is the world's best-selling home computer.

In fact, with Lemmings, Bart Simpson, Captain Planet and Deluxe Paint III all included in the "Cartoon Classics" pack,

it really is the only choice. And to make the most of your machine, check out Amiga Format magazine. It's a wicked mix of news, reviews, advice and hot tips, showing you exactly what's what.

It's also far and away the best-selling Amiga mag.

Not surprising when you see how much you get each month—over 200 pages *plus* a disk packed with exciting software. What's more, the current issue includes a free supplement especially for those considering an Amiga.

So don't get left in the dark.

# Amiga 600

**Launched:** 1992

**Discontinued:** 1993

Released in spring 1992 as a replacement to the A500+, the A600 weighed just 6lbs (the smallest Classic Amiga ever!). This 14 deep x 9.5" wide x 3" high system was aimed at the console market, adding very little to the operating system or the Amiga as a whole. It only had 1mb of chip memory, ECS and Workbench 2.05. It shrunk the basic system by doing away with the numeric keypad leaving just 78 keys, and became the nearest the Amiga has to a laptop. It did, however introduce the PCMCIA slot at the side of machine allowing the use of ram cards; CD drives and disks that fitted into this port. The fatter Agnus chip as standard also allowed the addressing of up to 2Mb Chip ram as standard, with the maximum ram expansion (with PCMCIA) being 6Mb.

This was yet another attempt by Commodore to aim the Amiga towards the console market by selling it as a games machine with a keyboard, which didn't work. The numeric keypad was sorely missed by most Amigans who would not touch it with a barge pole. Whatever the reasons Commodore chose to produce it, it was the last of the 16 bit Amigas and was the closest we have had to a laptop yet. In fact, it forms the basis of the DIY laptop known as Suzanne.

### **“Robocop 3 Bundle”**

The Epic bundle is interesting from a historical perspective, illustrating the first time that Commodore used two illustrations to sell the bundle to differing markets. Game players would be more interested in the Epic illustration, while serious users would find the Language Lab more appealing.

The bundle featured a 20MB 2.5 IDE hard drive, a word processor (possibly Wordworth) with a 5 language dictionary, plus Trivial Pursuit, Myth, Rome and Epic.

# Amiga 4000

**Launched:** 1992

**Discontinued:** 1994

In 1992 Commodore launched the most advanced Amiga yet. The A4000 used the AGA chipset to allow it to show 256,000 colours on screen from a palette of 16.8 million, as well as the new Workbench 3 that introduced the concept of among other things, datatypes. Several variants were available, all fitted with 6MB RAM, 1.76mb High-Density disk drive and a hard drive as standard.

# Amiga 1200

**Launched:** October 1992

**Discontinued:** 1996

In October 1992 the A1200 was launched. This took the A500 approach to computing with the "distinct" Commodore case, but including the AGA chipset present in the A4000, 2mb ram, and the PCMCIA slot from the A600. At the price of £399 it sold like hot cakes and is seen as one of the best Amigas to date. It appears to have been rushed to launch for the Christmas period with manuals claiming to give you the opportunity to upgrade from 1mb to 2mb chip ram with FPU. It is however, a darn fine machine that can be easily upgraded for most of your needs.

After Escom bought the Amiga during 1995 it was relaunched to mass outrage. The machine still cost £399, £150 more than it had a year previously and was not enhanced in any dramatic fashion. It was released in two versions- the Amiga Magic pack and the Amiga Surfer bundle. Unfortunately, the former was never released due to Escom's financial situation. The Escom Amigas were also struck by incompatibility problems due to a different disk drive being used, it was actually a PC high-density drive mechanism that had been altered to allow compatibility with the Amiga filesystem. Unfortunately, some games that hit the hardware directly would not run. A circuit upgrade was released free of charge that allowed users to fix the drive problem. - Taken from <http://www.amigahistory.co.uk>

# Amiga 4000T

**Launched:** October 1996

**Discontinued:** 1997

The A4000T was due for release during 1994 a few months after Commodore went into liquidation the events in April of that year resulted in around 200 units being manufactured. It was resurrected in 1995 by Amiga Technologies as the high-end Amiga system but manufacture was delayed until early 1996 when it became obvious that Escom was in serious trouble. The A4000T is basically an A4000 in a full tower case with IDE & SCSI-2 Fast controllers integrated as well as 2 video slots and shipped with a 25MHz 68040 processor. At the time production was limited and the A4000T were manufactured for a North American market at the West Chester plant whilst the European market was serviced from the Commodore assembly line in Bensheim, Germany. - Taken from <http://www.amigahistory.co.uk>

# Amiga CD32

**Launched:** October 1996

**Discontinued:** 1997

Commodore's second attempt at the console market was later revealed to be a last ditch attempt at making a profit. Launched in Europe during 1993 it quickly grabbed a large portion of the prototypical CD market, even beating PC CD-ROM. It's US success was also cut short when the U.S. government declared that Commodore could not bring anything into the country, as they had not paid the \$10 million they owed for the XOR patent infringement lawsuit. The last ditch attempt to save the company failed and Commodore entered bankruptcy on April 29th 1994. The unshipped Amiga CD32 units were seized by the Philippine government as payment for the use of their factory.

Although these events killed the CD32 as a viable platform it remained popular for several years, demonstrating a demand for Amiga CD titles. In 1994 a third party developer launched the SX-1 and SX32, allowing owners to turn their rejected console into a fully fledged Amiga.

*[ 9/10 –RPG Classic game, give a true sense of visiting and alien world. Immersive classic game]*

**AUI : 99%** - 'This is a true mega game of obvious quality and amazing depth that simply must be seen and played to death. A fantastic achievement.'

**AF : 88%** - 'B.A.T. is great. It's very easy to get wrapped up in the game and start to annoy the citizens of Selenia. One of the best features, though, is the fact there's no set route through the game. You can deduce, stumble on and wring all and sundry out of people, clues about what's happening with Vragnor.'

**AA: 80%** - 'As far as RPG games go, BAT is one of the best I have seen. The graphics are excellent and it is obvious that a great deal of time has been spent on the game. There is a high level of interaction and the cursor arrow, which changes

in different modes, is a very attractive idea. Animation is fluid and realistic and the whole project reeks of professionalism. I would definitely recommend BAT as one of Ubi Soft's best products and suggest that fans of other genres give it a go.'

**ZZ: 68%** - 'In this French RPG you play an agent of BAT (Bureau of Astral Trouble-shooters), on the trail of the evil Vrangor who has threatened to blow up the planet Selenia. After creating your character you can move around the game world. Control is totally joystick-driven, using icons and menus for command choices, the joystick pointer changes its shape when over specific areas of the screen, e.g. placing the pointer over a character may bring up a speech bubble. A door turns into an arrow and so on. Clicking on these 'action' areas may bring up additional menus. Menu and icon design is pretty logical and easily learnt. The Amiga version is, understandably, a better looking game but does retain many of the same problems as its C64 counterpart (65%, issue 68). There is far too much eating and drinking required, which ruin the flow of the flow of the gameplay. I also became confused too often, as which arrow moved me to what area. Then there's the weird programming section that allows you to create mini BASIC-like programs which, due to the vaue manual I couldn't understand how to use properly. On the good side, graphics are excellent with small animated 'things' flying around the screen now and again, giving a real alien atmosphere. This is aided by some nifty background music and plentiful spot effects. But it's not enough to make up for a poor interface and game design.'

AT THE START OF THE A-312 TRUNK ROAD YOU'LL FIND A WHOLE NEIGHBOURHOOD LIVING OFF THE IMMORAL EARNINGS OF CRIME AND CORRUPTION. IT'S KNOWN COLLOQUIALLY AS THE 'HOT QUARTER'.

HELLO AGENT JOHN BURNS, I HOPE YOU ENJOYED YOUR TRIP...

I love the atmosphere of this game with you really feeling you are visiting a strange Alien world. The controls are sublime as well, being really innovative at the time. The comic Book style works really well along with the subtle animate sprites that bring the pictures to life. The game isn't perfect Things that do annoy, such as realism on eating and drinking is an unnecessary pain along with you often feeling a little lost. It is also a shame as well, that the puzzles to solve weren't a little better. But despite all that, I am still a huge fan of this game. As a lover of all things Sci-Fi this was one of the few games to even this day, that had enough scope and vision, to fully immerse you in its world it has created. So whether you were idly wandering around the city, starting fights with the locals, or being a tourist and taking in all the sites and exploring, who knows you may have actually tried to be a good little agent and do what you were supposed to, there was much fun and unique experience to be had. All in all a top game, let down a little by a slightly weak puzzle element. It is just a shame that games such as the GTA series by Rockstar and Bethesda's Morrowind series, don't consider doing a modern take on the B.A.T. universe, as I am sure such a game would be a major hit (certainly one I would rush out and buy).

## B.A.T. 2 – The Koshin Conspiracy (1992)

£29.99 Ubisoft / Dev: Esprit Software Programs (ESP)

*[ 9/10 – Even better than the first game, with even more to see and do, and a far better story.]*

**AF : 84%** - 'There are over 400 animated sequences, the colours of the city change as night falls to a dingy blue grey; overall BAT II looks very, very nice. There's enough detail to hold your attention even if you're not getting very far, if say you are a novice to adventuring. This is the sort of game you get lost in, it's so huge it's difficult to know where you've been and where to go next. But if you enjoy immersing yourself in tomorrow's world, playing a modern-day Sherlock Holmes then BAT II will keep you from the horrors of the real world long enough to maybe forget for a while.'

**O : 84%** - 'Very nice indeed. I've got a lot of time for games with a decent storyline and a nice bit of atmosphere, and this has both. The main control system is easy to use and the city is nicely mapped out so that you don't have to plod back through tons of locations to return to a specific location. People are milling around all the time giving excellent opportunities to chat or even steal. I particularly enjoyed stealing things from innocent thick plebians – the poor citizens of Roma II – and then selling it back to them at a bargain price, but that's the kinda guy I am.'

Developer ESP did the unthinkable in 1992, with them actually releasing a sequel that bettered the original in almost every way. This time you are on planet Shedishan, in the city Roma II to help a fellow agent prove that the Koshans are taking over the essential spice mines. But as good as the story here is, it's the immersive graphics and sounds that really pull you in, as you wander around the massive city (its so big you have to drive around to see all of it). Like its predecessor, this is a tough RPG. But for novices, even, just sight seeing is great fun. A top-top classic.

## B.C. Kid (1992)

£25.99 Ubisoft & Hudson Soft /  
Dev: Factor 5

*[ 9/10 – Stunning conversion  
of a PC Engine classic.]*

**CU : 93%** - 'if you enjoyed Chuck Rock then you'll get a kick out of BC Kid – but Ubisoft's offering is definitely the superior game, thanks to the ingenious game design which always offers something new for each stage. What this all amounts to is one of the most enjoyable platform romps I've played for a long, long time. Forget the likes of Fire and Ice, The Addams Family or Parasol Stars – if you're into platform games, then this is the essential purchase to make. You won't be disappointed.'

**AM : 92%** - 'displaces Fire and Ice as best platform game. BC Kid could be described as the first real console-type game for the Amiga.'

**AA : 90%** - 'I would say this is certainly one of the most enjoyable games of this particular genre, and you can call me Susan if it isn't so.'

**AP : 89%** - 'A doozy. Although apparently all rather simplistic, it has to be rated this highly because not only is it one of the most well-rounded and complete games ever seen on the Amiga, it's completely loveable too.'

**O : 83%** - 'not going to woo the type of gamer who buys games simply to impress his mates, but for aficionados of good old-fashioned playability it's a must.'

**AF : 70%** - 'A reasonable conversion, plenty of playability is marred by blockyness and no level codes, no sound effects and poorly tied in music. A stocking filler for platform fans.'

Factor 5 have done a fantastic job bring the PC Engines PC Kid (or Bonk in the US) across to Amiga. A kind of Prehistoric Charlie Brown, that uses his hardy head as a weapon, and loves his spicy kebab meat. This is one of the few games that actually feels like a console game. Some may argue that its too simplistic, but that's part of its charm. On the Amiga platform games don't come much better than this.

**AF : 91%** - ‘a game that will last and last, which is why it earns itself the coveted Amiga Format Gold award. Once you get into it, the challenge of getting your crew more experienced, without getting them killed will keep you coming back for more, time after time. Your crew can retire after 25 missions, but you’ll probably want to start off a new one. If you’re after a quick thrill, you won’t find it here. But if you’re looking for something that is accurate and atmospheric, this is the one to get.’

**O : 84%** - ‘won’t appeal to everyone. Some gamers will not appreciate the amount of time it takes to get into the game or the relatively slow pace of the action..[sic]..But if you prefer a more comprehensive simulation which is crammed full of detail and has as much people management and strategy as killing things, then this is the game for you.’

**AP : 83%** - 'A flight sim that has more to offer than just flying around occasionally shooting things, and as such it's recommended highly. Only the price should put you off.'

**AA : 73%** - 'You cannot fault B17 either in the technical or realism department. Where it does fall down though is the gameplay. There is just not enough to keep the interest of anyone but the most die-hard simulator fans.'

**AC : 69%** - 'Good graphics, sound and a fearful level of difficulty don't translate into a coherent, playable game. If you enjoy the realism on offer, though, you won't get bored quickly.'

**CU : 68%** - 'A disappointingly uneventful flight sim, sadly lacking in excitement.'

A flight sim that little bit different, with you flying a big World War 2 bomber plane. It's a fantastically researched and chock full of atmosphere and spiffing gameplay. One of the things that made this game unique was you having to look after your crew of people and keep their morale up, let alone keeping the alive. It's a tough game and certainly a challenge, but for those up to it, there is quite an enjoyable experience to be had here.

The best way to play this game these days is to buy the game on [www.GOG.com](http://www.GOG.com) (Good old Games). It is the superior PC version to the Amiga and so of course missing all the disk swapping.

## Baby Yaga (1991)

£???.?? Cocktel Vision

[5/10 – A story book and Platform game for kids]

Done by the same people who did Abracadabra. This is essentially the same game, just with a different storyline. So like that game, if you are aged between 3 and 5 then you might enjoy it. It's a pity the collision detection is a little ropey, making some deaths unfair in my opinion.

## Baby Bug (1989)

£???.?? Linel / Dev: 1001 Software Developments

*[4/10 – Good port of a pretty dull arcade game.]*

A half decent Ladybird Bug arcade game clone. Ladybird was an obscure 181 arcade game, that had you dashing around munching all the dots and avoiding the bugs (so basically Pac Man) One thing that was unique however was the rotating green doors that when pushed would change the layout of the maze. So all in all a competent clone, but of a decidedly average and ancient arcade game, that makes this really only Public Domain worthy.

# Baby Jo in Going Home (1991)

*[5/10 – A really disappointing platform game.]*

**AA : 85%** - 'Loricel have come up with a game that is both cute in appearance while extremely addictive and highly playable.'

**AC : 70%** - 'another average platform game. Loricel have tried vey hard but it doesn't compete with the likes of Magic Pockets and Robocod.'

**GX : 3.5/5** - 'a competent platform game with an appealing cuteness factor. However this doesn't distract from the fact that there are better games on the market.'

**AF : 58%** - 'Although the appearance is very sweet, with some amusing animation, the control method and overall game feel is sadly lacking. Proof that you can't get by with cutesy graphics alone.'

**AP : 49%** - 'Endearing, full of odd comic touches, and distinctly French – but not really much of a game. For Shame.'

Back in the day, I really wanted this game, with me thinking the game looked gorgeous. Sadly whilst there a looks are there and loads of neat weird French touches. Sadly it's all let down by the controls (particularly the inflexible jump). This makes this game far too frustrating to play. Which is a real shame as if that had been sorted out, this game could have been good fun. All in all a missed opportunity.

**[3/10 – Nice graphics, but zero gameplay.]**

**CU : 75%** - 'The two outstanding features of this game are the intro sequence featuring the DeLorean car shooting off into the space time continuum and a neat rendition of the theme (which owes a lot to the original composer). Though it's adequately presented, Back to the Future II doesn't gel together as a complete game.'

**ZZ : 64%** - 'there are five sections but the first is enough to put you off. In theory it's an interesting cross between Metrocross and Paperboy, but in practice energy is lost quickly, cars appear out of nowhere and new lives begin at the start of the level...An uninspired conversion of a dazzling movie.'

**AA : 57%** - 'For such a blockbusting feature, I was quite disappointed at this feeble effort. It seems to me that although a lot of time was involved in the development of this game, it still lacks in imagination and has been wasted.'

When buying my Amiga, this was the game that made me go for the terrible Screen Gems bundle. It was all based on that stunning intro, that my local Dixons had on all their displays. When the game starts up, initially it looks impressive with cool futuristic graphics and easily recognisable sprites and backgrounds from the film. But as you begin to play it you soon find yourself frustrated, with the game being unfairly tough and scream inducing, at the beginning of level restart points. I played this game non stop Back in the day, as I was convinced the game would improve, once past level one.

When I finally managed it, I was depressed to find that level 1 was the best level. The second level is a naff overhead puzzler, that has you escape without seeing members of Jennifer's family. Kind of like the hospital mini game in Cinemaware's It Came from the Desert, only nowhere near as fun, and quite fiddly here really. Then in level three you are in the alternate 1985, where it has you stumble through an dull, basic, and incredibly hard beat-'em-up. This for me is the most annoying level. Level four has you complete a slide block puzzle...a totally weird thing to throw in and although ok to play, it doesn't fit in at all with the game. Finally in level five you find yourself back in 1955 in a level pretty much identical to first level but with a 50's theme instead. In summary, the game is bad, being for the most part unplayable and far too tough. All this is a real shame as the first and last level have some stunning art work in them and so could have been so much better.

## IT'S TIME TO GO BACK . . .

Great Scott! Returning from the year 2015, Doc Emmet Brown, has some bad news for Marty McFly . . . His future's in danger unless he can put things right.

Guide Marty through five levels in this exciting interpretation of the smash-hit film. Can you assure a safe future for Marty? Or will Biff ensure there's no future at all?

## ES IST ZEIT ZURÜCKZUKEHREN . . .

Lieber Gott! Als er aus dem Jahre 2015 zurückkehrt, hat Doc Brown schlechte Nachrichten für Marty McFly . . . Wenn er nicht das Richtige tut, ist seine Zukunft gefährdet.

Führe Marty durch fünf Level in dieser spannenden Interpretation des Smash-Hit-Films. Kannst Du Marty eine sichere Zukunft bieten? Oder wird Biff dafür sorgen, daß es überhaupt keine Zukunft gibt?

## IL EST TEMPS DE REPARTIR . . .

Mais quel Doc Emmet Brown, de retour de l'année 2015, a de mauvaises nouvelles pour Marty McFly . . . Son avenir est en danger à moins qu'il n'arrive pas à arranger les choses.

Vous guidez Marty à travers cinq niveaux, dans cette passionnante interprétation du célèbre film. Pouvez-vous prouver à Marty un avenir sauf ou laissez-vous à Biff le soin de s'occuper du contraire?

• Take the Griff and his gang on a daring heist through Hill Valley.

• Nimm Griff und sein Bande mit auf ein unglaubliches Heist durch Hill Valley.

• Vous affrontez Griff et sa bande dans une course de heurtoirs à travers Hill Valley.

• Grab! It's a heist back in 1961. Can you stay alive long enough to put things right?

• Versucht im Jahr 1961 Arracht immer noch Chase, Kessel. Da lange genug um Leben Martyn, um die Nacht zu retten!

• Time, time! C'est l'assaut de plus tard de nos, en 1961. Arrivera-t-on à sauver le temps qu'il faut pour établir l'ordre?

• It's back to 1955 to put a stop to Biff's plan. But first there's the 1956 lot to answer. And he won't admit it - you do!

• Zurück ins Jahr 1955, um Biff's Plan zu stoppen. Zuerst muß Du auch die 1956-Kasse abfragen, aber heißt Dick, dass die Zeit ist hier!

• Vous êtes de retour à 1955 pour mettre un terme aux desseins de Biff, mais d'abord, il y a ce petit problème à résoudre. Vite - il n'y a pas de temps à perdre!

[5/10 – Simple arcade game fun.  
Will keep you entertained for a  
Little while.]

**CVG : 85%** - 'BTTF3 is a nice attempt at capturing the humour and atmosphere of the movie, but none of the sub-games have the depth to keep the player hooked for very long.'

**AF : 82%** - 'the various section on its own are fun, which means that even if you do finish, you can come and play your favourite section on its own for a laugh! This makes for a fun game which has enough variety to make it fun for a while and is worth dragging out for a quick bash even when completed.'

**ZZ : 81%** - 'isn't quite a classic, but it's got lots of variety and playability.'

**AA : 78%** - 'Games that are film licenses have a reputation of being poor quality, often rushed out to make as much profit as possible. Thankfully Imageworks have resisted the temptation to scoop up piles of cash and have produced a reasonable game. Each of the four sections is reasonably well executed and relates well to the film. Graphics and sound are atmospheric, drawing heavily on the motion picture for inspiration. This game is well worth a look if you enjoy arcade style games.'

**AP : 76%** - 'I feel a bit ashamed of myself for it, but I really enjoyed this. Probably the second best movie license game ever.'

**CU : 71%** - 'BTTF3 is a huge improvement over the first two licenses. Unfortunately a good games player could probably complete this within two hours of buying it. Easy, and fun, this is a game for the kiddies

What we have here, is the good old fashioned kind of movie license game. So a group a vastly different mini games hobbled together, that roughly tell the story of the film. As movie licenses go, this is one of the better examples, with each of the sub games being enjoyable enough (even if not particularly original). The first level has you play the Doc as you ride a horse to rescue Clara from falling off the ravine. This is my favourite game and has you simply jump, duck and shoot, to avoid all the falling luggage and wildlife. Then you have an overhead shooter, reminiscent of the arcade game Gunsmoke. The third level has you play a shooting range and finally you have a pie throwing shootout. All in all simple fun, for a couple of hours.

# BACK TO THE FUTURE III PART III

**1885 WAS NEVER LIKE THIS!** The time-travelling adventures of Marty McFly and Doc Brown step up the pace for this, the final and most exciting instalment in the Back To The Future trilogy!

Stranded in Hill Valley back in the Wild West days of 1885, you play both Marty AND Doc in a frantic race against time to return to 1985 – not easy with Buford “Mad Dog” Tannen and his gang of gunslingers standing in your way!

Re-live the excitement of the movie with four thrill packed action sequences taken directly from the film, complete with digitised scenes from the movie and the original music score!

**1885 N'A JAMAIS ETE AINSI!** Les aventures de Marty McFly et Doc Brown, les deux voyageurs à travers le temps, atteignent leur apogée dans cette ultime et passionnante partie de la trilogie du Retour Vers le Futur!

Vous êtes coincé à Hill Valley, dans le Wild West de 1885: vous jouez, à la fois, le rôle de Marty ET de Doc et vous êtes engagé dans une folle course contre la montre pour retourner à 1985, ce qui n'est pas facile avec Buford “Mad Dog” Tannen et sa bande armée qui vous barrent la route!

Revivez l'émotion originale avec ces quatre séquences d'action palpitante, prises directement du film et comprenant des scènes digitalisées et la musique originale!

**1885 WAR NIEMALS SO!** Die Abenteuer der beiden Zeitreisenden, Marty McFly und Doc Brown, erreichen ihren Höhepunkt in diesem letzten und spannendsten Teil der Trilogie “Zurück in die Zukunft”!

Deinem Schicksal überlassen, befindest Du Dich in Hill Valley im Wilden Westen des Jahres 1885. In den Rollen von Marty UND Doc versuchst Du, in einem hektischen Kampf gegen die Uhr, wieder nach 1985 zurückzugelangen. Dies ist keineswegs einfach, denn überall wird Dir Dein Weg von Buford “Mad Dog” Tannen und seiner Bande Pistolenhelden blockiert!

In vier spannenden Action-Sequenzen, die dem Film direkt entnommen wurden, kannst Du nun den Nervenkitzel des Movieoriginals noch einmal miterleben – komplett mit digitalisierten Szenen aus dem Film und Originalmusik!

[3/10 – Offers a poor game of Backgammon.]

The game is Backgammon, which is a board you either like or you don't. Sadly I don't, having said that on playing it (even knowing the rules) I found this a poor version. Try Backgammon Royal instead, if you want to find a decent Backgammon game.

## Backgammon Royal (1995)

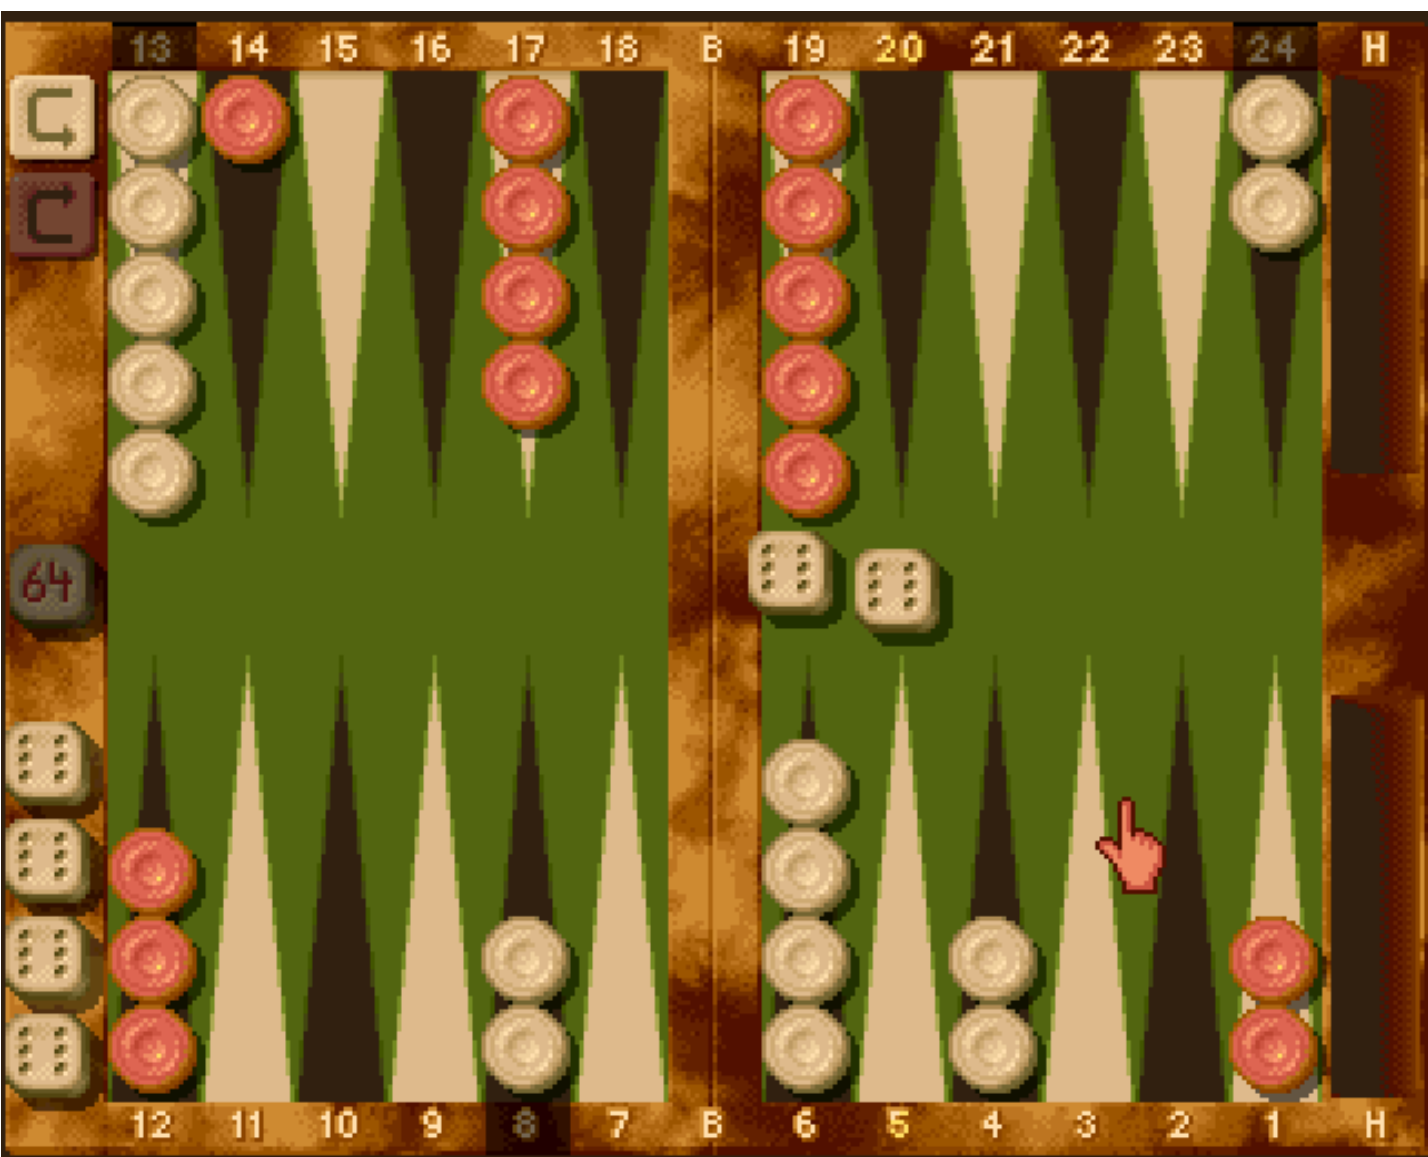

£???.?? Wolf Software & Design

*[7/10 – Nice version of the game.]*

Backgammon is the oldest 2 player board game, over 3000 years old and invented in Mesopotamia. This is an enjoyable version, that does the job, if offering little in the way of options. Backgammon is a game well worth learning (apparently) and this is a great way to play it.

Incidentally I have given a link below of a great introduction (done by a kid) on how to play the game.

<http://www.youtube.com/watch?v=LkS09YJECxw>

## Backgammon Royale (1991)

£24.99 CP Software / Dev:

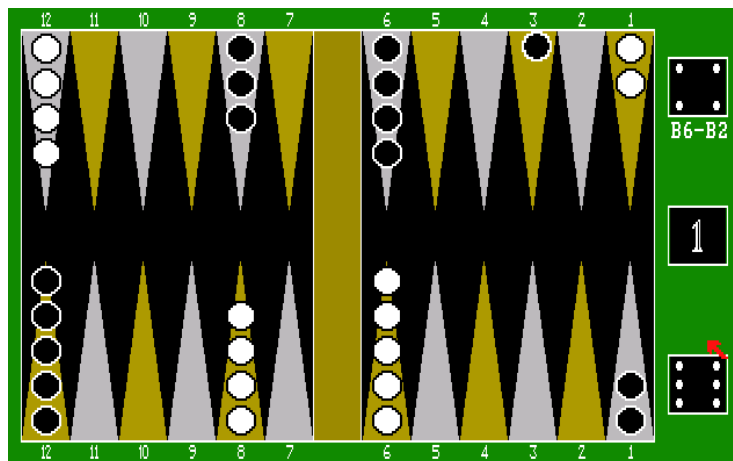

Oxford Softworks

*[6/10 – Basic to look at, but plays a good game.]*

**AF : 78%** - 'Backgammon Royale, like Go, attempts to bring a board-based classic to the small screen. Featuring neat, if unimpressive opponent screens where you can size up the next player, and a strong line-up of strategies. It has a host of other features which include a history option, where you can retrace a game from the very first move. It is best played between two humans, but the computer controlled opponents are a good way of brushing up your game, or learning new tactics.'

**AA : 75%** - 'Well there's not a lot you can say – it's Backgammon. The graphics are quite poor, but even if they were amazing it wouldn't make the game any better. But to people who like this type of game that won't matter. If you're the sort of person who likes a relaxing board game, then this is the game for you and that's why it has been given a Recommended.'

**AP : 45%** - 'All the bits are there, but it seems a little pointless. And the manual is terrible.'

Another good version of the game but extremely basic to look at. I still prefer Backgammon Royal (see previous game).

## Backlash (1987)

£19.95 Novagen

*[3/10 – Technically good but rather pointless to play.]*

**CU : 8 /10** - 'Novagen's Backlash is how Paul Woakes has been spending his time since writing the acclaimed Mercenary. And it hasn't been wasted. If you like your shoot 'em ups served neat and simple with no frills, then put Backlash on your list of essential purchases.'

---

Simple shooter, by coding genius Paul Woakes (he of Mercenary fame), technically speaking the game is impressive, with it moving frantic and fast. But sadly without any structure to the game and no feeling of progress it is a game you will quickly tire of. Check out Amiga Encounter instead as that is a similar game to this he did in 1991 and plays a much more enjoyable game.

**Z: 72%** - ‘Movement ranges from slow to sluggish and the sound is disappointingly thin for an Amiga version... [sic]...Basically this is Space Harrier with lead boots on.’

**AF: 71%** - ‘Simple blasting fare that’s fun for a while but soon becomes tedious. It is addictive at first, however, and although not as much fun as something like Operation Thunderbolt or Space Harrier, it will nonetheless keep you entertained and playing for a reasonable while.’

**ACE: 620 /1000** - ‘lacks an overriding objective or series of mini-objectives to sustain interest. Pretty and all as it is you soon tire of the simple pleasure of wasting things.’

**AP: 44%** - [R] 'Fairly dull shoot-'em-up with a few funny touches but nothing in the way of involving gameplay. And it's really nothing like Space Harrier either.'

---

A rare misstep by Steve Bak and with graphics by Chris Sorrell (both did the James Pond games). This looks pretty enough, but by having you stuck on the ground, as opposed to flying around, really saps the enjoyment from this game. The characters are all sluggish as well, so you don't get that adrenalin kick so important in shooters of this type.

## Bad Dudes Vs Dragon Ninjas (1988)

£24.95 Imagine

*[3/10 – Missing jump control makes the game next to impossible to play]*

**CU: 73%** - 'with nice big characters, but the animation, in particular, is ropy; you can kick into thin air and still floor a nearby Ninja; during face to face combat you appear to dematerialise. Body contact ought to mean body contact, shouldn't it? That said it's a competent beat 'em up with more than its fair share of action, detail and interesting settings. A fair enough game which could do with just a little more pep.'

**AP: 4%** - [R]

'Respectable conversion of a duff game ruined by a quite unbelievable programmer cock-up. Did anyone ever play-test this? And why didn't any reviewers notice? What's the world coming to? Literally unplayable past level one.'

Playing through level one of this game, I was mightily impressed. It all ran smoothly, looked fantastic and as someone who had only played the 8-bit versions of this game back in the day I was ready to give top marks. Then you got on to level two and three and a glaring omission becomes apparent in the game, you see whilst the developers have included a jump up function there is no diagonal jump available (the manual says jump up and then left or right, but that doesn't work). This results in the game being next to impossible to play especially on the later levels. Its so sad that such a fault has slipped through the net on this, as despite that one vital thing it is a good conversion.

Pour progresser à la fin de chaque niveau, vous devez vaincre le Maître Ninja - voici quelques exemples de ces superhumains infames: Un Obèse Souffleur de feu, un Géant portant une Armure, et le Géant Ninja, vert et horrible - qui a l'habitude déconcertante de se multiplier en armée!

**£???.?? Vesaliasoft**

*[2/10 – nice music, but basically a flawed puzzle game.]*

I like a nice puzzle game, so when I first booted this up, I was looking forward to one I hadn't heard of before. Sadly the game is far too easy and so fundamentally flawed as a puzzler. The game reminded me of that paper game boxes, that I used to play in Primary school. Basically you would draw a line on graph paper and so would your opponent and the purpose was to get across to the other side. This version makes things a little more interesting by you only having so many shapes to choose from, meaning you must choose your shapes wisely, to allow you across, whilst blocking your opponent. The trouble is this is all far too easy to block the opponent and so win the game. Sadly a puzzler that fails simply to work.

## Badlands (1990)

£19.99 Domark /Dev: Teque Software

*[6/10 – Good port of the arcade game, more fun as a two player game.]*

**CVG : 92%** - 'Badlands is fun all the way and with two players participating, it's a feast of explosive thrills and high speed motorway malarkey. Recommended without hesitation.'

**ACE: 780/1000** - 'This is just a straight rehash of Atari's earlier Super Sprint with guns and seriously lacks the bounce 'n' bash fun aspect of Ironman. While it is well programmed and fun for a while (especially with a friend to shoot at) there is nothing here to really grab your attention unless you're a committed fan of the genre.'

**AA: 77%** - 'Badlands is a little too similar to the original Supersprint, and adding futuristic backdrops wasn't enough to advance the genre another step. However as in its ageing predecessor, the gameplay is every bit as addictive and, although it isn't as good to look at as Off-Road, it more than matches in terms of gameplay.'

**YA: 75%** - 'Badlands is a let down. Oh, me and my mates will dig it out every now and then for a ten minute game, but even with graphics ported straight from the coin-op, and decent sound effects, there seems to be something missing in the gameplay department

**ZZ: 62%** - 'a fun two-player game, but it's really no advance over the ancient Super Sprint. The only new aspects are the ability to shoot and the additional hazards ..[sic]..You can't really blame the programmers (Teque London) – they've done a good job converting a rather crusty coin-op.'

**AF: 46%** - 'a fun little arcade game, but, unfortunately, has a rather short half-life. There just isn't enough variety.'

I am a huge fan of developers Teque (they became Krysalis Software by the way), and this is a top port of the arcade game. Sadly though this means it shares all the flaws of the original game. The main issue is lack of variety and slightly twitchy controls, but still, despite this it still fun for a little while.

£19.99 Arc Development

[4/10 – Nice graphics let down by a bad game.]

AA: 67% - 'The Strip-A-Motion works well, I commend Arc for that. If you can keep at this game, you may be the next gun slinger of the west!'

Like many Arc titles, I am always left with that frustration that their games could have been so easily so much better, if they just put some effort into the gameplay basics. It's a great concept, set in the Wild West and having you as a bounty hunter on a series of missions as you wander around the town. The graphics and sound are endearing throughout and really adds to the charm of the game. So with so much right and fun it is a shame that the controls to get around is so poor.

# Balance of Power (1987)

*[9/10 – A Stunningly involved and accurate global politics strategy game.]*

**AC: 88%** - 'In the final multipolar level Balance of Power gets closest to reality with the computer calculating the reactions and decisions of all 80 countries. In fact it is quite uncanny. The results at this level were accurate enough to write a newspaper article which wouldn't have looked out of place at the time. If this sort of simulation can get so close to actual events, perhaps we should send Bush and Gorby an Amiga each and let them get on with thermonuclear war in the comfort of their own palaces.'

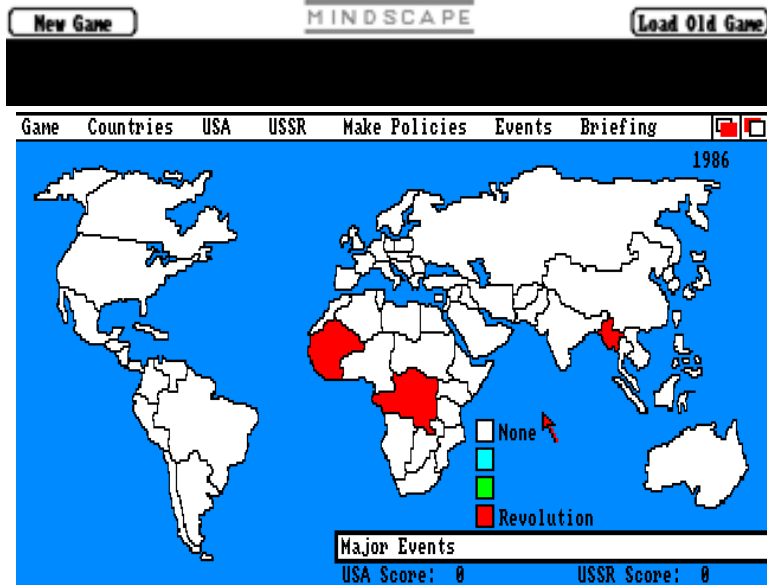

**APoV: 80%** - 'Although the scenario is anchored in the world of politics of the 1980's, Balance of Power's gameplay should still satisfy megalomaniacs who are better causing global-thermonuclear-war on their Amiga than anywhere else.'

Now they don't make games like this anymore, here we have an incredibly intelligent and realistic game covering world politics and putting you in control of either the USA or USSR superpowers. Starting in the 80's you must make political decisions such as offering foreign aid through to sending in troops, whilst avoiding a full blow world war that would undoubtedly result in nuclear war. The game is very slow to play, but it is uncanny in how everything responds so accurately when you play it. # BALANCE OF POWER

*Geopolitics in the nuclear age*

*by Chris Crawford*

It has been more than forty years since the first nuclear bomb exploded. In that time, the shape of the world has changed dramatically. The power to destroy civilization rests in the hands of the superpowers and now, as either the President of the U.S. or as the General Secretary of the U.S.S.R., you have total responsibility for your nation's course. To succeed, you must enhance your country's prestige without infringing too much on your adversary's interests. If you play the isolationist, you will find yourself alone in a world dominated by your opponent. If you are too aggressive, you could unleash the war that annihilates humankind—and both sides lose.

Balance of Power uses a huge statistical database, a meticulously detailed display of the world, and advanced artificial intelligence techniques to put you in command of one of the world's superpowers. You have vast amounts of information available as you press your country's interest and resist the pressure of the other side. Noted game designer Chris Crawford has created a model of the world which will entertain, educate, challenge, and perhaps frighten you in ways no computer game has ever done before.

## Balance of Power – 1990 Edition (1990)

£24.99 Mindscape

*[9/10 – A subtle improvement over the original.]*

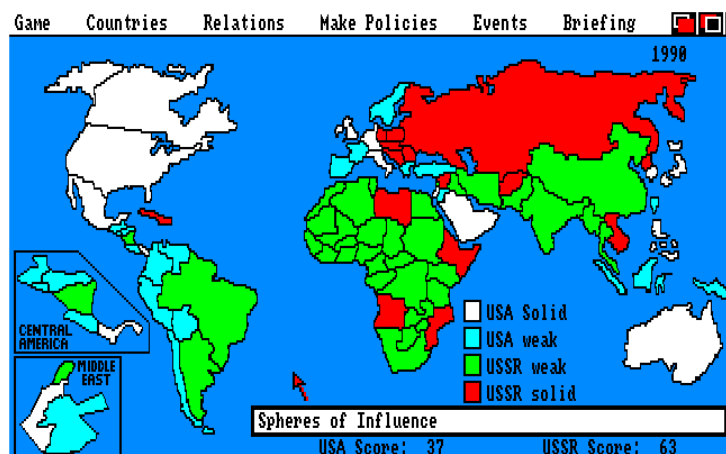

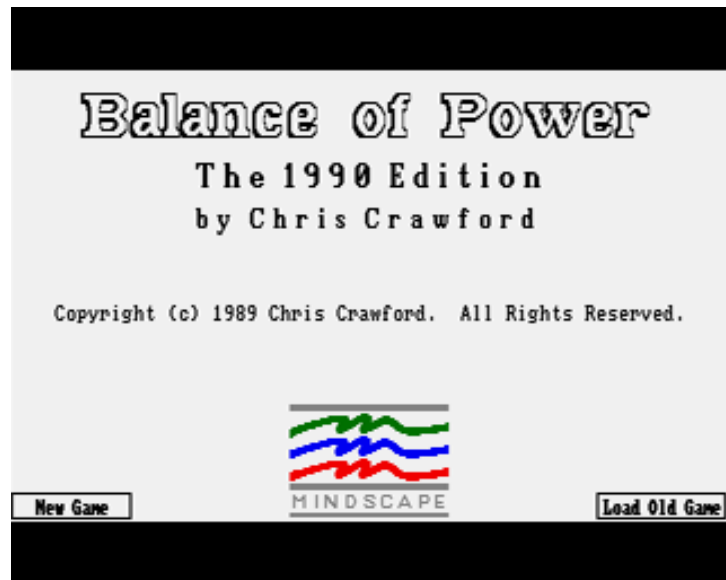

**ACE: 960/1000** - 'To attempt to summarise all but the most basic mechanics of this simulation cannot be covered in any great detail here; it takes the 91-page instruction manual to do them justice. Suffice to say this is a strategist's dream. The sheer size and scope of the simulation mean that it is possible to become totally immersed in the proceedings; single turns can take hours to digest and implement.'

**CU: 93%** - 'If you've ever wanted to make the Super Power decisions, like invading Pakistan to help Afghanistan organising a trade embargo with Britain (if you're American), and answer all those little 'if' questions that have bugged you, then this is for you.'

**ZZ: 90%** - 'A complex and involving game which will demand a lot of time to fully master.'

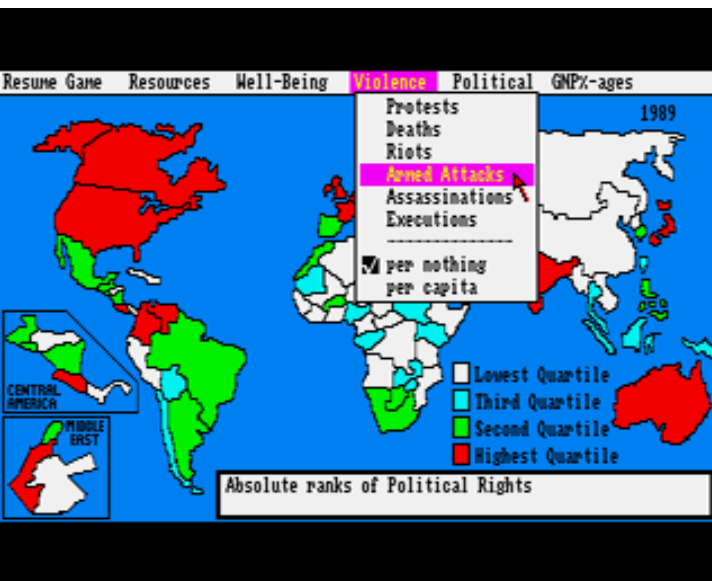

**GM: 89%** - 'If you enjoy strategy there's nothing else which comes close. This is the ultimate strategy game.'

**O: 84%** - 'hard to fault in terms of design, presentation and execution. Even the 98 page manual makes fascinating reading. An outstanding piece of strategy gaming – especially in two-player mode (even without a modem option). Worthwhile even for those who own the original.'

A subtle update of the original, with more updates of events up to 1989, an inclusion of a crisis advisory board, an expansion the countries included in events increased from 62 to 80. Finally the MultiPolar skill level, allowing the non-superpower countries the ability to play their own war games.

I only played this classic game when it was given free with Amiga Format in June 1991 (issue 23). I absolutely adored the game, really being blown away by how real it all seemed. It was best played as a two player game and I have many happy memories of me and my mate passing the disk to each other after school to do our next move, as we both went hurtling to total destruction. Chris Crawford (pictured) is a brilliant visionary, who has spent his 20 plus years in the industry pushing human concerns in games and having interpersonal relationships in games. Always pushing the boundaries, it is sad that he has not made more games in his career. I would personally love to see a Kickstarter project by Chris, particularly to do an update version of this game, as in todays world I think it would make this game an even more fascinating experience.

I can only hope that Chris will come back into the games industry and be given more of a chance in producing some of his interesting theories on game design into practice, as his strong views and criticisms of the industry are absolutely accurate, in my mind. I truly feel Chris is one of the few people in the gaming industry who can truly expand what gaming is capable of and finally help the game industry actually grow up (anything that would offer anything beyond the constant spewing FPS, driving and sport games, would have my vote).

\*\*\* ADDENDUM Chris did do a Kickstarter campaign in 2012 for Balance of the Planet which was a serious environmental simulator, which sadly failed to make anywhere near the 150,000 asking price. Chris puts this down to him marketing it incorrectly. For a fascinating insight into Chris Crawfords mind then it is well worth watching this interview with him...

# BALANCE OF POWER

THE 1990 EDITION

by Chris Crawford

Macintosh™ version shown

It has been several years since the release of the original **Balance of Power**. In that time the political voices in the world have changed dramatically.

Now, in response to popular demand, master game designer Chris Crawford gives us **Balance of Power: The 1990 Edition**—a new and enhanced game of global politics and power struggles. Featuring a new multipolar level, this game allows 80 countries to ship weapons and troops and fight wars; your challenge as a superpower is to monitor their policies and use your influence—at times to the point of diplomatic crisis—to protect your interests.

## New Features

- Covers eight years from 1989 to 1997
- Simulates real world political struggles in the nuclear age by allowing interaction among 80 countries (formerly 62)
- Allows 4 levels of play, from Beginner to the complex Multipolar level
- Utilizes a vast and **updated** database and faster processing capabilities
- Includes a 4-person on-screen "crisis advisory" group for counsel in crises
- Enhanced with non-nuclear war feature for smaller countries
- Includes both 1- and 2-player games

**Balance of Power** has been recognized as the definitive computer political strategy game:

"the most sophisticated strategic simulation in America, other than Pentagon war games"—**New York Times Magazine**  
Dec. 29, 1985

"...everything a good game should be—challenging, cerebral and thought provoking"—**Personal Computing**

1986 Game of the Year Award—**Family & Home Office Computing**

"a brilliant simulation of political, military and financial themes (that) demonstrates the hazards of nuclear brinkmanship..."

**The Ball Game (1991)**  
**£24.99 Electronic Zoo /**  
**Dev : Esprit Software Program**  
**[4/10 – Flawed board game]**

**O: 60%** - 'The aim of The Ball Game is to dominate a Chequers-style board game with counters of your colour. It's played in turns, with each of the four players laying one of their coloured counters at a time. Much like Othello, under special circumstances whole blocks of the opposition's counters can be changed, taking points from them and rewarding you. Straightforward graphics and simple rules, mean this is a game that is won with the mind, not joystick speed. Victory is tough, even against human opposition, but it lacks the classic edge of Othello and the thrill factor of more traditional computer fare. An interesting diversion, The Ball Game offers nothing really new, just a dependable board-game challenge.'

**AA: 60%** - 'quite different from any other puzzle game on the Amiga, the four player mode is greatly appreciated, but the unbelievably slow and repetitive gameplay lets it down'

**AP: 56%** - 'Good fun with lots of pals, but struggles to hold the interest when played against the computer. An interesting game design, slightly ineptly executed and not really worth the daft asking price.'

**GX: 2 / 5** - 'You may enjoy playing The Ball Game initially, but I can see the instant appeal soon wearing off due to the games repetitive nature.'

Done by the same development house who did the brilliant B.A.T. games this is an interesting but ultimately flawed Game, with its general premise being dull. It is kind of like Othello only nowhere near as good. Maybe I am missing the games subtleties, but I think not, ultimately a puzzle game best left forgotten.

## Ball Raider (1987)

£19.95 Diamond Software /

Dev : Robotek

*[3/10 – Gorgeous artwork, let down by difficult, joystick only controls.]*

**AUI: 7/10** - 'by no means bad and it has it's fans at A.U.I. At £19.95 it might be considered pricey.'

**CU: 5/10** - 'doesn't have anything like the number of extra features which made Impact and Arkanoid such interesting variants on a very old game format.'

**ACE: 357 / 1000** - 'There are some tricky screens to clear and your job's not made any easier by having to use a joystick to control your bat. A good looker that unfortunately has no gameplay.'

**CVG: 29 / 40** - 'Can't really say much more it's just Breakout.'

My first question with this game is why on an Amiga would you do a bat 'n' ball game without using the mouse as the controller? It is a real shame as it is the controls which is the main thing wrong with this game, that and speed and size of the ball making it too difficult. Artwork is sublime, but great looks do not a great game make.

## Ball Raider 2 (1988)

£19.95 US Action / Dev : The Incredible Trio

*[5/10 – Enjoyable if uninspired but ‘n’ ball game. Have given an extra point for the level designer though.]*

Totally different to the first game, sadly gone are the gorgeous Sci-Fi artwork of the first game and in it's place are cookie cut Arkanoid graphics. At least this time the controls are via the mouse and it now plays a good game (although fiendish brick layout). Level designer raises this slightly above the other clones. All in all some fun here for those looking for a challenge, but for others stick to Arkanoid instead.

## Ballistix (1989)

£19.95 Psyclipse /

Dev : Reflections

*[4/10 – Doesn't really work as a game.]*

**GM: 84%** - 'A high-res picture unfolds impressively to introduce the game, which has quite disappointing graphics. The bas-relief pitch tiles (which vary in colour from pitch to pitch) are adequate, and have some interesting character graphics, but the arena graphics which surround it are almost scruffy. A pleasant array of samples back the fast, smooth scrolling play nicely.'

**YA: 80%** - 'a stunning game – lots of excitement, great graphics, unusual gameplay and so on. What is even more worthy of note is that this is Martin Edmondson's first Amiga game, following two well received BBC games. The same team are now working on a multi-level sideways scrolling blaster. I can't wait.'

**ZZ: 77%** - 'When you see this for the very first time you think 'ah, Speedball'. Actually, it's nothing like it. It's practically the same as that old Crossfire boardgame, in fact. And while it's enjoyable for a while, play (just bouncing balls off a puck, into a goal) begins to get samey after a bit. It's nicely presented – with a big list of options- and sports some pretty graphics and clever sound effects'

**CU: 76%** - 'up to the usual excellent standards of Psygnosis's releases, but being based on a game that's about fifteen years old, it's hardly likely to be original. We're waiting for the computer version of Mousetrap next.'

**ACE: 686/1000** - 'Graphics are great, as are sound effects, but it's not got the compulsion or gameplay to rate as anything more than reasonable'

**O: 64%** - 'playable enough in the short term but lacks that vital addictive quality which brings you back for more.'

Whatever you may say about developer Reflections games having lack of gameplay, the same can't be said for the graphics. This was their first Amiga games after Martin Edmondson had had some success with Strykers Run 1 and 2 on the BBC. This game is very much like the old board game Crossfire, except here you can actually move the gun around the board. The trouble is the controls to aim your gun aren't that great and soon you lose interest.. Much like the board game itself.. At least with the board game you could make little ramps and see how far you could shoot the ball bearings. Overall as a 2 player game you may get some short term enjoyment (all be it as little more frantic luck than skill) otherwise you will soon be bored after 10 minutes of play.

## BALLISTIX

It's a whole new ball game!

Sick of silly old soccer? Tired of pathetic pinball? Then you need a dose of *Ballistix* - the fastest, wackiest, toughest ball game yet to appear on a computer. *Ballistix* just explodes with excitement, puzzles and an amazing 130 different screens of frenetic action on the PC, Amiga and Atari ST (the C64 version has 64 different screens).

The aim of the game is simple: score more goals than your opponent to win the match. Doing it is a different matter as **splitters** fill the screen with dozens of balls, **tunnels** hide them from view, **bumpers** bounce balls all over the show, fiendish **red arrows** speed them up to almost impossible velocity, **magnets** pull them away from your control, and much, much more.

*Ballistix* is incredibly flexible, too. You can play against the computer or another player, set the speed if you can't stand the pace, rack up bonuses that will get you extra goals and then, at the end of an exhausting game, set your name in pride of place on the high-score table.

*Ballistix* is definitely not a game for wimps. It's tough, fast, challenging and incredibly competitive - in fact, it's just the kind of game you like.

## Balls (1994)

£FREE Public Domain

[7/10 – fun block pushing puzzler.]

An enjoyable puzzle game which has you walk around and match up the same colour balls to make them disappear, some of the later levels can get quite taxing. The only slight criticism I personally have, is that I get frustrated with puzzle games with timers, and the time is far too tight for later levels.

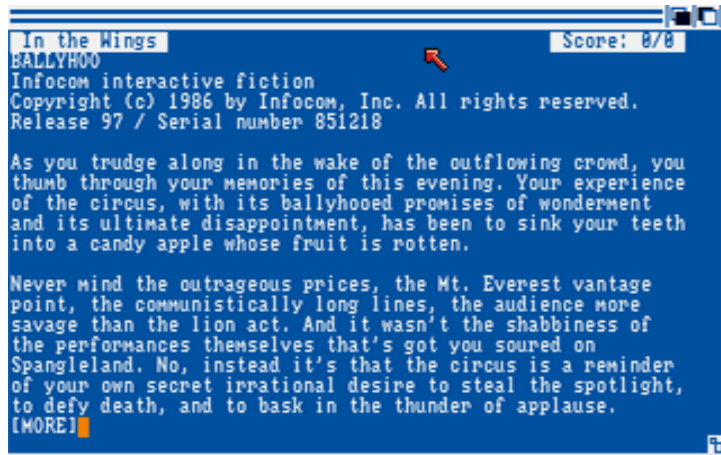

## Ballyhoo (1986)

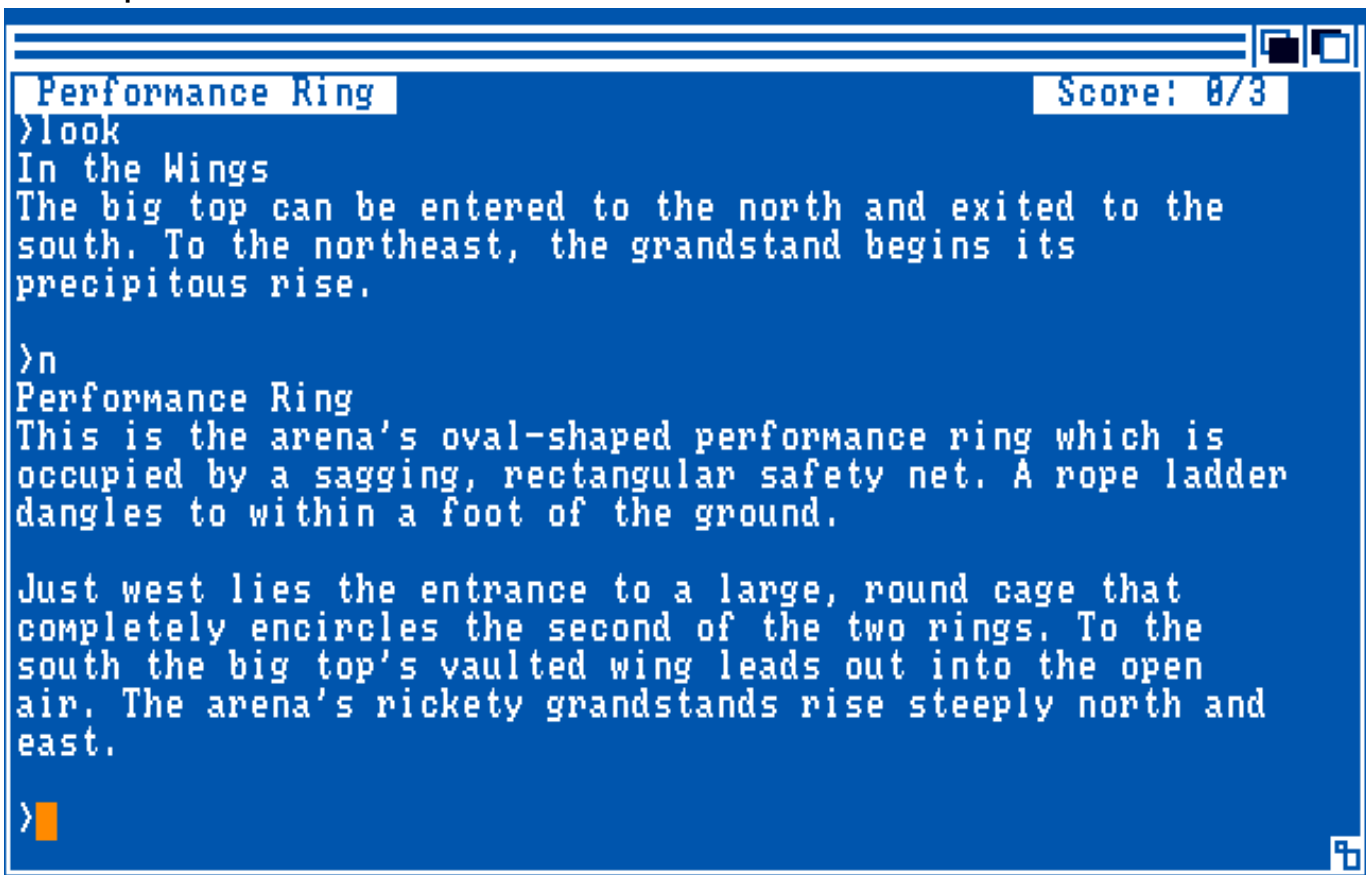

£29.99 Infocom

*[9/10 – Deep, involving text adventure, one of Infocoms best.]*

**AF: 90%** - [R] 'Hanging around after the circus has finished it's show, you hope to catch a glimpse of some behind-the-scenes performances. Instead you are drawn into a dangerous situation when the circus owner's daughter is kidnapped, and you try to find her. One of my favourites, Ballyhoo has a quite excellent plot which is highly realistic and charged with atmosphere.'

< Free balloon that came with the game.

A good introduction into the world of Interactive Fiction. Done by Jeff 'O Neill who sadly only did this and the game Nord & Bert. It is an engaging murder mystery and whilst not Infocoms best work, it is exceedingly enjoyable never-the-less.

Ladies and gentlemen! Children of all ages! Now appearing in every BALLYHOO package: your BALLYHOO disk; a program for The Traveling Circus That Time Forgot, Inc.; a Dr. Nostrum's Herbified Extract trade card; a colorful balloon; and your ticket to the circus!

Spangleland! Sawdust and glitter, buffoons and cotton candy! It's a place where your wildest dreams can come true! At least, that's what you think . . . until you get behind the scenes at the big top. Then you learn how easily sweet dreams can turn into nightmares.

Beyond the spangles lies a seedy world of deception and crime. Exploring the tattered corners of the circus lot, you overhear a conversation about the owner's daughter. It seems she's been kidnapped, and the hired gumshoe couldn't find the nose on his face. Good samaritan that you are, you start poking around on your own.

But watch your step. As the night progresses, you realize you're in as much danger as the little girl. For the kidnapper is lurking right there on the lot, trying to set you up for a permanent slot in the freak show.

# Bandit Kings of Ancient China (1991)

£24.99 KOEI / Infogrames

[7/10 – *Impressive turn based strategy game that is very involving.*]

**ZZ: 90%** - ‘The attention to detail is a wonder to behold, the subject matter is refreshingly original, the computer opponent very good indeed and the graphics, whilst not state-of-the-art, are pleasingly detailed. Koei continue their high standards with the release of Bandit Kings – very addictive.’

**AA: 85%** - ‘Bandit King is the second in the new series of historical strategy games from Infogrames. It uses a similar control system to the initial release, Genghis Khan, and any comments made about that game also hold true to Bandit Kings. The depth contained in the game is amazing and despite the fact the manual is over 100 pages thick it is possible to start play straightaway as the control system is very accessible.

Bandit Kings is slightly inferior to the previous release but is still an outstanding game. Highly recommended for any strategy enthusiast.’

Koei, now famous for its Dynasty Warrior series, used to be synonymous with turn based strategy games, that not only covered warfare but all facets of ruling a people. This is a highly detailed and engaging game, all be it one that will take you a while to learn. The period of 11<sup>th</sup> Century feudal China wont be everyone's tastes but as detailed turn based strategy games, that mixes politics, ruling your people, diplomacy and warfare, this can't be beaten.

The screenshot displays the game's interface. On the left, a character profile for Huan Yan Shun is shown, including a portrait, name, date (1103 A.D.), season (Winter), and titles (Ruler and Owner). Below this, a character in exile, Yang Zhi, is listed with a portrait and a table of statistics: Body (94), Bandits (0), Men (0), and Popularity (0). To the right is a map of China divided into numbered provinces, with some provinces highlighted in red and others in green. At the bottom, a dialogue box shows Yang Zhi saying "It's best if I go." and a prompt "(Flee) Where will you go?" with a red arrow cursor pointing to a province on the map.

# Bandit Mania (1994)

£6.99 Mental Image

Software Design

*[4/10 – Pretty, but dull Fruit machine simulator.]*

**AP: 61%** - 'Take this simple test: play the coverdisk, and if you want more when it cuts out, look up Mental Image's address on the coverdisk pages and send off for the full game. I did, and I wont.'

Three fruit machines are on offer, Noughts and Crosses is the worst of the three being very basic, then you have Technology, that has a game of Pontoon. Finally there is World Tour, which at least has additional features. Sadly they all are pretty dull to play.

**Bangboo (1995)**

£???.??

Millenium

**[4/10 – Simple  
platform  
puzzler that  
fails to excite.]**

Simple game which has you bounce a ball around the level clearing all the same colour blocks. Pots of paint allow your little bouncy chum to change to that colour and so allow other blocks of the same colour also be destroyed. The puzzle element comes in as you ensure you can reach all the blocks and clear them in the right order. Would have made a nice PD game.

## Bangkok Knights (1989)

£24.99 Activision /

Dev: System 3

*[1/10 – Honestly the worst beat 'em up I have played.]*

**AA: 48%** - 'a very poor conversion from the original C64 version. Although the sprites are of better quality, they are poorly animated, and the gameplay relies on repeating the same move until your opponent falls down.'

Asking £25 for this tripe is the only amazing thing with this piece of turd. Simply a terrible game with no involvement or subtlety of moves, beyond pummeling the fire button. The fact that System 3 genuinely thought they could charge

# Bank Buster (1988)

£???.?? Methodic Solutions

[4/10 – Really nice idea for a bat 'n ball variant, but missing the gameplay.]

This is a great idea for a game, take Breakout, but allow your bat to move in all directions and then have you use the ball to Tunnel you way to all those riches, its bursting with ideas such as having to grab keys, triggering dynamite to open doors and avoiding triggering alarms. Sadly its all let down by terrible collision detection making the game more annoying than fun. So easily good have been so much better.

## Banshee (1994)

£25.99 Core Design

*[9/10 – Best 1942 clone of all time, a great shooter.]*

**CU: 91%** - 'An incredible shoot 'em up, one that will a classic some day.'

**AF: 90%** - 'This is a real shoot-em-ups' shoot-em-up. Banshee tells it like it is: you kill things Full stop. Just boot up and shoot up. What more can you ask for?'

**AP: 89%** - 'Well, it's certainly no mental challenge, but frankly that's half the fun. Banshee's just a good, honest, rip-roaring, barnstorming powerhouse of a blast-'em-up, which is all it ever tries to be. Take out your brain and put to one side. Tweak your reaction glands to maximum response, and just get shooting.'

**AC: 89%** - 'Well I do like this game and the weirdest bit is , I've never been a fan of shoot-'em-ups! They usually bore me to bits, but Banshee has that elusive quality that drags you in. Each level reveals new challenges which are genuinely demanding, and the learning curve is just right. You get plenty of power ups at the start and then things slowly but surely start to get more and more frenetic, until you are literally gasping for breath. Get another player involved for even more fun, as the game gives you two power ups each time and you can only collect the ones that match your planes colour. This means that both players build up their ships at the same rate and over the top Armageddon scenarios are always around the corner. There are some bad points, it has to be said. The sheer volume of enemies can be literally overwhelming at times, and single players are going to have an almighty struggle on their hands to finish it. It is also highly aggravating to lose a life and have your hard earned power ups swiped from you, often placing you up the creek minus paddle situation. Niggles aside, this is an intense and extremely satisfying game that should tempt any games fan with an ounce of adrenalin in their veins. The Harvey Keitel of shoot-'em-ups.'

**O: 89%** - 'The Amiga was at the back of the queue when the great Gaming God handed out mindless shoot-'em-ups. Apart from the odd notable exceptions, Xenon 2 and SWIV, Amiga gamers haven't really had a chance to relive the old days when it didn't seem out of place to break a few joysticks in the name of a good blast. Core Design, not always the re-writer of history books but usually the purveyor of quality games, has come up with a blaster to test everybody's fire-button finger with Banshee. The game's a great roller-coaster ride to hell, and it takes the concentration to keep the cool-hand and clear head even for the most hardened game player.'

**AA: 86%** - 'As far as out and out shoot 'em-ups go you could do a lot worse than Banshee. Superbly detailed and atmospheric graphics help to create a scene which duplicates the storyline perfectly, and the smooth vertical and horizontal scrolling ensures the action never lets up for a second. It may be little more than a souped-up version of 1942, but that doesn't stop it being a damn fine game.'

Banshee is in my mind the greatest shooter on the Amiga, don't get me wrong I love Xenon 2 and SWIV and for when those games came out I have probably played them more. But looking subjectively I believe Banshee is the winner. The game runs beautifully and has some brilliant end of level bosses in it. But for me it's the humour throughout, from the little soldier guys, to crossing polar bears, that make the game so charming. In fact more than once it brought to mind the Metal Slug games, such is the humorous touches. There are things that do annoy slightly in the game however, the levels run on far too long in my opinion and the graphics although detailed could do with throwing a few other colours than a variant of brown. Also the attack waves are sometimes unavoidable and missing the get out path always there in a Cave written shooter for example. But still this a brilliant game that is a bona fide gaming classic and should be played by all Shoot-'em-up lovers.

Banshee was developed by a trio of immensely talented individuals, it was their first published game as well. There was Søren Hannibal on coding (pic. top right), Jacob Andersen (pic. middle right) on graphics and the immensely talented musician and Core regular Martin Iveson (pic. bottom right), who has done, well pretty much every game Core did, highlights for me on the Amiga is his Chuck Rock 2, Bubba 'n Stix, Heimdall 1+2 and Jaguar XJ220, Of course one must mention his seminal work on most of the Tomb Raider games. After Core Design they would leave and create short lived developer Lemon and create the enjoyable game AMOK for the Sega Saturn. It was a good game but sadly the Saturn struggled and so they would part ways. Søren would join Shiny Entertainment and work on the Enter the Matrix game and Jacob and Martin would help set up Retro-Moto. with Jacob staying and being instrumental in the hugely successful Hit Man series.

## Bar Games (1990)

£24.99 Accolade

*[6/10 – A fun set of mini games.]*

On looking at the game box, you probably already skipping on to the next game, but don't as this game is simple and great fun. If ever there was a game crying out for a remake on the iPhone it would be this. The game is basically bar related y mini games all thrown together to an enjoyable whole. The first game Liar's dice, a complex bluffing game where you must bid on how many of the same number on the dice is made up of your and your hidden opponents hand. It doesn't really work here too well, as despite her thought bubbles its not easy to see if she is bluffing or not. Wet and Wild is my favourite game and has you pouring buckets of water of the lovely walking beauties to get their T-shirts wet. It's a fun game and great for a good laugh.

Last order has you pour pints and then judge the power you slide the beer to the various patrons. This is also loads of fun and one that can be mastered. Air Hockey is good, but let down by only being keyboard controlled so a little sluggish. Finally Pick-up Artist has you try to chose the right lie to say to pull. It's an enjoyable diversion but too random really. All in all fun little diversion if not one to hold your attention for too long.

"WANNA GET LUCKY?" Cruise into the hottest bar in town. • Here, men are men and the women are glad of it. Pick-up lines slice through the charged air faster than a beer sliding across a counter-top. And games of skill and chance are enjoyed while the big-screen blares out the cable sports network. • *Bar Games™* takes you there...sits you right down on your favorite stool. Partake in 5 classic saloon games while sharing a cold brew and hot conversation. • Relax. It's happy hour. Cheers.

### Liar's Dice

Your opponent is a beautiful barmaid. Lay down your bet, then shake, rattle and roll. Don't be fooled by her "girl-next-door" looks...and don't let her small talk persuade you. "Three 2's," she's shrewd and knows the game.

### Pick-up Artist

Their mothers warned them about guys like you. Try and charm 3 of the most tantalizing women in the bar. If you're lucky, they may chat...even go out on a date. If you're unlucky, the only thing you'll pick-up is the tab.

## 5 great Bar Games!

Designed by Gene Smith.

### Air Hockey

Dates may get better looking near closing time, but air hockey only gets tougher. Challenge 4 local legends (2 men, 2 women). Each has their own style of play. Don't let this gorgeous goalie distract you. Keep your eye on the puck.

### Wet 'n Wild

Only the classiest establishments employ 8 men and 8 women for a wet t-shirt contest. 8 rounds. No stopping for falling buckets or vengeful contestants. Do your darndest to douse this doll. (Caution--a cold shower may be required.)

### Last Call

11:00 p.m. You're the bartender and a mob of thirsty patrons wants a drink...now. Fill 'em up and slide 'em down. As fast as they order, you've gotta deliver. The harder you throw, the farther they go. Crash! Oops...another mug bit the dust.

## Barbarian : The Ultimate Warrior (1988)

£19.95 Palace Software

[7/10 – Good 2 player fun.]

**CUSR : 9 / 10** - 'Barbarian on the C64 was great; this 16-bit incarnation is even better. It's graphically superior, a lot faster and smoother, and the use of sampled sound effects ice a beautifully prepared cake. One for the collection, methinks. Gangway boys, I want to give Williams another thrashing.'

**CVG : 36 / 40** - 'it's the little things that make Barbarian so great; the way the victor kicks the loser's corpse and flourishes his sword, the grotesque mutant, the gorgeous sound samples. All that's missing is music, but who cares? Unless you have a weak stomach, you should tie on your loin cloth, sharpen your sword, and dash out to the nearest Bazaar for a copy of Barbarian right away.'

**AC : 77%** - 'a good game and somewhat addictive. A bit more detail in the characters wouldn't have gone amiss. This must be the last in the series of two guys beating each other up in very nice scenery. It's wearing a bit thin, but no doubt someone will come up with yet another scenario with different graphics and surprisingly familiar gameplay.'

**ACE : 419 / 1000** - 'the game itself shouldn't take you longer than a week to complete. The two-player option does little to pep up the interest level, so though the games amusing in the short term, there's nothing much here to make you want to come back to it time and time again.'

I like many, bought this game on the Spectrum and purely for the buxom Maria Whittaker featured not wearing much, on the box (she was also a page 3 favourite in the Sun newspaper). The guy incidentally was Van Wijk or better known to us Brits as Wolf from the UK show Gladiators. But once we had peeled our eyes from the box and the poster and actually started to play the dam thing, we found it was actually a great game. The Amiga version is simply the best version of this game and so if you loved it on the 8-bit machines then this is the one to play. In single player it has you play a hero who must go through 8 Barbarians and defeat the evil wizard Drax and rescue Princess Mariana. Its all good fun with a surprising range of moves that can be pulled off from a single joystick with one fire button. Of course it was the difficult to pull off, but ultimately satisfying move, of the spinning head chop that we would always try to pull off. In gaming there is little better than the satisfaction of watching the head of you opponent thud to the floor and watch the little green mutant kick the head off the screen and drag the corpse away. All in all the game is a lot of fun, of course as a 1 player game you will quickly get board, but as a two player game this is still loads of laughs. Definitely one game to crank up and enjoy. Incidentally in America this game was released under the naff title Death Sword

## Barbarian II : The Dungeon of Drax (1989)

£24.99 Palace Software

*[5/10 – More variety, and fun still, but it loses out in the playability stakes, being far too tough.]*

**CU : 86%** - 'There is something undeniably 8 bit about Barbarian II. It's conception and gameplay are tried and tested, but that really doesn't put me off, its too well executed. It's still a must for fans of decapitation everywhere.'

**CU : 82%** - 'Simple, direct hack-and-slay action mixed with maze navigation, Barbarian II is as fun on the Amiga as on any other format.'

In the sequel Palace have thrown everything into it. Now you can play the Princess you rescued in the first or the Barbarian again and make your way through a maze of evil nasties (mutant chicken is the most vicious though). As a fan of the first game, I should love this, but I don't. I find the gameplay all wrong this time around and it's all, far too frustrating to play. In the US it's known as Axe of Rage.

## Barbarian (1987)

£24.95 Psygnosis

*[5/10 – Interesting control method, that doesn't work.]*

**GM : 87%** - 'Brilliant, great, wonderful and quite good too. Hegor stalks the caverns in very realistic fashion, hair waving, weapon at the ready and slightly crouched in preparation for anything. He needs to be! Necron's denizens are everywhere, attacking with axes, arrows and magic, but just wait till you see the dragon...! Perhaps booby-traps are a little unfair, as there are no warning of their presence, and coupled with the lack of save game facility can become tedious. But the urge to continue remains throughout. The large area to explore, the wonderful sound effects and marvellous graphics all add up to a success for Psygnosis.'

**CUSR : 6/10** - 'a game with major flaws that, if you can be bothered to make the effort required, can be quite rewarding.'

An experimental control method was used in this game, where you control the player by using the mouse to click on the corresponding icon. It just doesn't work with you feeling not engaged and more often than not dying because of the control scheme and jerkiness of the hero, rather than making a mistake. When you combine this with blind traps that kill you, it all ends up annoying as opposed to thrilling you. The sequel is far better and shows how this control system can work, although before being too harsh on this game, remember this was released way back in 1987.

For those who love the game then the Amiga is probably the best version to play it on, the visuals are great considering its age and for an old skool RPG it's a great little title. But for me it's a little too old and simplistic, and although I will sing from the roof tops of the games historical importance, I don't think it has aged particularly well So all in all a great title back in the day that lay the ground works for much more impressive RPG's to follow such as Dungeon Master and Eye of the Beholder.

# When the Going Gets Tough, the Bard Goes Drinking.

And the going is tough in Skara Brae town. The evil wizard Mangar has cast an eternal winter spell. Monsters control the streets and dungeons beneath. Good citizens fear for their lives. What's worse, there's only one tavern left that serves wine. But the Bard knows no fear. With his trusty harp and a few rowdy minstrel songs he claims

are magic, the Bard is ready to boogie. All he needs is a band of loyal followers: a light-fingered rogue to find secret doors, a couple of fighters to bash heads, a conjurer to create weird allies, a magician for magic armor. Then it's off to combat, as soon as the Bard finishes one more verse. Now what's a word that rhymes with "dead ogre?"

4 classes of magic user, including wizard and sorcerer. 85 new magic spells in all.

128 color monsters, many animated. All challenging.

Full-color scrolling dungeons. 16 levels, each better than the one before. 3-D city, too.

Optional use of characters created in Wizardry® or Ultima III®

**AC : 87%** - 'A good mix of tactics and cerebration.'

**ZZ : 80%** - 'probably the best role-playing game you can get-so far-for the Amiga. It's very well presented and a lot more challenging than The Bards Tale I and while the plans for an Amiga version of Dungeon Master have been shelved, probably the only game that will improve on it is the Bards Tale III. So – loaf on down to your nearest Amiga stockist and get it.'

**YA : 79%** - 'Definitely a game that benefits from the Amiga. The little animations that accompany the pictures of each character really help the atmosphere, and the screen is very pleasing to contemplate – it's not half as soothing looking at the C64 version. Definitely my favourite game of the month. I'll probably still be playing it this time next year!'

**GM : 76%** - 'While the heart of the game remains disappointingly unchanged and the disk access during encounters is still present, there are little extras which add much to the game: the scroll which actually scrolls when messages are displayed, the graphic animation and the flame which appears when torches are lit, all make the Amiga Conversion of the Bard Tale II, The Destiny Knight a very entertaining game to play.'

**AA : 81%** - 'I don't think there's anyone out there who is a bigger Bard's Tale fan than me. But even though I thoroughly enjoyed the two previous games in the series I must admit that Bard's Tale III is a little bit of a let down. We all know that graphics and sound aren't necessary in this type of game, but the graphics in BT3 aren't even as good as the ones in BT1. However the gameplay has been improved and thanks to the better story line there's a little more brain work involved. A good game that many people will enjoy.'

**AF : 69%** - 'The map area is fairly large, but the features within that landscape is limited. The foes crop up regularly, and it would be a serious problem if they were unavoidable, but you can be selective, and only pick on the weaker monsters. A well executed example of the genre, Bard's Tale III lacks tension. Nice graphics, but limited and repetitive gameplay means it is only really for beginners and fans of the series.'

**AP : 67%** - 'A competent and highly playable role-player in the classic tradition. What was excellent five years ago, however, is in serious need of an overhaul in 1991.'

Graphically this is a step backwards, with Electronic Arts getting lazy and deciding to just use the PC graphics touched up slightly. Gameplay wise, of the trilogy this is the most accomplished of the trio, being a huge gaming world and far better realised plot for you to follow. But by 1991 this game was already severely dated, and when compared to such titles as Dungeon Master and the Eye of the Beholder games, there really is no competition. Overall if you have fond memories of playing this back in the day (especially if you played this or the others on PC or another format) then the Amiga is the best versions to play of these games. Otherwise only those who love their RPG, seriously old skool should need apply.

# The Bard's Tale : Costruction Kit (1991)

£29.99 Electronic Arts /

Dev: Interplay Productions

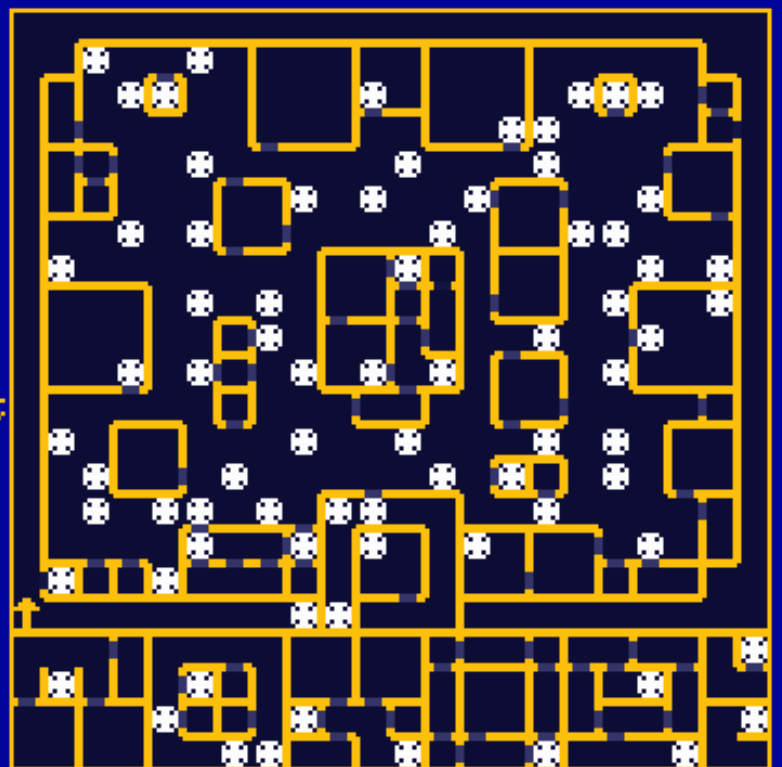

*[7/10 – Good construction kit, that's easy to use., if a little too limited and fiddly to insert your own graphics.]*

**AA : 80%** - 'The level of detail in the Bard's Tale Construction Set has to be it's major plus point. You can alter nearly every single aspect of the game world, thus bringing about a tremendous feeling of satisfaction when you see the finished product working. Ease of use is a vital aspect here and you cannot fault this as within half an hour you will have pretty well completed the dungeon. If you are tired of the Bard Tale RPGs, this may be what you need.'

**CU : 75%** - 'This game creator is much easier to use than most of the others I have come across, which means that with a bit of effort you will be able to create a finished game. The 'downside' is that all the games will look the same. All creation requires perspiration, and to create a game which really has something different in it you will need to spend a long time wrestling with the more awkward aspects of the package, namely the graphics and the 'special' logic sections. This type of open-ended software is what computers are all about. It is unlikely that you're ever going to create a game which will make you money, but the weeks of creative fun contained in the box will be it's own reward.'

**AF : 66%** - 'As far as it is, BTCS is a good piece of software that does its job well, but you can't help feeling that an Eye of the Beholder 2 Construction Set would have been a better idea.'

**AP : 62%** - 'Well, it works, and the guts of The Bard's Tale are a pretty goof basis on which to build your own RPGs. Only pretty goof, mind. You won't be writing the next Legend, I'm afraid. Not with this. It's not cheap, either.'

Pretty good construction kit, which will have you making your own adventures in no time. Although if you want to deviate from the cookie cut elements then it becomes a lot more involving.

## Baron Baldric – A Grave Adventure (1992)

£24.95 Electronic Arts /

Dev: Animation FX

*[2/10 – Impressive animation  
in a terrible game.]*

The intro is great and the animation of your player is genuinely impressive. But the game is completely dire, basically this is what happens when you take an obviously talented artist Lindsay Whipp who clearly isn't as skilled at coding nor game design.

# Barravento – O Mestre da Capoeira (1993)

£???.?? Hitek Software

*[2/10 – Nice animation, offset by bad Gameplay.]*

Animation is quite fluid and impressive, but sadly the gameplay leaves a lot to be desired, with

Repeated pummelling of the joystick more than enough to win a round. A poor beat 'em up then, but by no means the worst on the Amiga.

**Base Jumpers (1994)**  
**£25.99 Rasputin /**  
**Dev: Shadow Software**

**[8/10 – Great idea for a simple platformer and well executed. Mega fun as a multi player game.]**

**AF : 73%** - 'Base Jumpers is somewhat tedious in one-player mode, lacking depth and variety of plat, but when friends are involved it can be a gas, particularly when four players are fighting it out on screen. Players who scroll off the bottom of the screen shoot forward, losing points in the process and the subsequent shoot-out is more involving because the computer's 'shuists avoid argy bargy. But Base Jumpers shouldn't be a full-price game. Knock a tenner off and recommendation is forthcoming. Too pricey for simple pleasures. Verdict : Simple, yet quirky and enjoyable platform fare, if somewhat costly.'

**AP : 70%** - 'Base Jumpers is flawed. It just doesn't work at all as a one-player game – it's a bit like going bungee jumping with no-one watching to see how brave you are. And you run out of lives too quickly in multi-player games. Pretty soon there's only one player left, and he's not going to want to continue on his own after he knows he's won. And despite the bonus bits and pieces packed into it, it feels too flimsy to justify the £26 being asked. So although Base Jumpers filled our hearts with joy for a couple of hours, pretty soon we were beginning to get disgruntled. We liked it a lot, and it's made us laugh more than any other game this month, and there are secret recesses of it that we are yet to explore. But it's not a game we will be returning to all that often.'

**CU : 70%** - 'Base Jumpers' sick sense of humour is appealing, but its lack of gameplay variety and basic audio-visual presentation means that its £29.99 asking price is too high.'

**AA : 70%** - 'undeniably tedious for one, but you'll have a fair bit of fun if you can scrape a couple of friends together.'

**AC : 70%** - 'a great game, it's original, which instantly earns it extra Brownie points, it's fun and it doesn't take itself too seriously. I don't know how long the game would last you but it really does come into its own when you have the multi-player option on, and for a competitive game with a bit of humour you can't go wrong.'

**O : 69%** - 'a quirky offering, but not quite hitting the mark.'

Based around those nutters who break into buildings climb to the roof and dive off to free fall and then parachute at last minute. This has been turned into a joke filled platform game followed by a free falling avoid objects level as you do your jump. It's a great concept for a game and well executed. I really loved this game. I totally agree with everything the reviewers of the time have said, but thankfully in todays world where the full price cost is no longer a consideration, there is a lot of fun to be had here, especially if you get some chums over. Not perfect by any means but if you want a basic, fun, multiplayer treat that will get the competitive juices flowing then this is a good one to reach for.

## The Basket Manager (1990)

£25.99 Simulmondo

*[2/10 – Dull basketball team player manager game.]*

**GM : 51%** - 'You're actually a basketball team and have a few million dollars to spend on buying eight players, either professionals or rookies, but pros are very expensive. Matches are shown from above on a scrolling court and passes can be made straight ahead or directed with use of a swinging arrow. Player portraits are pretty similar to each other, all equally scruffily drawn. The pitch is neatly done and scrolls well. Sprites are reasonable in definition but mediocre in animation, and effects are just the repetitive thwack of a bouncing ball on court and one or two garbled ref shouts. Unless memory fails me, this is the first basketball game to use a plan view, so it's a shame playability is so very ordinary. It's a pain to get into the game – as copy protection, you have to put the names and fees from the manual to half of the faces you pick onscreen (tedious). The court is way too small, a brief dash and you're already at your opponent's basket, and controls are sometimes unresponsive.'

There I was excitedly ready to play a simulator of a manager of a sweat shop factory, making basket's in some tropical country and had become a basket case loon himself...Now that would have made a good game...Sadly this is simply a basketball manager game and a not very good one at that. Actually I am being too British, it's terrible turd and a waste of a floppy disk. Yet another Simulmondo crap game cockup then.. I do wonder why, in the many games the publisher developed, pretty much all of them were dire? Maybe in being Italian they were too busy at the vino and in the sunshine as opposed to stuck learning how to write a decent video game.

## Batman : The Caped Crusader (1988)

£24.99 Ocean /Dev: Special FX

*[7/10 – enjoyable enough if far too difficult and illogical with the puzzles.]*

**YA : 85%** - 'Batman features some very nice animation and graphics, as well as a respectable remix of the TV series theme which, although well done, does grate after a while (thank God you can switch it out). All in all a damn good game. I look forward to Ocean's next one.'

**O : 84%** - 'Not so much a game as two games, each housed on a separate disk and each completely playable in its own right. It's impossible to decide whether the characters or the backgrounds are more striking – each are superlative. The gameplay is frustratingly difficult, in fact it's precisely as this sort of game should be, causing hours of searching and punching and puzzling. The frame overlaying technique is highly effective, as the gradual build up of previously visited screens does wonders for creating a real environment. The lack of a Robin character and the obscurity of some of the puzzle solutions are the only drawbacks that I can find in this otherwise superb license.'

**GM : 74%** - 'The Dark Knight returns to 16-bit, Graphic definition is identical to ST but colours are subtler. The Batman music remix uses some nice sounds and with a few sampled sound effects, the soundtrack is very effective. This is the best presented version yet of this comic license.'

**CU : 89%** - [R] 'Batman has a great deal to offer: a snazzy soundtrack, good animation and interesting gameplay. However the puzzles are very difficult to solve and the lack of Splat! Pow! When Batman biffs somebody make it a trifle disappointing. A must for big kids.'

Holy cow Batman, its a Ka-Pow!, Splat! of a hero game based on our favourite psycho hero, who dresses us as a Bat. This is an impressive stab at the license and based more on the TV show as opposed to the darker Tim Burton films. Its all good fun, with a cheat on, but far too hard without. Batman needs to the gym more as I swear my granny can hit harder, with many of the henchman taking far too many hits before they are knocked unconscious. Also the puzzles in the game (of the pick up object and use elsewhere variety) are often far too illogical. Still the game really does portray the comic well and with two totally separate adventures there is lots to do. A Bird in the Hand has you pit yourself against the Penguin who has set up an umbrella factory. Batman soon unearths this is a front for his real plot to take over the world with his army of clockwork penguins and A Fete worse than Death has you take out the Joker who has kidnapped Robin! It is all good fun, but far too frustratingly tough and definitely shows it 8bit basic routes.

### The Batprogrammers

Special FX is a group of programmers, graphic artists and musicians formed 18 months ago by Paul Finnegan and John Smith. Originally the team consisted of just five members but this number has now grown to 14. The Merseyside-based company's first ventures were in the 8-bit sector: Firefly and Gutz for Ocean and Hysteria for Software Projects. Batman is its first 16-bit project, and was produced on a specially written development system, which will also be used on future projects. The graphics were designed on Deluxe Paint II and then converted for the ST.

The boys at SFX like a good blast and their fave raves include Galaga 88 and Operation Wolf. They're all Batman fans (a fact that helped them to get the Batman contract from Ocean!) and surprisingly enough, they loved the news that Robin was finally killed off (DC Comics number 428). "He was a hanger-on," says Paul. Now that work on Batman has finished, SFX will soon be embarking on its next Ocean project which is likely to be either a coin-op conversion or Ocean's next Batlicence - Batman The Movie.

## Batman: The Movie (1989)

£24.99 Ocean

**[8/10 – One of the best Movie tie-ins of all time.]**

**ZZ : 97%** - 'The fantastic thing about Batman is that it really is an Amiga game and not just a conversion. The first level is a better challenge, but the Batmobile section – well words fail me – the 3-D effect has more speed and detail than I thought possible. The sound effects are good but it's the music that really got me excited – the Batmobile section has a stunning rock track and the batcave a panic inducing up-tempo tune. Overall unbelievable!'

**GM : 96%** - 'The music is stunning. Its frantic pace in the poison Identification scene, along with the pounding track accompanying the Batmobile escape have to be heard to be believed. The graphics aren't slacking either.'

**CVG : 93%** - 'Superb graphics and sound and great five part gameplay carry off Ocean's best game of the film yet.'

**ACE : 922 / 1000** - 'Ocean are to be congratulated for putting so much effort into an excellent arcade game – especially when, given the Bat-hype, even Bat-shaped Space Invaders would have won them the number one slot on all formats. Proves that cynical commercialism does not always triumph over high personal and professional standards.'

**AF : 90%** - 'The five sections hang together well as a game. Each one is tricky and takes some mastering. It's unfortunate that if all lives are lost you have to restart from the chemical factory, but that certainly proves a challenge. It's edge of the seat excitement that grips you solidly. It's addictive, certainly, and though it's also frustrating at times and you could tire of it after a while, Batfans will not be disappointed.'

**CU : 88%** - 'a tremendous game, it follows the plot closely but doesn't sacrifice any gameplay. The graphics are of a high standard throughout and very well designed. The theme tune contains samples from the film and has a very funky feel to it. A highly playable and entertaining game.'

**AA : 82%** - 'For everybody who's worried that the game might be a bit of turkey, don't worry, it's worth the money.'

**O : 82%** - 'out of the five sections, only three are really worth while: the driving section looks and feels nice, but they both lack substance and depth, while the third section is laughably simplistic. But forget these criticisms and bury yourself in the first and last swinging sections which are as enjoyable as any stand alone platform game.'

Based on the massive 1989 hit film. This was one of the first Amiga titles, that was built specifically with the Amiga in mind, prior to that most games were up scaled ports from the 8-bit machines or lazy ports from the Atari ST. The game impressed and was also a playable title, truly showing what the Amiga was capable of, with the driving and flying sections included in the game that was nothing like anyone had seen at home before. The game was the first game to truly bring the Amiga machine to an affordable level with a price drop to £399 and the impressive Batman Pack.

Batman the Movie had some of the cream of Ocean and some of the best Spectrum coders working on the game. On coding there was **Mike Lamb** who had already made a name for himself on the Spectrum doing the brilliant Target Renegade and the impressive Spectrum conversion of Robocop. Also on coding duties there was **John O'Brien** who had amazed the gaming world with his Chase HQ conversion on the Spectrum. In fact the routines he wrote for that were pretty much re-used for Batman's Bat-Mobile driving and Bat-Wing flying sections (incidentally he now works for Sony on the Little Big Planet Games, and did a lot of the Lego games for Travellers Tales (including Lego Batman). Finally on coding you had **Alan Short** On graphics you had **Dawn Drake** and also **Bill Harbison** who both had both done the Spectrum graphics for Target Renegade and Chase HQ respectively. Finally you had on music duties you had C64 maestro **Jonathan Dunn**) who did the Addams Family music and Total Recall on the C64. and finally there was **Matthew Cannon** who also did the music to the game Elf.

## Batman Returns (1993)

£14.99 GameTek /

Dev: Denton Designs

*[2/10 – really awful cash-in.]*

**AF : 48%** - 'lacks excitement and atmosphere and it seems the money was spent acquiring the license rather than on the game itself.

Graphically, it's poor and even though around a tenner less than most games, it's still a tremendous disappointment. Batman himself is small and extremely tough to control, and by jove, the in-game music is appalling. Very sad.'

**O : 29%** - 'I hope you don't intend to retire on the profits you're not going to make from this embarrassing, embarrassing game. Sob.'

**CU : 19%** - 'It would be easier for me to pull a double decker bus out of my bottom than it would be to recommend this game. Don't bother with it.'

**AP : 15%** - 'Shoddy half-baked rubbish. Get it out of my sight. Now.'

I really don't get Denton Design's, they have done some of my favourite games of all time with The Great Escape and Where Time Stood Still on the Specky, and yet John Heap (pictured), the same person who did those all time classics could release a turd like this (no that's an insult to turds). (Roy Bannon also did the game lets share the blame here).

On to the game, well it's a scrolling beat 'em up that's, repetitive, dull, unplayable mess, with dodgy sprite collisions. The graphics are also weedy, but functional and actually some of the backdrops are quite pretty (if you are able to get off the first few screens - I had to cheat) ... even so a game of dire and painful tedium.

The background of the cover features a close-up of Batman's face in his cowl, looking intensely forward. He is wearing his blue and black tactical suit with the yellow bat logo on his chest. His right hand is raised, holding a silver handgun. The lighting is dramatic, highlighting the contours of his mask and suit against a dark, blurred background.

## Battle Bound (1991)

£14.99 On-Line Entertainments

/ Dev: The Warp Factory

*[1/10 – A lazily  
written game.]*

Coded by Martin J. Bysh a coder I personally absolutely detest (he did the terrible Teenage Mutant Hero Turtles Amiga arcade conversion) a lazy work for hire, who despite being offered some Amazing titles to do conversions of on the Amiga, all were terrible to mediocre. He clearly seems to have taken no care in any of his games (as long as he got paid). This game is a scrolling-by-the-numbers-beat 'em up is as bad as all the other games he did. (Ok the Viz game he did was alright.)

## Battle Chess (1988)

£24.99 Electronic Arts / Dev: Interplay Productions

*[9/10 – Chess with animated pieces, a classic.]*

**AUI : 9/10** - 'an excellent program that will appeal to players of all ages and levels. Not only are the graphics and sound effects superb, but it also plays a MEAN game of chess!! Highly recommended.'

**CUSR : 85%** - 'Maybe as a chess program, it's not the best ever on the Amiga, but it's definitely the most interesting and certainly the most fun.'

**ZZ : 85%** - 'An astounding piece of entertainment software and a cracking good chess game to boot.'

**CVG : 84%** - 'a game built around a gimmick, and like all gimmicks the novelty does eventually wear off. After a while I found that I was spending more time studying the 2D board.'

**O : 84%** - 'best game of its kind on the Amiga, even surpassing Chessmaster 2000. If you're a chess fan, you should go out and buy this game immediately. If you're not, you should buy it anyway.'

**GM : 83%** - 'The animation and high definition graphics have to be seen to be believed, figures walk around the screen, fight and perform various actions with incredible realism. Animation is exceptionally good, attention to detail doubly so and the 400K of sampled sound effects match the graphics quality. Unfortunately, time taken by some combat sequences can prove tiresome, especially with the Amiga's less than fast disc access. Use of 2-D option is the answer to this but the game loses its charm as a result.'

**AC : 77%** - 'although will prove a worthy opponent for the majority of casual players, it falls short of the high standard set by Chessmaster 2000 on the Amiga and Psion Chess on the ST.'

I love playing chess, ever since our rather eccentric headmaster had everyone at my primary school learn the game. Of all the chess games, this is the one I that I like to turn to when I want a bit of fun. It plays a pretty good game of chess and the animations are all varied, imaginative and humorous. Of course you will tire of it after a bit, but that's when you turn to a more serious chess game (Chess master 9000 on [www.GOG.com](http://www.GOG.com) is my favourite) Incidentally GOG also has the special edition of this game, for the PC on sale there. A worthy classic and a lot of fun, even if the temptation to sacrifice a piece to see a particularly fun animated exchange is always there.

*"...master chess grips its exponent, shackling the mind and brain so that the inner freedom and independence of even the strangest character cannot remain unaffected."*

There is a darkness over the battlefield. The wind sighs gently and there, in the distance, comes the flash of lightning and the rumble of thunder. With a sudden gust of wind, your warriors appear: the King, the Queen, two each of Bishops, Knights and Rooks, and before them all, a row of Pawns. Waiting, your King turns to you, ready to order his servants forward to their deaths in your battle to rule the field.

Dunkelheit liegt dem Schachfeld, es weht ein sanfter Wind und von weit her nähert sich ein Gewitter. Mit einem plötzlichen Windstoß erscheinen Ihre Krieger: Der König, die Königin, je zwei Läufer, Springer und Türme sowie eine Reihe von Bauern vor all den anderen. Warten Sie, bis sich der König Ihnen zuwendet, bereit seine Diener in den Tod zu schicken, um die Schlacht für Sie zu gewinnen und die Herrschaft über das Gebiet zu erlangen.

L'obscurité pèse sur le champ de bataille. Le vent gémit légèrement et là-bas, au loin, en perçoit les éclairs et le grondement du tonnerre. Dans une rafale de vent soudaine, vos soldats se dressent: Roi, Reine, Cavaliers, Fous, Tours, tous précédés d'une rangée de pions. Le Roi se tourne vers vous, ses serviteurs sont fin prêt pour une bataille qui sera peut-être sans retour...

## Battle Chess II – Chinese Chess (1991)

£25.99 Electronic Arts / Dev: Interplay Productions

*[9/10 – XiangQi or Chinese chess brought to the Amiga a good opportunity to be able to play a board game little known in the West]*

**CU : 87%** - 'good to look at and more importantly , taxing on the little grey cells.'

**AA : 86%** - 'chess players and new players alike should find the Chinese variant interesting and challenging. Those interested in classic strategy games Battle Chess II should be on top of your shopping list.'

**GX : 4/5** - 'anyone who enjoys a game of chess and fancies something just a little bit different could do worse than getting hold of a copy of this.'

**O : 85%** - 'Be warned, the computer opponent plays a tough game – even on Novice level – which can cause quite a few headaches to those of us who aren't exactly familiar with the new rules (i.e. everyone) – and it may therefore take some time for the player to get to grips with them. '

From Games-X

Counsellors may move one point diagonally in any direction

Pawns may move a single point forward until they cross the river. After crossing they can also move left or right

Cannons can move any number of squares, either vertically or horizontally and may jump over other pieces

Rooks can move any number of unobstructed points either vertically or horizontally

Ministers may move two points in a diagonal direction

Knights may move one point forward, backwards, left or right, followed by one point diagonally

**AF : 76%** - 'the game is more ruthless and barbaric than chess. Pieces are traded a lot earlier and because there are fewer pieces the whole game is generally quicker to play.

**AP : 48%** - 'Boring, slow and irritating. Only the most fanatical chess fiends will squeeze any real pleasure from this oddity.'

---

Good opportunity to play a little known (in the West) variant of Chess. It is an enjoyable board game if you take the time to learn, although it is still not a patch on Western Chess in my opinion. The other thing to note, is that some of the animations take ages to load and so its far better to play it on a hard drive (or download the PC version on GOG).

# Battle Command (1990)

£25.99 Ocean /

Dev: Realtime Games

*[7/10 – A thinking-man's Battlezone]*

**AF : 90%** - 'not only fun but it can be played as either a one-off blast or an ongoing sequence with disk saved victories, BC has a depth of entertainment often lacking in high-tech shoot-outs. The number of missions may be a hindrance in the long term, but some of these are incredibly tough. The game binds strategy, sim and shooting together brilliantly. It has enough abjectly weird locations to make exploring the world fun and there is an excellent range of firepower that promotes real experimentation. You will find learning the strategies behind Battle Command is only half the fun and being in control of the battle is even better.'

**ZZ : 90%** - 'A playability-packed tactical/arcade stunner!'

**CVG : 90%** - 'will have armchair tacticians gibbering like loonies. If you're after a game this nature, look no further – this is the best one!'

**ACE: 899/1000** - 'This isn't meant to be a rigorous future war simulation – the game is slanted more towards fun and action than some sort of pseudo-accuracy – and it succeeds admirably. It may just be Battlezone for the 90s, but at least it's a thinking person's Battlezone.'

**YA : 88%** - 'a fast action shooting game, with a little strategic thought as you fight your way across the map full of enemies, and variety in the form of various missions. Realtime are right to say this isn't a sequel to Carrier Command, because it isn't. Instead Battle Command is highly playable, largely exciting 3-D action bonanza.'

**CU : 82%** - 'a very good game, though slightly superficial. Don't expect a simulation, expect a fast, thinking man's shoot 'em up.'

**AA : 80%** - 'an option to rotate the turret and gun without turning the tank would have been useful. Although there is a lack of missions they are difficult and offer more than a few hours of play.'

Enjoyable action shooter, that at the time had graphics that really impress. It is still fun today, but expect a challenge, as for what it lacks in the number of missions it more than makes up for in being a tough game to beat.

Set in the near future, as an alternative reality, **BATTLE COMMAND** is an arcade/strategy game in which the player controls a single "MAULER" Assault Tank in one of 16 scenarios (missions) in the ultra war, fought between two dominant races in the **NEW WORLD**. The latest phase of the North/South war has been going on for over 10 years, with a stalemate eventually developing - a standoff between armies massed over a long dug-in battlefield. Such are the defensive capabilities of each side, full scale attacks are suicidal, so any offensive moves are, by necessity, small "behind the lines" actions performed by elite troops in specially designed vehicles. The Mauler is the latest such machine - capable of being lifted in and out of hostile territory by fast stealth choppers and armed with the most advanced weaponry the Northern scientists can devise.

The cover art for the board game 'Battle Command' features a central illustration of a soldier in a red helmet and blue uniform operating a large, futuristic tank. The soldier is looking through a scope, and the tank is equipped with various weapons and armor. The background shows a sunset or sunrise over a landscape. The title 'Battle Command' is prominently displayed in a stylized, metallic font. The publisher's name 'ocean' is at the bottom.

Dans le futur, vous contrôlez un "Mauler" un char d'assaut dans une des 16 missions de l'ultra-guerre qui se livre entre les 2 races dominantes du Nouveau Monde. Les capacités défensives de chaque côté sont telles, que toutes les offensives sont, par nécessité, des actions "derrière les lignes", opérées par des troupes d'élite aux commandes de véhicules spécialement conçus pour ce genre de raid. Le Mauler est le tout dernier véhicule de ce type - capable de pénétrer et d'être évacué des territoires hostiles et équipé de l'armement le plus avancé mis au point par les chercheurs du Nord.

An einem unbekanntem, fernen Ort tobt ein zermürbender Krieg zwischen zwei mächtigen Völkern. Du mußt mit einem "Mauler" Kampfpanzer in 16 verschiedenen Missionen Dein kämpferisches und strategisches Können beweisen.

Wegen der guten Verteidigungsanlagen sind Frontangriffe aussichtslos. Daher werden Angriffe fast ausnahmslos knapp hinter den Linien von Eliteeinheiten mit speziellen Fahrzeugen ausgeführt. Der Mauler ist die neueste dieser Maschinen - ausgestattet mit den wirkungsvollsten Waffensystemen, die jemals von der Rüstungsindustrie entwickelt wurden.

## Battle for the Ashes (1995)

£9.99 Audiogenic

*[7/10 – Budget Release of Graham Gooch with less options. Bit of a cash in.]*

**AA : 87%** - 'Other than the inclusion of the up-to-date Australian and English test sides, it's Graham 'nice moustache' Gooch all over again. Battle For The Ashes is equally as absorbing as the original Goochy effort, and people who've missed the previous incarnations can't go wrong for a tenner!'

**AF : 70%** - 'is Graham Gooch Cricket with its wings clipped – because you can only play a five day Test match between England and Australia and you can't edit the teams..[sic]..it's not bad at the price, but it reeks of blatant cashing in.'

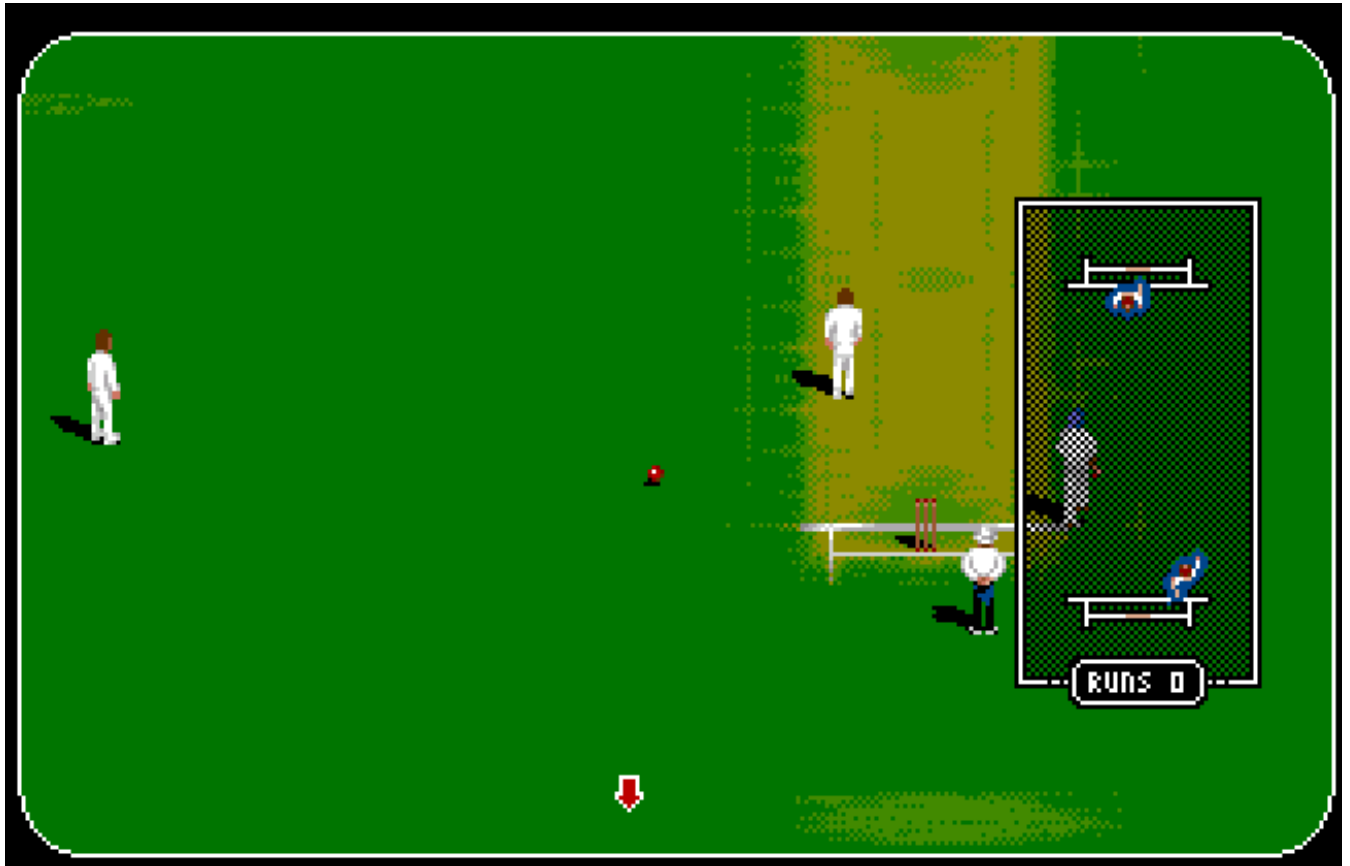

**O : 70%** - 'released as a tester for those players who perhaps weren't brave enough to fork out the original £29.99.'

**AP : 65%** - 'The latest in the best series of cricket games you can buy. But for gawd's sake don't if you already have one of the previous games. It's annoyingly flawed fun. I want another go, but I know it will only make me angry. What am I to do? I don't know. Help.'

Budget release cash in to tie-in with the Ashes. now-a-days its best to go to the original full price release Graham Gooch World Class Cricket game as it's identical to this but with more options. Have included this purely for completion sake. Still it is a hell a lot better than the 2013 Ashes game recently released by the Aussies. 😊

## Battle Isle (1991)

£29.99 Ubi Soft /

Dev: Blue Byte

*[9/10 – One of the best  
turn based strategy  
games.]*

**AF : 90%** - 'The programmers, Blue Byte, have reinvented the war-game genre making a game fit for heroes. It's simple but possesses real gameplay depth. The basic principals take minutes to learn, but are sharpened and refined in each successive scenario. The tanks and troops are extended chess pieces and the landscape is your board, it is your ability to use them effectively that is the appeal of the game. This graphic and gameplay mix ensure war games will never look the same again.'

**O: 88%** - 'retains all the best elements of traditional, board based strategy games, but adds the accessibility offered by a computer.'

**AA : 87%** - 'Ubisoft have taken the basic strategy game principle and produced a game that not only looks good but also plays well. From the second you pick up the joystick you are in total control of the action. A quick flick through the manual is all you need to understand the game and start playing, the impressively large number of different units and battle fields will keep you interested for a long time to come. Whether you are new to strategy games or a seasoned warrior take a look at Battle Isle.'

**CU : 85%** - 'Engrossing strategy game that's easy to play.'

**AP : 78%** - 'An enormously promising and brave idea which hasn't quite come off. It's not quite as deep as it might have been or as others would have you believe, but the basic problem is that by the time you get into it, it's all become so slow and repetitive and unfair that you just want to give up again.'

---

I love turn based strategy games and this, on the Amiga is pretty much the best. Back in 1991 it was a revelation to suddenly see a good strategy game with great visuals and music as well. Even to day it plays really well and is in many ways reminds me a lot of Famicom Wars or Advance War games. Great game that should be played if you love accessible war games. Be warned the computer takes ages to play.

Marvel at the crafty aliens, the brilliant attack waves and the amount of on screen action..[sic]..Battle squadron is so addictive that you just can't stop playing'

**GM : 87%** - 'in the genre of visually bright and addictive shoot'em-ups, it certainly deserves to be right up there at the top of the heap.'

**GM : 867 / 1000** – 'must go into the top three Amiga shoot 'em ups, along with Xenon II and Silkworm – not to be missed.'

**ZZ : 85%** - 'what's best about Battle Squadron is the excellent simultaneous two-player mode which gives it an edge on most vertical scrollers – two players mean twice the fun.'

**AF : 82%** - 'an excellent example of how to write a shoot-em-up.'

**O : 80%** - 'there is no sense of progression as in, say Xenon 2. As is the case with most games, the two player mode is a lot more enjoyable – and it lasts a lot longer. But due to the lack of variety, solo players aren't likely to be compelled to fight it out to the end.'

A truly stunning Amiga shooter that really puts you through your paces and has everything you could wish for in a vertical shooter on the Amiga. I actually do prefer it to Xenon 2 (playability wise) and if it wasn't for SWIV and later blasters this would be my blaster of choice on the Amiga.'

## Battle Valley (1989)

£19.99 Hewson /

Dev: Creative Thought

*[4/10 – Poor Silkworm clone, that today is best forgotten]*

**AC : 83%** - 'Isn't actually bad; it's quite clever inside, but dull on the outside, and consequently unremarkable.'

**ACE : 815/1000** - 'a deep and challenging arcade game. The time factor and strategic elements add a very welcome 'thinking' dimension to this smooth and colourful shoot 'em up.'

**AUI : 7/10** - 'The continual count down and the race against time makes this rather addictive.'

**CU : 54%** - 'The game does have a few definite virtue, however, a different – if not entirely successful – gameplay which is nice to see and keeps the interest up for a reasonable amount of time.'

**GM : 53%** - 'A couple of tears back Battle Valley was an 8-bit budget game but Hewson have obviously seen fit to resurrect it as a 16-bit title. The real question is why. It was great as a neat, cheap blast but there isn't sufficient depth or challenge to hold attention long today so pricing is dubious. Scrolling is fine, backgrounds unobtrusive and sprites neat and detailed; effects are average samples. Simple gameplay and nonchalant adversaries mean Battle Valley is somewhat less enthralling. For real action in the same vain, get hold of the excellent Silkworm.'

Nice enough to look at, but extremely basic to play. This is essentially an inferior clone of Silk Worm and so you are probably best sticking with that.

## Battlehawks 1942 (1989)

£24.99 Lucasfilm Games

*[7/10 – Good action fuelled simulator game.]*

**CU : 935/1000** - 'Terrific fast and colourful graphics plus some impressive and atmospheric sound effects all combine to ensure you keep coming back to this again and again.'

**ZZ : 90%** - 'A well implemented technically impressive and above all, fun piece of software, which will keep both sim freaks and blast fans quiet for some time.'

**AUI : 9 / 10** - 'A major factor in Battlehawks I particularly like – is the feeling of being part of a team. Other flight simulators set you in the role of a lonesome cowboy, whereas Battlehawks gives you the impression that you are part of a posse. Fellow, computer-controlled aviators may actually help you in a mission, engaging bomber escorts, for example. I can heartily recommend, Battlehawks to any one, including Flight Sim enthusiasts, who is after something a little different.'

**YA : 81%** - 'handling of these planes seem quite accurate. In fact frustratingly so I was stalling my plane with mind numbing consistency to begin with but, as with most things, practice makes perfect (well a little better at least).'

**CUSR : 71%** - 'It is quite fun to play, but as the frills wear thin the level of enjoyment falls rapidly. Not a worthwhile investment, but worth getting your rich mate to buy so that you can play round his gaff.'

---

Showing its age now, but a good fun World War 2 simulator that will take a while to learn.

"In early 1942, American planes were no match for my Zero. I was a hawk in a flock of geese — snaring, looping, pouncing, destroying. I was truly saddened for the brave men in those sluggish planes. All too soon, the planes got better..."

"My first burst of tracers skimmed the Val's tail. Just as I corrected my aim, he dove. I followed, and my Wildcat's cannon took his plane apart by bits and pieces. Suddenly, he pulled up and bailed through his shattered canopy. Moments later, the Val exploded..."

## BATTLEHAWKS 1942™

Rich in historical detail and thrilling in graphic realism, Battlehawks 1942 gives you a heart-pounding experience of the four naval air battles that turned the tide of World War II in the Pacific: Coral Sea, Midway, Eastern Solomons, and Santa Cruz Islands.

## Battle Master (1990)

£29.99 Personal  
Software Services

*[5/10 – Doesn't satisfy  
action or strategy gamers.]*

**AF : 83%** - 'Take a plot that's longer in the tooth than a dragons incisor and then apply a unique approach to turning it into a game. It's not as static as Laser Squad and more appealing than anything in the Ultima vein. It has a good sense of humour too, thank goodness.'

**AA : 77%** - 'PSS have managed to combine strategywith RPG in Battle Master to create a superb game that has you addicted from the word go. There's plenty of variety and the playing area is huge, with villages, mines and castles all waiting for you to explore them. The graphics are pretty good and make the game even better'

**YA : 76%** - 'A very colourful game that its not enough of anything to make it really worth playing.'

**ZZ : 58%** - 'too little depth with too little tactical meat to be considered by anyone but Gauntlet fanatics, who would, in turn, be disappointed with it as a true arcade game.'

---

I can really see what PSS were trying to do here (a kind of Zelda meets Laser Squad), but sadly it doesn't come off. The action is all too haphazard and random with the controls and the strategy is all far too basic. Therefore you end up with a game that pleases neither camp. Not a terrible game by any means, but one that hasn't stood the test of time.

## Battleships (1987)

£19.99 Elite

*[6/10 – Does the game Battleships as well as one could hope for.]*

**CUSR : 6/10** - 'a slightly more polished version of the game you could buy for a couple of quid except its going to cost you twenty in this format. Take my advice, but the cheapo when it appears and put the rest towards a C64 emulator.'

**ACE : 523 / 1000** - 'a simple game that you'll probably play for years to come – but never get too excited'

**CVG : 61%** - [R] 'A good translation but only entertaining until the novelty wears off.'

Although not worth £20 or even £10 back in the day, nowadays it is worth your time as cost is no longer a factor. This is a professionally done game of the pen and paper battle ships game, with the added benefit of doing 24 shots at a time and having those shots lessen as more of your ships are sunk. Of course this game was always about luck, so don't be surprised if your interest wains. Still for a small diversion, when you are looking for some simple fun, then this game is the one to go for.

## Battlestorm (1991)

£24.99 Titus Software

*[6/10 – Technically good blaster let down by average gameplay and dull graphics.]*

**AF : 83%** - 'It may not have the breadth and grandeur of a game like SWIV – it remains a rather plain game to look at despite the silky scroll, and there could have been a bit more to it – but it does make up for this with the dimensions of its playing area.'

**AA : 83%** - 'If you are an action fan it is definitely worth taking a look at this one. Hopefully Titus will continue to improve their products as they have done here.'

**AA : 75%** - 'Boasting 50 frames a second screen update, Battlestorm is at first sight a good, smooth, shoot 'em up. What lets it down are the dowdy colour schemes and unspectacular power-ups and enemy sprites.'

**CU : 63%** - 'An easy, uninspired and unsophisticated blaster'

**AUI : 60%** - 'Although Battlestorm scores highly on tech-specs, the design is dated.'

---

From a technical stand point you cant fault the title, the scrolling is as smooth as a babies bum...the trouble is that most of the game looks like most of the contents of a babies bum as well. Also there is little of anything different new or exciting, meaning it quickly becomes dull and repetitive.

## Battletech : The Crescent Hawk's Inception (1989)

£24.99 Infocom / Dev:

Westwood Associates

[ 9/10 – Great involving mix of adventure, RPG & Strategy.]

**CU : 81%** - 'Battletech's strongest features is the way you can easily get drawn deep into the game. This is as accessible as most shoot 'em ups and avoids most of the pitfalls this sort of game falls into. Don't expect blinding graphics or aural excitement, but you'll probably spend more time on this than most games.'

**ACE : 805/1000** - 'does not have quite the level of puzzling you would expect from an Infocom game, but it combines the 'Mech combat and quest elements well. The only problem is that because the game is addictive you may solve it quickly, and it only has limited replay potential.'

**YA : 68%** - 'a curious mix of strategic combat, adventure sequences and role-playing character and party development all based on a successful science fiction board game.'

**ZZ: 45%** - 'Battletech is based on the RPG of the same name. If you're a dedicated fan of this you'll probably get some enjoyment out of the computer version, but I would prefer the real RPG with a few friends instead of watching a few sploody sprites fire 'messages' at each other!'

Very involving and engaging game based on the board game and pen and paper RPG of the same name. In this game it is set in the 31<sup>st</sup> Century and has you play 18 year old Jason Youngblood who is training to be a Mech Warrior (a pilot of a massive military robot). This game takes you right through all his training and then on to a series of missions. Done by the same team who did Eye of the Beholder, It is a game that you need to invest a lot of time in, but if you do, and look past the poor graphics you will be richly rewarded with an engaging game. Of course it does help that I was a big fan on the board game and so was already a fan of the game, before I even first booted it up, back in the day. All in all a delightful mix of adventure, RPG and strategy that all works wonderfully and a story that will reward those with patience and time on their hands. For the rest of you the game will just seem tediously slow and with bad graphics.

**AP : 9%** - 'There is absolutely no fun to be had playing Battletoads on the Amiga. It's chronically badly-programmed, and the only reason you'd ever carry on playing past your first game is to see what all the levels look like. Quite frankly, this never ever should have been released.'

Simply a terrible port of an alright NES game by Rare. This did have some good names in the team who put this together, so I can only assume it must have been a last minute rush to make this mess of a game.

*[ 8/10 – Fun and varied, but tough to master.]*

**AP : 88%** - 'It's got nice big sprites, dayglo colours, and it's actually rather good.'

**O : 88%** - 'The reason why Ocean's Beach Volley is such fun to play is all down to its simplicity – there's no messaging here, just straightforward Volleyball action from start to finish. The control mode is tricky to get to grips with, but once you have the hang of it it's very instinctive – so if you make a mistake you know it's you and not the control method that's at fault. The graphics are of a very high standard and add to the overall feel no end. They're simple enough, but just oozing with style and humour, from the nude models on the beach to the player's quiff hairstyle!'

**YA : 85%** - 'It is challenging, and strangely addictive. The fact that for this review I kept playing long enough to reach the stage where I was good enough to sometimes win at the lower levels and progress to later venues must mean something. It's not a game with any real depth to it but it can provide a good deal of fun.'

**ZZ : 88%** - 'even in one player mode, the sheer playability and great cartoony sprites make for a highly enjoyable game.'

I really enjoyed this, its only fault in not being that accessible and one instead you must invest time in, to be any good. But invest that time and you will have one of the best volley ball games around, with the courts and characters wonderfully varied

## Beam(1989)

£24.99 Magic Bytes

*[7/10 –Frustrating and addictive action puzzler.]*

**GM : 72%** - 'For the first few levels of Beam it makes you realise how in cuss words your vocabulary is..[sic]..Although tough at the outset, Beam provides a fairly stiff challenge to those willing to persevere with the frustrating controls.'

**YA : 55%** - 'I still can't decide whether I like Beam much, or not. I can't help feeling a vague sense of disappointment which I think is caused by the unimaginative design of the different levels. On the other hand, it provided a certain degree of mental stimulation and was quite entertaining for a good number of hours.'

P1:00022

P2:00000

HS:01558

Time:00078

Wow this game frustrates the hell out of you... The purpose of the game is to pilot an Asteroid looking ship around by hitting the first lit up power cell, you ship then turns that colour. Hit another power cell and it will join the two with a laser, connect all the power cells and then you can escape through the exit to the next level. Your problem is the controls are purposefully bad, with your craft continuing in a given direction until you press the fire button to stop you also need some thought (especially on the later levels) that you cannot cross a laser beam once in place. All in all it's a fun game, let down by being really tough and having no password select.

## Beamrider(1998)

£14.99 Epic Marketing

*[4/10 – clumsily executed puzzle game. .]*

**AF : 83%** - 'The basic premise of the game is this: you have a cannon (though there could be more, depending on the level) that periodically fires a beam of coloured light, the colour depending on the colour of the cannon. This beam of light needs to be directed towards the colour coded exit through a series of mirrors and other gadgets, and all this needs to be done within a strict time limit. The mirrors and other gadgets..[sic]..A fine brain tease with plenty of challenge. You can even get a mate to join in on the teamwork mode. Very good, but not a classic.'

---

Not a game I personally gelled with...I have always hated puzzle games with timer countdowns and one that is so severe makes the game annoy rather than encourage play. The random smiley faces as well makes it all rather unfair as well. IA nice idea clumsily executed.

## Beast Busters(1992)

£24.99 Activision /

Dev : Images Design

*[4/10 – Weedy conversion of an average arcade game.]*

**CU : 87%** - 'a fine conversion which doesn't house an ounce of originality, but is one of the best of its kind.'

**ACE : 702 /1000** - 'A robust conversion of the gun mounted coin-op which features good graphics and sound. However, the control method is rather fiddly, and those who've already got a couple of these types of games in their collection might find that the unoriginal gameplay becomes dull very quickly.'

**AP : 62%** - 'Technically flawed (it slows down when there's a lot happening)

**AF : 41%** - 'A disappointing conversion of a fun game.'

Back in 1989 the arcades was awash with the ever popular gun shooters swarming the arcade market with Taito and it's Operation Wolf and Operation Thunderbolt being the best examples of this era. Beast Busters by SNK tried to ride the craze as well with its own blaster, which interestingly had you take on zombies and glorified its gore. It would be a formula picked up again years later by Sega with the massive hit House of the Dead. Sadly Beast Busters in the arcades was mediocre at best and on this weedy port, whilst not terrible makes the game even more a dull game to play.

## Beast Lord(1993)

£19.99 Grandslam /

Dev : W/S Design

[5/10 – Average Beast game clone.]

**O : 80%** - 'Beastlord reminds me of Elf and Shadow of the Beast, due to the need to tackle individual problems by using the right object with the right thing, with the odd fracas thrown in for good measure. Other than that, it doesn't offer anything new to the player. Even so, it's still a good game to play, mainly due to the number of creatures and characters that are there to be beaten up – me violent? – and the size of the levels.'

**AA : 53%** - 'There will undoubtedly be a handful of people who like this, but I am sure they will be around in very limited numbers.'

**CU : 51%** - 'The controls are a little suspect, to say the least. The control of the main character feels slack and unresponsive, and the mouse-controlled bank of options makes the game impossible to play with a hand held joystick. It isn't bad, and touches like the ripple effect caused by the cloak bring it up above the average mark, but only just.'

---

The main problem with the game is the mouse controlled actions such as picking up and using items which results with you getting control-tied and often in a mess. It doesn't help that the game itself is also rather dull and quickly becomes repetitive as well.

## Beavers (1993)

£25.99 Grandslam /

Dev : Arc

Developments

*[5/10 – Get past level one for a surprisingly fun platform game.]*

**O : 84%** - 'Beavers is very nearly flawless. There's just one thing which prevents the game from getting a stupendously high mark that's the layout of a few of the levels'

**AA : 84%** - 'Beavers may well have been rendered among the also rans if it wasn't for the one or two neat touches and the overall frshness of the game.'

**AF : 75%** - 'Beavers isn't a marvellous game, but it is competently written and introduces another likeable character. But looking at legends such as Sonic (who, to be fair, is hardly very much further along the evolutionary scale), it feels as though Grandlam could have made so much more of their invention.'

**AP : 71%** - 'It's all very sweer and everything, but inn the wake of platformers like Arabian Nights and Flashback, it's all just a little too simplistic. Perfectly nice, but I fear it's destined to be lost to history fairly swiftly.'

**AF : 70%** - 'Gameplay-wise it's a;; pretty standard stuff from thereon in: shamelessly shallow fun, jumping from platform to platform while dodging a plethora of nasties. These range from cute little Frankenstein lookalikes to sharp-suited bears with revolvers.'

**AC : 65%** - 'Beavers really is nothing new and will undoubtedly go down in history as just another, dare I say it, platform game! The gameplay is perhaps a little simplistic and control unresponsive. For money there are better options available.'

Playing the first level with the forced scrolling is enough to turn many away from this platform game, in some ways that's a shame .as although this platformer falls squarely into Average category (with a capital A) it does a reasonably fun game. A game that wont ever win awards but does what it set out to do.

*[4/10 – Amazing to see speed of it all on a humble A500. But not much of a game.]*

**O : 78%** - 'BTIG will never match Doom, so don't expect it to – and if you've got an AGA machine, look elsewhere for your thrills. But if you fancy a nice bowl of atmospherics, with a spoonful of weapons and trinkets sprinkled on top then Iron Gate should keep you going.'

**CU : 75%** - 'Fast scrolling RPG marred by messy controls.'

**AP : 55%** - 'It's a noble effort to try a Doom style game for standard Amigas, and this almost works. Unfortunately, it's let down technically by not enough screen detail and that combines with some wholly irredeemable game flaws to make later levels a chore rather than challenging. You'll have fun for a bit, but end up leaving BTIG at the back of the toy-cupboard.'

When you play this game, you cannot believe the technical prowess of the programmers, who have managed to get such smooth running 3D corridors on the humble A500. Unfortunately there really isn't much of a game here really, and what there is won't hold your attention for long.

## Beneath a Steel Sky (1994)

£34.99 Virgin Interactive /

*[9/10 – Superb Adventure game, although best to play on PC via GOG.com nowadays..]*

**CU : 95%** - 'A genuinely enjoyable experience, and one where there are so many ways to play it. I can definitely see myself returning to this one after I have completed it, just to find out what I've missed. Simply one of the best adventures ever released on the Amiga.'

**AF : 94%** - 'a massively intense and atmospheric adventure which will keep you on tenterhooks right until its final startling conclusion. Utterly brilliant.'

**O : 93%** - 'I could if I wanted to, sum up Steel Sky in just one word: Superb. Reasons for this? Well, take the amazing incidental animations, for starters. Steel Sky is a real eye-opener...'

**AP : 86%** - 'With as much care and attention taken on the storyline as the graphics. Steel sky is an example of what an adventure game should be like – funny, enthralling and convincing. There aren't any jumps in logic in story line, or stupid coincidences that propel you through the story. Read as little as possible and you will genuinely be surprised as the story unfolds. Hard disk owners can add another five percent for the speedy location jumps.'

**AC : 85%** - 'Revolution have surpassed the amazing Lure of the Temptress with their latest adventure and I congratulate them on making such a fine adventure game. If it doesn't go to the top of the software charts then I think there is simply no justice in this world.'

A fantastic adventure game done by Revolution Software, who are best known today for the brilliant Broken Sword games. I adore any adventure game Charles Cecil's Revolution software produces...

This game is set in a futuristic totalitarian state and has you play a man (Foster) who was orphaned and abandoned outside a giant metropolis and brought up by savages... All is well until until the police of the regime bundle you in to a helicopter. The helicopter begins to plunge into the city...and it is here the story begins.

I adore this game from its genuinely funny dialogue, to great puzzles and storyline. On the Amiga in retrospect it was a tough game to play though with loads of disk swaps of the 15 disks. The best way to play it on the Amiga is by the CD32 release. As this has no disk swaps and added well recorded dialogue. Now-a-days though it is the PC version you should play and by a generous bonus Charles Cecil has given the whole game completely free on [www.GOG.com](http://www.GOG.com). So there is no excuse not to play this brilliant game today.

THE OLD MAN WAS TRYING TO TELL THE FUTURE, LOOKING FOR PICTURES IN THE CAMPFIRE...

EVIL... OHHH, I SEE EVIL...

EVIL, BORN DEEP BENEATH THE CITY... FAR FROM THE LIGHT OF DAY...

I SEE IT GROWING, SAFE BELOW A SKY OF STEEL... SCHEMING IN THE DARK... GATHERING STRENGTH...

AND NOW... OHH... NOW THE EVIL SPREADS!

IT SENDS DEADLY FEELERS OVER THE LAND ABOVE...

ACROSS THE GAP... REACHING TOWARDS THIS VERY PLACE!

I'D SEEN HIM DO THIS A HUNDRED TIMES, BUT I HUMOURED HIM.

AFTER ALL, HE'D BEEN LIKE A FATHER TO ME.

AND WHAT DOES THIS EVIL WANT HERE?

OH,  
MY SON,  
I FEAR...

I  
FEAR THE  
EVIL WANTS  
YOU!

THAT WAS  
WHEN JOEY  
PIPED UP--

FOSTER!  
SENSORS  
DETECT  
INCOMING  
AUDIO  
SOURCE!

THEN THE REST OF US HEARD IT, TOO.

THE EVIL! THE EVIL IS NEARLY HERE--

WHUP WHUP WHUP

IT SOUNDED MORE LIKE A 'COPTER THAN A DEMON.

KWAH! UMMPH!

BUT, NEXT THING, ALL HELL LET LOOSE ANYWAY--

RUN, FOSTER! RUN! HIDE FROM THE EVIL!

AIEEE!

BUDDA BUDDA

FOSTER! >KZZT< H-HELP!

KCHANG

BUDDA BUDDA

BETTER >SZZT< MAKE MY >TZZK< NEXT BODY MOVE >KTX< FASTER, FOSTER...

HE WAS ONLY A ROBOT, BUT, WELL, I LOVED THE LITTLE GUY

THEN, AS SUDDENLY AS IT STARTED, THE SHOOTING STOPPED.

WHUP WHUP

>TZZT<

THERE WAS A MOMENT'S SILENCE AS THE COPTER CUT ITS ROTORS, THEN--

WHOEVER IS IN CHARGE HERE, COME FORWARD--

NOW!

ONLY A FOOL WOULD'VE ARGUED WITH THAT FIREPOWER.

I-- I AM THE LEADER OF THESE PEOPLE... WE ARE PEACEFUL--

BRING HIM HERE.

AT ONCE, COMMANDER REICH.

WE'RE LOOKING FOR SOME-ONE.

SOMEONE WHO DOESN'T BELONG HERE... WHO WASN'T BORN IN THIS GARBAGE DUMP... WHO CAME FROM THE CITY AS A CHILD...

WE WANT TO TAKE HIM HOME AGAIN.

MY MIND RACING, I REMEMBERED WHERE I'D SEEN THAT SYMBOL BEFORE...

IT WAS THE DAY THE TRIBE FOUND ME...

THE DAY OF THE CRASH...

THE DAY MY MOTHER DIED.

YOU ALRIGHT, CITY BOY?

GOT A NAME, SON?

R-ROBERT.

HAH! WELCOME TO THE GAP, ROBERT!

YOU'RE ONE OF US, NOW.

AS HE PATCHED ME UP, THE OLD MAN HAD GENTLY EXPLAINED THAT THERE WAS NO WAY BACK INTO THE CITY...

AND I ALREADY KNEW THERE WAS NOTHING HE COULD DO FOR MOTHER.

HIS TRIBE WAS POOR, BUT THEY TREATED ME LIKE ONE OF THEIR OWN...

I LEARNED HOW TO SURVIVE, HUNTING IN THE WASTELAND THEY CALLED THE GAP...

AND SCAVENGING FROM THE CITY DUMPS.

AS THE YEARS PASSED, I FORGOT MY LIFE IN THE CITY

HAH!

DISCOVERED NEW TALENTS...

I'M YOUR KEZT-FRIEND ... CALL ME STZZT: JOEY.

AND GOT A SECOND NAME.

THIS IS WHAT WE'LL CALL YOU, NOW YOU'VE COME OF AGE, SON! WE FOUND YOU, FOSTERED YOU ...

SO THAT MAKES YOU ROBERT FOSTER!

...WASTED ENOUGH TIME!

GIVE US THE RUNAWAY OR WE'LL SHOOT EVERYONE -- STARTING WITH YOU, GRANDAD!

THE OLD MAN HAD BEEN RIGHT, FOR ONCE...

IT WAS ME THEY WANTED.

NO, MY SON! DON'T LET THE EVIL TAKE YOU! RUN!

DNA SCAN CONFIRMS IT'S HIM, SIR.

EVIL HAD COME TO THE GAP, JUST AS HE SAID.

TAKE HIM.

BUT HAD THE OLD MAN SEEN WHY IT WANTED ME?

OR WHAT IT WOULD DO NEXT?

IT WAS TOO LATE TO ASK HIM NOW.

LEAVING DESTRUCTION ZONE, COMMANDER REICH.

GOOD. DETONATE..

MUCH TOO LATE.

WHY, YOU MURDERING...

KEEP HIM QUIET.

ALL I COULD DO WAS WAIT.

JUST LIKE ON A HUNT. JUST LIKE THE OLD MAN TAUGHT ME.

WAIT... AND BE READY.

IT WAS DAWN WHEN WE REACHED THE CITY.

LAND IN THE CENTRAL SECURITY COMPOUND.

A DAWN MY TRIBE WOULD NEVER SEE

THEY WERE NO MORE THAN A NOTE IN REICH'S BOOK NOW.

YES, SIR. LOCKING ON AUTOMATIC LANDING BEACON.

BUT WHAT WAS I? WHY DID--

SIR! THE GUIDANCE SYSTEM! IT'S GONE CRAZY!

WE'RE GOING TO HIT!

MAYBE I'D GET SOME ANSWERS NOW.

IF I SURVIVED ANOTHER COPTER CRASH...

## Benefactor (1994)

£24.95 Psygnosis / Dev: Digital Illusions

*[ 7/10 –Puzzle Platformer that although not to my tastes I can see why many like it.]*

**AA: 90%** - 'Looking at the screenshots you could be forgiven for thinking that it doesn't look much of a game. However, scratch a little beneath the Lemmings-like surface and you will be rewarded with what is undoubtedly a fascinating and enjoyable platform/puzzle hybrid. Superb animation and constant surprises make Benefactor well worth a score in the nineties, and well worth an accolade. There's definitely more to Digital Illusions than just pinball.'

**AA: 87%** - 'Quite an original platform puzzler, with plenty of long-term addiction.'

**O: 85%** - 'I will say that since Lemmings arrived on the Amiga, many games of a similar style have been and gone without really achieving the same heady heights of technical excellence and great design. Benefactor, possibly the least Lemmings-like of the genre so far, gets the thumbs-up from me for being one of the most original and entertaining puzzle games around.'

**AC: 80%** - 'Benefactor is the best thing Psygnosis have released for a long time. It feels like a montage of Flashback (the US Gold title) and Psygnosis' very own genocidal pets, the Lemmings – indeed there's a Lemmings tribute level on the Egyptian world. Both the graphics and sound have been implemented very well. The variety of both location and puzzle aspect of Benefactor makes it an engrossing challenge.'

**AF: 68%** - 'Not a bad puzzle game, but a fair way from being a great one. Some nice ideas and gorgeous visuals and let down by a general feel of 'yeah, so' '

**AP: 57%** - 'For every level that's fun to do, there's one that annoys the hell out of you, and for each nice touch in the game, there's a Bad Thing to go with it. More often than not, the silly things get in the way of enjoying the game, and if we ever do a Complete Control section on it, count me out.'

Benefactor done by Digital Illusions , best known in the Amiga days as the people who did those brilliant Pinball Games (Pinball Dreams, Fantasy and Illusions). Of course Digital Illusions are best known as DICE (Digital Illusions Creative Entertainment) yes that brilliant company who did all the Battlefield games and my favourite Need for Speed Hot Pursuit oh and Mirrors Edge. In fact Thomas Anderson who coded this game worked on the recent Battlefield 4 game and music maestro Olof Gustafsson is credited with Midtown Madness 3 and the first two Battlefield games.

Anyway on to the game itself well Amiga Computing was kind of right with it reminding a lot of Flashback. In it you must negotiate the levels platforms, with a certain puzzle in the where to use objects you pick up and how to get to certain platforms. For me though I really don't like the weedy tiny graphics and so for me as good as many find this game I just didn't gel with it.

**[ 4/10 – To s.]**

**ZZ: 35%** - East vs West is a boring game apart from the intro and the few laughs you might get when reading the poorly translated manual. They can blow themselves up as far as I am concerned.'

On watching the intro I was really looking forward to playing this. Especially when I saw also it was developed by Time Warp Studios (they who did Great Giana Sisters, although no one who worked on this game worked on that classic title). Anyway the games premise and setting is really cool. It is set in Berlin after the war where Berlin is divided between the Allies and the Russians. You play an American agent Sam Parker who must search and find a rogue Nuclear bomb before the Russians get those hands on it.

When the game starts it all starts to go down hill however. Everything is mouse driven, which should

Make intuitive. Sadly no, the game instead brings up a dizzyingly complex array of icons each time you interact with something, and that is after a huge disk loading wait time, not to mention constant disk swapping.

All this is a pity as I feel there is a probably a great game somewhere in here, just waiting to get out. It is just that it is smothered under bad interface design and coding. There is for instance a great tongue and cheek humour to it all that I really liked.

Think of it as badly coded Grand Theft Auto that isn't any fun to play and full of repetitive city blocks and nothing clear with what to do.

As it stands though this is a game best seen as a German curio and best forgotten.

# In 1989 the Wall cracked... ...in 1948 a nation cracked..

As a nation is torn apart in one of the greatest political tragedies in modern history, this is only but a backdrop for a far more sinister event that has taken place. An atomic bomb is found missing from a British base and is believed to be headed to the Soviet forces. As a lone American agent, you must scour the city questioning the military police and occupying forces and interrogating the shadowy figures of the underworld, in your mission to recover the bomb before the Cold War takes a much more dramatic twist.

## Bermuda Project

£24.95 MirrorSoft /

Dev: Graphicfinal

[ 4/10 – *Graphical adventure with not much of a story.*]

**AC: 72%** - If Bermuda Project were text only it would be probably very run of the mill. The graphics and simplified mouse commands change it into an entertaining game that most will enjoy. Enjoyable entertainment. No real depth.'

**CUSR: 4/10** - Later on in the game there's a jeep to be found, but even that has no petrol in it so you'll have to go off searching for some as well. Personally I couldn't be bothered, mainly because it is so fantastically boring, there is simply no compulsion to solve the puzzles. The entire game is played in complete silence, apart from an irritating woosh when you get near the coast. Graphically it is also pretty poor. The main spite is quite nice, but the scrolling is slow and jerky and the backdrops are sadly lacking in detail.. The mouse control is also frustrating indeed. Controlling your hero is a tiresome process, as is using the menu system. All these faults ass up to a very unprofessional attempt at a game only die-hard arcade adventure fans should consider looking at.'

**GM: 60%** - 'Although the graphics are poor and the sound effects sparse it has some degree of depth and arouses sufficient curiosity to keep playing for a short while.'

**GM: 60%** - 'Bemuda Project comes through, with my only reservation being the pop up menu/text routine which is so fussy. Other than that I can not fault it as it entertained me no end.'

Written by Eugene Evans. For those not around at the time, his name was quite big a few years earlier to this game release having been a perceived whizz kid in the press for his £35,000 salary and free Ferrari whilst working for the ill fated Imagine Software (who went spectacularly tits up on a BBC TV documentary Commercial Breaks (see here to watch <http://www.youtube.com/watch?v=Yt9BsZCifgU>)

Incidentally Eugene went to the US and still writes games with him involved most recently with the Warhammer Online games and Dark Age of Camelot. Actually Retro Gamer did an interview with him and he came across really humble and admitted he never deserved the Whizz Kid praise with it more being a publicity stunt by Imagine.

Anyway this game was in development hell for 18 months before finally limping out. For its age its not too bad, just not a very engaging story, resulting in you walking around aimlessly not entirely sure what to do.

# Best of the Best : Championship Karate (AKA Panza Kick Boxing Gold)

[ 8/10 – Reboxed Panza Kick Boxing with only a different final stage thrown in.]

**ACAR: 91%** - ' Best of the Best Championship Karate is almost a reproduction of my old favourite, Panza Kick Boxing. In fact, it's the sequel, subtitled Panza Gold Edition. Everything is the same – the crowd, the referee, the moves and everything else. The only difference is an advance stage at the end. When you've won a certain number of fights, you will be invited to participate in a Kumate. For the uninitiated, let me

suggest you take a look at the movie Blood Sport, featuring Jean Claude Van Damme. Here's a quick definition – a kumate is a fight with no referee and no rules. Your only aim is to make your opponent hit the ground and stay down before you do...[sic]..Best of the Best Championship Karate has pretty good graphics – the only problem is it is too similar to the original Panza Kick Boxing. The animations of your moves is excellent. Complex moves are a little slow, though actions are fast and well drawn. The sound of feet and hands connecting to mid-rift, leg or head are also well done. There is also a plethora of options and moves plus a fair few opponents to fight against. There is also training which directly affects your attributes like reflexes, strength and resistance to your opponent attacks. If you haven't already realised. I absolutely love Best of the Best Karate Championship. It has depth which other games of this genre lack. The addictiveness and reality also surpass the rest of the class.

## Betrayal (1990)

£29.99 Microprose

[ 6/10 – *Fun strategy game where you play the villain.*]

**ACAR: 91%** - ‘ Graphically the game is superb, and the package carries a very well-written manual that explains all the intricacies of the plot. The fight routines are displayed with huge sprite figures that wield their weapons exceptionally well, and die beautifully. One review cannot hope to present how entertaining betrayal is, just go out and buy it and see for yourself.’

**AF: 84%** - ‘Betrayal must be played by at least three players to be fully appreciated. Play it alone and you have to be beat three experts immediately. The complexity of the game makes it initially tough, but after a few abortive wars and stupid errors, it’s possible to start some really messy backstabbing political battles. The more the game is played, the clearer it becomes no one route leads to victory and that the possibilities for betrayal along the way are endless.’

**CU: 75%** - ‘Decent enough strategy but probably wont last.’

**AA: 74%** - 'a good game that requires a bit of strategic thinking. The four different levels are certainly taxing and if you start on the hardest level you'll certainly have a few problems becoming ruler of the land. It really makes a change to be a bad guy, and it's great fun organising assassinations and various nasty deeds. Betrayal is a must for strategic people out there who are fed up with playing mister nice guy.'

**ZZ: 70%** - 'The combat is far too simplistic and lacking any skill or judgement to be of any use to anybody. It reduces the game to a lottery. Frustrating, as combat is an important area of the game. What a shame.'

---

Not a bad little strategy game. Of course it hasn't aged that well and as Zzap 64 Magazine mentioned the combat isn't overly strategic. Still all in all there is definitely some fun still to be had if you remembered this back in the day or like strategy games.

**A WEB OF INTRICATE POSSIBILITIES - BUT FAIR PLAY ISN'T ONE OF THEM**

A new barrel of fine Welsh ale had just been broached. The royal palace's smoky dining hall resounded to cheery voices. To one side of the top table a harpist and a minstrel were struggling to be heard above the commotion caused by two dogs snarling over a bone in a corner.

Eating slowly, I lean forward to catch the breathless whisper of a rival knight. "They came in at a run, baying like wolves. Four wild-eyed barbarians ready to cut, gouge, pulverise and fall anything that moved."

That news was indeed music to my ears. My forces' attack on his wealthiest town had met with success. Financially weakened, militarily broken, and politically bankrupt, he could no longer hold influence at Court.

So long as no evidence of my wrong doing remained. So long as the Gods blessed the crops of my harvest. So long as the rumours of the capture of my brother were true. The throne was mine.

I've cheated, lied, spied and slaughtered.  
The fruits of Betrayal are mine.

*The West Marches is a corrupt land ruled by immoral leaders. You are one of four Knights with a lust for power. And in the pursuit of power, the end justifies the means.*

*Develop a mastery of political subterfuge, gaining places for your Courtiers at the palace of the King and Bishop, ready for the coup which will make you the master of Betrayal.*

*The bloodiest battles yield the greatest spoils. Strategically extend your domain, robur your rivals' resources, and tighten your stranglehold on the peasants of the land.*

*Betrayal involves a long, hard, ruthless struggle, starting with the economic management of your income and cultivation of your lands, culminating in the honing of your military strategy and execution of political subterfuge.*

*The towers provide your power base. Manage them successfully, and harness the locally needed to buy, build and fight for ultimate power.*

**Better Dead than Alien (1988)**  
**£19.95 Electra Software**  
**[ 8/10 – Really fun Space Invader clone that uses the mouse.]**

**GM: 81%** - ‘ Backdrop scrolling is jerky, control is distinctly sluggish but gameplay remains highly addictive due to the great password system. The Amiga’s superior sonic capability is exploited with an ‘argh’ every time the Argo is hit, and generally very good sound FX throughout.’

**ZZ: 72%** - ‘Space Invaders with add-on weapons and greater manoeuvrability is a surprisingly enjoyable game. It is a little overpriced.’

**AC: 48%** - ‘The game was developed as a spoof and as a result the programmers may have neglected the important Aspect of lastability.’

**ACE: 458 / 1000** - ‘The action is all very predictable and adds nothing new to the pack of shoot-em-ups that already exist. A simultaneous two-player option makes progress easier, but doesn’t add greatly to the action. The graphics aren’t even much to shout about. Strictly for shoot-em-up freaks who like a tough, if unexciting challenge.’

**CU: 4 / 10** - ‘in my opinion, the programmers have concentrated more on producing a game with a sense of humour than a playable one, and the end result is little more than uninspiring.’

Written by ex Oxford Digital Entertainment programmer Jason Kingsley, who had worked on the brilliant Hunt for the Red October game and Trivial Pursuit games. I owned this back in the day and personally couldn't disagree with the reviewers more. It is a Space Invader style shooter, but with ship, controlled by the mouse able to move anywhere. It is this mouse fast precision control which makes this game for me. Also with 75 levels there is quite a bit of variety into the mix. The level password system as well removes any frustration as well and makes you want to battle through to the end. So in summary, definitely not worth the full price back in the day.. But a fun enjoyable basic shoot em' up that still holds up well today.

**GM: 57%** - 'Five quid more for the Amiga version! Why?! It's certainly no better than the ST version. The action kicks off to a good start with a decent rendition of the Harold Faltermeyer theme, but apart from the driving section with its polygon graphics, I feel the machine isn't trying. Beverly Hills Cop is a game that, unlike the film, at the end of the day doesn't deliver the goods.'

# BEVERLY HILLS

This is a terrible game. Things start well with on the intro with veteran music maestro David Whittaker doing a fantastic rendition of the Axel F music. Then the game starts and you are stuck in a terrible Robocop Arcade style arcade warehouse. Except the mechanics are all broken with it really difficult to wrestle the sluggish controls. Battle your way through this then you get to drive a broken shopping trolley.. Well it's supposed to be a Mercedes but it certainly doesn't drive like it. Then on to a bad shooting section in a mansion garden and just as you are losing the will to live you enter a house to a shoddy 3D section and then the best most wonderful thing happens...The game ends and you can go back to the lovely intro music again. A really bad game.

**GM: 78%** - 'Hybrid combination of Ghost 'n' Goblins and Thundercats in gameplay, Beyond the Ice Palace takes the successful key elements of the two former titles and mixes it all up in one tough multiway scrolling arcade adventure...[sic]...On the Amiga, like Buggy Boy, the game is a near direct conversion from the ST. All the features, caverns, level layout, graphic and sonics have been recreated. Somehow during the translation a slight judder has crept into the scrolling, which, while noticeable, doesn't affect gameplay. The graphics hardly push thre Amiga, although, nicely detailed and using sensible colours, they're still only slightly improved, smoother 8-bit characters running around. Likewise, the Amiga sound quality is similar to the ST version, a touch better in effects and tune. The high – bordering on the frustrating – difficulty level of the other versions is still present, leaving little margin for player error. Even nine lives don't seem enough as the action is constant...[sic]...no way original in design or as a game idea, its playable fast-paced, addictive, demanding and generally very enjoyable.'

**ZZ: 70%** - 'A slightly above average Ghosts 'n' Goblins game.

**CUSR: 6/10** - 'Overall the excellent graphics just about make up for the mediocre gameplay, and the spirit's lair is sufficiently large to provide a challenge, both to hardened gamers and mappers, who should have a whale of a time trying to get all this down on paper. Not a bad game, but I get the feeling that an Amiga owner who splashes out £25 quid on this may feel just a teensy but cheated.'

**AP: 53%** - [R £2.99 Prism] 'Nothing special, but a bit of fun for the price.'

**CU: 38%** - [R £2.99 Prism] 'It looks and plays like an 8-bit game, and it has all the lasting appeal of a bag of chips, but I suppose for three quid it isn't bad.'

**O: 1/10** - [R £2.99 Prism] 'a completely unplayable and unjoyful game. Don't get it – unless you want a good laugh!.'

I used to love this game on the Spectrum. It hasn't aged fantastically well and is impossibly tough. But for an hour of your time those who want to reminisce or see how rock hard games used to be then give this game a whirl.

*[ 9/10 – Beautifully written text adventure. On of the best.]*

**ACE: 920/1000** – [Atari Review] 'enjoyable blend of traditional adventure and role-playing. You've got all the character interaction, parsing, and exploration aspects of an adventure combined with the challenge of manipulating

objects for trade and fighting as well as solving puzzles. And of course you must develop your character or die in the attempt. The combination of the two styles gives a game of great depth, with numerous sub-plots, challenges, and diversions.'

"Our doom is sealed."

Y'Gael turned away from the window overlooking the Great Sea. "The Guildmaster nears the end of his final quest," she said softly. "When he succeeds, for succeed he will, our powers shall cease to be."

The silence was unbroken for a long minute. Then a tiny voice near the door peeped, "Forever?"

"No." The old woman leaned forward on her staff. "The Age of Science will endure long; no one in this room can hope to outlive it. But our knowledge need not die with us -- if we act at once to preserve our priceless heritage."

"Wherein lies your hope, Y'Gael?" demanded a salamander in the front row. "What Magick is proof against the death of Magick itself?"

Y'Gael's dry chuckle stilled the murmur of the crowd. "You forget your own history, Gustar. Are you not author of the definitive scroll on the Coconut of Quendor?"

A tumult of amphibious croaks and squeals drowned out Gustar's retort. Y'Gael hobbled over to a table laden with mystical artifacts, selected a small stone and raised it high.

"The Coconut is our only hope," she cried, her eyes shining in the stone's violet aura. "Its seed embodies the essence of our wisdom. Its shell is impervious to the ravages of Time. We must reclaim it from the Implementors, and hide it away before its secrets are forgotten!"

The shrill voice of a newt rose above the cheering. "And who will steal this Coconut from the Implementors?" he scoffed. "You, Y'Gael?"

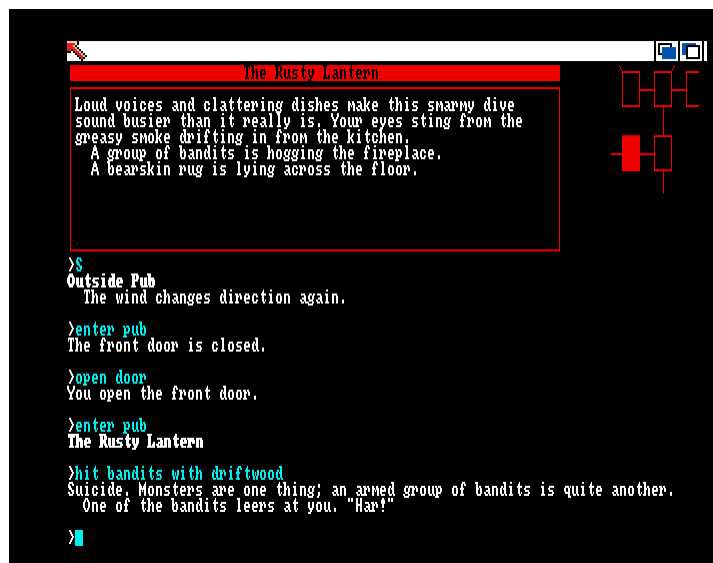

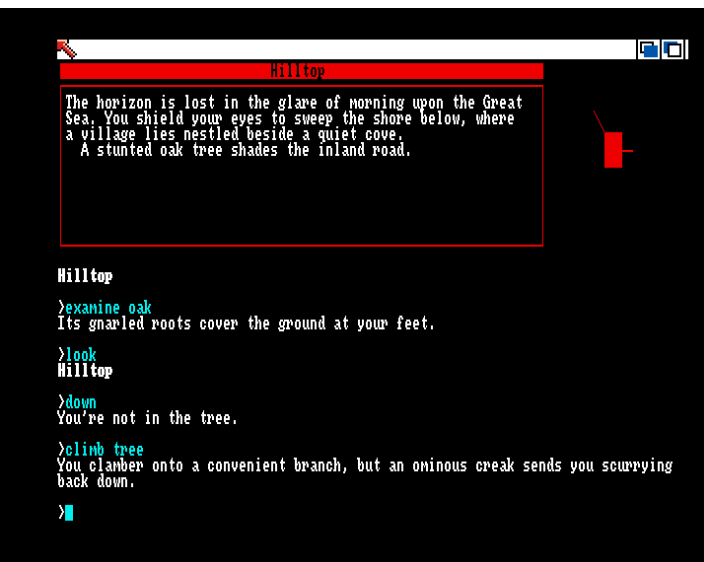

The violet aura faded at his words. "Not I, Orkan," replied Y'Gael, shaking the lifeless stone and replacing it with a sigh. "The fabric of Magick is unravelling. We dare not rely on its protection. Another champion must be sought; an innocent unskilled in the love of enchantment, who cannot know the price of failure, or recognize the face of death."

[MORE]

**CUSR: 9/10** – ‘Beyond Zork is a clever combination of an Infocom text adventure with a D&D type role playing game. I am not sure that the combination works well. Nevertheless, the game is a must for all Infocom fans, (the name alone should ensure that) for it is better than a number of their titles, particularly some of the more recent ones.’

**GM: 87%** – ‘I like this new style of game, the changes made to the infocom format are neat and work very well. The inclusion of the role playing elements add a little more spice to the standard text adventure, and with extra sprinkling of realism, Infocom are really cooking.’

**AF: 85%** – [R] ‘An update on the original Zork story, this casts you as a peasant who must seek out fabled treasure known as the Coconut of Quendor. The usual Zork rules apply generally, but here you actually alter the attributes of your player before you begin, in a sort of RPG style. Unlike other Infocom games, Beyond displays a map which shows your immediate area.’

I love text adventure games and especially Infocom games. This is also one of my favourite (Ballyhoo slightly pips it to the post). The writing is fantastic, I mean really, really good. Written by Brian Moriarty (pictured) who had already made a name for himself at Infocom with titles, Wishbringer and Trinity., before going to Lucas Arts and working on Loom.

The map on the top right of the game works really well allowing you never to feel lost of where the exits are. Yes I really like his game. The game also featured on the Lost Treasures of Infocom compilation and can be picked up today on [www.GOG.com](http://www.GOG.com) in the Zork Anthology. So if you love text adventures then there is no excuse to immerse yourself in this there is no excuse.

**THE LEGEND OF ZORK CONTINUES WITH AN EXCITING NEW STYLE OF INTERACTIVE FICTION.**

*The Zork® Trilogy has sold nearly one million copies, making it the most popular entertainment software product ever! Now, Infocom introduces an exciting new Zorkian universe that's bigger and better than ever. Beyond Zork blends the puzzles and fine prose of interactive fiction with the combat and character-building of role-playing games, and enhances the whole with an incredible new interface.*

Dread times have befallen the Kingdom of Quendor. The wizards have mysteriously disappeared. The Enchanter's Guild Hall lies in ruins. Villages are abandoned, drunken men mutter strange tales, and vicious monsters haunt the streets and wastelands. Now it falls on you, a lowly peasant, to unravel the meaning behind these ominous events. Will you accept the challenge?

Of course you will. For you're a hardy adventurer, ready to confront the most fearsome foe. And in *Beyond Zork*, you have an arsenal of new weapons and abilities at your disposal.

You start by designing your own character. Choose from such diverse attributes as strength, endurance, compassion, and luck, or let the computer select for you. As you venture onward, your character will evolve, reflecting your success in your quest.

*Beyond Zork's* sophisticated new interface makes interaction more natural than ever. In the heat of battle, the special function keys let you strike the decisive blow with a single keystroke. There's even an on-screen map to chart your progress!

As you grow in experience and abilities, you realize that you're being prepared for a great task, a task of which you know nothing...

Your adventure begins as soon as you open your BEYOND ZORK package. Inside you'll discover your BEYOND ZORK disk, a lavishly-illustrated edition of *The Lore and Legends of Quendor*, and a fabulous map.

as yet. Your search for the answer will lead you deep underground, where unspeakable monsters guard the world's most fabulous treasure—the fabled Coconut of Quendor.

*Beyond Zork* was written by Brian Moriarty, award-winning author of *Wishbringer®* and *Trinity®*. Fans of Infocom's fantasy series will recognize characters and locations from previous stories, while old and new players alike will enjoy exploring the Zorkian landscape as their challenge increases and their character grows in strength and power.

**ENTER THE WORLD OF THE MASTER STORYTELLERS.**

Interactive fiction is a lot like your favorite book, using words to tell a story that progresses through time. The difference is that YOU are the main character. The story comes alive as you go places, meet people, outwit opponents, and tackle a wealth of puzzles and predicaments.

Journey to a place limited only by your imagination—the world of Infocom's interactive fiction.

The BEYOND ZORK screen shows not only the vividly descriptive prose Infocom is famous for, but a map that changes with your location in the story and a window displaying the room description, your possessions, or your character attributes. Screen shown is for Commodore 128 version.

*[4/10 – Lightweight business  
simulator.]*

**O:** 81% – ‘Don’t dive into Big Business expecting something along the lines of Wall Street Stock Market Simulator or anything like that. Endless number crunching and the sort of data that make tax inspectors go weak at the knees are definitely out. The emphasis is on fun not figures (apart from the secretary’s). In fact, this game’s limitations are, in one sense, it’s saving grace...[sic]...What you can expect is a few, solid hours of entertainment at a time, not a quick blast between meals.’

**AA:** 67% – ‘Initially, Big Business is quite good fun and it really comes into its own in the multi-player mode. However, this is probably due to the humorous graphics, because after a while boredom sets in due to the repetitive nature of the gameplay. The high price is another stumbling block and it would have been better suited to the budget market.’

O: 40% – ‘A pretty grim affair all round, which shouldn’t really have left the drawing board. It would be just as effective running on a Psion Organiser.’

A business light simulator which for me didn't have enough oomph for me to get into it. Alright if you learn the ropes, but in truth probably won't hold your interest for long.

## A SEMI-REALISTIC WACKY BUSINESS SIMULATION!

Have you ever wondered how it would be to run your own corporation? Did you ever wish you were in your boss's shoes? Or do you just want to prove you can compete against two other players in a match of strategic whiz and business skill?

If you answered one of the above questions with YES, *this game is for you!*

BIG BUSINESS is a not so serious simulation of a large manufacturing corporation. Three players, each starting off with equal assets and marketing the same product, compete to acquire the greatest net worth by the end of the game. Players must make decisions on how much money to spend on advertising, research and development or raw materials; at which price to sell the product; whether to build or close factories and at what capacity to operate the factories; and whether to borrow money or repay outstanding loans.

You can initiate takeovers, detect and catch opponent's spies, start law suits and create worker's unrest in your opponent's company.

You don't have to be a business genius to enjoy this game. With its beautiful graphics and excellent game play, it's fun for everyone!

### FEATURES:

- Choice of 20 different product groups and occupations
- Playable alone (against two computer opponents) or with up to three players together
- Loading and saving of game status at any time possible
- NO on-disk protection
- Digitized sounds

*[6/10 –Straight forward basic racer. Playable enough.]*

**O: 65%** – ‘Aside from graphics, it’s really no different to any other bog-standard racing game available. Of course it’s no worse either. There’s a certain raw playability about a racing game that dispenses with all the frills., but unfortunately Big Run doesn’t provide us with it. It is playable, but not to an extent that’s going to see you coming back time after time. Big Run is just one of the many applicants to the average conversion line.’

**AP: 61%** – ‘Extremely basic gameplay and over-familiar graphics make this pretty dull going.’

**AC: 60%** – ‘With nothing new to add to the glut of racing games on the market, Big Run is destined to vanish without making too many ripples in the software pond. If this had been released two years ago we’d have loved it to death, but in these modern Technicolor times, it just doesn’t cut the proverbial mustard. Just another driving game when all’s said and done.

**AF: 58%** – ‘With only six stages to work your way through you’d expect a bit of a challenge. Actually each stage is relatively easy and you’ll complete the entire game within a day, leaving you with a pretty box and vey little else.’

**AA: 17%** – ‘You’ll regret even booting the game in your Amiga. Aaagh! Trash it! Burn it at the stake! I can’t take it any more., get it away from me.’

---

Based on the bog standard Jaleco racer from 1990. I had quite a bit of fun with this arcade racer. Sure it is all very basic and too easy, but the handling is responsive and for while it lasts it is enjoyable enough for what it is.

Arcade graphics for comparison.

# Bill and Ted's Excellent Adventure (1991)

£24.95 Capstone /

Dev: Off The Wall

**[4/10 – Cute, but with no puzzles or little dialogue. There is little to hold your attention.]**

**AUI: 80%** – ‘The game contains digitised shots from the real movie, and four levels of difficulty, with some pretty graphics and lots of whacky situations! Is Beethoven really Val Halen in disguise? How do you get Michael Angelo off the ceiling? How do you get Joan of Arc to cool down while she is burning at the stake, and does Mary Antoinette eat cakes while she is dieting? All this and more will be revealed, but remember for juniors only, Dad must not go near it.’

**AP: 58%** – ‘The whole thing is just too undemanding and unspectacular to merit the asking price. It would be ideal for the younger players, but older dudes really needn't bother – it just isn't excellent enough to really cut it.’

**AF: 58%** – ‘Bill and Ted could have been ‘triumphant’, as the movie has scope for a radical adventure game, but this is little more than a frantic scavenger hunt.’

**CU: 57%** – ‘Too easy to compete, for real fans only.’

I love the Bill and Ted movies and it annoyed me that pretty much all the games released for the film were for the most part terrible (Gameboy game not included as that was brilliant). This one isn't a terrible game, just far too basic, not only in the puzzles, but the next to no dialogue (too important staples in adventure games) in the game. All in all it makes the game a painfully tedious exercise in making your way through the game... with it missing both challenge, or a world in which to lose yourself in. Young kids might enjoy, maybe, but I doubt. For the rest it's only for the nostalgic or daft people compiling an Amiga Game encyclopaedia to play.

[2/10 – *Slow and dull.*]

**AA: 68%** – [R] 'The game plays far too slowly to anything close to a feeling of being supposedly the most dangerous racing experience ever. There's nothing here that hasn't been done better before, and no one but the most desperate racing game fanatic will get many laughs from accepting Bill's challenge.'

**AF: 50%** – [R] 'How does it race? Well like a lot of other average racing games but I couldn't face the 300 laps of some of the tracks – it gets heavy going. The controls works well after a bit of practice but on some circuits it can get a bit tedious because it's so easy.'

---

Distinctive Software, who had made a name for themselves with the Test Drive 1 and 2 games and 4D Sport driving handled the Amiga conversion of Konami's game. This game is pretty poor, being far too slow and dull to drive. If you have played the Days of Thunder game or 4D Sports Driving you will know exactly what to expect from this (i.e. not a lot). All in all best avoiding this game really.

**DO YOU HAVE RACING IN YOUR BLOOD AND ICE IN YOUR VEINS?**

Konami gives you the truest depiction of NASCAR racing with bit map scaling that provides the most detailed images available.

Konami® introduces the only NASCAR® endorsed stock car simulation that turns your disk drive into a pit pass to the most authentic racing environment available. Co-designed by Winston Cup Champion Bill Elliott and Distinctive Software™ — developer of Test Drive™ and The Duel™ — this is a test of your mettle and milliseconds on the banked ovals of six official, perfectly scaled NASCAR tracks like Daytona, Talladega, Bristol, Darlington, Michigan and Atlanta. Or the two twisting road courses of Sears Point or Watkins Glen. All with bit map graphics plus a scaling technique, creating graphics so detailed you can actually read the car's make when you go bumper to bumper.

On-screen statistics tell you course length, maximum banking and the total number of laps in each race. With this vital data, adapt your car to each unique track by adjusting gear ratio, transmission, spoiler angle and tire stagger. Depending on whether you're racing or qualifying for pole position, you must also decide which type of engine to use. But "dial in" your car carefully. One miscalculation could send you reeling into the wall.

When you think you have the right stuff, drop the hammer on NASCAR's finest field of racers — including Bill Elliott himself — in single races or compete for the Cup in the Championship Season.

# Billiards Simulator (1988)

£19.95 ERE International

[3/10 – Rudimentary Billiard simulator.]

**ACE: 819 / 1000** – Billiards simulator is a very competent piece of programming, and is very enjoyable to play. Well worth having a look at if you are interested in sport.'

**YA: 42%** – 'There is a whole host of other parameters that can be altered to tweak the game as you see fit. These include adjusting the gravity of the balls ranging from the Moon to Jupiter. All these options are very nice but I can't see anyone using them after a bit of initial experimentation. Billiards with no pockets on the table and in Martian gravity! Don't call us, we'll call you.'

**AC: 35%** – ‘The graphics are reasonably good, particularly on the menu screens, and there are recognizable effects and an excellent jazz piano soundtrack which plays before the game. But they don’t make up for the poor gameplay and lack of realism.’

Man I love the intro music on this game. On starting the game though it all went horribly wrong. The first thing that struck me is the missing something from the table, six in fact, being the pockets. A quick Google search later told me that there is a variant of Billiards played on a “Carom” table that has no pockets. One scores by getting the cue ball to glance off one object ball onto another. This is different from pocket billiards table (the one I knew) where object balls must be hit into the pockets. All in all this makes for a really dull game to play. The overall mechanics aren’t too bad and if you are a huge fan of “Carom” Billiards as opposed to normal billiards then go knock yourselves out with this. For me however I will stick with Jimmy Whites snooker, thank you very much, I like my pockets 😊.

## Billiards Simulator 2 (1991)

£25.99 Infogrames

[6/10 – *Competent Billiard simulator..*]

**AA: 75%** – ‘It’s pretty easy to sum up Billiards II. If you like Billiards and Pool then you will love this. The 3-D view makes the game very attractive and extremely realistic. But unfortunately this game won’t appeal to everyone, and the more blood thirsty among you will probably find it very boring. For the more placid games player.’

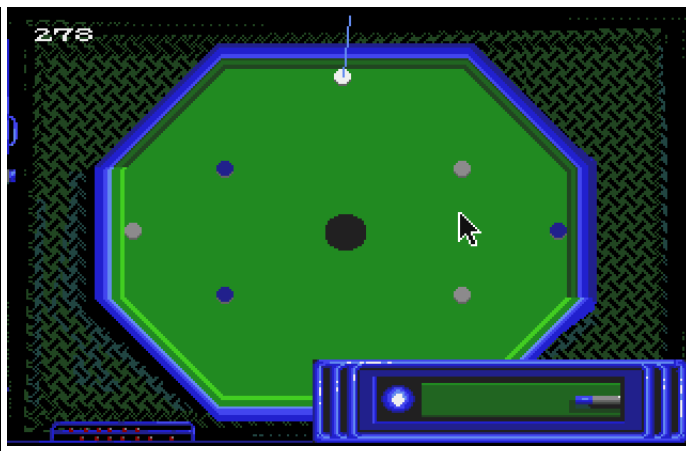

**CU: 70%** – ‘Here you are given a choice of three types of games: French Billiards, which uses three balls; American billiards, a 15 ball game; and futuristic billiards, basically a couple of fun games played on odd-shaped tables.’..[sic]...’On the ball billiards sim which will test your skill.’

**AF: 58%** – ‘looks rather scrappy and dated next to Virgin’s somewhat slicker product.\* If you have to play a game based on the old ‘green’ table, it has to be said that Jimmy White’s your man. The variety and options offered here can’t compensate for Jim’s class.’

**AP: 47%** – ‘Might just about be okay if there weren’t any other 3D pool/snooker games around. But there are, so it’s not.’

**GX: 3.5 / 5** – ‘If you are looking for a nice relaxing game with something slightly different thrown in then this is definitely the game for you.’

The problem is that by September 1991, the World had seen Jimmy Whites Whirlwind Snooker by Archer Maclean. So against that, this game is incredibly crude to look at and play. Which is a shame as it does a reasonable, no frills, game of billiards with three different variants (French Carom, American Pockets Billiards and Futuristic hexagon tables). So if you love the game of Billiards over Snooker or Pool, or simply curious to give Billiards a go, then this is worth a whirl. For the rest of us best to play better table games like Jimmy Whites.

## Bill's Tomato Game (1992)

£25.99 Psygnosis

[7/10 – Fun, original puzzle game.]

**AUI: 90%** – ‘BTG is a surprisingly addictive game. There are lots of nice amusing additions to finish off the rough edges, including some really nasty ways to die. Maybe the music will get on your nerves but if it does, it’s easily switched iff. And there is a password system to save a shred of your sanity. Destined to become a cult classic.’

**AF: 88%** – ‘Altogether, Psygnosis have managed to do something original once again. There’s no chance of this ever being as successful as Lemmings, but for many an hour of taxing distraction you could do much better than this.’

**AA: 88%** – ‘Bill’s Tomato Game is certainly a strange little title and one which provides a much needed injection of originality into the puzzle genre while we all desperately wait with baited breath for Lemmings 2. Bill’s Tomato Game is great fun to play and doesn’t suffer from the high boredom level which most puzzle games suffer from when you come unstuck. This really is a case of forcing yourself to have one more go at that frustrating last level. It’s ripe and ready for you to pick.’

**O: 82%** – ‘I wasn’t expecting much from Bill’s Tomato Game so it is with some surprise and a great deal of pleasure I can report that, although it doesn’t rank as one of the best puzzle games ever, it still is a fine, fine game.’

**AP: 81%** – ‘If you liked Lemmings, and you’re looking forward to Lemmings 2, then you’re sure to like this. Puzzle games need new ideas to make them interesting, and this has got plenty.’

**AC: 80%** – ‘So is Bill’s Tomato Game any good? Well, yes and no. Yes, because of the original idea, the great graphics and delightful little tune. No, because after a while it does get a bit monotonous and a little boring.’

Named after Psygnosis employee Bill Pullan who did the Aquaventura game and went on to do Mace Griffin : Bounty Hunter and the MotorStorm games for Sony and still works at SCE (Sony Computer Entertainment). In this game you play Terry the tomato and it has you place a variety of objects on the screen to help Terry arrive safely to the exit at the other side of the level. Once you feel you have everything in the right place, then you hit the traffic light button and see if you have helped Terry the Tomato one step closer on his journey or turned him into ketchup. I really like this game, there is a password system and so you seldom get frustrated and it can get quite a brain teaser as the levels progress. One game this does remind me of is the PC game "Impossible Machine". Still if you like puzzle games then this is a real beauty and one that would make a great little touch screen game on phones and tablets.

# Bill's TOMATO GAME™

Meet Terry & Tracy, an everyday pair of walking, talking tomatoes caught up in a totally unfeasible tale of rivalry, evil squirrels and mystical lands... oh and, erm, love!

## INGREDIENTS

Tracy and Terry are the cream of the tomatoes. Apart from being particularly ripe and squashy specimens, they're both in love and determined to escape from the lorry taking them to the Purée factory so they can run away together and get married.

And so, after being hurled into the back of the delivery truck, they make their move, slipping quietly out of the back and squopping (animals hop, tomatoes squop!) away to happiness. Whatever could go wrong???

Well, as it happens, lurking in the trees along their path, an evil squirrel was eyeing up Tracy's plumb form and decided to take her for his own. Just as the two love birds were passing by a tall vine, the squirrel struck, whisking Trace away from Tez and carrying her away to his vine-top abode.

Terry saw red. His skin puckered and his little crown of leaves trembled with anger. So, off he dashed in pursuit of the rascally rodent to win back his sweetheart...

*And you thought tomatoes couldn't climb trees!!*

Tracy et Terry Tomato sont amoureux - le problème c'est qu'ils se trouvent à l'arrière d'un camion qui les amènent à l'usine de purée! Ils s'échappent donc en sautant du camion et ont l'espoir de vivre heureux loin de tout. Cependant, leur bonheur tourne court lorsque un méchant écureuil enlève Tracy et l'emène dans sa cachette haut perchée. Et donc Terry part en poursuite.

Tracy und Terry Tomato sind verliebt. Eigentlich kein Problem - nur daß sie in einem LKW auf dem Weg zu einer Ketchup-Fabrik sitzen. Nach einem beherzten Sprung von der Ladefläche des Lastwagens hoffen sie auf eine gemeinsame glückliche Zukunft. Ein böses Eichhörnchen entführt Tracy auf den Gipfel einer Weinrebe und Terry startet mit seiner Verfolgung.

Tracy e Terry Pomodoro sono innamorati - il brutto è che sono anche su un camion che li sta portando alla fabbrica di conserva! E quindi se la svignano alla chetichella, scivolando giù dal camion e dandosi alla fuga, verso la felicità. La loro felicità è, però, di breve durata, quando un malvagio scoiattolo rapisce Tracy e se la porta nella sua tana sopra la vigna. Ed ecco che Terry si lancia alla riscossa.

Man this is a terrible game. The first thing that strikes you is there is about 4 disk swaps just to start the damn game. Then you choose your fighter and endure even more disk swaps... Then after walking painfully slow around different locations you decide the game is total junk and put it in its amazing box art. It such a shame as the graphic are nicely done and the sound.. Its just the important bits.. The game play and slowness of it all that turns this all into a painful experience.

Incidentally the box art work by legend **Bob Wakelin** who is credited with the fantastic Ocean logo and some of the most fondly remembered box arts. The Billy the Kid box was Bobs favourite of all his art works.

It was just a pity the game was terrible,

*"A couple of times the guys at Ocean said to me 'Look Bob, this game really isn't very good so we need an extra special cover.'*

*I suppose I should feel guilty for it."*

£25.99 Palace Software /

*[6/10 – Slickly done original shooter/non shooter, that you will either love or hate.]*

**ACE: 919** – ‘This strategic shoot-em-up – but without the shooting – sounds a lot more complicated than it actually is. Once the mode of play becomes familiar the action proves extremely addictive, the game is nicely balanced to provide a continual challenge.’

**CVG: 88%** – ‘Fabulous music, unusual gameplay and exotic graphics make up for a basic lack of variation in the gameplay. Addicts of arcade adventures with the accent on tactics rather than the trigger-finger should find this a challenge worth meeting.’

**ZZ: 84%** – ‘Far off in the future, mankind is becoming weaker with every generation as their gene structures struggle to keep up with the environment. A race of robot frames with human brains are the only hope for the future. At present they’re undergoing rigorous testing in the bio challenge. The special test dimension consists of six levels, each of which can contain up to six planets. Your objective is to collect four pieces of an amulet, obtained by destroying enemy robots, by crunching them by dropping a power slab onto them. Once this has been done a special guardian must be destroyed (using ammunition collected on previous levels) to allow access to the next level.’

**O: 82%** – ‘The first impression that Bio Challenge gives is of being merely well presented and not much of a game, but a few minutes work is rewarded by the first nipping bite of addiction.’

**CUSR: 75%** – ‘Bio Challenge is definitely worth a look. It isn’t the most absorbing game you’ll have ever played, and there might have been just a little bit more to do. It’s nevertheless an impressive release, and it’s quite the cutest post holocaust game I’ve seen in a long while.’

---

This is **Paul Cuisset’s** first game on the Amiga. He would go on to do Future Wars, Operation Stealth, Cruise for a Corpse and Flashback games. It also featured **Denis Mercier** on graphics and **Jean Baudlot** brilliant music (both would work with Cuisset on many of his games including Flashback.

Therefore with such a high pedigree of developers it is interesting to see how they started out. This game is weird but at the same time compelling, with game mechanics that completely flies in the face of standard shooters prior to this game and since. As much as I commend a game developer trying something new, in this instance I personally didn’t feel it worked and instead had wishing they had stuck to doing a traditional blaster. In summary, I know there is some who adore this game and whilst I am not one of them, I can see why there are others that do. This is definitely a Marmite game and worth you giving some time to it, to see which way your bread is buttered.

*[4/10 – poor conversion, of an  
over rated arcade game. Nice  
music though.]*

**ZERO: 81%** – [R] ‘As well as blasters and bombs this short-arsed commando also has a bionic bit, Nah, stop laughing you cheeky gits – it’s his arm and it can be used as a sort of rope and grappling iron to get onto higher platforms. (Much like the caped crusader in his later game.) Still, it’s not really my cup of tea – challenging and popular in its time, but not for me, though.’

**CU: 80%** – [R] ‘It’s very fast. The only real problem is the scrolling. Unlike the lovely 64 version, the Amiga game uses the dreaded push-flip-scroll. But hey, when you’ve got a game as good as this one, who care?’

**AUI: 8/10** – ‘Despite its quirks, Bionic Commando is really excellent fun. It can be quite frustrating at first but stick at it and you will be glad you did. For it possesses the quality of first rate gameplay that will bring you back to it again and again.’

**CUSR: 7/10** – ‘It has to be said that Bionic Commando has been translated really quite well from the coin-op. The graphics are close, but not that impressive in their own right (the coin-op wasn’t too impressive in the first place). The scrolling seems to have been a botched job. Rather than continuous scrolling, keeping the main sprite in the centre, it works on ‘walk a bit-scroll-walk a bit-scroll’ technique that can at times be quite infuriating. In direct contrast to the average graphics, the sound has to be some of the best I’ve heard on the Amiga so far. There is no FX, but each level has it’s own tune, and level one particularly has a wonderful jolly bit of salsa featuring some excellent instrument samples. In terms of gameplay BC isn’t the most rewarding game I’ve played, but it’s still enjoyable enough to hold your interest for a good while to come, as ‘just one more go’ addictiveness is certainly in evidence.’

**AF: 81%** – [R] ‘A classic coin-op comes crashing to Earth. Basic sprites, glitchy control and crushingly twee music conspire to ruin a good platform/combat game. It strangely draws the interest though, in the way many really duff games do.’

**ZZ: 35%** – ‘Play the C64 version if you can, but if you can’t, that’s still no excuse for wasting money on the Amiga version.’

**AP: 30%** – [R] ‘Terminally flawed conversion that isn’t worth considering unless you’re a real masochist. More of a Chronic Commando than a Bionic Commando.’

---

Terrible arcade conversion, that is actually inferior to the 8bit versions. Interestingly the coder of this (**David J. Broadhurst**) went on to do Assassin on the Amiga for Team 17 and did the mightily impressive Bubble Bobble, so it wasn’t through lack of skill..One suspects this was rather a rushed out game and it shows. As mentioned in the reviews the only saving grace is the music.

Original arcade graphics for comparison.

£FREE Public Domain /

*[8/10 – Simple, Free and a brilliant 2 player game.]*

I have given it the name that most people remember it a, which is Biplanes. Salmon-Pink Max was actually the sequel...Both games were identical apart from the sequel allows you to play the computer and the original was only two player.

The game itself is simplicity itself.. Basically an update of Combat on the Atari it has you control a biplane with the express purpose of shooting you opponent out of the sky. That is it pretty much, but man is it addictive and as a two player game will soon have you and your opponent screaming at each other, as friendship is forgotten and competition takes over. I love this game.

## Birds of Prey (1990)

£34.99 Electronic Arts /

Dev : Argonaut Software

*[7/10 – Ambitious game. Too ambitious for the Amiga though. Best to play it on PC.]*

**CU: 94%** – ‘takes flight simulators about as far as they can go on the A500. You’ll certainly not be stuck for choice with this sim. A game you must not miss.’

**AC: 94%** – ‘easily the most addictive and playable flight game on the market. Realism buffs will be advised to go for Flight of the Intruder or ProFlight, but those of us born with the need to stuff Mavericks down the throats of computer-generated bad guys will lap up this game like a starving cat and bowl of catnip-flavoured cream.’

**Zero: 90%** – ‘may be as hard to get to grips with as climbing Mount Everest with an anvil sellotaped to your forehead, but strangely enough that’s part of the fun.’

**AF: 88%** – ‘There is so much in Birds of Prey that flight-sim fan could disappear for weeks. Campaign scenario works well, the background detail is very strong and the variety of planes is, of course impressive in the extreme. Graphics are strong, especially the planes themselves, and the levels are set so that both beginners and hardened pilots can have fun. Letting it down is the frame rate. The graphics aren’t smooth enough and there is an annoying jerkiness. It might be understandable, but it isn’t forgivable. The lozenge control system would work so much better if the update rate was better. As it is, they combine to be irritating at the moments when you need to be clear-headed and quick.’

**O: 90%** – ‘has much to offer aircraft enthusiasts who want an opportunity to ‘fly’ more exotic types of plane, but the rest of us will find more enjoyable fare elsewhere.’

**AA: 86%** – ‘Birds of Prey is the most thorough flight sim out today. Everything related to air combat is included in depth and detail. It manages to create the computerised, dehumanised, feel of modern air combat extremely well. The downside of this means that it is complicated and definitely not something for the casual player who doesn’t want to spend hours reading the manual.. My only complaints are that 30 routines are jerky when you have the detail turned up and to have a chance of controlling the plane you MUST use an analogue joystick. Any flight sim fan should buy this.’

**AP: 81%** – ‘Certainly the most complex flight sim to date, and quite possibly the most enjoyable to play – it’s virtually guaranteed to hold your attention for months. But, at the risk of labouring the point, those darn jerky graphics will ruin it for many.’

**GX: 4 /5** – ‘Overall it is a superb release which will appeal to the more experienced flight buff with many hours of computer flight time under their belt.’

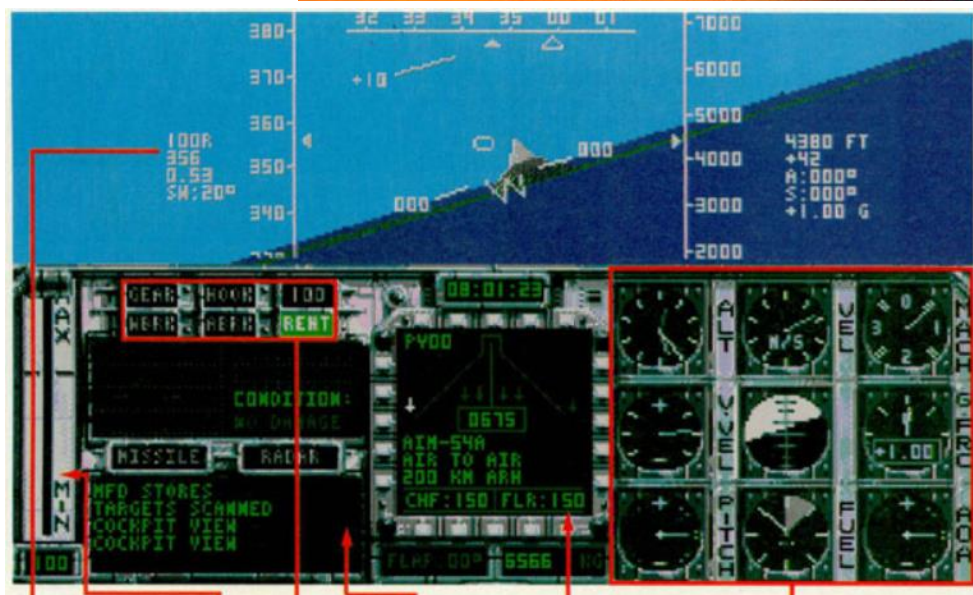

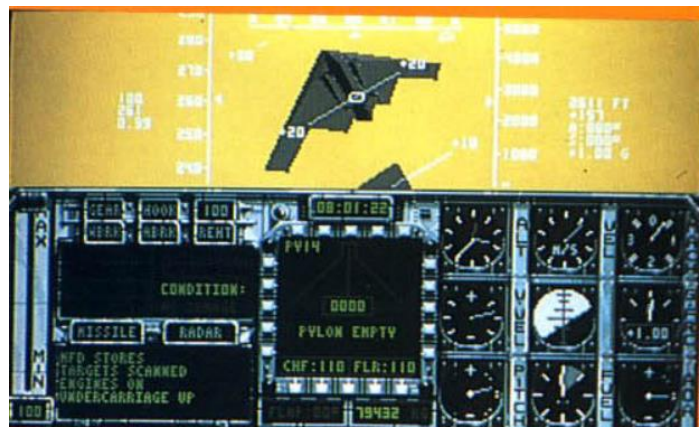

Argonaut Software is of course these days more famous for creating the 3DFX chip for Nintendo and working on Star Fox and Stunt FX. In fact Peter Warnes who did the graphics engine on this would be the main person (alongside Carl Graham) were the two main people behind the 3D game engine of Star Fox.

This is an incredibly ambitious game with an impressive roster of 40+ aircraft to fly in the game. Of course most of them to me at least felt mostly identical to fly and the cockpit inside is also identical. Never the less, when this came out for those who had the patience this game was wonderful..but for myself as a kid I simply found it too much a chore to play and dull. As an adult I am impressed at what Argonauts managed to achieve on the humble Amiga but still find it too slow to play. Try the PC version instead of this.

**JEZ SAN AND THE ARGONAUTS**  
 The team behind *Birds Of Prey* is Argonaut software. Headed by industry veteran Jez San, they've been responsible for games such as *Starglider 2*, *Afterburner* and *Days Of Thunder*. *BOP* was originally scheduled for a 1990 release under the name of *Hawk*, but other projects, team changes and 'acts of God' all contributed to an extraordinarily hefty delay. . Coder Chris Humphries has been with the game from square one, starting work on it way back in the summer of '89. Innumerable other programmers have chipped in on various stages, adding names such as Peter Warnes, Giles Goddard, Ian Crowther and Herman Serrano to an extremely long list of credits. It's highly unlikely that we'll ever see a sequel.

It’s a simple wargame with the famous PSS arcade sequences. Nicely presented but game’s very limited and won’t be absorbing for long.’

Not to be confused with the Dreadnought data disk by Dr Peter Tuscan. This is instead quite arcade blaster that has you simply finding the ship and then shooting it. This is a game better known on the 8 bits and perhaps on those machines the simple game play is engaging enough. But on the Amiga I didn't feel there was enough here to keep me entertained at all.

"My power will not die; whosoever uses the Black Cauldron for evil will be all-powerful, for my blood will flow with his, and together we will either rule the world or destroy it." So cursed the evil king as he was thrown alive into a crucible of molten iron, where he was captured in the form of a great black cauldron.

Find the Black Cauldron and defeat the forces of the wicked Horned King by destroying the cauldron's magical powers, removing it forever as a threat to humankind.

Travel through eerie forests. Swim swift rapids and alligator-infested waters. Penetrate even the dark halls and dank dungeons of the Horned King's castle!

Take counsel from Dallben, mightiest enchanter in all Prydain. Explore with the beautiful Princess Eilonwy, faithful Gurgi, and would-be bard Fflewddur Fflam.

The closer you get to the Black Cauldron, the more precarious your position will be. Eventually you will have to face the Horned King himself. With you, brave adventurer, rests the fate of the world.

[8/10 – Good Dungeon Master clone.]

**AA: 93%** – ‘Black Crypt is a very atmospheric addition to the growing range of role playing adventure games on the Amiga. Eye of the Beholder and DM fans will lap it up, while Captive freaks will probably find the control interface a little annoying to begin with. It’s not badly designed or cumbersome, just different to what myself and others have been used to after playing Tony Crowther’s efforts. Graphically superb, the icons and objects are thorough, the 3D is convincing and the screen size is larger than usual. Addictive from the off, and no doubt very challenging in the long run.’

**O: 92%** – ‘...The control interface, it’s so intuitive that five minutes into the game you won’t even notice it. That’s important, because in a game of this type you want to concentrate on enjoying getting your head around the puzzles or giving the wandering monsters what-for, not struggling with an over complex spell system. What finally tips the balance in Black Crypts favour is the delicate line between mental effort and combat and the superb the plot leads you through the game. It wont trip beginners up too much, but neither will experienced players stroll through it unhindered. What more can I say except buy it?’

**CU: 90%** – ‘The puzzles are pitched at exactly the right level, the control system is easy-to-use and the atmosphere generated incredible. Although it’s highly derivative of several other title, Black Crypt is a must buy.’

**CVG: 90%** – [R] ‘Originally released by Electronic Arts, Black Crypt is the only real alternative to SSI’s Eye of the Beholder. There are huge mazes to negotiate and loads of slaving beasts to batter. An excellent RPG.’

**AP: 85%** – ‘Its parts are individually ordinary and yet together they somehow manage to entertain and enthrall to a large extent. A fine Fantasy Role Playing romp which will please both novice and veteran. It may even convert a few cynics like me.’

**AC: 85%** – ‘Overall, Black Crypt is basically Dungeon Master with knobs on. The level of difficulty might put a few of the less experienced RPG fans off, but for the conquerors of Dungeon Master and its ilk, this is definitely the game for you.’ The graphics make it instantly like-able, and playability-wise you can’t go far wrong. It’s not a classic, but it’s much better than some of the other rubbish on the market.’

**AF: 78%** – ‘A competent role-playing game which just isn’t really innovative enough to provide a sufficiently new challenge.’

This was Raven Software's first game who of course went onto work so well with Id software and go on to produce Hetic and Hexen games and then go onto do such gems as the X-Men Legends and Marvel Ultimate Alliance and Quake 4 to name but a few.

What we have here is a really good Dungeon Master clone. It doesn't offer anything particularly new and isn't as good as Eye of the Beholder.. But if you like this kind of game then this you will find much enjoyment with this.

# "BLACK CRYPT" - IF YOU LIKE YOUR DUNGEONS DRIPPING WITH MONSTERS.

The "Black Crypt"™ positively oozes with twenty five of the most hideous and despicably cunning monsters.

They await you in a dozen plague-ridden inter-connecting dungeons, on 20 spell binding levels.

The most heinous among them is the Dark Lord Estoroth, who, many centuries ago, had been banished from the land by four Guardians with awesome supernatural powers. In the process, the Guardians and their weaponry had been lost.

Now Estoroth is back, seeking a ghastly revenge against a defenceless people.

Your task is to lead an intrepid band of adventurers to retrieve the mystical artifacts that may hold the power of the four Guardians and provide your only chance of saving the world from evil.

The "Black Crypt" is the most electrifying fully animated dungeon adventure, with exceptionally detailed rotating point-of-view perspective.

It features real-time combat and spell-casting, all in 64 colour extra half-brite Amiga graphics.

But be warned, you enter this breeding ground of evil at your own peril. And hopefully not on a full stomach.

## Black Hornet(1991)

£7.99 Hi Tec Software

*[4/10 – Generic shooter that feels like its running through treacle.]*

**AP: 38%** – ‘Pretty blaster with game play so crushingly tedious that I’ll personally buy anyone who can play it 10 times in a row without suffering permanent psychological damage a pint. Mind you the Ed likes it.’

Dull generic shooter, that although it plays ok, constantly feels like you are flying through treacle as everything is so slow. Screams of rush port of a predominantly C64 game to cash in on the 16 bit market. All in all this is one best to avoid.

## Black Lamp (1988)

£19.95 Firebird

*[3/10 – Nice graphics, let down by frustrating gameplay.]*

**GM: 85%** – ‘Jolly Jack the jovial jester appears as if by magic on the Amiga. His quest is to rid the medieval kingdom of monsters and dragons by collecting nine magic lanterns. His may also gain the bonus of marrying the princess if he is successful. The Amiga conversion is the same standard as the Atari ST game (reviewed in TGM004, 86%) with colourful cartoon characters and detailed backdrops. Basically a platforms and ladders variant, and while still highly enjoyable, Black Lamp could be have been improved for the Amiga. Music comes in the form of a speedy Greensleeves tune- which grates after a while – and accompanied by suitable sound effect.’

**ACE: 825 /1000** – ‘This pretty, musically pleasant little arcade adventure gains quite a bit on its way over from the ST, but not in the one respect it was so desperately lacking in, namely game-play. Running round flip-screen castles and scrolling outdoor scenes makes a nice start, but when it’s just about all there is, you’re entitled to feel disappointed. Sorcery packed a good deal more game into a far smaller map, and that one came out years ago.

**CUSR: 7 /10** – ‘I was very impressed by Black Lamp. Unlike a lot of Amiga games these days, this really does manage to provide a long term challenge that arcade-adventurers and mappers alike should revel in. Well worth a look or a splurge, even.’

**YA: 50%** – ‘This game is good to play, but it could have been oh so much better had someone put a bit of effort into the conversion, and at least improved the screen a bit.’

Graphically this game isn't too bad with cartoon cute characters throughout..which is a real shame as the game play is complete travesty with an unending swarm of beasties coming at you and a really fussy ladder climbing making it next to impossible to climb ladders unless you are perfectly lined up. The fact this got such good reviews back in the day shows us either how far gaming has come or how much less corrupt the gaming press now is.

## Black Magic (1989)

£19.95 Procovision

*[7/10 - Enjoyable if basic platformer that is really fun to play.]*

**GM: 59%** – ‘The year is 1402, the place is the kingdom of Urus, a quiet and prosperous land. Or rather it was until the day the wicked sorcerer Terius thundered in with his minions to plunder the kingdom’s wealth, which he hid in 70 locations. The only hope of counter attacking is Venzius, Urus’s most famous sorcerer.

Each level is split into the upper and underworlds, with two ways to compete each level. The first is to collect all the diamonds spread across the playing area, depositing them in baskets scattered around (you can only carry four gems at a time). Or you could try your hand at destroying the variety of minions inhabiting the above ground platforms and subterranean caves (once you’ve found a weapon). Helpful items include shovels for underground digging, a safety screen (sort of smoke screen), shot power, special shot (these rebound off of obstacles) and lightning. When a weapon is picked up an energy bar in the status panel appears, as the current weapon is fired this bar diminishes, though collecting strawberries scattered around replenishes this. When either one, or both tasks are completed on each screen the sorcerer turns green, informing you that the exit should now be found. A pleasant tune plays throughout Black Magic, and although graphically the game isn’t any great shakes, it’s pretty playable. As with most games governed by a timer a touch of the old angst sets in, but look you might like it.’

I really enjoyed this game and it was a total surprise as well with myself never having heard about it before playing it for this book. It reminded me an awful lot like a Public Domain game level of quality.. But once you look past the basic graphics you in fact have a highly playable, solid, unique platformer that had me playing for quite a bit as I pushed my way on to each level. The only thing I didn't enjoy was the games timer...although find a trained version of the game and that annoyance can be bypassed with infinite time.

Yes I definitely recommend this game.

Black Sect 1993)

£???.?? Lankhor

**[8/10 - Beautiful RPG game that is well worth your time...But Unfortunately its only in French]**

I Really I shouldn't include this game as it only came out in French and not English. But sometimes a game is so good that rules have to be broken and I simply just had to include it even if was simply a nod to its existence.

Developed by Lankhor (the development house that came out with Vroom) this is instead a highly polished Dungeon Master RPG like adventure., that will have you wishing you paid attention more in French class at school, instead of drawing bears, moustaches and onions on all the pictures of French people in your study book (or was that just me?) Anyway this is a game well worth your time with.

The game is chock full of atmosphere as you try to work out what happened in a small Yorkshire village in the moors. Rock hard but never one where you die and feel cheated.

Also only 5000 copies were ever sold so if you happen to see this then pick this up quick.

**Black Shadow (1987)**

**£19.95 CRL**

**[4/10 - Very basic shooter. With bad controls and speed.]**

**ACE: 701 /1000** – ‘Crikey!

A monster asteroid is threatening to put Earth into a permanent eclipse. Its up to you (and a friend if you wish) to stop it by flying across a vertically-scrolling landscape and destroying the military bases, industrial units and solar hyper reactor. Black Shadow is very pretty, murderously difficult and extremely playable but it’s just another shoot-em-up with no outstanding features.’

**CUSR: 7 /10** – ‘The initial difficulty may, however, put off most people. If it was slightly faster and had a bouncy soundtrack to blast with ,this would almost certainly have been a Screen Star. Unfortunately it hasn’t so it aint. Nice try though.’

**AUI: 6 /10** – ‘As the first 16-bit release from CRL, Black Shadow is not to be despised. They have decided to go for an easily recognisable theme which is understandable. However to compete with the likes of Insanity Fight and Xenon, any similar games will have to be of a very high standard. Black Shadow, whilst being a respectable release, just is not really in terms of graphics or gameplay in the same league as these.’

**GM: 28%** – ‘Black Shadow makes a good impression with its title page, music and smooth options screen; but once in play it proves a disappointment. Mouse control is erratic and, while a joystick is better, it doesn’t make up for the persistently irritating gameplay. The strength of the alien attack might be bearable if you had a decent spacecraft with which to do battle, but this is not the case. The ship is slow to respond, it cannot fire unless its previously fired two bullets have disappeared, and it is restricted to moving inside less than half the total screen. With only average game graphics, poor sound FX, lack of originality and too-tough gameplay, Black Shadow is not recommended.’

Game Machine (GM) magazine has hit the nail on the head perfectly with their review. Jon Law who did the graphics for this would go on to do a far better job with Desert Strike and Space Hulk games and would go on to work for Blitz Games and Rebellion.

This game is unfortunately unplayable pretty much and is best forgotten about.

## Black Tiger (1989)

£19.99 US Gold

*[4/10 – Poor scrolling and controls make it a poor arcade conversion.]*

**GM: 84%** – ‘the graphics are the same, bold and colourful (the 16-Bit code was taken from the arcade machine, so they should look good). The action is as fast and frenetic, but sadly there isn’t much improvement in the sonics department.’

**CU: 73%** – ‘One of Black Tiger’s major failings is the lack of action and smoothness in the gameplay. This is always one of the problems in arcade conversions. Whilst this was overcome in games like Strider and Forgotten Worlds, Black Tiger falters quite badly with a complete mismatch of speed and action. This is not one of the outstanding conversions of all time, especially when you compare it to some of the competition which appeared pre-Christmas, particularly Ghouls ‘n’ Ghosts to which is closest in character. Pretty average in all respects.’

**AF: 71%** – ‘Control of the main character is fiddly at first, which a one-strength jump which cannot be controlled mid-air. However, Black Tiger bears enough of a resemblance to its coin-op parent to content most devotees, and although this unashamed ST port-over is a far cry from the class of US Gold’s previous Capcom conversions, it still manages to entertain to a reasonable degree.’

**AC: 68%** – ‘The game is playable enough, Nice graphics, nice sound, a bit old-headgear now, but a prime example of the genre in all it’s graphical splendour.’

**ZZ: 63%** – ‘A dull and uninspired coin-op gets a bland conversion.’

Another terrible coin-op conversion. Graphically it is identical to the arcade original.. But with terrible scrolling and painfully slow gameplay results in you having t o endure a frustration fest of a game. It is so frustrating that the Amiga was subjected to so many lazy Atari ST ports in its early years.

It is particularly annoying in this instance I have such fond memories of the arcade game and it deserved a much better version than given here. Track down the arcade original on Capcom Classics Volume 1 (PS2, Xbox) to play it as it was meant to be played.

# Black Viper (1996)

£19.99 Neo /

Dev : Light Shock Software

[4 /10 - *Fast game engine but lousy game play.*]

**Amiga Active : 3 /10** – ‘I have to wonder why anyone would use precious days, weeks and months programming it, let alone playing it. Whilst it is easy to play, Black Viper looks awful and is very repetitive – for die-hard retro fans only.’

Released after the Amiga had imploded in 1996 this game is almost a really nice racer and shooter. It runs really fast and smoothly and the controls are all responsive enough. Unfortunately though that is when the good things to say about the game stops. Its main faults is that there is too much traffic and too small a width for the road to make negotiating traffic a pleasure as it is in say Road Rash. Also the tracks whilst pretty are repetitive and dull. All in all a great game engine showcasing a bad game, which is a pity as I love as many good 2D racers as possible.

## Blackjack Academy (1987)

£24.99 Micro Illusions

[7 /10 - *Very good Blackjack simulator.*]

**Info:** 4 /5– ‘more than just a good blackjack simulation, it is a school for learning playing & betting strategies, and card-counting. There are many useful options including prevalent rules for Vegas, Reno, Atlantic City, etc. and custom rules to enable matching any real (or imagined!) casino. You may play up to 5 players, and speed of play is variable. Nice graphics and sound, but needs customizable card-counting system (so you can practice the system you choose), and high-speed robot players (so you can assess a given system’s performance). Recommended.’

**YA:** N/A – ‘As a simulation, the Academy is superb and anyone who enjoys the occasional flutter could do well to check out a copy. After all, you don’t know how quickly it might pay for itself the next time you are in Vegas.’

---

Basic to look at but works perfectly well as a BlackJack game. The masses of options for different rules and a quite a comprehensive strategy help guide rounds of the package nicely. Yes if you are after a no nonsense serious Blackjack game then this is definitely one of the best.

## Blade (1997)

£14.99 Alive Media /

Dev: Scorpious

[5 /10 - *basic turn based RPG  
a little to dull to play.*]

**CU: 86%** – ‘If you give it the chance – more to the point, if it gets the chance – Blade really can suck you in. There is a lot of fun to monster whomping and the speed of the interface means you wont be waiting all day to get to the punch line. Turn the lights down low and stock up for the ling haul, because Blade’s the sort of epic game that if it grabs you, can move the clock from 6 pm to 6am very quickly.

Hack and Slash fun but can leave you empty.’

**AF: 65%** – ‘Not dreadful, but disappointing, more could have been done to make this a lot better.’

---

Nice user interface but with dull uninspiring graphics and slow juddering scrolling that makes this game far more a chore to play than it should have been. It feels to me unfinished, which given the year of release was probably right as they sought to get a couple of games sold before there were no Amiga owners to buy it.

A real pity though as with a bit of polish and a more interesting story this could have been quite good. Being a mix between Hero Quest and an RPG.’

# Blade of Destiny (1993)

£39.99 US Gold

*[6 /10 –detailed and involving RPG, but too slow on the Amiga.]*

**AF: 91%** – ‘The whole approach of the game is more based on games such as Dungeons and Dragons than other RPG’s like Eye of the Beholder. This works in its favour, because you’re working within a better designed and more established system. For instance, there’s more variety of magic in Blade of Destiny and it is well thought out. It’s certainly a game that will take a long time to solve, and it’s challenging enough to make it worth coming back to. This game is the first in a trilogy, and the future for realms of Arkadia looks extremely bright...’

**CU: 86%** – ‘if you’ve played a computer based RPG and felt frustrated that it didn’t do something that you know it should do then Blade will not frustrate you in the same way. There are limitatios, after all it is governed by the coding and not some Dungeon Master’s imagination, but it is the most comprehensive RPG ever to appear on your Amiga.’

**AA: 77%** – ‘I have mixed feelings about this one. On the one hand I can see that it is an excellent RPG, rich in storyline and high on interest for the player, however, having seen what machines such as the PC are capable in this field, I find myself just wanting that little bit more. Still if the Amiga is not capable of such amazing feats, as we are constantly informed it is not by various people, then Blade of Destiny is a more than acceptable substitute.’

**O: 73%** – ‘The main problem with Blade of Destiny is that you have seen this sort of thing before – and better, most probably. There are few surprises as you travel around, with everyone and everything you meet conforming to their usual clichéd fantasy roles. Much has been made of Blade’s size. True, the land of Arkania is a vast place, with literally dozens of towns to visit and dungeons that you can freely explore, but there’s a big price to pay for this. For one thing the disk swapping on a single-drive machine is unbelievable – you can’t seem to go more than ten yards – without having to swap disks. The first person exploring is a dull and tedious affair – the screen update is annoyingly sluggish, especially given the fact that you can’t even ‘see’ the poorly drawn buildings until you are practically standing in front of them. Combat is equally uninspiring – the board game-like ‘movement points’ system removes any sense of urgency or excitement from the proceedings while the characters slowly shuffle about the isometric-3D battlefields like they’re on Valium. The best thing you can say about Blade is it is nothing if not thorough, so it’ll no doubt cause RPG addicts to perform cartwheels. But it doesn’t really make any concessions to the average gamer, which leaves the majority of us standing out in the cold.’

**AP: 67%** – ‘There is little to encourage all but the most dedicated fan here. (A1200 version was awarded 75%).’

**AFC: 60%** – ‘Blade of Destiny is a wonderful outing – in fact it’s one of the best roleplayers I’ve seen this year, but its genius will be lost on all those unfortunate enough not to have a hard drive and the patience of a particularly well-disposed saint, and I for one don’t fall into this category. It could and should’ve been a world beating binder of a game and very nearly was, but as things stand it’s just too po-faced by half. Don’t you just hate it when that happens?’

---

Based on the German knock off version of Dungeons and Dragons, a pen and paper RPG “Das Schwarze Auge” or DSA. First thing to understand that unless you are in to sadomasochism you should only play this off a hard drive install with a top spec Amiga.. Even then it hasn’t aged well. I have also noticed there has recently been a revamp version of this game released on the PC in 2013, but with a Metascore of 18 % it is perhaps best to simply avoid this game completely, unless you happened to play this back in the day and want a nostalgia fix.

## HACK AND SLASH

It’s inevitable, but no matter how hard you try to avoid it you’ll find yourself in a fight sooner or later.

Anyway, once battle has commenced you’ll be greeted with a screen like the one below. All combat is governed by movement

points which vary from character to character. The amount you have varies according to what you’re carrying, how strong you are and whether you’ve been surprised or not. It’s a familiar means of sorting out fighting that all regular RPGers will be used to. It basically means that you can draw a weapon, move, decide to change weapons and attack providing you have enough points.

Active character

Active party member’s options. This is a generic box, so every option appears even if you cannot perform that action. The numbers in brackets by each option indicates how many movement points that action will take.

Combat area

Inactive party members and monsters. It can get a bit confusing here if you are being attacked by characters from the same class as your party members – all the graphics are very similar!

Active party member. This is indicated by the highlighted square he’s standing on. His portrait also appears in the top left of the screen.

## Blade Warrior (1993)

£24.99 Image Works

[ 3/10 – *Lovely graphics, but no gameplay substance.*]

**CU: 84%** – ‘A thrust and parry adventure for chivalrous folks.’

**O: 82%** – [R] ‘There aren’t many games which are truly original but Blade Warrior is one of them. Set in a fantasy world full of hideously deformed mutants who attack on sight, you, as the heroic Blade Warrior, must find and defeat the evil Murk who is hell bent on doing the same to you. The game mainly consists of wandering around, fending off the bizarre creatures while collecting as many spell ingredients as possible...[sic]..At £25.00 Blade Warrior wouldn’t offer too much in the way of value for money as the combat side of things can be a touch samey., mainly because of the limited amount of moves you can pull off. For this silly price (£7.99), however , I’d advise you to snap it up right away.’

**AA: 79%** – ‘Gameplay is very dubious and is vey difficult in this semi light to see who is killing who. In fairness Blade Warrior is not as bad as all that and will likely improve with a little practice. For me, I’ll give it a miss.’

**AP: 77%** – ‘Visually superb, possibly the most atmospheric game ever, and with the gameplay to back it up (I think).’

**AF: 74%** – ‘The hack-n-slash gameplay tires quickly, but the sense of adventure and rewarding implementation of spells keeps you going. Blade Warrior comes highly recommended to the adventure novice – hardened hackers will find themselves wanting just a little more.’

**Z: 72%** – ‘There’s no real depth to Blade Warrior, and even fighting the monsters isn’t great fun. With all the black graphics knocking around, you can’t see the wood for the trees.’

**AP: 8%** – ‘[Round Up] Gimmicky and stupendously dull beat-’em’-up-with-a-sword played in silhouette.’

---

As you boot up the game you are immediately reminded of the recent indie released game Limbo with the silhouette graphics..and then as you first encounter the silhouetted spider traipse towards you ..you know that the Limbo developers must have taken inspiration from this game. However that is where the similarity ends.. Whilst Limbo was a tremendous game full of inspiring puzzles, Blade Warrior instead is a mundane repetitive dull hack-’n’-slash that will have you wanting to gnaw your arm off with boredom after 5five minutes of play. Which is a shame as I love the graphical style and little touches like the monsters turn into multiple birds when killed. If only Jason Kingsley had thought to include a game to all that visual splendour then Blade Warrior would be something special. Sadly he didn’t and so this is now a game for the curious into either what probably inspired Limbo or see Jason Kingsleys early career.’

The game incidentally was written by Jason Kingsley who is the same Jason who would go on to found Rebellion Software and who would go on to do all the Alien Versus Predator games and sniper elite. Blade Warrior would be his third game after the brilliant Better Dead Than Alien! and Murder games.

# BLADE WARRIOR

The beast was present in the land and from tower to tower the sorcerers voice called upon him. As night encroached and set the sun to flight, so his legions made ready to conceal the tablets that would see daylight banished forever.

So, as the same last bloody light drained from east to west, the paladin came forth, ready to do battle against the legions of the night, using all his might and skill in this tale of swords and sorcery.

## Blades of Steel (1990)

\$44.95 Konami /

Dev: Novotrade

[ 4/10 – *Bad conversion of the NES classic.*]

**AUI: N/A** – ‘The graphics, sound effects, and flexibility of Blades of Steel are mediocre. It also doesn’t help that the game is copy-protected as to both disk and manual, and will not work on accelerated Amiga’s or a hard drive. It has problems with the Super Agnus chip. Unless you’re looking for a simple hockey game, skate on by.’

---

Ok so its Ice skating which is not a sport I know a lot about.. But any sport which someone can punch someone in the face and instead of a life time ban only gets 5 minutes in the naughty chair (Sin bin) is ok by me. I have actually played the NES version and arcade game and its quite an enjoyable game. Basic but good fun especially with a mate around. Sadly this Amiga version is a poor conversion. Its not terrible but just doesn’t have the right controls to be as playable as its NES counterpart.

## Blastaball (1987)

£9.99 Mastertronic /

Dev: Icon Design Ltd

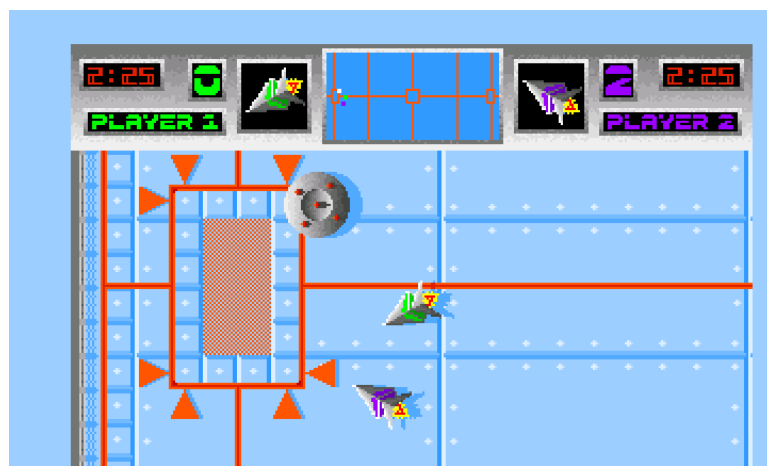

[ 2/10 – dull Crossfire clone.]

**GM: 65%** – ‘Craft control takes a little getting used to due to the high level of inertia – its more apparent on this version than on the others – but practice makes perfect. Blastaball should keep Amiga owners happy for a while, though interest could soon be lost due to its simplistic concept; the game doesn’t change much, it just gets harder.’

**YA: 29%** – ‘Blastaball's small germ of an idea is a novel one – a shame really as more opponents on screen with some music and better sound effects would have pushed this game up into real budget status.’

---

A really dull version of that crossfire board game where you have to fire balls to shoot the puck into the goal. Controls are too slow and only two ships makes the game far too dull to play.

## Blastar (1993)

£25.99 Core Design

[ 3/10 – *Terrible controls on overhead sections, better on horizontal shooty bits..*]

**AA: 86%** – ‘Blastar is by far the best shoot ‘em-up on the Amiga in my opinion. I like everything about it, from the missions aspect of the sub levels, to the fast and frantic, yet controllable action, and even the music, which is right up my street, This is almost faultless, and certainly lays Project X to rest as far as I’m concerned.’

**O: 81%** – ‘Blastar’s great fun but if only Core had spent a bit longer polishing off the rough edges this could so easily have been a classic.’

**CU: 78%** – ‘Blastar’s not a bad game, it’s just not that good either. There’s little to be gained zooming around the screen blasting everything in sight. For one thing you won’t last very long, for another you’ll never see the ground based installations that you are supposed to be blowing up. Caution is the name of the game here. Personally, I prefer the action to be a bit more frantic. I got to grips with the rotational thing but I still prefer a more traditional scroller. Which is why Overkill gets my vote.’

**AC: 68%** – ‘Blaster got a lot of great qualities to it. Smart Graphics, cool sounds but unfortunately poor control. This at the end of the day, affects the overall play, however pretty things might look.’

**AUI: 57%** – ‘The control method is so poor that sometimes it is not possible to line up and fire on a target from your position and have to move around to get a shot in. (There are only sixteen directions you can face, which is poor from the 360 degrees you can turn through.)’

**AF: 44%** – ‘A pathetically poor attempt to produce Xenon 3. This game fails on every single level. This is not the worst shoot-em-up ever, but comes pretty close.’

**AP: 37%** – ‘Uppers: Nice graphics, sound and introduction sequence. Yeah Great, Downers: Dull as dishwater, and about as much fun as falling in a smelly old canal. In January. The Bottom Line: Insipid shoot-em-up that fails to even live up to the pretty pictures on the box.’

Hmm the only company that gave it a favourable review (Amiga Action) also happened to have an exclusive demo on its cover disk...hmm I love the smell of game magazine corruption in the morning.

Ok on to the game, well on going through the nice intro and into the in game graphics you are initially are blown away how pretty it all looks and how smoothly it all runs. So much is right visually and aurally with this game, that it totally baffles me they would make such fundamental mistakes with the controls. Firstly your ship is affected by inertia and so the faster you go the wider the turning circle. This really annoys with you often having to frustratingly circle an enemy ship several times just to line up the shot. Instead I just ended up just leaving the fire button on and flying off to do the mission of destroying the enemy bases. Which brings me on to the next broken aspect of this game... The levels are far too large and the radar system completely useless, this leaves you with the boring task of aimlessly flying around until you happen to stumble across an enemy base...Which incidentally you wont spot as it looks almost identical to the standard backgrounds. It does improve when it switches to the horizontal shooting levels (making you scream why they just didn't do more of these levels), but by then all good will for the game has been spent.

All in all a frustratingly broken game, which annoys me immensely as this could have so easily been turned into something special with some tweaks and play testing. As it stands Blaster is a poor part of Core Designs history and not one to recommend. Interestingly Tim Swann who was lead programmer on this, went on to be lead programmer on Diablo and Fable 2 and Fable: The Journey. Co-coder Dann Scott meanwhile went onto work on the re-mastered Golden Eye games.

**Blasteroids (1987)**

£24.99 Image Works /

Dev: Teque Software

**[ 5/10 – Good port of an average arcade game. ]****ZZ: 88%** – ‘An extremely playable, top class arcade conversion.’

**CUSR: 82%** – ‘Visually Blasteroids is near identical to the arcade machine, and that’s as it should be, the game set no great standards here, but the gameplay Teque have most successfully managed to encapsulate. There are some minus points. The way you transform the ship by pulling back makes it all too easy to do by mistake, and this can be pretty irritating. Sound too, whilst sampling its arcade parent, omits Mukor’s contemptuous ‘Human slime is weak!’ remark at the end of the level. That made the coin-op for me. Otherwise no complaints Asteroids never really did a great deal for me, and Blasteroids only did a little to change that. Devotees of the machine won’t feel so detached.’

**O: 81%** – ‘How many Asteroid fans played Blasteroids, were initially impressed but after a few games realised it wasn’t anywhere near as atmospheric and nail-biting? It’s fortunate that the gameplay is strong enough to make it work. But only just.’

**ACE: 746 /1000** – ‘Looks and sounds OK but isn’t that impressive for the Amiga. The levels are also a bit too easy.’

**GM: 71%** – ‘Digitized pictures are always attractive but even with backdrops faithful to the arcade machine Blasteroids is not a game to push forward the boundaries of software. With a slight loss of high definition comes lack of ship detail although the overall effect is of a very slick game. The music and effects are generally below average – faithful yes, but also annoyingly repetitive.’

---

This is a graphically good, with solid controls and a reasonably accurate arcade conversion. Unfortunately it a conversion of a pretty poor Atari arcade game, where Atari attempted and failed to update Asteroids.

This home conversion is slightly slower than its arcade parent and far too easy, with you being able to breeze through to the final boss by simply not moving the ship and shooting all around you. If you want to play a decent update of Asteroids on the Amiga then try Super Stardust, you certainly wont find a good Asteroids update here.

**£6.99 Hi-Tec Software/**

**Dev: Pal Developments**

***[8 /10 – Enjoyable Ikari Warriors clone in a tank. Runs smoothly and with top graphics, definitely a hidden gem that should be played.]***

**AP: 75%** – ‘Unusually for Hi-Tec, this game isn’t a license from a dodgy Hanna-Barbera cartoon. It’s actually a totally original product, om so much as something that’s basically Ikari Warriors can be called ‘original’, though here the player is in a tank (or ‘piece of miniature hardware’, as the inlay would have it)) instead of faffing about on foot. This of course opens the door to lots of fun driving over enemy soldiers and listening to their (different-pitched) screams, free from those bumping into things and dying worries.

Not that you are invulnerable, of course (bit of a silly game if you were, though it would probably still be loads of fun), as the enemy forces are armed to the teeth with a lot of rather heavier weaponry. Including tanks, planes, helicopters, mobile rocket launchers and huge armoured personnel carriers. Hardly innovative stuff, you might be thinking (and you would be right), but that doesn’t stop Blazing Thunder from being a great little game. Faster-paced than the norm for this kind of thing (and blessed with some great sound effects) it cracks along through some effectively cartoony backdrops and heaps of action. It’s as playable as you expect something this simple to be, and hard enough to be addictive too. Especially fun are some of the later landscapes which are often quite imaginative (if not to say decidedly odd) in design – worth looking out for. One word of warning – it’s only half as much fun if your joystick doesn’t auto-fire – but essentially we’re in a moan-free zone here. A winner.

- Stuart Campbell.’

Coded by Gary Antcliffe, who would do many of Hi-Tecs finest games like Yogi's Great Escape and Scooby Doo and Scrappy Doo..and then would go on to do the Universe game on the Amiga and recently worked on the brilliant Little Big Planet game.

I really loved this game, it has wonderful cartoon graphics, that perfectly captures the feel of the title and more importantly it all moves and plays incredibly well throughout.

The fact that this game was a budget title really wows, as it puts a lot of full price games to shame. Yes definitely a hidden gem that need to be played.

## Blinky's Scary School (1990)

£7.99 Zeppelin Games

*[ 7/10 – Dizzy meets Jet Set Willy in this polished cartoon adventure.]*

**AP: 71%** – ‘Once upon a time the Codies used to churn out ‘simulator’ games by the barrow-load and, despite some heavy flak, made lots of money from them. Bit then everyone else started doing ‘simulator’ games, and kind of spoiled it a bit, so the Codies turned their attentions instead to ‘loveable character’ games – Dizzy, Seymour, Little Puff and all the rest of them. But then, er...Here’s Blinky, Zeppelin’s very own ‘loveable character’. He’s a ghost with big eyes and outsized boots who is a bit crap at jumping, and won’t drop an object unless he can pick one up at the same time, but otherwise fits the role perfectly. And true to form, he’s got lots of room to wander around with puzzles to solve, baddies to dodge and traps to avoid. It’s sort of Dizzy, but with a garnish of Jet Set Willy. All good fun, with smart graphics, plenty of surprises and hours of pleasure for those who enjoy this sort of thing (e.g. me).

What we really, want, however, is the ultimate ‘lovable character game, pitting Dizzy, Blinky and the rest in their ultimate challenge – a fight to the death! Put them all in a Speedball 2 playing area, arm them to the teeth and see who comes out on top. It would be brilliant. (Nurse! – Ed).

- Jonathan Davies’

I must confess, I always have a soft spot for cartoon Dizzy like adventures like this. I think it was because how much I used to play these kind of games on the Spectrum. Of all the Dizzy clones I have played, then this is one of my favourites. It all is incredibly polished with stunning graphics and all plays surprising well. I think Jonathan Davies analogy of 'Dizzy meets Jet Set Willy' is quite a good one and sums up this title quite well (all be it far closer to Jet Set Willy).

If you hate Dizzy/Jet Set Willy games then you will not find anything to love here. Also the jumping is really annoying with it next to impossible to be able to jump over enemies in some sections. But if you do enjoy those kind of games then this is definitely one worth tracking down.

If you enjoyed this then you may be interested to know that they did do a sequel on the Amiga to this called Titanic Blinky. There was a third game in the works called Blinky in America that sadly never got released.

Incidentally a great PC remake has been done and can be found here.

# Blitzkrieg – Battle at the Ardennes (1987)

£24.99 CDS

*[ 4/10 – Old Turn based strategy. A little too clunky for my personal tastes.]*

I had high hopes for this when I booted it up. I love Turn based strategy games and was pleasantly surprised after some ugly menus to be greeted with a pretty full colour hexagon playing board. Sadly though the game controls its self are incredibly clunky. Leaving you spending far too much time battling with the controls as opposed to enjoying a good strategy game. All in all a missed opportunity in my opinion.

All in all a real shame.

## Blob (1993)

£25.99 Core Design

*[ 5/10 – Original concept let down by frustrating gameplay.]*

**AP: 88%** – ‘Uppers: . Brilliantly original (as far as the Amiga goes, anyway), maddeningly addictive, and eerily vertigo-inducing. Blob’s a top character, too – you really feel for him when he gets hurt and does his sad puppy-dog eyes. Eve if he does look exactly like Putty.

Downers: It would have been food to have some kind of instructions at the start of each level as to what your exact objective is – later on you have to tool around for quite a while before you work out which sort of level it is. And cute though it is, you should be able to cut the death sequence short.

Bottom Line: A superb original arcade puzzler with tons of character, and a refreshing change from, well pretty much anything. Yet another great game that could only ever happen on the Amiga.’

**AF: 83%** – ‘Like the classic Nebulus, it adds a new viewpoint on top of all the action and the puzzles you’d expect from a class platformer. A winner.’

**AA: 83%** – ‘The gameplay can’t really be faulted, but I still wish the whole thing had that added touch of pizzazz.’

**AFC: 82%** – ‘A very playable and most enjoyable departure from the norm.’

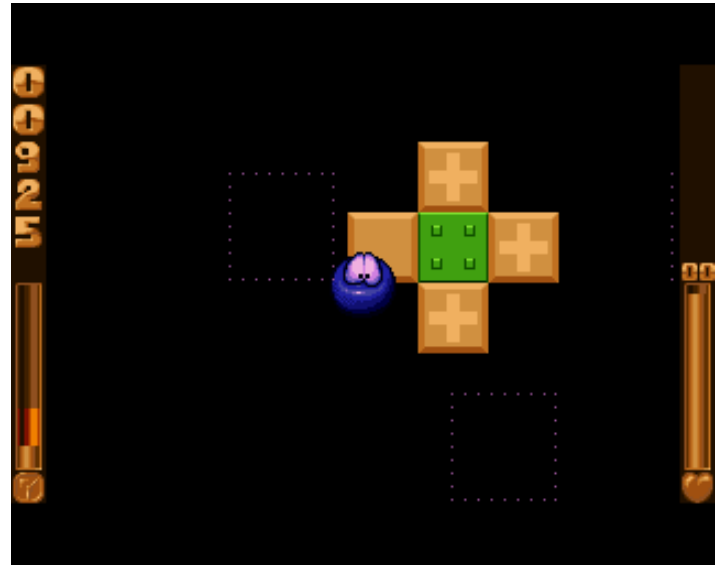

**AUI: 78%** – ‘You certainly have to have patience and excellent reactions for Blob. You also need to be the type of person who enjoys spatial reasoning and utter frustration – it can be a blind guess as to which direction to go. That said, Blob does have its appeal. It’s a simple concept, but a difficult game and you’ll find yourself hurtling off platforms to your doom before completing any level. Still, level codes do exist, so you don’t have to play right from the start every time.’

**CU: 72%** – ‘This is one of the better puzzle games of the year, although it’s nothing remarkable. The graphics are cute with plenty of nice sprites making up for the minimalist back drops. Ultimately, though, the game just doesn’t offer enough long-term interest. Once you can complete the first 10 or so levels the game starts becoming a repetitive chore and when that happens you won’t come back to it.’

**AC: 70%** – ‘Blob may have the graphics, sound and originality, but it lacks in playability thanks to the control system, and the difficulty level is way too high. Right ideas, just badly implemented.’

**O: 67%** – ‘..the 3D technique used is quite nice, but at the end of the day I have to keep coming back to the fact that the frustrating regularity of unfair death hisses you off so much that it’s hard to stay friends with the game for very long. I played this over a number of days and each time I returned to it I felt that I had been a bit unfair in my judgement, but after half an hour of being pushed off tiles and bumping into platforms above me I still came to the same overall conclusion. If you have the patience of a saint and aren’t the sort of person that’s likely to throw your Amiga through the window when frustration takes over then take a look, As for me, I’m off to take my aggression out on a brick wall.’

Hmm I really wanted to like this. I love games that try something new and this certainly does attempt that. The game isn't terrible either being quite a technical achievement and all running rather smooth. The problem is though that game itself isn't that much fun with it all feeling a hard painful slog, as opposed to an enjoyable romp. Too often playing this I died because, either... A) didn't know where to go. B) missed a platform as there is no easy way to estimate jumping. All in all, this is a game that is probably worth a play, to see the original concept, just don't expect it to hold your attention for long.

## Blobz (1996)

£14.99 Apex

[ 9/10 – *Excellent Lemmings Clone. Loads of fun.*]

**CU:** 82% – Not the most inspiring name for a game, but then look at Worms and how successful that title was. Blobz steals its gameplay style directly from Lemmings., replacing the suicidal rodents with green non-descript things decked out with tiny eyes. While Lemmings' motivation for suicide is biological, blobs just don't know any better, if they walk into spikes or water they die, but there's no stopping them. A walking they will go, straight into trouble. As can be seen from the screenshots the landscape types are not as detailed or developed as Lemmings, but Blobz is a Blitz program and so is a little more basic (yes the pun was intended) than the game it's based on. The puzzles themselves are satisfying, if frustrating and they have been well thought out using the various 'skills' which you can assign each Blob. What you can't see from the screenshots is the smooth horizontal scrolling and the neat moving water effects and special touches.

While the platforms themselves might look basic, there is a good reason for this: a level designer has been included so you can make as many as you like, and it's simple to use. You assign skills to each Blob like Lemmings. First check on one of the skills represented by icons at the bottom of the page then click on the Blob you want to execute this skill. There is a rocket pack skill, a jumping skill, a reversing skill, a chomping skill (allowing your Blobz to eat horizontally through structures, unless a solid girder is in the way)...[continued]'

...[continued]...several directional missile skills and a digging skill. Not all of these are available on each level so, for instance, just when you're comfortable about saving Blobs with the reversing skill, it disappears on the next level. On some levels you have to pick up skill icons as you go along. The game is based on six worlds each mapped out like a maze and there are 60 levels in total. To get to the end of the world you have to negotiate your way around a maze completing the levels. Although it is possible to get to the exit by completing maybe 80% of these if you choose the right path, the ones you miss might contain valuable clues about completing later ones. The amount of levels and increasing difficulty means that this is not a fast game to finish. Add the possibility of infinite custom levels and you have a lot of a game. A well recommended purchase. - Martin Davies.'

**AC: 81%** – 'Overall, Blobz is an addictive game with truckloads of playability, it's just a shame that it won't be available in any shops- you'll have to buy it mail order. Still it's nice to see that descent products can still be produced on the Amiga.'

**AF: 71%** – 'Excellently produced but just too close to its inspiration to merit a higher score. The crippling time limit on most levels does nothing to make the game more appealing either.'

What a fantastically pleasant surprise this game was. By 1996 I had already left behind my Amiga and was instead playing PC and Sega Saturn games, so I totally missed this Amiga gem when it came out. The game is very much like Lemmings, but extremely polished a massively fun balanced game to enjoy. It also has some nice touches like a maze level select that allows you to have multiple paths to complete each world, meaning if you are stuck on a particular level you can often avoid it and instead make a new path for yourself.

Yes from the cute Worm like sounds, to the pretty graphics, combined with so much polish and shine that you can see your beaming face in it..this is a game well worth tracking down and giving some serious time to.

Then when you combine all of the above with a solid construction kit as well, I am also inclined to say this is even better than Lemmings in many areas. Quick I better make my escape before the rabid Lemming fans come to beat me up.

## Block Out (1989)

£19.99 California Dreams (US)  
or Rainbow Arts (EU)

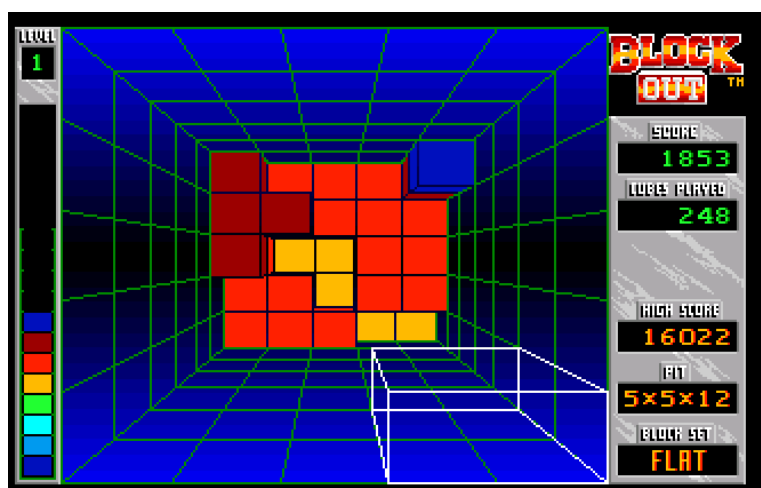

*[ 7/10 – Enjoyable alternative to Welltris (a 3D sequel to Tetris). Definitely worth a play if you enjoy these kind of games.]*

**AF: 84%** – ‘On first sight, Block Out could be well passed off as a Welltris rip-off. This is unfair, since Block Out is a true 3D puzzle game, with the player having not only to think width and height but also in depth. Don’t dismiss the game out of hand! Have a try and you’ll see that it has enough of its own character to stand up as a challenging game in its own right and for many people will have more appeal than Welltris.’

**O: 81%** – ‘Despite its obvious resemblance to a certain game beginning with T and ending in etris, Block Out isn’t quite as easy to pick up and play. It takes time to adjust to the 3D and it takes even longer to get the hang of the controls. It seems strange that it is not solely mouse-driven – Having

to us the keyboard is frustrating at the best of times, but when the going gets fast you seem to spend more time thinking which key does what as opposed to what shape goes where.’

**AA: 78%** – ‘Block Out will appeal to puzzle fanatics out there and proves that the old ideas are sometimes the best.’

**Z: 78%** – ‘Another good variation on the Tetris idea, but a rip-off nevertheless. If you can’t get enough of Tetris, and its numerous clones, then you’ll probably love Block Out (though it’s not as good) but I wonder how long these games will continue to flourish?’

**CU: 75%** – ‘Block Out is more therapeutic than addictive. It doesn’t get the adrenalin going in the same way Tetris does. That’s not to say it’s not as good – simply that it tests you in an altogether different way.’

---

I really enjoyed this improved clone of Welltris. The controls took a few goes to get the hang of, with the keys Q, W, E rotating the shape on the three axis and the mouse controlling where to place the shape (with left mouse button dropping the shape). But before too long I was happily placing the shapes in a nice gentle pace. This is the first slight niggle with the game. You seem to stick on the speed you initially choose. So there is no feeling of progression, with the games difficulty rigidly remaining the same. In addition to the Flat fun mode I described (which has only the seven Tetris shapes) there is also a 3D-Mania mode and Out of Control

mode, with you be able to tweak those modes to exactly as you desire. My head really fizzled with those extra modes with each mode time upping the number of shapes considerably to 32 items or something like that. Not a game that is everyone’s cup of tea, but if you like your puzzle games then definitely give this game a go.

# Block Shock – The Last Chance (1989)

£19.99 Kingsoft /

Dev: New Comer

*[ 4/10 – Nice puzzle shooter idea, let down by bad controls and annoying music. A real shame as it is a good idea for a game.]*

Simple premise... You fly a helicopter at the bottom of the screen with your mouse. Very time you fire you will create a block on the shapes moving towards you. Make the shape into a rectangle and it will disappear. Keep repeating. Music is repetitive and really annoying, also make sure you switch it joystick as the mouse if far too twitchy to be accurate. With both of those elements sorted then the game becomes far more enjoyable, for a little while at least.

## Blockhead(1996)

£14.99 Applaud Software

*[ 6/10 – Good Boxy Boy clone, with functional Public Domain graphics, but enjoyable gameplay.]*

**AF: 77%** – ‘A solid, if uninspired, puzzle game that will keep you playing. Just don’t expect too many fireworks.’

**CU: 67%** – ‘It does have a public domain feel to it. However if you feel in the mood for a brain teasing session then get this.’

---

One of my favourite games on the PC Engine/Turbo Grafix console is Boxy Boy (which itself was also an update of the old Namco arcade game of the same name.) This is essentially that game of pushing boxes on to the IN’s to open the exit. However this has the added ability of being able to pull as well as push boxes deviating from the Boxy Boy premise. The game is functional in the extreme, having said that it is solid fun to play. It is just a shame that this definitely looks and feels like a Public Domain (free) game that got itself published to capitalize on the fact few games were being released for the machine in 1996.

Definitely a worthy diversion of your time, just don’t expect to be blown away. Also to any Indie developers, there is a lot of good ideas that can be found here.

## Blockhead 2 (1998)

£14.99 Applaud Software

*[ 8/10 – Good Boxy Boy clone, with functional Public Domain graphics, but fab gameplay.]*

Really enjoyable sequel. As before, but this has a slightly different concept where you must place fall the apples into the cauldron to open the exit. This game is bursting with load of new concepts and ideas as you progress.. Mixing in a bit of Chips Challenge game ideas into the bargain. The graphics look a lot more polished this time around.

## Blood Money (1989)

£24.95 Psygnosis /

Dev: DMA Design

*[ 6/10 – polished shooter, that's too tough and mundane to hold your attention long. ]*

**ZZ:** 94% – Money makes the world go around, and 25 quid is a fair sum to pay for a shoot-'em-up, but Blood Money is well worth it.

All four of its worlds contain some of the most stunning baddies, ranging from pulsating jellyfish to spinning rocks. The animation is incredibly smooth and the scenery is simply beautiful (reminds me of the valleys, boyo!). Gameplay measures up to the game's brilliant looks and each world requires a totally different set of tactics in order to succeed. So you're really getting four games in one.

Another bonus is the two player option which is hilarious as the 'partners' make a mad dash for the cash. And although the game is extremely challenging, most lives are lost through sheer greed!

Great to play alone or with so-called 'friends' Blood Money is one of the most addictive blasts I've played in ages.'

**STAF:** 92% – 'It may not be an original concept and boiled to basics it's just another shoot-em-up, but that doesn't stop it from being a hugely addictive game that'll keep you blasting for months. The two player option offers simultaneously play which keeps two people happy at once. The game is so visually brilliant and possesses those classic addictive qualities that once you've picked up your joystick you just won't want to put it back down again! This is arguably the best shoot-em-up on the Amiga to date.'

**CVG: 85%** – A smidge more variety would have helped the quality of the gameplay match that of the graphics and sound more closely, but there's still no denying that Blood Money is a damned good blast. Definitely one of the best games of its type on the Amiga to date.'

**YA: 82%** – 'I would have preferred the omission of the introductory music in favour of more levels, or other difficulty option'

**CU: 76%** – 'Blood Money is neat, but it builds itself up too much. It's simply not as good as it thinks it is.'

**O: 74%** – 'Fans of Menace are in for a treat. Others may find the going a little tough – and maybe a little flat at times.'

**ACE: 732 /1000** – 'If it's a tough shoot-em-up you're after then this fits the bill. Even simultaneous the two Player option does not make things much easier – It's a hard graft all the way. It certainly is not stretching the bounds of computer entertainment – shoot-em-up gameplay never varies much. However, It's addictive and testing, guaranteed to give a lot of short term pleasure.'

**AP: 33%** – [R £7.99] 'This game is the epitome of lifelessness – in fact, it's worse than that. It's competent, Average, Mediocre, Inoffensive, And as such, it's unforgivably crap.'

In typical Psygnosis fashion, you are first greeted with an ok intro of a ship flying through some asteroids, all set to a stunningly fantastic piece of intro music (seriously up there with some of the Amiga's best). Then going into the game you are first greeted with 4 planets to conquer, each with a different craft and completely different graphics in each, making the game more like a compilation of four small games really. In the game it all looks, pretty enough and all moves extremely smooth. Still despite all this it definitely feels lacking.. The silent sound effects when music is on doesn't help proceedings.. Also its layouts are frustratingly punishing and not in a good way , with you often forced into bullet paths and terrain it is impossible to escape from. All in all a polished but generic blaster, with brilliant intro music.

The game was designed by DMA Design (better known today as Rockstar North) and David Jones who would of course later create Lemmings and Grand Theft Auto and Tony Smith also would work on Lemmings and still in the industry most recent being part of the team behind the 2013 DC Comic beat 'em up game Injustice : Gods Among Us. Perhaps though the real star of this game though is the music by Ray Norrish who did a Stirling job on many Amiga games such as Alcatraz, Anarchy and the Killing Game Show.. But with Blood Money I think he did his finest work.. Mixing in comedian Harry Enfield 'Look at my Wad' quotes and 'Show me the money' all set against a memorable catchy tune, that is up there with Amiga's finest. It is so sad that he seemed to leave the gaming scene after his Amiga days. Although he does seem to have created an indie game Robotron 2154 <http://norrish.force9.co.uk/robotron/> which is awesome and well worth a play.

David Jones (programmer) and Tony Smith (graphics designer) from DMA Design, who have spent the last eight months writing Blood Money.

The one thing that's holding David back on the Amiga is lack of memory. Games have to be written for the bottom of the line machine and there's just not enough memory on the basic Amiga.

Don't tell anyone else, but DMA's next game promises to be a hack and slay which might have an unusual cheat option, one that adds more blood and guts to the graphics for those not of a sensitive disposition.

## BLOOD MONEY

### The ultimate arcade game

Hold it right there. Are you REALLY ready for this one? Have you got the courage to load up the experience that makes all the other games you've played seem prehistoric?

Because **BLOOD MONEY** is simply the best arcade game you've ever seen. It has staggering graphics, amazing sound effects and music and the most gripping gameplay you've ever tackled in your life. **BLOOD MONEY** just leaves the competition for dead and takes you into new realms of arcade action.

But it's going to be tough. From the instant you hear that driving soundtrack you'll be plunged into a maelstrom of sheer destruction, as you plunder the four Outer Planets in a kamikaze quest for gold and glory. The aliens in **BLOOD MONEY** set some vicious traps, and it will take all your skills just to survive.

Use your awesome firepower wisely and you'll turn those aliens into blood money that can earn you extra weapons and equipment. And you're going to need them, because there are no easy screens in **BLOOD MONEY**. It's a life and death struggle that demands all your tactical genius and shoot-em-up know-how before you battle through to confront the four planetary Guardians.

With its vast bit-crapped graphics, superb animation, blistering sound, devilish obstacles, awesome firepower and 1 or 2 player options, **BLOOD MONEY** is the greatest challenge yet faced by any games player with a passport to outer space.

**BLOOD MONEY**. It's here. It's in your trembling, sweaty hands. It's ready and waiting for you. But are you sure you're ready for **BLOOD MONEY**?

*[ 8/10 – Engaging cyberpunk, vampire adventure RPG. Today it is best played on a PC though.]*

**AP: 89%** – ‘Clever, well-scripted, thoroughly engrossing adventure that is fun IF YOU HAVE A HARD DRIVE. The loss of ‘dialogue replay’ is really annoying – with so much meaty dialogue you do need to be able to recap previous conversations at your convenience. I ruthlessly banish one of its marks for this deficiency. (90% given for AGA A1200 version)’

**CU: 88%** – ‘[A1200 review] Even if you’re not a fan of Gibson and Sterling-based Cyberpunk fiction, the compelling story and informative manual will soon convert you – it’s fangtastic!’

**O: 84%** – ‘I liked this fame a lot, and if you have the necessary hardware (one for a game-starved A4000 owners), like adventure games, and are familiar with cyber-speak, buy it.’

**AF: 82%** – ‘Despite some tedious game mechanics, such as the inventories of the characters and the combat system, this adventure is powerfully overwhelming in its narrative and pace. It feels as if you are taking part in a book. Adventure fans, Internet fans, Hackers, Crackers and Phreakers are all going to love it, it bites.’

A very well written, text heavy adventure set in 2094 New York, a futuristic ,cyberpunk world of vampires and murder. It is an engaging world and one well worth battling with the unnecessarily complex and laborious user interface that involves both mouse and keyboard. But battle through that learning curve and I guarantee you will find a story to enjoy here.. Especially as there are so few vampire or cyberpunk games around.

The Amiga though really wasn't geared towards an adventure game that is so complex and so it was only really worth playing on an A1200 with a hard drive.. Today though, instead of trying to play it on the Amiga , it is far better to play the PC version. The best way to play this game today is buy the superior PC version on GOG.com

<http://www.gog.com/game/bloodnet>

So in summary definitely a game to sink your teeth into. Give the game a go, you will definitely Fang-k me for it, as this game has a lot of bite to enjoy (Ed – Call in the bad pun squad, and cart him away).

^ comforting to see that even in the future, Central Park is pretty much the same.

*[ 7/10 – Inferior Dungeon Master Clone, terrible graphics but enjoyable RPG never the less.]*

**CU: 85%** – ‘seems to be far more varied than DM ever was. The further you get into the game, the more depth you realise it has. One thing that has been salvaged from Dungeon Master is its logical element. Every puzzle can be solved if thought out logically, which make it much more fun than a trial and error jobby. A deep, involving one-player game. A deep, involving and highly competitive two-player game. A thumbs up deserved if ever there was.’

**AP: 85%** – [R £9.99] ‘FRP at its best (and cheapest). A Class One Bargain (with Honours).’

**CVG: 81%** – ‘Role players who don’t care about flash graphics should love Bloodwych but, unlike Dungeon Master, it won’t hold equal appeal for more mainstream gamers.’

**AC: 81%** – ‘obviously inspired by Dungeon Master, but it fails to emulate the 3D interaction and falls short of the standard graphics and sound expected on the Amiga.’

**AF: 79%** – ‘I enjoyed Bloodwych immensely, but then I’m into this sort of thing anyway...[sic]...Still great fun for all you role playing freaks out there , and one that may eventually become a classic.’

The fact this game out after Dungeon Master is crazy, as against that game this is vastly inferior. Still look past the graphics and it isn't a bad game. The simultaneous two player option is a nice touch as well being genuinely innovative and great fun to play.

So if you like your Dungeon Master style RPGs and want a fresh challenge then you could do a lot worse than giving this a go.

It is just a shame that the graphics is so poor, I know it is incredibly shallow of me but I really struggled to get into this game, because the game is so ugly.

As the people of the Bloodwych awake to a new dawn, they find a stranger in their midst – from one of many races he has come. His task; to halt the demon that lies dormant within the Castle of the Bloodwych.

Unification of the Crystals of Sanguis will secure the Behemoth in his lair for all eternity. Should they remain separate, then he shall rise to bring darkness into the world.

This unique role-playing fantasy game allows greater interaction with the environment than has ever been seen before. Argue, barter, negotiate – even lie through your teeth! The fully implemented personalities of all the characters in Bloodwych allows a rich style of role-playing that has only been dreamt of.

With one or two player simultaneous mode, this is the game that you've been waiting for. Bloodwych for those that dare!

**A really interesting Bloodwych review by Hired Guns creator Scott Johnston , which was taken from...**

<http://www.angusm.demon.co.uk/AGDB/DBA1/BloodWy.html>

***Scott incidentally now works at Apple in Software Development, His review is a good few pages long, but I think a really interesting read...Hey though if you aren't interested you can always skip on a few pages, to the next game 😊***

The Amiga game I've chosen to talk a little about is the seemingly forgotten game Bloodwych. A simultaneous two player dungeon RPG that came out, I think, in the spring of 1991. This game is very important to me because, together with the indomitable Dungeon Master, it inspired me to create my own game. I'll ramble on a bit - if you can bear with me – about how, why and what led up to this.

The computer I first started playing around with was a Spectrum, mainly because it had a better BASIC than the C64. I played many games and started writing my own adventure games which were reviewed in Crash magazine (Lightmare, Battle Axe). After the Spectrum I bought a Commodore Plus 4, which may seem a weird choice, but it had a decent keyboard, and again, it's BASIC was superior to the C64's. Then the A500 came out. My mate got one before me, I was really livid about that - especially when he started showing off Carrier Command! When I finally did get a 500 bundled with Photon Paint it didn't take me long to get to grips with 4096 colours. HAM mode drawing came easily after battling with the Spectrum's colour 'clashing' system! The results basically got me the job with DMA as a Graphics Artist. I drew these lovely big science fiction landscapes, well, I thought they were lovely then.

Commodore + 4 >

Amiga 500

< Sinclair Spectrum

The first game I worked on properly was Walker, which was ultimately in development for 3 or 4 years. The only graphics of mine that ended up in the game were of the actual Walker itself. It was a bit like the ED-209 from Robocop, and it had this swivelling head which had 90 different angles. The Walker project went into limbo for a year or two, during which time someone came up with the idea for Lemmings. I did a lot of the graphics for Lemmings with Gary Timmons doing some animation, they were simple and naive, but maybe that's why they appealed to a lot of people that wouldn't normally have played computer games. Lemmings only took about a year to produce, and it's success allowed DMA, which was a 4 or 5 person team working in a 2 room office, to roughly treble in size. I taught myself Assembly during this time.

At about this time Dungeon Master finally appeared on the Amiga. What really struck me was the level design. With a few simple things, like switches and floor-pads they manage to produce a great variety of puzzles. Learning combat was great as well; using the controls properly you could dash round the monsters doing them damage without taking any hits yourself, if you got it right. You could also use the corners in the corridors to your advantage, as well as using the doors as weapons. I took the trouble to map Dungeon Master, but with the sequel Chaos Strikes Back the level design meant you were going all over the place without any clear idea of how much progress you were achieving. It wasn't as satisfying.

Captive was just a bit too slow for my taste, I think Tony (Crowther) put a lot of polygons or graphics compression and other things in the game and it ended up being a bit too much ...and anyway I was more into the idea of a sword and sorcery type game rather than the science fiction approach; which is going to seem like a huge contradiction because of the approach I took with Hired Guns. Actually, Hired Guns started off as a sword and sorcery game, but the reason it changed was when I did an initial demo for it, during the production of Lemmings, I ended up putting this shotgun effect in, that enabled reloading by firing and then pulling back, like a pump-action. I was really happy with the result. I was also a big fan of the film Aliens, and in the special edition of the film you had these unmanned sentry guns, and they **had** to go into Hired Guns.

Ah man, that's great, you could hear them blasting away in the background, BA-DA-DA-DA-DA-DA while you were running around wondering what the hell was going on. In the end my influences forced Hired Guns into being a science fiction game.

Bloodwych came out a bit after Dungeon master on the Amiga. The main innovation was it's split-screen, horizontal format allowing for two player games. As far as the multiplayer option goes, the really big thing was co-operative play. Much more fun than all this deathmatch stuff. Doom and Quake are fine but nothing beats working together. I used to play Bloodwych with a college friend every few nights for a couple of hours. The game gave me a lot of ideas.

Actually, the first hacking I did was on Bloodwych. We had some really good debugging tools at DMA but I used the Action Replay Cartridge which was gathering dust in a cupboard. It wasn't that I wanted to cheat, but there was a small bug in the game. I can see why it didn't appear in the play testing though. It was a really sneaky thing, There was this NPC (Non-Player Character) chap that you could barter with. He'd hold up various objects which you could accept or refuse. If one of your guys was a bit hungry, you'd wait for something like an apple to appear and accept that, etc, etc. Well, at one point you were offered a white key, and if you didn't accept it, there and then, it was never offered again! You couldn't complete the game and you'd have to start from scratch which was pretty lame. The Action Replay Cartridge let you go through the memory checking for any changes, when I found the variable corresponding to the white key, I reset it and was then able to continue.

It's true the character graphics in Bloodwych were a bit spindly, but this was because the screen size was so small - this was another limitation I wanted to get round in Hired Guns. I made the characters fairly slim, but you need to do that in order to create sufficient contrast for when a monster appears. It's got to look huge in comparison to your guys. Also, because we used a small screen repeated four times, unlike Dungeon Master which used one big screen, we were left with more available memory. This allowed us to put in extra angles for all the wall graphics so you can see above and below.

Bloodwych tends to play faster than Dungeon Master. By this I mean that the puzzles are more combat based requiring less ponderous trial and error, and the screen redraw is just plain quicker. Obviously having four players in Hired Guns, each with their own 3D view, was going to mean pushing the old 500 quite a bit. Fortunately I had around me at DMA a number of experts on Amiga technology and we milked those custom chips for everything we could get!

A simple but effective speed up trick which I employed at a later date on the AGA versions of UFO: Enemy Unknown is worth a note at this point. The original PC code (in C) we got from Nick and Julian Gollop was a bit of a mess, and in the time available we couldn't do that much with it to speed it up without opening a whole new can of worms. I did make a major breakthrough at speeding up the AI though thanks to the Amiga. When the enemy took it's turn, instead of leaving you to look at a 256 colour screen, I found that replacing it with a simple 4 colour screen made things happen in about half the time. The problem was that the Amiga chips were hogging the bus bandwidth and slowing the processor right down.

Some other Amiga RPGs included some nice effects which really added to the atmosphere. Take Black Crypt for example which unlike Dungeon Master, which had been converted from the ST, was written for the Amiga, with some nice Amiga-ized effects. The teleport effect in Hired Guns which is a sort of rainbow-transparency thing, I 'borrowed' the idea from Black Crypt. I've seen a few pirated versions of Hired Guns about, but none of those have actually cracked the game properly.

One week I came up with a cunning plan, I figured anyone who cracked the game would take out the manual protection, play the game a bit and leave it at that. But I included a routine that detects if the game has been altered, it then does nothing until you make a certain amount of saves at which point it messes up your save files, just when you're getting into the game. Bloodwych's level design wasn't very good, kind of a rabbit's warren maze with none of the themed levels you'd find in Dungeon Master. Bloodwych had huge, convoluted levels which you soon gave up mapping, but it didn't matter because you didn't have to do much back-tracking. You could just soldier on. It was a bit more arcadey than the problem-solving in Dungeon Master; both good games, but in different ways.

There weren't really major puzzles, they were a bit obscure, a lot of distant clicks when you triggered a switch etc. It concentrated more on the character progression, and the stats like Strength and Magic etc. I quite enjoyed the spell system. Dungeon Master was more realistic, in a way. You'd be introduced to new spells and given a series a runes (e.g. FUL BRO) to invoke it - the player would have no idea of how many more spells existed or what they had missed. Bloodwych was more arcadey, you had a colour code indicating type and strength, and a spell book showing you all the spells that you could get. This colour system was basically used throughout the game. It was fairly simplistic but good fun.

Dungeon Master had a map of 22 x 22 x 10 levels, I think. In Hired Guns it was a proper 3D map, you couldn't escape a monster by just running up some stairs, they'd chase you up there. In Dungeon Master as soon as you left a level you were safe from anything on the previous level. This was another innovation from Bloodwych, you could literally see the monsters queuing up at the stairs to get at you. That could be quite a shock if you were used to Dungeon Master. Of course a couple of human players could easily use this to their advantage and lure monster to their grizzly deaths - frequently!

The sound in Bloodwych was - basically - shite. There was a "clink" that meant either you'd been hit, or you'd hit someone, and maybe the odd grunt. I was really into sound effects and music though. My brother, Brian Johnston, did the Hired Guns music which was excellent. They were huge tunes, probably 2-300k to get the best quality samples. I've always thought the sound is important, with the Colonization conversion we got Allister Brimble to do the music and it turned out really brilliant. In the AGA version of Hired guns which hasn't been released the monsters have multiple sound effects instead of just one, as in the released version.

Typically in Hired Guns there are quite a few contemporary weapons, although they tend to be the least effective ones. One of my favourite sounds (only in the AGA version) was from the film Where Eagles Dare, the German Schmeisser sub-machine gun, which makes a satisfying metallic clattering RAT-TAT-TAT.

## Dungeon Master (1987)

I don't think it was intentional, but there's a definite feature and style progression through Dungeon Master to Bloodwych, to Hired Guns through to Doom that brought people to the point where they're playing multiplayer games. I never played Doom that much, but, in a way, I see Duke Nukem as a spiritual successor to Hired Guns. It had the in-humour, the fun, the neat little gameplay tricks and especially the level design that made Hired Guns what it is.

## Bloodwych (1989)

In the end, what I really enjoyed about Bloodwych, and made Hired Guns so much fun was the option to play co-operatively. There's too much concern with deathmatches now.

## Hired Guns (Nov 1993)

It was Bloodwych that sparked the drive to produce my own game.

[ 4 /10 – Detailed but dull war game.]

**O:** 72% – ‘Comprehensive it may be but friendly is not a part of the vocabulary. Fussy is more appropriate, as the whole process of setting up your troops, identifying different groups and units and just keeping an overall look at what was going on was far too time-consuming and unnecessarily complicated. Of course you can set battles to automatic, but that cuts out 50 percent of the package’s potential entertainment value. Sadly, the campaign section, good though it is, isn’t enough to carry the whole game.’

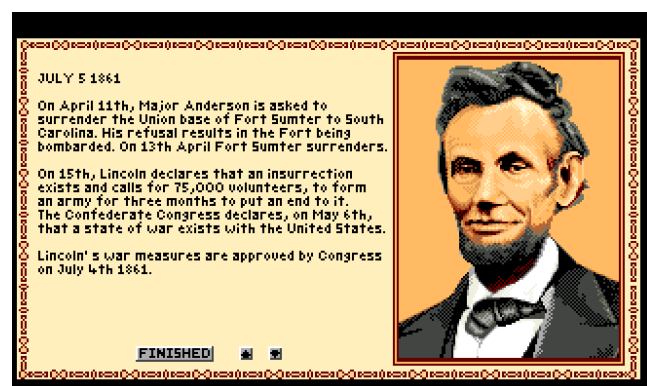

**CU:** 69% – ‘A good war-game, let down by the actual combat section.’

**AP:** 66% – ‘Interesting, informative and uniformly dull. It’s a fairly reasonable Civil War simulation but mostly devoid of character.’

**AC:** 60% – ‘On the whole, though, the war gaming fan will find enough in this game to warrant buying it, particularly as the tabletop variety takes even longer to organise and play. Other gamers will scratch their chins in a thoughtful manner and give it a wide berth, but that’s only to be expected.’

**AF:** 52% – ‘Although the Blue and the Gray is an historically accurate portrayal of the American Civil War, it is too tedious for anyone but the most ardent war gamers to get to grips with.’

Blue and the Gray, is exceedingly in depth and stuffed with loads of information about the civil war in it. So if you are a Civil War aficionado as a guy I used to work with was. Then this game is of definite interest to you and well worth you investing your time in.

If however like me, you have an interest in history generally, but when playing a game you like to be entertained first, educated second, then it best to avoid.

It is a real shame as well, as I can see the love, attention to detail and effort that has gone into this game, that I want to Love it. But I just felt completely confused on what to do and un engaged in everything around me.

As mentioned in the magazine reviews, it is the battles that is what really annoys about this game. With it all being far too slow, confusing and cumbersome to play. It is true that you auto play the battles... But that's the main point of the game surely?

Phwoar, nuts and bolts hey, doesn't all that shiny smooth metal, doesn't it just make your screw driver go all of quiver... and as for when I see that vacuum cleaner..well I just go weak at the knees.

No? ... Ok, maybe its just me, cough (ahem).. Well maybe this game isn't for you, as it's full of sexily clad naked atomically correct androids to get down and rusty for you. The actual puzzle game that allows you

to see all that cyber erotica, is actually quite good fun (read the Zzap review above for the simple rules of the game. It is a bit like draughts and so quite strategic, once you have to think several moves ahead. Yes I quite enjoyed this game, and not just because Blue Angel 69 the sexiest cyber babe I personally have ever seen (sorry Miss Vacuum, but I have met someone else...now where are those jump lead cables?).

AMIGA

## Blue Angels : Formation Flight Simulator (1989) £24.99 Accolade / Dev: Artech Digital Entertainments

*[ 5 /10 – Novel alternative to your typical flight shooter. It is a pity it all runs so sloooow.]*

**GM: 78%** – ‘Amiga formation stunt flying has the same high presentation and clear layout as the PC original but lacks the interest and playability due to weak flight graphics. Screen update is quite slow, of variable jerkiness and prevents a feeling of involvement. Strangely, sound is little improvement over the PC, just a few bleeps, a dull engine noise and ‘Break!’ Only of major interest to Red Arrow freaks.’

**AC: 75%** – ‘Now, a flight game where you don’t get to shoot anything isn’t necessarily all bad, but something has to be done to make it interesting. Although Blue Angels has a nice display and plenty of options and stunts there isn’t much to keep interest. It could sell on the accuracy of the simulation, the reality of flight training to become an ace pilot, but of course without an analogue joystick option all this is impossible. Nice try though.’

**AA: 70%** – [R: £9.99] ‘It’s reasonably good fun and there are loads of options to explore. Hope they’re a bit quicker.’

**AF: 70%** – [R: £9.99] ‘It’s not as much fun as Knights of the Sky, but for those who liked Top Gun, this should be right up your flight path.’

**AP: 41%** – [R: £9.99] ‘The simulation mode’s more fun than the air-shows, which seem an entirely unworkable idea. The fact is that there are many faster, smoother, better-looking flight sims out there that you can practice complicated manoeuvres on, and then go and shoot down planes afterwards. Strictly of novelty value for flight sim enthusiasts only.’

**CU: 20%** – [R: £9.99] ‘Let’s face it, the Amiga just can’t handle flight sims very well can it?’

Do you ever watch the Red Arrows doing all those crazy stunts, and think wow, what I would do to be up there flying with them? No me neither, typically my thoughts run along the lines of crazy loons...and making sure I am out of any potential crash flight paths. This game I feel has a lot of potential, after all Nintendo’s Pilot Wings proved, that with a good scoring system and a range of stunts to perform can result in compelling gameplay. Sadly in this game, the graphics are far too weedy, and the gameplay has no real reward for perfecting a stunt. All in a missed opportunity, that sadly on the Amiga was not up to the task.

## Blue Boy (1992)

£24.99 Micromania

[ 6/10 – *Superman meets Defender, in this surprisingly fun game.*]

Simple, but entertaining arcade game which is crying out for a Superman license and stuck on the app store. The concept is simple, you are Blue Boy, who fly across the city, defending the hapless citizens, who seem oblivious to the laser wielding aliens above them. As the Super Hero you must keep an eye out when any aliens grab the humans and shoot the aliens down before they take them up to mother ship. The game is surprisingly good fun (if the city too large to traverse in time). Still it is all helped by the humorous graphics. Give this game a quick go, it probably won't hold your attention for long, but while it lasts you will have a blast.

## Blue Max (1992)

£29.99 Mindscape /

Dev: Three-Sixty-Pacific / Artech Digital Entertainments (Amiga conversion)

[ 4/10 – *Too slow on the Amiga, Play the PC version to see how it should play.*]

**AA: 68%** – ‘After viewing the intro, I hoped that Blue Max might be something special. The presentation is a plus, being of a high standard with a vast array of menus. Unfortunately all hopes of a good flight sim were dashed when the game began. The first thing to strike you is the incredibly slow screen update. The 3D literally grinds to a halt when there’s any action. Taking this major problem into consideration and add the fact that there is a sheer lack of depth, all you’ve got is a game that’s nowhere near the standard expected.’

**AF: 65%** – ‘even the smoothest of sorties won’t provide you with the ‘skin-of-your-pants’ exhilaration that was intended. Still if flight simulators are what light up your particular Christmas tree, the Aces is worth a try. Smoke me a kipper, I’ll be back for breakfast.’

**AP: 52%** – ‘A game which aspires to greatness, but falls far short, it could have been a classic, and that is what makes me angry. The best I can say is ‘nice sound’.

I love myself a bit of World War 1 bi-plane flight sims, none of that see a dot on a radar and watch it disappear as you fire a missile 20 miles away. No I want to see the white of the eyes of the old bosh as I give the Hun a jolly good talking to, that he won't forget I can tell you. This flight sim allows you to control 8 of the biplanes of the time and has oodles of options to enjoy. So it is a shame that the conversion from the PC is such a poor one, with no attempt made to try and get it to work at a reasonable frame rate on the humble Amiga. So for your World War One fix, look instead to play Knights of the Sky, Red Baron or Wings. Otherwise, instead play this on the PC, where the game runs as it was supposed to (The One game it 90% on its PC review).

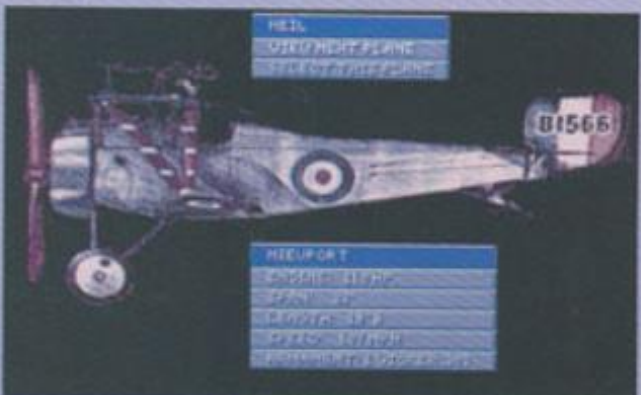

One cool option in this game is that you get to play two players simultaneously, for some serious dog fighting action.

## THOSE MAGNIFICENT MEN'S FLYING MACHINES

**1. SOPWITH CAMEL**  
Probably the best known plane of the war, taking its name from the 'hump' over the engine cowling. A sensitive plane - requiring a sensitive pilot - and is quite nose heavy, making the risk of a spin all the more likely. Each plane could carry four 250lb bombs with a forward-firing machine-gun. Almost 5,500 were built, and the 'Camel' claims more kills than any other plane of the Great War.

**2. NIEUPORT NIE 17**  
This was the favourite amongst the allied aces. Quicker than the Camel, the Nieuport also carried electrically-fired rockets for the destruction of enemy balloons.  
The Camel and the Nieuport are just two of eight different planes you can choose from - each with individual characteristics and specifications. Which will be your favourite 'kite'?

## Blueberry (1988)

£???.?? Infogrames

[ 2/10 – Terrible interactive cowboy Franco-Belgian comic book.]

The game is based on what looks to be a hugely popular Cowboy comic book that in France was more popular than Marvel at the time. Sadly even understanding what the game is about doesn't save you from how truly terrible the game is. There is nothing but an indifferent storyline, mad speech of certain words and terrible (I mean REALLY bad) arcade sections that makes you wonder how this ever was released? Still the artwork is pretty nice, and it introduced me to a cool new comic I had never heard of before...so it's not all bad.

# The Blues Brothers (1991)

£25.99 Titus

[ 8/10 – *Slick platformer ,with awesome music. Let down by mundane platform mechanics, that never seems to shake thing up .]*

**O: 91%** – ‘The Blues Brothers has got everything it needs – almost. But it hasn’t got a driving section involving over 100 cars, totally impossible stunts and mass pile-ups, and that’s about all that’s wrong with it. Although the game is based on the characters rather than the film, Titus has still managed to create a very playable, enjoyable and surprising game. To be honest, even if it wasn’t based on the Blue Brothers and the main sprites were completely different, it would still have worked. Luckily, because it is, we get some great adaptations of the music. In one or two places the tunes are slightly out (although I only noticed this because I’m an ardent Blues Brothers fan), but for the most part they’re spot on. Titus has obviously put a lot of effort into the game’s design. Almost everything you see can be used to climb on, even things that first appear merely backdrops and the nice part about this is that the sprites change to suit whatever they are climbing on. The two-player option is a mite tricky to get to grips with at first, but with a bit of perseverance and teamwork, the re-centering screen works fine. The Blues Brothers is an excellent product, no matter who you are or what you do to live, thrive and survive.’

**AC: 88%** – ‘There isn’t a lot I can grumble about except maybe that the game is quite hard definitely not one for the platform beginner. If I was Titus I was very proud of this excellent film conversion.’

**AP: 87%** – ‘Sparkling piece of console-style action that’s excellent in everything it does. Don’t let the Titus name put you off, they’ve finally come good. Fun fun fun.’

**CU: 87%** – ‘Fans of the Blues Brothers, and even those who have never watched the movie or listened to their records, will definitely get a kick out of this game. One of the best platform romps on the Amiga for a long, long time.’

**AF: 86%** – ‘You’ve seen the movie, bought the soundtrack and been to the fancy-dress party. Now play the game?’

**AA: 86%** – ‘It’s been a long wait but it was worthwhile. The characters have been successfully captured, being depicted in charismatic ways. Instantly identifiable Blues Brother melodies thump out toe-tapping beats. It is not only the vibrant Brother atmosphere that shines through but the gameplay is smooth and addictive. This stands as one of the most fun movie conversions to date. A tribute to the boys, platform entertainment, and an illustration of how movie conversions should be produced: with care and quality.’

**Z: 86%** – ‘Blues Brothers is the dog’s you-know-what – possibly slightly marred by a lack of things to do.’

**AA: 52%** – [R £7.99] ‘I think it’s fair to say that Blues Brothers film is a classic. I also think it’s fair to say that the Blue Brothers game isn’t. It’s not all that bad, and in fact if you like simple platformer’s, you won’t be too disappointed, but we’ve come to expect more from

our games these days, and be honest, this Titus budget release just leaves me a bit cold now. I do remember when it originally came out, and do remember enjoying it quite a bit, It just seems that we've seen about a million games of this genre since, making a second appearance nothing more than a reminder of how 'not really that good' it was first time round. The basic idea is the player controls either Jake or Elwood Blues, and must make his way around a number of platformed levels, collecting spinning disks and performing general platform activities. Not the worst game ever, not the best. Ho hum.'

---

Wow the music is so good in this game...Of course it helps that I am a huge fan of the Blues Brothers film and music. But all the tunes are here offering great renditions of all the classics. The gameplay itself is a simple platform affair, and on the Amiga it does a darn fine job as well with it all scrolling smoothly and moving fast. The only trouble is that the platform action is very generic, with it not really changing or offering anything new off of level one. Also this game is really missing a punch, as opposed to only able to attack by throwing boxes. So in summary, compared to most console platform games this game is decidedly mundane, but on the Amiga where decent platform games are much scarcer then this is definitely worth your time. Interestingly John Scott who programmed this went on to work on Quake 4, Unreal Tournament 3, Gears of War 1-3 games and Shadow Complex (now that is quite a resume!!).

# THE BLUES BROTHERS

The New Hit Adventure Game Starring Jake and Elwood

They sent the police into a panic  
They whipped the crowds into a frenzy  
They redefined Rock'n'Roll music  
And now...they're ready to do it again

Cruise along with Jake and Elwood, those all-time rhythm'n'blues men in this engrossing platform game-an explosive mix of adventure, comedy and music.

Back by popular demand, the Blues Brothers are out to conquer the stage one more time. To an upbeat rhythm you set off across town to retrieve your stolen instruments...but it ain't that easy. You've got to escape from prison, swim through the catacombs, and shoot to the upper heights of the big city before you can start that concert.

Creating chaos and confusion, you encounter Marilyn, the hot-tempered waitress, Isosocles, the prison warden and Bob, the burnt-out hippie... Get ready to play the Blues!

- Jake and Elwood, the original Blues Brothers
- The Blues Brothers original soundtrack
- 1 or 2 players simultaneously
- More than 300 screens on 6 different levels
- Multidirectional scrolling

## BMX Simulator (1988)

£14.95 Codemasters

[ 4/10 – *Supersprint clone, with bad controls and very little to hold your interest.*]

**ACE: 810 / 1000** – ‘This addictive budget title was a very popular 8-bit game and is now appearing on the larger machines. Pedal against either a friend or the computer. Great game with lots of addiction.’

**GM: 76%** – ‘Graphically the Amiga BMX simulator is superb. Every jump, barrel, flag etc is excellently detailed. Sound is improved over the 64 on the title screen, but scarce on the racing. Colour is well implemented throughout even though fairly dark colours are used for the tracks themselves. Movement of the riders is continually smooth throughout the whole game. If you complete the track in the allotted time, you have the option to see how well you have (or haven't) managed to overcome those obstacles by pressing the A key when prompted. In this mode, if you hold down the S key, the action replay goes into slow motion. When the track is completed it's on to the next, except this time the going is a little bit harder.’

This game was the last game Richard Darling, co founder of CodeMasters designed and coded (on the original 8 –bits), before going into just design and management of the hugely successful Codemaster publishing house.

I remember, getting this on the Spectrum and not liking it much, but at least that would have only cost me £1.99... To pay £15 for the same simple gameplay and poor controls would have had me crying out loud. On to the game...

Amiga Version

Well it's a bit like the Atari coin-op Super Sprint, only on bike, and with dodgier controls. The game is only any fun at all as two player where the simple gameplay makes it perfect for a little competition. But all in all, a real dud.

You know here in the UK baseball is called Rounders and is only played at school by the girls. Of course the game most are mad for here is Football (or soccer as the US call it) all I hear all day at work is about it which is a pity as England our national team is rubbish at playing it. I personally think we should follow Americas model and choose sports no one plays, have competitions no other country can enter or play and still call ourselves World Champions ha ha (ps I know World is some sponsor of the 30s and its all a happy coincidence, that its happens to be the word World) I hear they are trying to get a new sponsor for a reboot of a Hasbro toy so the winners can be called Masters of the Universe Champions. Anyway rant over on to the game..This is a rebrand of TV Sports Baseball and it's a pretty ok version of Rounders, I mean Baseball ☺ . See TV sports Baseball for full review.

# Bobo in Stir Crazy (1988)

£19.95 Infogrames

[ 7/10 – Fun collection of Game and Watch style mini games. Good simple fun to be had.]

## Amiga Resource

Summer: 17 /20 – ‘A French comic-strip character, Bobo, is a hard-luck prisoner, who at the end of six most original games, may give you a high score but still be in the slammer.

Bobo must serve porridge to hungry cons; peel potatoes as fast as possible; use a trampoline to bounce cons over the wall; scrub a floor everyone is laying down new tracks (any mother can sympathize with that one); escape from prison by walking on high-tension wires; and keep a dormitory full of cons from snoring and ruining his sleep. Excellent large graphics, good animation, surprising sound effects (particularly in what may be an international “language”), and adequate documentation help make the games delightful. All control is by joystick, and while the moves are not complex, they will tax your skills. The title alone, of course, is a major plus. So original.’

**AC : 67%**– ‘Stir Crazy is a thoroughly enjoyable game packed with humorous touches. The graphics are top notch cartoon quality and the sound and music some of the best to be heard on the Amiga. If that’s not a good enough recommendation then you shouldn’t forget that the game features the zany Bobo, who could just become one of the mega stars of computer entertainment.’

First of all I should note I had to take my screens from the brilliant Cubex55 You Tube vids as I couldn’t seem to emulate the game, worked fine on my Amiga though. The game is based on a French comic and has you do a series of simple arcade games in surviving prison life. Think of it as a series of Game & Watch games with great graphics and sound and you have some idea what to expect.

Do you like porridge? Bobo certainly doesn't - he's gone stir crazy doing time in the notorious prison, INZEESLAMMER.

He's desperate to get out, and his best friend is a trampoline! Using this, he and his fellow inmates can jump from their cell windows and bounce over the wall. Once over the wall they have to negotiate three electrical wires, jumping from one to another to avoid electrocution.

Then on to freedom, or is it? When Bobo's not trying to escape, he has his daily tasks, ranging from spud bashing and dishing up in the canteen, to cleaning the floor whilst other prisoners insist on walking across it! And the warden just loves to catch Bobo out, so even one footprint can spell trouble.

## Bob's Bad Day (1993)

£19.99 - Psygnosis /

Dev: The Dome

[ 8/10 – Fun Cameltry clone, with good Mode 7 like graphics.]

**AP: 85%** – ‘Bob’s Bad Day’s a gameplay triumph, and the sparse graphics really don’t matter. Just play it okay?’

**AA: 85%** – ‘It’s more a bad morning than a bad day, because once the wizard takes his leave, the game is an absolute pleasure to play. Yes better graphics would have been nice, and to be honest, the different gravity types do get confusing at times. Oh but then that’s the whole idea isn’t it? What more can I say then, apart from something really clichéd and trite, like “Bad day? Oh ho, more like a few food nights if you ask me!” (Help me please! – Karen).’

**CVG: 82%** – ‘The real-time sprite rotation in BBD has been heralded as the Amiga equivalent of the SNES Mode 7. It isn’t as impressive, but it’s smooth and inoffensive. But it’s not the graphics that make BBD, it’s the playability – Bob moves realistically and the difficulty level is well judged. If you’re after a game that’s a little bit different, give it a go.’

**CU: 82%** – ‘Of course, the downside of being the first to utilise Mode-7 style rotation is that the game graphics have to be very basic. This initially detracts from what is a very playable game, but you’d be foolish to let it influence you more than a few seconds.

Bob’s Bad Day is one of the most playable and addictive games I’ve seen in some time. The difficulty curve is exceptionally well judged, the playability is pitched just right and, with 100 levels, it’ll keep you going for a good while. Don’t let first impressions put you off Bob’s Bad Day or you’ll miss one hell of an addictive puzzler. Try it out.’

**O: 80%** – ‘The first impressions of Bob’s Bad day are not at all good, as I’m sure you’ve probably realised from the static screenshots on this here page. But without playing it yourself there’s no way of realising how fluent and utterly marvellous this game is, so you’ll just have to take my word for it. Bob’s Bad Day is one of those rare games which beginners can pick up and have a really good time with, which is mainly due to the perfectly judged movement of Bob himself. Rivalled only by the ball from Pinball Fantasies, Bob is one of the most realistic spherical objects you’ll find on the Amiga, with the twisty –turny platforms conveying a genuine sense of vertigo as you teeter over the edge of a cog-infested chasm with only the pull of gravity preventing you from loosing valuable coins. At times the reactions required to manoeuvre Bob ask just a little bit too much and some of the pathways are so difficult to reach that you could end up wearing the TV as trainers, but if you take things slowly and carefully and breathe deeply you should find no problems. The sad thing is that Bob’s Bad Day’s rough graphics and relative lack of hype will mean that it probably wont get the recognition it so richly deserves – a bit of spit and polish here and there would probably have tempted more people to part with their cash. Still, if you’re prepared to overlook the tasteless graphics in favour of the tasty gameplay then I’m sure you won’t be disappointed. Definitely a game that deserves to do well.’

**AF: 79%** – ‘The frustrating puzzles, madcap speed and a startling rotating effect make this a choice game if you like things upfront and wacky.’

**ACAR: 79%** – ‘Bob’s Bad Day ‘aint bad at all. In fact for a simple game with fairly rudimentary graphics it’s fast, addictive fun.’

**AFC: 69%** – ‘A fair old puzzler, but nothing to lose your head over.’

**AUI: 41%** – ‘Bob’s job is to roll and bounce around each of the 100 levels collecting the coins that need to escape, but this is made more difficult by the constantly changing gravity and the monsters that feed on the coins. Terminal boredom soon creeps in as the maze puzzles and the monsters all begin to merge into one horrible nightmare. Not even worth a joke about Bob being left out on a limb, let’s put this one down to Psygnosis having a bad day as well as Bob, eh?’

**Original Cameltry arcade game**

Lifes tough being Bob, there he was minding his own business, when suddenly a Wizard appears out of nowhere, says that was funny, and just because Bob was sarcastic about it the Wizard detaches his head and sends him on a weird twisty world to get his body back. Made by developer The Dome, who are best known today for their game Pugsy... This is a naughty unlicensed take off, of an obscure Taito arcade game called Cameltry released in 1989 (you can play the arcade original on the Taito Legends 1 compilation disc released on PC, PS2 and Xbox). Bob’s Bad Day, the game is quite good fun and kept my interest through all 100 levels. Yes well worth your time.

Bob was just minding his own business when it happened. All it needed was a wizard with a poor sense of humour, a couple of angry words and Bob found himself rolling around - not in laughter, but like a ball!  
 Now Bob's got to spin through the craziest lands the wizard could create in search of his legs. It's one of the fastest and funniest adventures around with the kind of mad challenge that'll keep you up all night searching and spinning in your quest to find Bob's lost legs.  
 And you thought you've had bad days!!!

Bob vaquait à ses différentes occupations lorsque tout arriva. Un sorcier sans humour, quelques mots échangés par colère et voilà notre cher Bob en train de se tordre, pas de rire, mais comme une balle de flipper!

A présent, Bob doit rouler dans des pays incroyables, créés par le sorcier pour retrouver sa forme initiale. C'est une aventure surprenante et délirante ainsi qu'un défi fou qui vous tiendra en haleine jours et nuits afin d'aider ce pauvre Bob à retrouver ses jambes.

Et vous qui pensiez avoir tout vu!

Bob frönte gerade seinem Hobby, als es geschah. Alles, was es dazu brauchte, war ein Zauberer, der absolut keinen Spaß verstand, ein paar ungehaltene Worte und schon kugelte sich Bob - aber nicht etwa vor Lachen, sondern wie ein Ball!

Nun muß sich Bob auf der Suche nach seinen Beinen durch die merkwürdigsten Länder rollen, die der Zauberer schaffen konnte. Eines der schnellsten und lustigsten Abenteuer mit diesen verrückten Herausforderungen, die Dich nächtelang durch die Gegend wirbeln und nach Bobs Beinen suchen lassen.  
 Du dachtest, Du hättest schon schlechte Tage gehabt?!

Bob stava facendo gli affari suoi quando è successo. Non gli mancava altro che uno stregone con uno scarso senso dell'umorismo e con un paio di parole irate e Bob si è trovato a rotolare, non dalle risate, ma come una palla!

Ora Bob deve girare nelle terre più pazze che lo stregone potesse creare alla ricerca delle proprie gambe. È una delle avventure più veloci e buffe che ci siano con il tipo di sfida pazzesca che vi terrà tutta la notte rotolanti e impegnati nella ricerca delle gambe di Bob.

£25.99 – Team 17

[ 9/10 – A great Amiga Beat-'em-up.]

**AC: 93%** – ‘Great graphics, brilliant sound, amazing playability and addictive as hell. If you’re going to buy a game this month make sure it’s this one. Beat-'em up fanatics must be over the moon.’

**AFC: 92%** – ‘Graphics are crisp and though not exactly awesome, they do the job well enough. Still, if you want this kind of speed you have to make sacrifices. I jest not when I say slower characters are quick but the fast ones are supersonic! An excellent soundtrack and loads of crystal-clear sampled speech to keep your eardrums bouncing merrily along. Some of the catch phrases the characters come out with in victory are guaranteed to raise a smile, not to mention adding heaps to the atmosphere. As an example to the genre, there is little to fault in Body Blows. You may tire of the one-player game as initial novelty begins to wane but, behind Renegade’s superlative Sensible Soccer,

this is easily one of the most agreeable head-to-headers about. Full of violence, full of style. Body Blows topples SF II’s precariously balanced crown and it ‘ain’t no pretender. The king is dead, long live the King!’

**O: 92%** – ‘Before we go any further, I wish to go on record as saying that I don’t like Street Fighter II on the Amiga at all. I disagreed with the 89% we awarded it (something mid-70s was more to my taste) and am generally of the opinion that the game has sold more than it deserved on its own merits. Which is why it warms the cockles of my heart to see something come along that really DOES deserve all the hype it’s had and will inevitably show SFII up to be the mediocre beat-’em-up that it is. Yep, Body Blows is the business and no mistake. After three hits in a row, Team 17’s gamble with a big-sprite beat-’em-up was their riskiest yet, and I don’t mind admitting that I had my doubts about this one. Having just walked away (barely) from a solid day’s ding-donging with the game, however, I’m pleased to report that Body Blows holds its own not just amongst Team 17’s past efforts but against any beat-’em-up on any home machine. Okay, so it rips off Street Fighter II something rotten, but any clone that improves upon the original is okay in my book, and Body Blows does that in just about every respect. It’s faster, smoother, tougher, has more variety and, most importantly, is infinitely more fun to play. If pushed, I’d have to say that this is only my second favourite Amiga combat game (IK+ is still tops with me), but it’s a close run thing. The action is fluid and instinctive, the special moves are easy to use and great fun to watch, and Mr Sheen must have been working overtime to give the game this much polish. The whole product reeks of quality with its sampled speech, oodles of options and general all-round user-friendliness. If you thought Street Fighter II was the business, think again – as a pure fighting game, this blows 99% of similar efforts out of the water with ease. Can these boys really do no wrong at all?’

**AA: 92%** – ‘A smack in the teeth for Street Fighter II and a kick in the groin for every other beat-’em-up. Body Blows contains superlative animation, hundreds of fighting moves and the usual high quality Allister Brimble tunes and SFX. More entertaining than Bruno, more attitude than Eubank and more satisfying than seeing Tyson stuck in jail. We’ve had to wait a long time for a beat-’em-up like this but it was certainly worth every finger-twiddling minute.’

**CU: 91%** – ‘The best Amiga beat ‘em up money can buy.’

**AP: 89%** – ‘Get it. Now. Whatever you think about beat-’em-ups, get this one and you’ll change your mind. A true corker of a game, with undeniable influences, but a feel and playability that are all its own. I’ve been waiting for this for a long time.’

**AF: 87%** – ‘there is something lacking – it just seems a little bit too clinical and robotic. Still, this is far and away the best beat-em-up ever. It’s technically excellent, polished and it brings up-to-date an area on the Amiga which has been sadly lacking recently. If you already have Street Fighter 2, sell it and buy Body Blows.’

For those who didn't grow up with an Amiga and instead had a console, it is really tough to understand why Body Blows was so highly regarded both back in the day and so fondly remembered today. When compared to the Consoles Body Blows is a poor game, with limited moves and much weaker playability. However when compared to Beat-'em-ups on just the Amiga this is definitely up there with the best.

At the time when this was released, this game came as a welcome game, after a swathe of disappointments such as the Street Fighter 2 Amiga conversion. Looking today, there is nothing fundamentally wrong with this game either...The graphics and sound still impress, the speed is smooth and top notch.. The only thing that lets it down really is the lack of moves, but this is more a limitation of the Amiga single button joystick as opposed to Team 17. I really enjoyed replaying this game again and whilst it isn't worth your time, outside those who played it back in the day and want a nostalgia kick, never-the-less for the an Amiga Beat-'em-up this remains a top class effort. In fact the Ninja special move, by blending into the background until hit (think Predator) is a fantastic special move that needs to come back in beat-'em-ups.

DAN

NIK

KOSSAK

### DAN

A young gang-leader who knows every dirty trick in the book, Dan is fast, good in the air and able to deal with most situations. Unfortunately, he's not too hot at getting punched, so opponents should find it easy to sap his energy if they can find a way through his defences. Like Ryu in Streetfighter, he can chuck out bolts of electric energy if the mood takes him.

#### SPECIAL MOVES:

Super Roundhouse Spin, Awesome Uppercut, Electrobolt, Deflectorbolt.

### NIK

Another young punk with his eyes on the title, Nik is the identical twin brother of Dan, and as such they have exactly the same moves and abilities. Nik and Dan hate each other, so you're always sure of a good scrap when these two get together.

#### SPECIAL MOVES:

As Dan.

### KOSSAK

A big flabby powerhouse from the former Soviet Union, Kossak is a product of early genetic experimentation. He's super-heavy, super-hard and, as a result, a little slow to react to some situations. Fast opponents may be able to exploit his lack of speed.

#### SPECIAL MOVES:

Groundshock, Hammerfist, Superdrill.

# YITU

# DUG

# JUNIOR

## YITU

Yitu is probably the fastest character in the game, possessing incredible lightning moves and cat-like reflexes. When he's at full tilt he's almost too quick to see, so always keep your guard up against him. If you can get through the blur of fists and feet, he's easily finished off due to his low hit tolerance.

### SPECIAL MOVES:

Super-fast punch, 100m leap, Super-slide.

## DUG

Another fat blubberguts, this reject from the pro-wrestling circuit can be devastating when he's on form. Like Kossak he is incredibly tough and his punches are like dynamite, but he's surprisingly fast for his size and most vulnerable in the air. One to watch out for.

### SPECIAL MOVES:

Super Body Splash, Head Charge, Stretch Push, Earthquake.

## JUNIOR

Thrown out of the boxing world for being too rough, Junior now satisfies his passion for extreme violence in the Body Blows underworld. His punching power is devastating, although his kicks leave something to be desired and is vulnerable below the belt.

### SPECIAL MOVES:

Uppercut, Super Punch, Flying Punch, Right Hook.

# MARIA

## MARIA

The only female combatant, Maria is a bit of a stunner and likes nothing more than a bit of fightin' n' fumpin' when she's not wowing the fashion world on the catwalk, or something. Spanish in origin, she has the power to do the splits to amazing effect, although she doesn't hold up well after a few good punches in the mush.

**SPECIAL MOVES:**  
Razor Spin, High Kick, Splits Trip, Flying Splits.

# LORAY

## LORAY

After learning the Way of the Exploding Pint Glass at a remote Shaolin Temple in Thailand, Loray decided that his martial arts skills would be best put to use in the streetfighting world. So here he is, complete with an array of mystical moves that you won't learn down at your local sport centre's karate class. Fast and agile, he's a handful for anyone.

**SPECIAL MOVES:**  
Dragon Flame, Spin Kick, Flat Hand, Short Roundhouse.

# MIKE

## MIKE

After a heavy day's trading on the world's stock markets, this executive boss type rolls up his sleeve and works off all that corporate stress with a spot of martial arts. He's very fast and possesses good all-round skills, although his strength is only average and is vulnerable in the air.

**SPECIAL MOVES:**  
Whirlwind Roundhouse, Tornado.

**NINJA**

This renegade exponent of the deadliest martial art of all is the only contestant armed with a weapon - in this case, a razor-sharp sword. When he's not giving you the closest shave you've ever had with his gleaming blade, he's summoning on ancient forces to make himself invisible and generally being very hard indeed.

**SPECIAL MOVES:**

Spinning Sword, Shadow Move, Super Shadow.

**MAX**

The ultimate bad guy, he only appears in the one-player game as your final adversary. Max may look like just another fighter, but in fact he holds a dark secret. All other information on him is classified.

**SPECIAL MOVES:**

Wait and see.

**T1**

Rumours abound that there may another contestant in the competition. Little is known about this fighter.

### MAIN CONTENDERS...

#### ...NIK

Brother of Dan and the downtown gang leader. His desire to win is only matched by the hatred of his brother.. he uses this devastating force

to summon a powerful electro-bolt which leaves most opponents reeling.

#### DAN...

The elder brother of Nik and a rival gangland rebel, he shadows his brother's moves every step of the way. Like Nik, he is able to draw upon inner energies to produce a devastating bolt of pure aggression.

#### ...JUNIOR

This solid British boxing bulldog has forgotten all about the Queensbury rules.. in his repertoire he has a fine selection of devastating kicks as well as tough punches! With his world-class stamina and incredible fists, Junior is potentially King of The Ring!

#### LO RAY...

This buddhist monk left the sanctuary of his shao lin temple many moons ago, seeking fame and fortune on the prize-fighting circuit. With some spectacular moves, magical abilities and tremendous agility, Lo-Ray is state-of-the-martial-art!

## Body Blows Galactic (1993)

£26.99 – Team 17

*[ 7/10 – Good sequel but the player balance seems off this time.]*

**AC: 93%** – ‘Body Blows Galactic is the best beat-’em-up to ever be inserted into the drive of the Amiga., OK ,so its older brother Body Blows, and IK+ were both pretty hot but Body Blows Galactic takes the title. Please, take my advice and visit your software emporium now.’

**AF: 88%** – [AGA version] ‘Galactic is better than the original, but it suffers from dodgy joystick controls and is trembling in the long shadow cast by upcoming Elfmania.’

**O: 87%** – ‘Compared to the original it goes far and beyond it thanks to the strange nature of the opponents. Add to that the eight-player tournament and you’ve got a game that’s perfectly competent in all departments and is just about the best beat-’em-up available for the Amiga. You just have to ask yourself if you really, really want another combat game, and if the answer is yes then Body Blows Galactic is most definitely for you.’

**ACAR: 86%** – ‘The sprites in Body Blows Galactic are huge, taking up almost half the screen height – you’ll almost believe you’re playing an arcade machine. Not only that, they’re fast, smooth, and well animated. The detail is impressive too – each player is decked out nicely, with high tech outfits and accessories. By the way there’s a free bonus disk in the box too, with a playable demo of the soon to be released Overdrive – a view=from-the-top car racing game – and a fully working version of Apache, an update of the old favourite Choplifter.’

**AP: 72%** – ‘We all liked Body Blows when we got to see it in April this year, and the team universally hailed it as THE Amiga Beat ‘em up. I probably wouldn’t have given it the roaringly good 89% that Tim Tucker did, but hey, that’s Tim’s prerogative. We liked it, Team 17 were pretty chuffed with it, and presumably you all liked it as well, as there’s now another one of it. It’s Body Blows Galactic and although it’s not really a sequel, it’s a bit more than a data disk. Danny and Junior are the only two survivors from the original, who’ve jetted off across the universe to kick seven shades of goo out of strange new races. Star Trek this is not. The graphics are a big improvement, the figures are better drawn, better shaded and don’t move in the oddly stiff-limbed way of Body Blows. The characters are massively diverse; there’s a girl on a hovering skateboard, a creepy ghoul, and even a dwarf on a dinosaur that work as a team and blatantly flaunt the Queensbury rules of gentleman’s boxing. These are Good Things. The downside? Well, the characters just don’t seem to hit each other, Weedy sound effects and nothing to the impacts as they get fighting. Maybe blood splats or bigger impact animations would have covered this up. And then there’s the big one. This game is slow. Very, vee-rrr-yyyy sloooooooow. Compared to the original which was frenetic fest of blocks and blows, this one a good 25% slower. Okay, so there’s animated backgrounds, but big deal. Go for Body Blows, or read the Mortal Kombat review, but leave this one alone.’

**AP: 79%** – [AGA version] ‘Much better than the 500 version, but doesn’t offer enough for fans of the original. May melt in the heat of the Mortal Kombat exhaust trail.’

**CU: 57%** – ‘A sad follow-up to a brilliant game. What a disappointment.’

This game is just as polished as the original, with a top range of characters to choose from. Unfortunately this time Team 17 broke the balance. The players are not evenly matched. One thing I do love with this is the tournament. Being able to set up an 8 player tournament. An idea I wish Capcom would take and run with, as its such a cool idea.

## Phantom

This uncanny chappie exists as an individual energy mass and subsequently is a tad tricky to pin down. Expect a lot of flitting around and some pretty lethal orb-type weapons as part of his repertoire.

## Inferno

Comes from the hot side of the world of Eclipse and is a fiery kettle of fish. Among his talents are the ability to throw the deadly Heatseeker and burn you with a spinning flame.

## Dan

Dan the man is obviously from Earth. If you don't remember him from the first title let me tell you that he's pretty adept in the skills of the Orient. He also has a pretty nifty trick with an energy bolt.

## Lazar

Lazar is from the most techie planet of them all, and subsequently has a lot of electronic wizardry at his disposal. Ranging from the high-powered laser beam through to the Lightning Strike, messing with him could give you a nasty shock.

## Dragon

Dragon also hails from the planet Gellorn-5. A massive and rather sluggish character, he can take a hell of a battering and can also inflict a great deal of pain.

## Warra

Hailing from the planet Eclipse, Warra lives on the side of the planet which is totally immersed in darkness and cold. A pretty tough cookie, Warra can give you the cold shoulder and inflict the big freeze.

## Junior

This champion boxer is also from the planet Earth. A real tough nut with some deadly moves. As well as all the standard moves, he can blitz with a series of jabs or deliver the punishing Fists of Fury.

## Dino

A sentient being who comes from the planet Gellorn-5. Unusually enough this planet is at an infantile stage of development, hence it is populated by dinosaurs. Dino comes equipped with a deadly little friend who has a nasty nip.

## Puppet

An occupant of the planet Miasma, puppet is no soft toy. His malleable joints make him a very pliable bundle of wood and strings. His Disarmer and locomotion weapons are particularly lethal.

## Tekno

Another inhabitant of the planet Titanica, Tekno is probably the most advanced being in the game. He has a lethal weapon in the Thundershot and an excellent grabbing technique with the Power Pull.

## Azona

The rock chick of the crew, this moshing extra from a Mad Max movie is also from the planet Titanica. Equipped with a hoverboard, she has some naff albums and a bullet-belt.

## Kai-Ti

This most ravishing chick hails from the planet Feminion. This is a world totally populated by women, and although I don't know exactly if they all look like her, it can't be that bad. Kai-Ti is a lovely mover, is extremely agile and supple... and I love her.

# Bograts : A Puzzling Misadventure (1996)

£12.99 – Vulcan

[ 6/10 – *Ok puzzle platformer, if a little fiddly to be enjoyable.*]

**AF: 87%** – ‘Another cracking good game from Vulcan. One for gamers who like to spend hours pondering over puzzles. Requires not a small amount of manual dexterity too. It’s almost excellent.’

**AC: 85%** – ‘A deceptively tricky little puzzler. Great fun to play unless you’re highly strung or prone to losing your temper pretty easily. Be warned, it isn’t just a dumb shoot-’em-up, so you might have to use your noggin for a change.’

**CU: 83%** – ‘Totally addictive and absolutely involving puzzler.’

Interesting platformer that for me was still too fiddly and harsh to be an enjoyable puzzle platformer. Reminded me a lot of the Mario Vs Donkey Kong game as you have to help your two little baby bogs make it to the exit safely.

### THERE'S A BOGRAT IN ME KITCHEN...

Because we're such helpful people here at AF, we've reproduced a typical *Bograts* level with some simple instructions. Don't panic, but be prepared to think some.

- 1 Ladder controlled by switch number 11.
- 2 A baddie that can only be killed by the blue Bograt.
- 3 Ladder controlled by switch number 10.
- 4 Key that must be collected by the red Bograt.
- 5 You have to re-start the level from here.
- 6 Ladder controlled by switch number 7.
- 7 Controls ladder 6. Currently the ladder's off.
- 8 You. Accessing the terminal that gives you a map view.
- 9 A moveable block. Use this to put fires out.
- 10 This lets the Bograts reach key 4.
- 11 The first switch you pull to start the Bograts off.
- 12 Your lovely offspring. Bless 'em.
- 13 Lots of lovely hearts that are crucial to collect.
- 14 Pick this up and have an extra bomb to play with.
- 15 Switch to control the direction of belt 19.
- 16 A handy spring to bounce you back to 10.
- 17 Collapsing walkway. You only go over this once.
- 18 White key needed to open door 20.
- 19 A two-direction conveyor belt.
- 20 Collect key 18 and you can open this door.
- 21 This block can be destroyed with a bomb.
- 22 Push block 9 over this fire to put it out.
- 23 A pit full of deadly spikes. Put block 9 here.
- 24 Key number 4 needed to open this door.
- 25 This block must be blown up before...
- 26 ...reaching the exit here. Wasn't too tough was it?

## Boing! (1990)

£7.99 – Micro Momentum /

Dev: Alternate Realities

*[ 2/10 –. Terrible, tough, puzzle platformer. Now they thought they could sell this on the Amiga baffles me.]*

Urgh! Horrible game.. Basically has you going a series of platforms, collecting up Amiga red demo balls, whilst avoiding the green ones. The fact this came out in 1990 and the people developing it actually though they could sell it totally boggles my brain. Avoid

## Bomb Buster (1988)

£24.95 – Readysoft /

Dev: Euroline

[ 1/10 – *Shameful Bomb Jack clone that's really badly done.*]

**YA: 33%** – ‘This version of Bomber Busters , however is a poor imitation. It is very slow (although the gameplay is moderately fast –it’s just the loading of different screens). Come on Readysoft!’

**AC: 25%** – ‘Bomb Busters is a flaccid example of the game designers art, and not even children would be fooled by it for long. Elite is working on the real Bomb Jack. It is bound to be better – save your pennies for that.’

---

Everything about this game is dire, from the terrible graphics and slow gameplay, through to the fart noises your jetpack player controls. This was clearly supposed to cash in on the arcade game before the official Bomb Jack was released by Elite. I find it heart-warming that I could find very little about this game.. Which I hope means this sold hardly any on release and quickly was buried, as it deserves to be.

## Bomb Jack (1989)

£24.95 – Elite /

Dev: Paradox Software

[ 7/10 – *Pretty solid conversion, if tough of an arcade classic.* ]

**CUSR: 6/10** – ‘The problem with Bomb Jack is that the graphics and sound are nowhere near the quality that they should have been. The Amiga is quite capable of producing graphics as good as an ancient arcade machine, so why doesn’t it? The sprites are too small and not detailed enough, while the backgrounds are too simplistic to have any real impact. The sound isn’t much better, comprising an irritating high-pitched tune and dreary effects. Why then you ask, did I say it wasn’t bad? Well it’s the gameplay that saves Bomb Jack from obscurity. The feel of the coin-op is there, as is the frustration when you accidentally plough into an enemy and lose your last life just as you were about to beat the high score. The game is fun from beginning to end, although it almost borders on Thundercats-style frustrability.’

**AC: 47%** – ‘If it were less than a tenner then I’d say go get it – but at its current price, Bomb Jack is definitely not good value for money.’

**CVG: 40%** – [R £9.99] ‘Aaarrrgh! You’ll have more fun standing in a bowl of cold porridge. Avoid unless you’re very silly.’

**ZZ: 39%** – [R £9.99] ‘Yet another poor arcade conversion of Bomb Jack – the game must be doomed!’

After reading the poor reviews for this game, I braced myself for something truly terrible. What I found though was quite a solid arcade conversion. Sure the Amiga was capable of much more, but gameplay-wise it plays pretty close to the original. Ok there is often too many enemies on the screen at any given time, so avoiding death is next to impossible.. But then the arcade original was equally just as tough as well. If you are after a basic arcade game to while away 5 minutes here and there, and also of the personality not to break things when frustrated, then give this conversion a go.

## Bomber Bob (1990)

£24.99 – Idea Software

*[8/10 – 'A top vertical shooter, basic, tough, really cute and as addictive as hell.']*

**CU: 88%** – 'Bob is the sort of performing dog you'd normally expect to find on That's Life. He's cute, has large floppy ears, a stupidly loveable face, and he's got a talent for flying bomber planes. He does this remarkably well. Why a canine with such cute sad eyes should want to partake in an all out offensive against similarly well trained pets is beyond me, and I can't turn to the instructions for clues because they're all in Italian. Bomber Bob is a vertically scrolling shoot 'em up. It doesn't offer anything new in the game design stakes other than its cuteness, which makes even the characters in New Zealand Story look like burnt lamb chops. It also plays brilliant. I wouldn't be surprised if it appeared in coin-op form it's that good. As you travel through the many levels you are attacked by waves of enemy aircraft and a smattering of ground attack silos. Enemy planes attack from different heights but you have to match their altitude to shoot them down. Hitting enemy targets earns money which can be used to buy extra weapons at the end of each level...[continued]....

..[continued]...Before the money can be spent, however you have to get through 'The Tunnel', a 3D section not a million miles away from the trench sequence in Star Wars. This time the tunnel has more twists in it than a Cadbury Spiral. I found this section to be taxing, yet learnable. But I cannot understand why the tunnel gets brighter as it recedes into the distance.

Graphically, BB is top class. Vaguely reminiscent of an ST game, the graphics are brightly coloured, perhaps a little too bright, and instantly lovable. The full-screen scrolling gives a true arcade effect, and the simplistic, if tiny, status window gives the game an uncluttered look. Soundwise, Idea have created some interesting spot FX. Unfortunately, they take up a lot of memory so their use is limited. It's difficult, granted, but the attack waves can be learnt, and slowly but surely you'll find yourself flying through the game. Three cheers for original product!

– Tony Dillon.'

**AA: 77%** – 'Oh my God! It's the revenge of the flying super-pooch! But what is this? Killing sweet little teddy bears – that's not very nice. I didn't mind the piggies in the Zeppelin getting it, but teddies, it's too much for me to 'bear'! Not only is it cute, but it's also really playable. I loved the imaginative use of graphics when the poor old cutesies got shot down. Very addictive, and overall a worthwhile buy!'

A really addictive, polished shooter and the first Italian game I have played that I have actually enjoyed. The people who worked on this game also did Clik Clak is very good as well,

## Bombuzal (1990)

£19.99 – Image Works

*[7/10 – 'Fun puzzle game, let down slightly by the controls.]*

**ZZ: 92%** – 'I may be fat but I know a good game when I see one and Bombuzal is ooh ever so fab 'n triff. It's got all the incredibly addictive gameplay of the 64 version (120 levels, really fiendish screen layouts and loadsa variety) plus a whole bunch of top-quality Amiga graphics as well. I mean, when it comes to cutey factor, Bombuzal putting his hands up to his ears to protect them from the sound of the explosions definitely takes the biscuit (Hob Nobs, please). They could have made a tad-ette more of the sound, though, and the scrolling is a teensy weensy bit jerky so the game doesn't quite exploit the machines potential to the extent that the Gold Medal 64 version did. But what are we complaining about – a game as good as this doesn't often come out for £19.99.'

**ACE: 919 /1000** – 'The puzzles are brilliant and the levels numerous and tough enough to keep you glued to the screen. You'll manage all the levels eventually, but you'll really get your moneys worth in the process.'

**AP: 84%** – [R – Free with Magazine] ‘Classic puzzling fun, easy to get to grips with but hideously difficult to beat. That it’s been converted to the Super Famicom shows evidence of its charm.’

**AUI: 8/10** – ‘I do have slight doubts over its lifespan, but then that will depend on your own attraction to puzzle games. For anyone who likes a lot of fun and want to give their brain a bit of a workout, at the same time. Bombuzal is the perfect solution.’

**AFC: 78%** – [R] ‘Bombuzal is a peach of a game. The levels are so deceptively simple that every time you die you have to have another go – It’s got a password system too (hurrah). Originally released by Mirrorsoft, it’s now on the Grandslam Collection compilation.’

**CUSR: 49%** – ‘The control is horrible. For one thing, Messrs Crowther and Bishop have rotated the directional control by 90° in comparison to every other isometric perspective game, which means lots of mistakes. It’s very easy to walk off the edge of the platform because you automatically direct your character according to instinct. Bombuzal is a nice idea, but one which has been spoilt by one or two stupid mistakes.’

< The complete game was given free on issue 1 of Amiga Power in May 1991

I remember when Amiga Power Issue 1 gave this free game and boy is this game a great little puzzler. The purpose of the game is to walk around the map and trigger the red bombs. The puzzle comes in by ensuring when you set off the bomb you have an adjacent square that is safe, and there is still a path to explode them all. I have to confess I still prefer the SNES conversion called Kablooeey by Kemco,

as the conversion sorts out those little annoyances of the game on the Amiga. The issues on the Amiga version is the controls are a little twitchy especially in 3D. Often I died, not through not knowing the puzzle, but simply walking off the edge. But beyond that annoyance it's a great little puzzler, and another desperate game to find its way on to mobile phones.

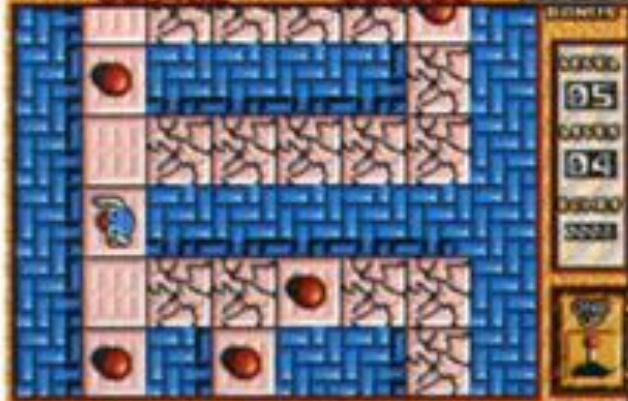

Kablooeey on the SNES

Screen One - If you can't work this one out you might as well give up now.

Screen Five - Whoops, there goes that floor again. (Hint - try going up to start with).

Screen Two - Take out the bomb in the bottom left-hand corner first, then you can't go wrong.

Screen Six - Move the big bomb, light the blue touch paper and retire.

Screen Three - Move the bomb along the slot and bomb's your uncle (sorry).

Screen Seven - Looks a bit lop-sided, doesn't it? Better do something about it, hadn't you?

Screen Four - It's the fourth screen. Look out for screen Five, coming soon.

Screen Eight - You'll have to go twice around the houses to complete this level.

## LOOKING BACKWARDS

# HOW THEY CAME UP WITH BOMBUZAL IN THE FIRST PLACE

**T**he basic idea behind the original C64 version of *Bombuzal* was cooked up one night by games designer David Bishop and programmer Tony Crowther when – as is so often the case – they were actually meant to be working on something else entirely. David Bishop takes up the story...

The thing was that I was doing a series of games for Mirrorsoft with Tony Crowther that I would design and he'd then program. There was *Zigzag*, *Fernandez Must Die*, *Phobia*, and around the same period there was *Bombuzal*.

I was staying at Tony's house because we were finishing off a game (it was either *Fernandez Must Die* or *Zigzag*) and I just sat bolt upright in bed at about 3.30 in the morning with the idea almost fully formed in my head. That tends to happen a lot – the idea for a game comes all at once in a flash.

Anyway, I wrote it all down, and in the morning left all the notes with Tony. I came back to his place the following week and he'd prepared a playable demo already. He really is incredibly fast. He based the graphics on some sketches I'd done and that was basically it, the original C64 version of *Bombuzal*.

### Looking back at *Bombuzal* now David, what do you think of it?

Well, actually this morning I was playing *Bombuzal* on the Super Famicom and really, apart from *Wonderland*, I think it's the best game we ever devised. I like it because it was so unpressured too – Tony and I actually did it all in our spare time. We gave Mirrorsoft *Fernandez* or whatever it was (the game we were really meant to be working on) two weeks early, and then quite casually asked them what they thought of this, passing them a finished C64 copy of *Bombuzal*. They loved it – it was sort of our Christmas present to Mirrorsoft.

### Tony Crowther remembers everything slightly differently.

I think David was round my house one night and we sat and designed the basic idea of the game together, then I stayed up working on it all night like I usually do and by the morning we had a running demo. We had the basic game finished in a couple of weeks – originally there wasn't any 3D in it, but worked simply on the overhead view. We added the 3D later to make it look more attractive for magazines basically – we knew everyone would get much more excited about it then. As far as I'm concerned though I always play it in 2D – to be honest I find the 3D version a bit of a pain.

### Is there anything you wish you'd done with *Bombuzal* that you didn't?

Not really. Adding anything else would have flooded it really. It's nice and simple as it is. As it is it starts off nice and easy and becomes complicated quite naturally as you go on. I think the only problem with the Amiga version is that it

doesn't run as fast as the C64 (though it's quicker than the ST). Had it been purpose written for the Amiga it could have been quicker – Ross could have used the hardware sprites and so on.

The only regret I really have is that it didn't sell well enough to make the sequel we designed worthwhile. In the updated one we would have had some bombs up on big blocks rising above the landscape, and lots of holes in the ground too. That meant there would be height involved as well as moving left and right, back and forward, which quite changed the nature of the game. There would also have been more aliens in it – it would have been more of a shoot-'em-up.

**I JUST SAT BOLT UPRIGHT IN BED AT ABOUT 3.30 IN THE MORNING WITH THE IDEA ALMOST FULLY FORMED IN MY HEAD.**

DAVID BISHOP, CO-DESIGNER

**Ross Goodly, better known today for programming *Gravity*, handled the coding chores for the ST/Amiga conversions. How did that come about?**

I'm a friend of Tony's basically. My lead machine's the ST, so I did it on that and then ported it over to the Amiga. We made a few changes to the music and sound, and the Amiga's a tad faster, but basically the two versions are exactly the same. It was all very straight forward really. Gameplay-wise it's identical to the C64 version, but of course with the graphics snazzed up, sampled sound added and so on. When I was working on it I didn't actually look at the C64 much at all really, but worked instead from a set of notes and game designs Tony gave me. He actually did the 16 bit graphics for me himself, the whole thing taking us about six months in all.

### Do you actually like the game?

Yes, I think it's very good – I never knew why it didn't take off more than it did. As a puzzle game I think it's at least as good as *Tetris*.

## AND WHAT THEY'RE ALL UP TO NOW

### David Bishop

David's actually settled down and got himself a proper job, after years of freelance games design, journalism and PR for companies including Domark, Ariolasoft and Telecomsoft going as far back as 1982. His job? As a Product Manager at Virgin, where he works with (amongst other things) the *Magnetic Scrolls* product line.

It's quite strange because back in 1987 I designed a game called *Wonderland* for *Magnetic Scrolls* which has only fairly recently come out on the PC, with the Amiga due soon. It's taken a long long time to come to fruition, but I'm very pleased with it indeed. I always imagined it using the *Magnetic Scrolls* window system, which it does, and I think it's come out beautifully. It's just been nice having something to do with it again.

### Tony Crowther

Tony's most recent success was *Captive* for Mindscape, another Top 100 game. It's done exceptionally well – and deservedly. Well enough in fact for a sequel to be under way using the same 3D routines, as well as a Missions Disk for the

original which we'll see earlier. Tony's also working on *Captain Planet* for Mindscape, a cartoon licence which seems like a fairly unusual thing for him to want to do.

It's true, I prefer working on personal projects. I don't look at programming as a business, it's a hobby for me. I don't do coin-op conversions any more – plenty

of other people do and they're good at it so I leave them to it – I have to be interested in what I'm working on. With *Captain Planet* though I'm

Tony Crowther's *Captive*

being given a fairly free hand with the games design which makes it all quite challenging and okay.

### Ross Goodly

Ross is perhaps best known these days for the recent, and successful, *Gravity* – one of many games that almost made the Top 100, but not quite. Currently he's working on *Drop Soldier* for Image Works, scheduled for release towards the end of the year.

It's a space strategy game cum shoot-'em-up, based loosely on the plot of the book *Starship Troopers* by Robert Heinlein. That's all I can say about it really at the moment – you should see the finished thing around November.

## Bonanza Bros. (1991)

£25.99 – U.S. Gold /

Dev: Twilight

*[7/10 – Enjoyable solid port of the Sega arcade game.]*

**GX: 5 /5** – ‘Graphically Bonanza Bros is identical to the Mega Drive and the sonics are also pretty much the same, but the whole game plays at a quicker pace and is slightly easier to control.’

**AA: 90%** – ‘The coin-op version of Bonanza Bros was good for a laugh. And I’m pleased to announce that US Gold have faithfully recaptured the humorous antics of Mobo and Robo. While the graphics don’t quite live up to expectations, the little touches of humour and the jolly ditties have been captured perfectly. Most importantly, Bonanza Bros plays particularly well and it definitely comes into its own in the simultaneous two player team mode. Although the pace is somewhat subdued, fans of its arcade counterpart will almost certainly love it.’

**AC: 83%** – ‘All in all, Bonanza Bruvs is a pretty groovy game. The run-around-and-collect-things formulae is fairly old hat these days but the two-player option keeps it fast and furious. If you’re looking for something a little bit out of the ordinary give the Bruvs a go.’

**CVG: 82%** – ‘Anyone who remembers Bonanza Bros. from the arcades will recall the weirdo graphics and bizarre sound effects. Well, the good news is that both of these have been faithfully replicated on the Amiga version. The only thing missing is the control method. The arcade used two fire buttons to control the characters—one for jumping and one for firing. This method is lost on the computer versions and to jump you have to use a combination of up on the joystick and fire. The game itself can be a right old laugh: the buildings often get maze-like and the bad guys can be a real handful. The intro sequences are smart and the graphics throughout are attractive, even if they’re weird! Neat tunes and extremely funny sampled speech add to the proceedings and you’ll have may a chuckle over this. It all boils down to whether or not you enjoyed the arcade game, and if you did then this is the game for you!’

**AP: 81%** – ‘Stylish, but lacking in longevity. Like Storms’ recent Rodland, Bonanza Bros is more of a snack than a full blown nine-course meal (but it’s tasty, tasty, very very tasty, all the same).’

**O: 80%** – ‘Bonanza Bros is exactly the kind of game that you could find yourself wasting a couple of ten pence’s on in the arcade, but not something you’d want to spend any lengthy amount of time with.’

**AM: 73%** – ‘Bonanza Bros is not an awful game (I may have been a little hard on it), but not wildly exciting either, good for the kids, but unlikely to appeal to many teenagers. If U.S. Gold has hopes of a Super Mario Brothers type cult status for these two, they’ll have to come up with a better vehicle for them than this.’

**AF: 70%** – ‘Ten buildings of increased complexity and tougher baddies aren’t enough to keep you interested, The animation is blocky, with only a few imaginative touches and there’s not enough two-player interaction to add depth to the game. If only there had been a bit more entertaining animation and a few more Levels, then the Bonanza Bros could have been a cracker, but as it is – there’s not enough here.’

---

Now why? for the love of all that is Sega, does US Gold get this arcade version almost perfect to the arcade original. I would have loved Outrun or Afterburner this close.. But no I get Bonanza Bros. Don’t get me wrong I like the arcade game, it’s a fun, short diversion. It’s just all rather repetitive and samey after a bit. Basically you must go around collect the loot and escape. But if you love the arcade game you will love this cracker of a conversion.

## Bone Cruncher (1987)

£14.95 – Superior Software

*[8/10 – Brilliant Boulderdash meets a Puzzle Game. Much better on the C64' though.]*

**ACE: 948 /1000** – ‘The puzzles here are exactly the same as the C64 version of this soap-and-skeletons toughie so you can bet that the gameplay’s well up to scratch. The graphics are rather better and the music’s spot on, making it even more presentable. Usual stuff for the Amiga and very welcome because of that, this is strongly recommended for thinking gamers – especially at that price.’

**GM: 61%** – ‘Little different to that of the Commodore 64, the Amiga characters are slightly better defined. The monster growls, speech and the theme tune which spiced up the Commodore version are gone, and the tune which does play is mediocre. Bono’s bowel trouble is the only sound effect unique to the Amiga version, which hardly strains the might of a 512k memory. Bone Cruncher on the Amiga plays just as well as the 8-bit game and represents a cleverly designed and enjoyable puzzle, but it lacks any attempt at improvement over the smaller machines versions.’

**AC: 33%** – ‘What can I say? Avoid Is a good word.’

This is such a difficult game to review ,as its a brilliant puzzle game, but on the Amiga the version I played was incredibly glitchy (and judging by the reviews of the time this was the release version).

The idea is a bit like Boulderdash meets Chips Challenge, with you moving around your green troll and digging paths avoiding those pink balls., to progress you must collect bones and then stir them in a pot. Once you do that then you can feed old big Troll outside by going to one of the doors, where the old soak, lazy big troll is sitting in the lake taking a bath. After you have given the nosh to Troll for some reason there is a counter and when it hits zero the pink balls will move in that direction. It's a great idea and really playable, although it very harsh, with you having to press F3 often to restart a level because you get yourself stuck. It's just a pain that every version I could try was a bug ridden mess on the Amiga. After battling through this Buggy Amiga version I switched to my C64 and cranked this up. You know what, the C64 is the vastly superior version, with, better music and no glitching or bugs. So Play this on the C64 and only try the Amiga version if you don't have a C64. But words to the wise, this would make such a great, addictive mobile phone game. Just make sure you offer a rewind button, as opposed to starting the whole darn game.

Amiga version, buggy and inferior to C64 game (seen on the right)

### Bono The Dragon and his Flourishing Business

You are Bono, a friendly dragon residing in a picturesque sea-castle. As a shrewd business-dragon, keen on "nice little earners", you make your living by selling soap to the giant monsters who bathe in the sea surrounding the castle.

With the aid of your business partner, named Fozzy, you produce the soap by collecting skeletons amongst the castle caverns and then boiling the bones in a cauldron.

However, the castle caverns are fraught with danger: there are monsters who will kill you, spiders who will eat you alive, and glocks who will block your path. It will pay you dividends to also avoid the perilous trapdoors and hidden volcanoes.

# Bones Brigade (1989)

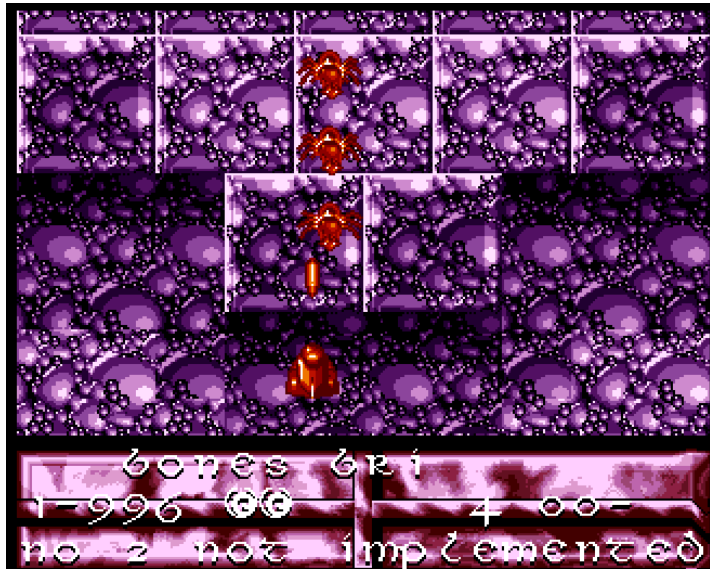

259 Francs – Unknown ??? /

Dev : Genesis Software

*[1/10 – Polished, really short, uninspired shooter, that isn't any fun to play..]*

**Joystick : 88%** – 'sorry couldn't find scan to tell me what the reviewer said. '

A polished, but dull shooter. Feels very much like an unfinished demo to me. I actually finished it trained in only six minutes. This game is short, dull and not much fun to play the game throughout.

## Booly (1991)

£19.99 – Loricel / Dev: TAG

[7/10 – *An engaging Logic based puzzle game.*]

**AP: 64%** – ‘Booly is yet another (another!) abstract puzzle game – there seems no end to these things. This one, despite the awful meaningless packaging and dull look, is actually rather diverting – not a puzzling classic of Tetris or even Loopz proportions, but a damn sight better than the Quadrels of this world. There is actually a workable – if slightly odd – game in here. The idea is that you are faced with a group of coloured tiles, all linked together in ways you only discover by clicking on them. Click on one tile, which turns it to another colour, and tiles connected to it will similarly flip colours. - your task is to get all the tiles the same colour within a time limit, which takes some frantic experimental clicking, a bit of logic, a good deal of memory testing and a fair amount of luck. Indeed, it’s the sort of thing that many people – myself included – will be tempted to play some sort of blind luck/intuition basis rather than having any truck with cold logic at all, and it’s to its credit that it works as a game this way too. And that’s it really. There are of course –some levels flipping angels and devils rather than grey or coloured tiles and are all the prettier for it – and occasionally it gets frustrating to the point of almost impossibility, but really there is really little else to say. If you like abstract puzzles it’s a perfectly acceptable if uninspired one, and happily comes in at a mid-range sub £20 price point. You could do worse. – Matt Bielby.’

**GX: 2.5 /5** – ‘Generally, it is a competent game, easy to learn yet tough to play properly, with standard graphics, smooth animation, and a choice of mediocre tunes it can be claimed to neither poor nor good. Just average. But, if you enjoy puzzles

and are as cool as a cucumber – you’ll love it. If you relish challenges, have plenty of time and like to keep moving in your games – take some Valium, keep the cat away and try not to butt the screen.’

Ok firstly, I should advise that I love puzzles games, especially those that rely on logic as opposed to dexterity. This game was therefore a surprise hit for me, with me finding it a real good puzzle game, and one where, with a bit of logical thought you can progress quite far. It’s definitely not everyone’s cup of tea, but if you are a puzzle-head like me, then it is well worth you giving this game some of your time.

## UN JEU DE REFLEXION RENVERSANT...

Pour venir à bout des 300 tableaux\* différents qui vous sont proposés, vous devrez faire preuve d'un maximum de réflexion et de stratégie. En effet bien que le but de BOOLY soit simple, seule une logique implacable vous permettra de gagner et d'évoluer dans le championnat. Par exemple, dans le 1<sup>er</sup> tableau toutes les cases bleues doivent devenir grises. Rien de plus facile en apparence, mais vous devrez tenir compte des liaisons existantes entre certains objets... tout en respectant un temps imparti. Seul ou à plusieurs, plongez-vous dans ce puzzle-game où une multitude d'options dont un éditeur de tableaux vous sont offertes.

Un jeu vraiment passionnant, grâce à des règles extrêmement simples et à une très grande diversité de tableaux de jeu, vous allez réellement connaître de longues heures de plaisir !!

## AN ASTOUNDING PUZZLE GAME

Solving the 300 different stages\* available to you requires a maximum of thought and strategy. The purpose of BOOLY makes it a simple game to play, but only the most relentless logic will make you win and progress in the championship. Let's take an example : in the first stage, every blue square must become grey. It appears to be easy, but if you remember that some of these objects are connected to each other and that you dispose of a limited time... You see things differently.

Alone or with other players, plunge into this puzzle game that offers you a multitude of options like the integrated stage editor. Truly a captivating game, thanks to its simple rules and the great diversity of its levels : welcome to a world of long hours of entertainment !

## Boomeraid (1991)

£23.99 – TSA /

Dev: Lemmingsoft Waldoware

[3/10 – *Crocodile Dundee meets Algebra Class. Too fiddly to be fun.*]

**CUSR:** 17 /30 – ‘Boomeraid’s graphics are very basic, with very small sprites and untidy scrolling in places. Although the idea of the boomerang throwing and the many jokes in the game are entertaining to begin with, the slow pace soon lets your attention wander. Boomeraid is a nice idea that almost works, but sadly almost is not enough. Give it some thought if you want something a bit out of the ordinary. It will certainly amuse a lot of ex-pats from upside-down land.’

**AF:** **No Score Given** – ‘Boomeraid is an earlier effort than Light Force by the same programmers and in a few ways it shows. The whole thing does not seem to hang together with quite the same tightness, the test exercises are just slightly less clearly presented and the game is perhaps less natural in its integration of the teaching principles. But these are really quite minor gripes. On the whole it is another clever package, wittily combining an enjoyable game of the kind that may appeal to young people whose educations are more biased to TV and arcades than to textbooks with a good, solid grounding in the topic under discussion. This is as much fun as algebra is ever going to be!’

Crocodile Dundee meets an algebra class, you couldn't write this stuff. But that is exactly what this game is. Wander around beat up various thugs in the park or throw a boomerang by working out an algebra equation. It also has an online algebra book to help as well. Nice idea but too fiddly to be truly enjoyable or educational.

# Boppin' (1992)

£23.99 – Karmasoft /

Dev: Acursed Toys

**[6/10 – Great characters let down by a game that doesn't really work.]**

Boppin' has such a great story, and definitely one that Wrecking Ralph should do as a sequel.. I have screen shot it all on the following page (enjoy). On to the game itself, well it's a cute puzzler with Yeet and Boik just the cutest characters ever, Sadly the actual game doesn't quite work, with no real of control of throwing the blocks, making lining up tough to do. All it needed was a Yoshi Island targeting system and some more ricochet shots needed and it would have been perfect. According to the internet the poor old developers only sold 284 copies on the Amiga and so ported on to the PC in 1994. As it stands a top idea, that just needs some slight refinement to be a real classic.

"ALL RIGHT! LET'S GET BOPPIN'!"

# Save the Monsters!

Sweetie Hunnybunz, the Singing Treacle Bear, has captured all the monsters of all video games everywhere and imprisoned them in patterns throughout his multiverse. With no monsters to fight, the heroes of these games are out of a job! But Yeet and Boik (with your help) can save the day!

Each of the 150 worlds in the Hunnybunz multiverse is a new puzzle with elevators, multi-directional gravity and many different prizes. In the final battle you face sweetie Hunnybunz himself, but, beware, for this treacle bear is no piece of cake!

Boppin is a one or two player game, complete with a full featured, user friendly world/level editor to expand the game beyond your wildest dreams. Over 2500 tile images are supplied, but not all are used in the supplied worlds, so truly new puzzles can be created.

## Borobodur

- The Planet of Doom (1992)

£25.99 – Thalamus /

Dev: Softeyes

**[4/10 – ‘Pretty graphics but far too slow and terrible to play.’]**

**AC: 74%** – ‘I quite enjoyed playing Borobodur, even though it’s nothing new or innovative, so I think those of you who like Turrigan should take a look.’

**AA: 70%** – ‘Frustratingly slow and tedious with minimal action, Borobodur has you aching to find some excitement. While puzzles aren’t difficult to understand, they can be hard to negotiate. You know you have to jump at a certain place but you always seem to overstep the mark. I’m tempted to say this is because you start to rush things in a vain effort to inject some speed and vitality into the game. In-game music is satisfactory – some decent sound effects would have been better. I’m afraid Borobodur is one of those games that will soon be forgotten as you look to the more interesting new releases.’

**GX: 3/5** – ‘Overall, I would love to be able to recommend this, but I’m afraid that unless you have immense patience, incredible superhuman reflexes and an amazing long fuse, it’ll probably drive you crackers. I can’t really see the point of a game that can only be enjoyed to the full by mere mortals if the have the cheat mode activated.’

**AF: 35%** – ‘The levels progress from lifeless areas of terrain to seething masses of creatures that not only slow down the already questionable update speed, but also rip your character to pieces and take you right back to the beginning of the level: (AAAAAARGH!). All this occurs while a terrible piece of music plays in the background to either keep you awake or provoke you into kicking in your TV.’

**AP: 34%** – ‘Big and not-bad graphics (if a bit on the crude side), but when it comes to gameplay Borobodur is hopelessly lost forever in the craplands of mediocrity. What’s the point of releasing something this half-hearted as a full price, three-disk game? Ask Thalamus.’

---

I bet looking at the static screen shots, with the luscious visuals and the cool F-Zero like sections and this looks like the best game ever. Sadly when you sit down and play the game, the poor play mechanics, such as jumping, frustrating gameplay, comes to the fore, and its all so slow as going through treacle. It’s a real shame, as there is loads of possibility with this game.

# Boston Bomb Club (1992)

£25.99 – Palace /

Dev: Silmarils

*[8/10 – ‘Short lived, but hugely entertaining puzzle game. That relies on fast reflexes’.]*

**AP: 86%** – [R-£9.99] ‘Although perhaps a pretty severe learning curve, it keeps you playing because it’s just so bizarre and entertaining. Also, you can start playing it at the higher levels if you want, so even if you do find it difficult you’ll get to see a good deal of the game. A welcome breath of fresh air for the puzzle genre, and absolutely screaming (in a silly accent) for you to spend ten quid on it.’

**CU: 84%** – ‘This all makes for a fiendishly difficult, but thoroughly enjoyable piece of brain-teasing. Boston Bomb Club is witty and ingenious – not least for managing to conceal what is a pretty familiar piece of arcade puzzling.’

# THE OBSTACLES

**GATES**  
Click on these to block off a different exit.

**LOCKED GATES**  
Runs across the small red button and the gate changes.

**JUNCTIONS**  
Rotate to continue the groove in a different direction.

**RANDOM JUNCTIONS**  
Change to a random section of track when activated.

**TRAMPOLINES**  
Cause the bomb to jump the indicated number of squares.

**O: 83%** – ‘This has to be one of the most bizarre game concepts ever. Rolling bombs around a maze while babies crawl across the top? All very weird. Boston Bomb Club owes an awful lot to Rainbow Arts’ Logical – the ‘balls rolling along gutters with rotating junctions’ idea for a start. The only real difference between the two are the cartoon graphics, the scantily-clad females, the fact that one is from Germany and the other is from France and Boston Club has a plot (of sorts). The actual mechanics are identical, right down to the difficulty level (in Logical you could get as far as level 23 without losing a life, here I got as far as level 13). On its own merits, B.B.C. is enjoyable, and quite taxing at first...until you get used to things. The option to start from later levels is quite welcome, especially once you’ve mastered the early screens. Its lasting appeal could be questioned though: there are only 30 levels in total and while most of the later ones are quite tough, it won’t be that long before you’re there. The manual isn’t anything to boast about either, not even taking the time to explain the different obstacles.

Its still remarkably playable though, and once you’ve got into the swing of things you’ll find yourself coming back for more. It’s also typically French, with the bunny-girl barmaid appearing between levels and leaning over the table mid-game. If you don’t already have Logical and you are in the market for a ball-rolling brain-taxer, then I’d have to recommend Boston Bomb Club. In a sense it’s like Logical 2.’

**BRIDGES**  
Allow one bomb to go across them before disintegrating.

**TOILETS**  
Drop in the bowl, travel along the pipes and leave by the tap.

**PLUNGER**  
Makes a section of track either appear or disappear.

**AP: 78%** – ‘Pleasing, fun and very French – a puzzle game that not only works as a game but proves to be a real hoot through the wit of its presentation. Neat.’

**AF: 74%** – ‘There isn’t a great difference between this and puzzles like Logical, but it does feature distinct improvements. First the introduction of graphic theme is a plus, giving the game instant appeal. The setting also allows sight gags to muscle in on the act, lightening the atmosphere. The innovation comes in graphic form too, with touches like saboteurs. The resulting package is a polished platformer.’

**AC: 74%** – ‘In all though it is a little too simple – great fun for a while, but not good enough to warrant a place in software history.’

## DEFUSING THE SITUATION

One of the mischievous mad Victorian scientists – he'll lean over the play area, changing gates round to annoy you.

Much more pleasant is this mechanical hand – it places extra point bonuses randomly about the place.

Disposing of the eager-to-explode bombs isn't as easy as it looks. The beggars are pretty tricky to handle...

Much manipulating of these turntable things needed to create a channel to send the bombs where you want them to go.

Some of the many moving gateways – click on them to set the course and so direct the bombs in the direction you want them to go.

Your cursor arrow – click on gates or turntables to move them around.

Trampolines bounce you across (and sometimes off!) the pool-table sized play area.

Not an air-horn – this contraption is actually where your bombs kick off from!

**AA: 69%** – ‘Explosive action? Well, not quite. Boston Bomb Club is reminiscent of Rainbow Arts’ Logical. In terms of graphical quality and sound, it doesn’t compare, falling short of providing the same challenge and excitement. The whole affair plays too slowly, as you wait agonisingly for the bomb to reach the target once you have created a route. For a game that held promise, the ‘polished’ feel is missing while the fun factor diminishes as the minutes pass by. Not one of Palace’s better releases although puzzle freaks may find hidden enjoyment.’

---

I quite enjoyed this. It’s French its mad and zany and in the short term thoroughly enjoyable. In the game you play a member of a Jules Verne era Scientific club. Who for kicks play an explosive board game where they roll bombs around a board and through rotating the tiles aid the bomb to the target shaped trap door, whilst getting as many points along the way. The reviewers sited the game Logical as its inspiration., but for me Pipe Dream or Locomotion was the puzzle games that immediately sprung to mind when playing it. However the art style, setting and humour, for me made this far more enjoyable than all those games. The only criticism with this for me was I felt 30 levels was just too short. With me really just getting into the swing of it before it all comes to an end. Still it is definitely one I plan to revisit again.

## Botics (1990)

£19.99 – Krysalis

*[4/10 – ‘Awkward viewpoint and a need to worry about height mar this Pong update, by being overly complex.’]*

**ACAR: 71%** – ‘The year is 2085, and the satellite TV companies rule the world. Each home has 952 channels to choose from – one plays constant reruns of neighbours. The demand for Sports coverage is insatiable, and there is a growth in the market in Robotic Games. The main event, known as Botic, is a sort of mechanised soccer. The metallic opponents face one another from opposite ends of the field – an enclosed area, with elongated gaps behind each player. They’re goals and the aim of the game is to bounce an android ball past your android opponent into the goal mouth. Succeed, and you move onto the next playfield, the area beyond the window you’ve shot through. Got that? Its sort of wandering

soccer, moving from pitch to pitch as goals are scored. Keep scoring, and you keep driving your opponent back. After four failures, the game is over. Botics is essentially a simple little game and it’s quite enjoyable to play. It’s a bit like Arkanoid – or even Pong, the first ever computer game – because all you’ve got to do is move your bat back and forth to meet the ball. This time it’s in three dimensions, so you need to be the right height as well. Simple or not, its beautifully presented. The game scenario is developed nicely, with robotic sportscasters announcing the games and even robotic cheer squads. Sounds are nice, with good use of speech and other effects. All in all, very smooth, but not much depth.’

**AA: 71%** – ‘Although hyped as the sport of the future, Botics may be disliked by a number of people for the following reasons. The game is enjoyable to begin with, but the initial excitement soon wears off due to very repetitive gameplay and lack of variation in both the opposition and the arenas to compete in. However the game is nicely presented, with attractive graphics. The control system was tricky to master to begin with, as judging the height of the ball was difficult, but perseverance proved the controls are not a problem.’

**ACE: 596 /1000** – ‘The aesthetics are fine, but very serious flaws are in the gameplay. A game as simple as this should ideally be simple to pick up and play as well. Unfortunately it isn’t.’

**AF: 41%** – ‘Combination of cuteness and futuristic metal doesn’t work. There are many frills and baubles which give the unfortunate impression of filling space, and fleshing out what is otherwise a fairly simple reworking of the oldest computer game of all.’

---

Sadly I didn't get on with the game. It is true that after some practice you can start actually winning games...But why have Krysalis chosen the hardest isometric viewpoint and then ask you to worry about height as well? All this makes Botics a game you need to spend hours with just to overcome the poor game design decisions. It's a real shame as I would like a pong update done properly (Neo Geo's Windjammers shows how to update Pong properly.)

## Bowls (1988)

£???.?? – Simulmondo

*[2/10 – Pointless, dull version of Bowls with terrible graphics and gameplay.]*

If you read by first volume of the Amiga Encyclopaedia then you will know what a huge fan I am of Simulmondo and Italian game development in general!!! (cough, I hope you are reading my sarcasm here). So after playing such efforts as 1000 Miglia and 3D World Boxing.. I was expecting the worst.. Sadly Simulmondo didn't disappoint with another unbelievably bad game produced by the Italian boys. This time we have Bowls, and if it wasn't for the Simulmondo logo on the title screen I would have naturally assumed this was a free Public Domain game as opposed to a commercial release.

On starting it up the impressive title music gets you all excited as it's a really nice piece of game music.. But I have been here before with Simulmondo and so I keep my hope for a good game in check. On the game you can choose three environments, outdoor, indoor and beach. Then you err throw the jack ball (small white one) and then you throw your other balls as close possible. That's it a no frills, pointless waste of a floppy disk.

## Boxing Masters (1994)

£???.?? – ESP

*[2/10 – A Boxing game where you can't box only manage.]*

Ok it's a boxing manager game, so it's a game where you have no control over the interesting stuff like the boxing, and instead have to do all the dull stuff like arranging fight contracts and suggesting tactics. This in its self wouldn't be too bad if the game did it all with a bit of humour. Sadly it is all very serious about it and so consequently a real snooze fest...Avoid.

# Brain Artifices (1991)

£???.?? – Soft Enterprises /  
Dev: Sceptic Design.

*[3/10 – ‘Line up all the same objects in a straight line. Found no skill or fun when playing this game.’]*

A depressingly simple puzzle game where you must line up all the same objects in a straight line. I personally found no enjoyment in this game I am afraid. Even multiple levels in I still didn't feel my brain was being taxed in any way.

Level: 003 Lives: 04 Time: 00177 Moves: 00120 Score: 000259 Mode: NOVICE

# Brain Man (1995)

£???.?? – Mega Arts /

Dev: M-Soft.

*[8/10 – ‘A thoroughly enjoyable puzzle game.’]*

Now this is classed as commercial, but it really is a very polished Public Domain game, that was sold commercially as the Amiga was going through some slim pickings of new games to play in 1995. This though is a great game, mixing in Pac-man with a healthy dose of head scratching as well. The purpose of the game is to collect all the gems and make it to the exit (letter E). The trouble is when you move the key it will keep moving in the direction pushed until it hits something. Combine this with enemy balls moving around the maze and you have quite a fun and polished game.

It also has a surprisingly good fun and competitive 2-Player game thrown in as well.

All in all a thoroughly enjoyable little game that is well worth a play.

## Brat (1992)

£24.99 – Image Works /

Dev: Foursfield

*[7/10 – ‘Polished and original, let down by frustrating gameplay.’]*

**O: 93%** – ‘Make no mistake, this is no childish effort – Brat is as innovative and addictive a puzzle game as you are likely to see for quite some time.’

**Z: 90%** – ‘There are twelve levels overall, each comprising three stages, and I reckon that if you sat down and finished the game in one sitting (if it were possible, which I doubt), you’d be reduced to a jibbering wreck. The graphics, as you can see, are very nice – everything moves well and the screen layout is great when it comes to user friendliness stakes (mind you, if your mouse is crap you may not be of the same opinion). Yup, Brat is original and compelling stuff, it has to be said. My only worry is whether the compelling side of it is quite ‘compelling’ enough, as at times it can (I found) turn into a bit of a memory test (and my memory is virtually non-existent). That aside, though, there’s one thing I can say without a shadow of a doubt. This game is no duffer! In fact it’s the dog’s!

# TOY TOWN

**ACE: 850 / 1000** – ‘It’s a remarkably clever game which is easy to pickup and difficult to put down. If only it didn’t make you feel like taking a hammer to the TV screen on quite such a regular basis, it’d be flawless.’

**AC: 75%** – ‘Brat is a lot of fun. Although initially frustrating. You’ll soon find it to be a source of many hours of entertainment. Once again it seems ImageWorks have delivered the goods.’

**CU: 73%** – ‘A nice idea, let down by many annoying elements.’

**AP: 65%** – ‘Beautifully programmed and with lovely sound and graphics. Brat is utterly ruined by a colossal misjudgement of character. If you can identify with Nathan, you’re not the kind of person I’d want to meet down the pub on a Saturday Night. In fact, I don’t even think you should be allowed on the streets.’

Ok this is definitely a Marmite game, with you either loving or hating it. The premise of the game is simple, You must help Nathan the Bratty baby negotiate his way through an isometric maze by placing down arrows, objects and commands around the level for the baby to follow. There is much to frustrate with this game. The single direction scrolling and having to restart the whole friggin' level each time you die (they are big levels.) being the main things. If only they sorted those two factors I would have a lot more love for this game. As it stands I like what its trying to do (and would be fab on a touch screen today) but it all frustrates me a little too much for me to truly engage with the game. Still its nice and original, with nice visual and music, so if you want to try something a bit different then this is definitely worth your time.

**Cannon** – Block with weight.

**Space slug** – Eats arrows and follows their direction.

**Space mole** – Drop weight on head when mole comes out of the ground. (Don't worry, he can take it!)

**Drops** – You're going to need a parachute.

**Colour pads** – These are coded. It's your job to make them all flash on.

**NATHAN:** The trendiest kid in town – rushing headlong into trouble, as ever.

**DIRECTIONS:** Little arrows everywhere – unlimited use of these keeps the boy on the straight, diagonal and narrow.

**SWAG:** It's sad for one so young to be so mercenary, but as even placing a simple direction arrow costs one gold coin, it's a good idea to pick up as many of these as possible along the way (incidentally, the jewels are also worth their weight in gold... or whatever).

**BRATS:** Cats may have nine lives, but this little monster has only three – guard them well.

**MILK BOTTLES:** Energy replenishment in a suitable container.

**STOP SCROLL:** Puts a halt to the screen's movement, allowing the boy time to catch up.

**REVERSE SCROLL:** It hasn't been collected as yet, but this space is reserved for the icon which goes one stage further than the Stop Scroll, by sending the screen back in the opposite direction for a short time (the small box between holds a timer which counts down the amount of time remaining for each of these features).

**STOP SIGN:** Place this in Nathan's path to call a temporary halt to his ramble. A direction arrow then sends him on his way again when the time is right.

**USEFUL OBJECTS:** Bridges, weights and gems are all prized possessions to young Nathan – but as for that doll...

**DYNAMITE:** No self-respecting brat can ever have enough dynamite – it's not only essential for clearing a path, it's also good for a little old-fashioned mischief.

**MOVING PLATFORMS:** Careful and well-timed use of arrows is the only way to get the young tyke through these horrors.

**COINS:** Filthy lucre paves the trail, so grab as much as you possibly can.

**ERASERS:** Remove unwanted or incorrectly placed arrows.

**POCKETS:** Although they're empty at the moment, these 10 spaces are just waiting to be filled by Nathan's swag.

**BRIDGES:** The number above this icon represents the amount of bridge sections in this, Nathan's only dedicated pocket. Use these pieces wisely, as approaching a break in the path without sufficient bridge sections is a sure-fire way to put a stop to the action.

**[4/10 – ‘Interesting oddity,  
hasn’t aged well today.’]**

Historically speaking (for video games that is) this is quite an interesting game. As this was the first game released by the newly formed publishing house

Psygnosis, who was formed from the ashes of Imagine software, which had been a really bug publisher in the 8 bit era and famous for making headlines in newspapers such as buying kid programmers Ferraris and then infamously going belly up in 1984, all caught on camera by BBC documentary Commercial Breaks (<https://www.youtube.com/watch?v=ZoDh61sgCOg>)

Before Imagine went bankrupt there were two games they were working on that was going to revolutionise the gaming world (well according to Imagines adverts) and these games *Psychapse* and *Bandersnatch* would include an extra piece of hardware with extra memory to offer a gaming experience like never before. These games of course never saw light of day, but the code was taken before the bailiffs took the computers and *Bandersnatch* involved into this game.

The games story involves you play Kyne a scientist framed for a crime he did not commit by the evil Government (boo) who set him up when he refused to share how he made the process to create a super being. The game itself is very much in the old 8-Bit style of wandering endless mazes. I suppose for its age, the game isn't bad, but without a nostalgia cushion to play the game on the game hasn't aged well.

The controls as default are horrible on default as it is the mouse which is unplayable. To get this half playable press the Page Down key and then press F6 to change you controls to keyboard (its still awful to control, but at least you have a fighting chance 😊 )

[1/10 – ‘Dull and cumbersome strategy game.’]

**CU: 53%** – [R £9.99] ‘In honesty, I’m the worst person to review this, because I like Project X. This is clever but dull, and only serious war-heads will get a thrill out of it.’

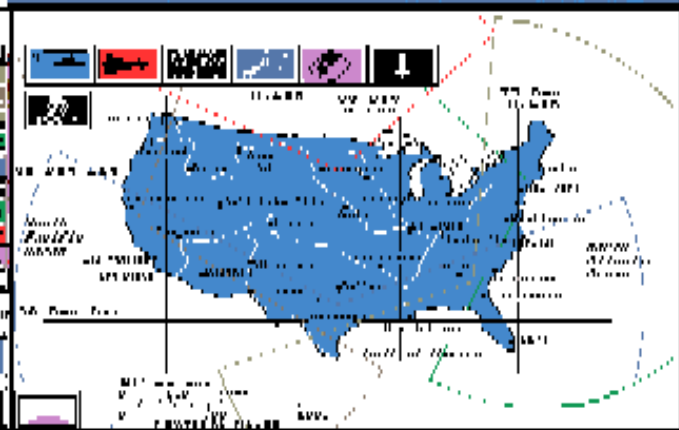

**AF: 30%** – [R £9.99] ‘Another throwback to the days of poorly designed and uninspired PC-wargames.’

Man this game is so boring. It simulates World War 3 and nuclear war, and yet makes snore-inducingly dull. Avoid.

## Breach (1987)

£24.95 – Arttronic /Omnitrend

*[7/10 – ‘Basic to look at but enjoyable turn based strategy.’]*

**ACE: 761 / 1000** – ‘Breach is very easy to play and as a solo game it’s not half bad. There are some annoying parts of the game (You can’t move through a square occupied by someone else for example, causing you to make frequent and costly detours) but once you know about them, you can compensate. The overall verdict is simple but playable, the designer option will keep you busy for some while.’

**Info: 3.5 / 5** - ‘Breach is “a single player tactical-level combat game” which combines elements of standard board war gaming, fantasy role playing and graphical adventuring. The graphics are a bit flat, but better than most wargamer fare.’

**AUI** - ‘Breach is ideal for all those players who liked the look of Paladin but who could not stomach yet another fantasy game.’

Graphically basic, but in many ways this is like Laser Squad and surprisingly accessible and fun to play, if you like your turn based strategy games that is.

## Breach 2 (1989)

£24.99 – Impressions  
/Omnitrend

*[6/10 – ‘Better graphics, but I found the controls less intuitive than the original.]’*

**YA: 95%** – ‘Breach 2 is a superb product. The presentation is great, gameplay couldn’t be much improved and it’s just so addictive! Even non-strategy fans will love its mindless violence that combines with careful thought and planning. At last Impressions have proved that they are capable of great things. Let’s have another biggie you guys, try a fantasy role playing adaptation of Breach and really do the business!’

**GM: 85%** - ‘The numerous improvements to the original ame, not only in gameplay but also visually and aurally, have made Breach 2 a slick and elegant game to play.’

**ACE: 825 /1000** - ‘Breach 2 is a thoroughly absorbing close combat simulation which will appeal to general game players as well as hardened strategy addicts.’

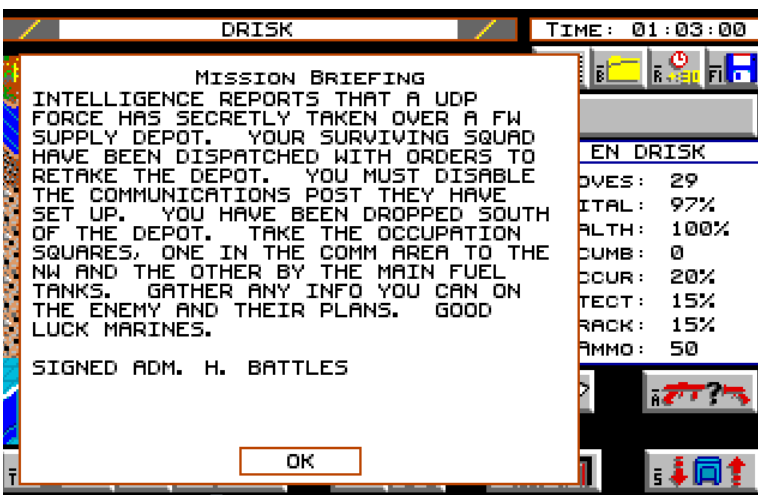

**AF: 79%** –‘Breach 2 is slow, but strangely absorbing. Once the game as a concept is understood, players can start to use the mechanics of each scenario to their benefit, exploiting the strengths and limiting the weaknesses of a squad. Which makes Breach 2 the obvious choice for those who like their wars to be personal, face-to-face, hate filled affairs.

**AC: 78%** –‘If you are after realism perhaps you should be looking at Dragon Force, but if a startlingly playable and in some places very taxing strategy game is what you are after then this is the one.’

**AA: 75%** –‘For those of you who have had the chance to see what Breach or Paladin was like, then the coming of Breach II is going to be a pleasant surprise. The gameplay is virtually identical with all the playability of its predecessor. The option to port across a commander you might have made in Breach is also very useful. Whether your interest be in arcade or strategy games Breach 2 is a must.

**Info: 3/5** –‘Unfortunately the original, logically arranged point-and-click interface has been replaced. The dreaded conversion-it strikes again. Breach 2 wasn’t developed with the Amiga in mind, and it shows.’

**AP: 60%** –[Enhanced Edition Reviewed] ‘A simple looking role playing game – nothing new – but with Amiga standard depth that actually shows.’

The graphics a little better than the original but I found the game less accessible than the original (but maybe that is because I played it as a kid so got used to that game). The core problem with this game, is that it clearly wasn't built for the Amiga, being clearly a PC game, and it shows out of every pore. If you want a turn based strategy then go to Laser Squad, U.F.O., Battle Squad or indeed the original Breach. There is nothing essentially wrong with this, its just been done better elsewhere.

AMIGA

Although the graphics are nothing to write home about they are perfectly adequate for the job in hand. There is a reasonable opening soundtrack, and then the occasional spot effect during the game. Control is simple using the mouse, but there are also keyboard equivalents for every command.

PREDICTED INTEREST CURVE

This is not a game that has an immediate visual impact. Neither is it the sort of game you can just boot up and play without some preparation. Once you have become accustomed to the way the movement phases work then there are many hours of absorbing entertainment to be had out of Breach 2. Even when you have played it for some time you may occasionally want to come back to it for the odd game.

## Breathless(1996)

£24.99 – Power Computing  
/ Fields of Vision

*[5/10 – ‘Nowhere near as fun as Doom, but technically a very impressive game.’]*

**AF: 95%** –‘At last the Amiga has broken through the 3D Doom engine barrier and proved itself capable of matching and beating machines costing multiples of its price. Things can only improve from here on in. Its arrival couldn’t have been more timely. Imagine you were trapped in a box canyon surrounded by hostile Indians. You’d just fired your last bullet and the Indians were coming to get you. Just as you were about to throw the gun at the first Indian to appear you heard the bugle of the seventh cavalry in the distance and the Indians scattered like the wind. Breathless is that bugle call.’

**CU: 92%** -‘Once you’ve seen these graphics it’s difficult to contemplate returning to the old ways. Big, beautiful and brash. Brilliant.’

**AP: 56%** -‘Technically lovely there’s no denying it (even on an ordinary A1200), and easily the best attempt at a direct clone (albeit one done by people who’ve more or less completely failed to grasp the whole point of the original). But you won’t care, because by halfway through level two you’ll be sound asleep. In 2D, it’d be drivel, and that means in 3D it’s drivel – but in 3D. This is AMIGA POWER. Hear no lies.’

This game is a real shame as technically what Fields of Vision has managed to pull off on an Amiga (all be it a sup-ed up one) is simply astounding. This really was comparable technically to PC games of the time. Sadly however, the level design in the game is terrible, whilst Doom has a fantastic layout of enemies, secrets and objects, this game has no such thought behind it.

Consequently the games balance is all over the place and the game simply isn't fun to play. Worth booting up on sup-ed up Amiga to see what the machine was capable of, just don't expect to be entertained for long.

## Brian Lara's Cricket '96 (1996)

£29.99 – Audiogenic

**[8/10 – ‘Great game of Cricket just don't expect it to be different to Graham Gooch World Cricket.’]**

**AF: 88%** –‘This is great. They've improved the annoying bits and kept the core gameplay.’

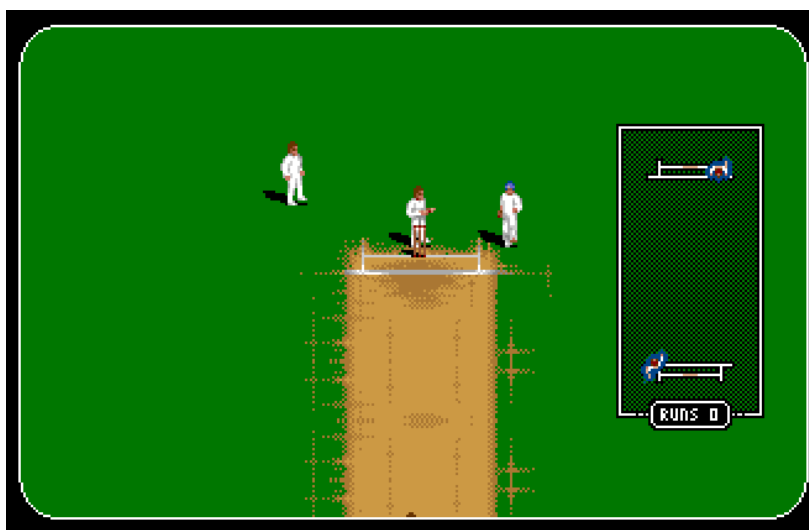

**CU: 82%** –‘Very competent sim. Cricket fans will love it.’

**AA: 72%** –‘As far as the changes go, they're fairly limited and whether this warrants a full price release is debatable. The only noticeable difference is the fact Audiogenic have changed the name from Graham Gooch's World Class Cricket to Brian Lara's Cricket '96. And er that's about it.’

**AP: 55%** -‘In short everything that could have been done to make Brian Lara Cricket '96 the definitive Audiogenic cricket sim has been done. It's been tidied up, sorted out and dusted down. Just as the Amiga as a games machine coughs its last fleck of blood from it's diseased chest and slumps its head on the floor. ‘Nads. And now the difficult part of being a games reviewer; deciding on the score. There is part of me that wants to shout “Oh you sad, cretinous ignoramuses, why has it taken you several YEARS to sory out this game that could have always been this good and instead foisted a succession of bug-ridden, flawed versions on us until we were sick of it. I'm going to give you 20% and let that be a warning to you.” And likewise there's a part of me that wants to say ‘the best Amiga cricket sim in the world just got even better, a game that's delighted and dazzled a generation of gamesplayers has been given the slickest polish yet – well done Audiogenic – 90%. But only because I wanna get quoted on the box.’

Ok this is yet another rebadging of Graham Gooch World Class Cricket (I make that seven rebadged versions of the game by Audiogenic). This was the last one they did and so consequently is probably the one to play as it is the most polished of all of them. Although if truth be told, you won't notice what those tweaks are. Also I am not being picky here.. But Brian Lara is black, so why are all the players all white in the game!?!?. All in all a fun game of cricket, just don't expect anything different from Graham Gooch, beyond a '96 update of the player roster.

### A question of control

The controls are pretty damn simple; and even if they're NOT simple enough for you, you can select a skill level to suit your abilities (or lack thereof!) The fielders can either be directly under your control or completely CPU-controlled; leaving you to just worry about bowling. The bowling itself is pretty easy: just make sure that by the end of your allotted time limit you've moved the bowling cursor to the position you want and then wiggle the cursor in the prescribed manner to gain as much speed or spin as you can. Strategies come from your selection of bowlers – so you might want to opt for a fast bowler but then deliberately send a slow delivery to confuse things. You can also use spin bowlers to trick opposition, and even pretend to be clumsy when fielding to tempt batsmen into going for extra runs they'll never complete. If you chose to play with manual fielding it's really just a case of running the active fielder towards the ball and throwing it back to the wicket as soon as possible. Batting is easily more fun than fielding or bowling, with a combination of timing and a good working knowledge of the various possible shots being necessary to strike a good shot every time. You still get to see the target hinting at where the bowler is aiming, and then you need to select from the eight joystick directions to select the shot (ie down/left for an off-drive, left for a cover drive, etc.) finally timing your swing correctly depending upon the speed of the delivery. You can then speed your runners up by waggling the joystick as fast as possible. Easy, non?

## Brian The Lion (1994)

£25.99 – Psygnosis /

Dev: Reflections

*[9/10 – ‘I adored this game, technically it is so impressive and great fun to play.’]*

**AUI: 87%** – ‘Brian the Lion is a platform game which Psygnosis are rightly proud. The gameplay is slick and fast and the whole package is excellently presented.’

**CU: 86%** – ‘Very playable and very colourful, Brian is probably the best-written platform game ever. With more tricks and stunts than most similar games. It’s the kind of game you must have in your collection, even if its just to annoy your console owning friends.’

**AC: 85%** – ‘The graphics are sex on the screen, the sound’s great, it plays like a platform demon and is as addictive as nicotine and caffeine mixed together. It’s certainly the best platformer I’ve played in a long time.’

**O: 82%** - 'I'd be lying if I said I hadn't deliberated long and hard over my overall mark for BLT because at the end of the day, for all the good points of the game, there's still something missing. Graphically it's very appealing, and some of the console-style effects – zooms, rotations, etc - are absolutely excellent. Likewise the tunes and sound effects are all done very well. But there's something about the main character and the overall 'fullness' of the game that leaves me unsatisfied. I think one of the reasons for my enjoyment of Zool 2 last month was the improvement of character and, to be honest, I don't think I was aware just how important that was until now – basically, Brian is too soft looking. When you get to some of the later levels with ghouls, ghostly trees and so on, a lion with a semi-perm and a pair of Bemuda shorts just looks out of place. The control system is very nice and, apart from the sometimes frustrating ice levels, you'll never have any trouble getting Brian to do exactly what you want, but one major mistake I think the programmers made is the use of parallax – in particular, the way backgrounds move in unison with Brian. In some of the empty-looking levels, you might be jumping from, for example, one crocodile's head to another, and at some points you're just floating in free space with no landmarks to show you if you're moving at all. It's only when a piece of scenery appears and goes hurtling by, that you realise how wrong you've been in your 'leap of faith', leaving you tumbling into the sea, lava or off the screen – minus one life. It's quite obvious that a hell of a lot of time and thought has gone into BTL and it is without doubt a very goofy platform game – it just lacks that certain 'something'.

**AF: 49%** –'Brian the Lion is certainly big enough and bold enough to stave off the fiercest competition but unfortunately it's also boring enough to send you to sleep.'

**AP: 42%** –'I started out quite liking Brian the Lion (it's as technically accomplished an Amiga platformer as I can remember seeing), but as time wore on and I discovered more and more, the score just plummeted and plummeted. For Brian's sake, I decided I'd better stop playing it while it still had some marks left.'

This was developer Reflections (Shadow of the Beast trilogy) last game on the Amiga, before they went on to wow the gaming world with their Driver and Destruction Derby games.

In fact most of team who did this game such as two of the coders of this game Michael Troughton, Russell Lazzari and Philip Baxter on graphics, would be heavily involved on all those later Reflection games.

I really enjoyed playing this game, especially on the CD32 or A1200 AGA version (pictures are from CD32), where the graphics are even more stunning. Ok compared to a console platform like Mario or Sonic then this is average, but on the Amiga then this is up there with the best being a polished, fun and gorgeous platform game. I love the music as well in the game by Richard Ede and Psygnosis veteran Mike Clarke.

*On lots of the levels you will find a helpful tornado to take you to secret levels.*

**Bride of Dracula (1991)**  
**£25.99 – Gonzo Games /**  
**Dev: Toast Dept.**

**[5/10 – ‘Lots of great humour and great concept, just poorly implemented.’]**

**AF: 73%** - ‘You won’t find anything here to amaze you, either in the graphics (fair, with some good coloured skies), the sound (spot effects and not very good ones) or gameplay (too easy), but Brides of Dracula could keep you interested for a day or two. But then, so can watching paint dry, at a push.’

**CU: 73%** - [R - £9.99] ‘The plot is a simple one – Count Dracula is alive and well and is looking for a wife. The nearby town of Bistritz has 13 suitable candidates, but before any can become a bride, Dracula must first bite them and then lead them back to the castle,

where they will wait in a coffin for him. Unfortunately, Van Helsing is also alive and well, and has a few scores to settle, so is also searching the town with an eye for revenge. He’ll stop at nothing to get his hands on Dracula, and that’s where the fun begins. In this one or two player game, you and a friend can play either of the characters in their relevant quests. It’s all played out on a split screen, horizontally scrolling landscapes with both parties occupying the same world. To begin with, they start as far apart as possible – Dracula searching for wives and Van Helsing looking for the tools he needs to destroy the dark Count. However, as the game progresses the tension mounts and before too long you’ll find yourself crossing each other’s paths constantly. It’s all good fun, and very easy to get into, despite the slightly confusing screen layout. The simple controls mean that before you know it you can get right into the game. An excellent attempt at an odd idea.’

**AF: 70%** - 'Brides of Dracula results in being a formulaic adventure escapade that won't thrill you and will struggle to fulfil you.'

**AP: 59%** - 'Let's start with the bad points. Well, for a start, the graphics are amateurish and very 1980s, although there are a few arty touches to the teleport system. Much worse, is that fact that it's all so very plodding. Getting Drac to move is like watching paint drt, and dull old Van Helsing's not much better either, except you do get to laugh at his stupid walk. As for vamping those maidens, it's all very well, except you have to go and get them one at a time, take them individually back to the castle, and then go down to town to get another one – how very repetitive.'

Don't get the impression I've got a total downer on the game, though. It's actually quite a hoot – the way in which you vamp unsuspecting maidens is suitably tasteless, for instance. At one point I 'did' a blond haired maiden in a long green dress, who promptly turned into a scantily clad young vampress with spokey black hair, who told me my wush was he command. Now that is what I call metamorphosis! Humorous vampire antics do not a great game make, especially when it all boils down to a tediously slow split screen race. Briefly funny, but no way is this a good deal.'

**AC: 31%** - 'I don't think this game's likely to rise from the dead too often. Ho ho ho, I'm aright joker me.'

This is such a great idea for a game, having Drac and Helsing in a race to collect up their stuff. Sadly it all runs far too slow and so combined with big maps to traverse makes collecting up what you need (babes for Drac and tools for Helsing) ends up being a tiresome task. Which is a real shame as that is the whole game. Hopefully some indie developer out there will be inspired and take this great concept and run with it...If you do, let me know please as I would love to play it.

## Bridge Player 2000 (1989)

£25.99 – Oxford Softworks /  
CP Software

**[1/10 – ‘Cumbersome interface and no help for the novice Bridge Player wanting to learn.’]**

**AUI: N/A** – [Version Reviewed is Bridge Player 2000 without the Tutor]  
‘My impressions? Well, if you are after a Space Acd or Elite then this is definitely not a go. However it would appear to me that Bridge is really not that sort of game anyway. This is definitely not the game a complete novice would use as too little is explained to really tutor you adequately. But if you have the rudiments and need practice, and the occasional tutored hand and analysis to improve your bridge, then this may be almost exactly what you need. And if you need this, who cares if doesn’t have a WIMP\* interface. After all, we are talking Bridge, not Go Fish!’

\* WIMP – this stands for Windows, Icons, Mice and Pointing. So basically means a Windows style operating system.

---

Actually there is two versions Bridge Player 2000 and another that included a Tutor. I was actually curious to play this one as always wondered about how to play Bridge, as I know my parents used to play it all the time. Sadly I was at a complete loss. I could find know tutor and was thrown into the deep end without a clue what to do. Also it really annoyed that the programmers of this made the interface so basic, I mean how difficult would it have been to draw a picture of a card and allow you to use the mouse. Ok hopefully I will have more luck with the next few Bridge games.

# Bridge Player Galactica (1989)

£25.99 – Oxford Softworks / CP Software

[3/10 – 'Better than BP 2000 but not by much.']

Another Bridge Player although still no mouse controls and leaves you hopelessly lost for the novice. At least this actually draws some cards this time.

Nicola has appeared with Pat Davies in two BBC2 Bridge series 'Grand Slam' and presented the series 'Master Bridge' for Channel 4. She is a director of the London School of Bridge which teaches the game to over 1,000 people each year.

**THE BRIDGE PLAYER**, designed for players of all standards, gives literally millions of possible hands, simulating the game of Bridge with full realism.

The program's bidding routines are both comprehensive and versatile, using the ACOL system and the Stayman, Blackwood, Gerber, Grand Slam Force and Unusual No-Trump conventions.

**THE BRIDGE TUTOR** contains 100 tutor hands designed to instruct the intermediate bridge player. The hands, with commentary, were composed or selected by Nicola Gardener, international bridge player and bridge teacher and range from fairly straightforward hands to endplays and squeezes.

**BRIDGE PLAYER 2150 GALACTICA** also contains an amazing number of unique and innovative features,\* including:

- full information displays during play of the contract
- a post mortem facility, enabling you to rebid and/or replay any hand
- scoring of the last hand and the rubber on a cumulative basis
- input your own hands or save and load hands from disc: a number of interesting hands are provided
- solves double dummy problems from trick eight onwards
- options to bias the deal to give you and your partner winning hands
- special 'cheat' options to peep at the opponents hands, see previous tricks, claim rest of the tricks, review the bidding
- and much, much more.

THE INTEGRATED BRIDGE PLAYER AND TUTOR, WITH POWERFUL CARD PLAY AND WEALTH OF SUPERB FEATURES, OFFERS YOU HOURS OF ENJOYMENT IN THIS CLASSIC GAME OF COMMUNICATION AND SKILL.

## Bridge 6.0 (1990)

£25.99 – Artworx Software  
Barrett & Smith Enterprises

[7/10 – ‘Quite a good Bridge game, if you like that kind of things.’]

**Info:** 3.5 / 5 - ‘I haven’t played much Bridge in the past couple of years (I’ve been too busy blasting aliens instead), but this game brought it all right back. There aren’t many bells and whistles, the graphics are adequate, and the sound next to non-existent. However, cutthroat bridge players don’t much care about the niceties: they’re more interested in the game for its own sake. And Bridge 6.0 plays a vicious game of either contract or duplicate – I only pulled off a couple of finesses in several hours. Bridge fanatics will love it.’

Ok this bridge game impressed me the most with the three I have just played. This game actually does things like use a mouse and draw graphics (oooh exciting 😊). One thing I liked was it has a hint system that helped me start to work out what I was supposed to be doing. For me it wasn’t enough to turn me into a Bridge Addict, and I have heard Omar Shariff’s Bridge game is the one to play for Bridge. But still a solid game.

## Brigade Commander (1990)

£25.99 – Electronic Zoo /

Dev : TTR Development Inc

*[8/10 – ‘Simple, intuitive controls and a indepth strategy game.’]*

**AA: 81%** - ‘The control system used in Brigade Commander is very simple to get to grips with. Being an impatient git I didn’t bother to read the manual before starting to play but this was little problem. The information and background details used in the game are comprehensive and should satisfy any techno-freak. The scenario editor and whole host of other options increase the game’s appeal immeasurably. Whether you are a hardened strategist or new to this style of game. Definitely worth a long, hard, look.’

**AP: 68%** - ‘On the surface just another wargame, but its approachability makes for a refreshing change. One meg only though, and the graphics are (as ever) crap.’

---

I was really impressed with this. The control system is brilliant, allowing multi select commands and all extremely accessible. The scenario builder is a nice little extra as well.

## Brutal Paws of Fury (1995)

£25.99 – GameTek/

Dev : Software Sorcery

*[7/10 – ‘Really fun Beat-’em up. Some gameplay flaws, but worth a go in 2 player.’]*

**AA: 90%** - ‘Brutal is a beat-’em-up with animal sprites, and I imagine it wasn’t too difficult to program. The bestial connection may well be looked upon as a gimmick, and to be fair it does provide a useful angle from which to sell the product, but with easy playability and great graphics, it’s so much more than that. The programmers could have perhaps have gone a little bit

further using traits of the animals, but their characteristic strengths are included to a certain degree, and along with the cartoony effects they make Brutal an excellent game that is very much worth playing.’

**AC: 82%** - ‘The game’s modest appearance does little to inspire excitement on the first viewing of Brutal Paws. The cartoon characters make an appealing change in the genre, but the quality of the graphics doesn’t match up to top selling rivals on the Amiga. Surprisingly, the game overcomes this handicap by combining a few innovations with enjoyable gameplay. Training to acquire a broader repertoire of moves did much to solve the problem of giving a combat game a long term challenge, and highly in keeping with the martial arts’ theme.’

**O: 69%** - ‘The sad thing is that Brutal suffers from ‘Exploding Dist Syndrome’. This is where a match can be won simply by repeating the same moves over and over again.’

**AF: 65%** - 'A pleasant, quirky, pretty beat-'em-up, which ultimately fails because the gameplay is as dull as a dodo. For over 30s only.'

**CU: 55%** - 'Brutal is a novel enough idea, with shades of Hong Kong Phooey cartoons in some of its characters. The graphics, sound and speed are good, it's just let down by the awkward, unspectacular special moves and the fact it is too easy to get by with flailing kicks and punches. Not what you want from a beat 'em up.'

Before Kung Fu Panda was a thing, us few gamers were already knocking several shades of fur in this beat 'em up. There is a lot to love here in this game. The characters are bursting with humour and nicely varied, it all runs super smoothly and fast and its great fun as a two player game. As a single game there is a lot to love about the game as well. I love that as you continue to play your character they will get to learn more special moves and progress up through the Karate belts. This gives a wonderful sense of progression and keeps you going back for more. You can sadly with the right move just repeat it and win most of the fights, but for me I just don't see the point of doing that and removing the fun of the game, purely to win. Overall for a beat 'em up on the Amiga I thoroughly enjoyed this game and I do wonder if the guys and gals who made Kung Fu Panda ever came across this game when brainstorming ideas on what to do?

## Brutal Football (1994)

£24.99 – Millenium /

Dev : Teque

*[8/10 – ‘Superb fun, especially as a two player game. Well worth a play.’]*

**AFC: 94%** - ‘This is a bit more like it! Forget Speedball 2 – this is the game to play if you like your violence frequently, loudly and preferably red. Brutal Sports Football, is indeed, brutal – seeing several players kicking the living daylights out of an opposing team member is something else entirely. Just how it’ll go down with concerned parents I can’t say, but remember kids – it’s not real, they’re only actors... aren’t they? Well how can that be tomato sauce then...?’

**AC: 90%** - ‘Brutal Sports Football is totally engrossing schlock gore. Smart graphics which leave nothing to the imagination coupled with chunky sound which make this futuristic footy brutally great fun.’

**AP: 88%** - ‘Deliriously decadent. Fittingly feral. Boxingly bloody and viciously violent. Okay?’

V AGA version was much prettier.

**O: 88%** - 'Yes indeedy! I like it. It's lovely to be able to play a game where you don't get sent off every time you hack someone down, let along hacking their heads off. The game may look as though it is repetitive, but there are enough icons and different moves available to keep you happy for ages and ages.

The presentation is excellent (although fairly Bitmap Bros-esque – but there's nothing wrong in that) and the music is good throughout, as are the superb sound effects during the match – ah, the reassuring swish of someone's head being cleft in twain. The matches last for just the right amount of time, with the first half being fairly sport orientated and the second half turning into major carnage as the teams become more knackered. I particularly liked the fact if you draw, the match goes into injury time, where the ball goes out of play and the winner is whoever can kill the other team first. The pitch is a good size, making it possible to get some technique in without having to run for miles before a goal opportunity, and the number of players are well judged, ensuring very few dull moments. The opponent intelligence is excellent – so far I've not found any cheating ways to score – and as you progress through the league meaning that you can't keep employing the same tactics throughout. The locker room is a nice touch, adding a limited but adequate amount of 'manager-iness' to the game without holding up the flow of play. The game works just as well in single-player mode as it does with a mate or two (needless to say John "Vinny" Bennet enjoyed it!) and overall I've got no complaints to voice at all. I had a superb time reviewing this and, as we speak, I'm off for another game!

## BRUTAL TOYS

Help is at hand in the form of many pick-ups and extra weapons, and on offer in the store today are...

### BOMBS

Always useful for blowing up people, I find. You have only a few of these

to play with so go easy and watch out for your own players.

### FIRE BOMBS

Similar to standard bombs but they don't do so much damage to the

ground. They also roll around a bit longer than normal.

### ICE BLOCKS

Collect the little ice cube and you can freeze you opponents solid for a

few seconds. Nice ice!

### HARE

Collect this little chap and your players will be endowed with

super-speed for a short while.

### GO BALL

This little beauty endows the ball with legs. If you collect the power-

up the ball will up and scarp for your rival's goal mouth.

### SHIELD

Pretty self-explanatory, this power-up cloaks your team members in a temporary

forcefield, giving you free reign to do whatever you want.

Death, carnage, destruction and politically-incorrect references toward rabbits. Are you tough enough to hack the peace, horror and sheer excitement?

"Gallows humour permeates the whole game"

Run away! Run away! He's going to cut my head off!

**AA: 87%** - 'A mix of violence and humour is always a winning combination in my book and Brutal Sports piles on both in spades. The two-player game is superb, and a good deal of thought has evidently gone into making the whole game as humorously tasteless as possible. If the same effort had gone into the rest of the game design, Brutal Sports would be a classic. As it is, it's very good.'

**Amiga Down Under: 80%** - 'Overall a game for those bored with the masses of ordinary soccer simulations out there. Brutal Football is hard, fast and a lot of fun.'

**CU: 79%** - 'BS Football is a well coded effort. It's great playing your way through the leagues and kicking the crap out of all and sundry. Most fun when played against a friend. Buy, buy, buy.'

**AUI: 78%** - 'Brutal Sports Football is worth checking out. Violence and the occasional goal being scored – sounds like an ordinary game of footy really, doesn't it? Except with swords.'

**AF: 77%** - 'Less of a team sport, more of a gang war. This game will fall foul of any video games certificate scheme. Violent, compelling and massive fun.'

**SLAYERS THUGS ASSASSINS WARLORDS**

This is one game where the graphics are so much better on the AGA Deluxe edition (A1200 and CD32). Most of the screenshots here are taken from the CD32 AGA version. The normal Amiga version screenshot is the first two screenshots on the games reviews first page. On to the game... This game is a HUGE amount of fun, especially as a two player game. Basically it's a free for all American Football game, with no rules and swords. There is always so much going on, and although the game is very repetitive for a quick two player game with a mate it's a great laugh. I thoroughly recommend this, just be prepared to get bored after a few games in the single player.

**MAD DOGS SAVAGES PUNISHERS HUNS**

## Who was behind the BS?

Brutal Sports – Football was coded by **Paul Stapley** (who has done such classics as Lead programmer on Porsche Challenge on PS1 and Graphics System Programmer on Mortal Kombat: Shaolin Monks (2005) . His most recent games was Technical Director on TNA iMPACT! (2008) and WWE all-stars (2011). Co programmer **Peter J. Jefferies** would also be lead programmer on X-Men Next Dimension(2002) and also work on MK:Shaolin Monks as well.

The graphics were done by **Antony Hager**, who went on to be main Graphic Designer on Sims 2 and **Ian Stevens** who only seemed to go on and do graphics on the game Club and Country.

The music was done by **Richard Joseph** a veteran of the industry that has been involved in either music or sound effects for many of the Bitmap Brother and Sensible Software games. He is also the person who is responsible for that catchy tune in James Pond 2 : Robocod game. He would continue to be very active in the industry working on such gems as Sensible Soccer 2006. Sadly he died the following year in March 2007 of lung cancer.

Do you like sports games but think American Football is for wimps? Do you like action but reckon that chainsaw massacres are for grannies' tea-parties? If you do then Brutal Sports Football is for you.

This is an all action, crunch 'em, stomp 'em, stomp 'em, no holds barred game of mutant football combat where heads will roll and where injury time means just that.

Football with a new set of rules, No Rules!

- One or two player game
- Four breeds of rock hard player
- Head to head, all out combat
- Masses of pick ups
- Laughs, Blood

Vous êtes un fan de sport et pensez que le football américain c'est pour les mauviettes. Vous aimez l'action et trouvez que les massacres à la tronçonneuse c'est pour les fillettes. Alors ne cherchez plus, Brutal Football est fait pour vous.

C'est un jeu de football trépidant, où les androïdes se livrent à des combats sanglants, où les têtes roulent et où tous les coups sont permis.

- 1 ou 2 joueurs
- 4 types de joueurs
- Duels impitoyables
- Compétences et équipements spéciaux de chaque équipe
- Nombreux objets à ramasser
- Rires, sang

Vi piace lo sport ma siete dell'idea che il football americano sia un gioco da femminacce? Vi piace l'azione ma pensate che i massacri con la sega elettrica siano cose per vecchietti? Se la risposta è sì, allora Brutal Football fa per voi.

Si tratta di un gioco all'ultimo sangue, dove tutto è permesso e dove si disputano dei "combattimenti" di calcio tra squadre di androidi, nel corso dei quali cadono molte teste e dove il tempo di recupero, in seguito alle ferite, significa proprio questo.

- Gioco ad uno o due giocatori
- Quattro tipi di giocatori
- Combattimento corpo a corpo, senza esclusione di colpi
- Equipaggiamento speciale e particolare abilità per ogni squadra
- Numerosi oggetti ed icone da raccogliere
- Divertimento, sangue

## Bubba 'N' Stix (1994)

£25.99 – Core Design

*[9/10 – ‘Classic puzzle adventure game, chock full of humour and fun.’]*

**O: 91%** - ‘Bubba is a truly fab game that could have done with being longer. What’s there is going to keep you busy for quite a while and you’re more than likely to enjoy yourself while you play. It’s just that it’s the computer equivalent of sex – superb while it’s happening but over before you know it. Or so I’m led to believe.’

**CU: 90%** - ‘Takes the arcade adventure game into the next dimension.’

**AA: 87%** - ‘Puzzle games have become better and better over the last 12 months or so, and any new effort will have to go some to beat the likes of Lost Vikings or even One Step Beyond. Bubba ‘N’ Stix combines the best elements of platform and puzzle with a refreshing new approach and look that should appeal to anyone who likes to have their brains teased. The excellent graphics are the icing on a particularly inviting cake of a game. (Possibly parkin.)’

**AF: 85%** - 'Bubba 'n' Stix is more fun than you can shake a stick at, although five levels may be a little on the sparse side for the competent platform players out there.'

**AC: 85%** - 'It looks good, it sounds good, it even plays good. Bu jingo it is good. A definitely sound investment for platform puzzle cartoon fans (you can tell I read the press releases like a good boy).'

**AP: 84%** - 'It's the closest thing to a Looney Tunes cartoon I've seen on the Amiga, with masses of animation and a huge cast of imaginative monsters to meet along the way. The puzzle base of the game provides interesting gameplay while being annoying when you're stuck.'

Simon Phipps is a bit of a hero of mine, He has had an amazing career creating Switchblade, Rick Dangerous 1 and 2, Wolfchild, before doing this game. He has gone on to do Shellshock (Saturn), Shadow Man, the first five Harry Potter games. EA's remake of Goldeneye and now most recently worked on Need for Speed Most Wanted.

This game is a fantastic puzzle platform adventure game, where you play an everyman Bubba and Alien called Stix. This Stix Alien is a useful chappy that Bubba can use in a host of ways to help Bubba save all the fellow Aliens kidnapped by the evil Waldo boss. The game is sweet but short (5 levels), although the middle levels isn't as good as the first two and last. Still definitely give this game a play.

*The following is taken from Simon Phipps brilliant website (who designed this game, not to mention Switchblade, Rick Dangerous Series to name a few of his classics).*

<http://www.simonhipps.com/design/bubbanstix.htm>

*I hope Simon is ok me placing the article in this book, but I found his first hand insight into how this game got made fascinating...enjoy...*

The origin of Bubba 'n' Stix is one of those odd little stories that reminds me how much the games industry has changed.

In October of 1992 I had returned from holiday to be asked to do a game that was moody, dark and atmospheric. It was to use sprites that were rotoscoped from real human reference and featured what could only be described as being a kind of Indiana Jones-style adventurer that was armed with a stick and who could do loads of really cool moves and actions with it.

Bubba encounters Waldo in the first level of the game

I mulled it over for a number of weeks and began squiggling down a number of doodles about what could be done with a stick. It became really apparent that realism and sticks did not quite go together - if the stick was long enough to pole-vault with, it sure would be too long to use as a snorkel. (Plus, having spent nearly two years doing 'dark and moody' on my previous project, Wolfchild I was not exactly keen on going straight back there.)

Then one Tuesday evening, Billy 'Bli' Allison (my collaborator on the project) and I, went back to my house and began brainstorming about what could be done with a stick. As the night went on, pages of A3 began getting covered with the most outlandish and madcap ideas that could possibly be done with a stick. Most of them breaking the laws of physics and some of them, probably illegal.

Satisfied that we had exhausted the 'Man With A Stick' idea we presented the drawings, never expecting them to be taken seriously. Sure, there were 30 or 40 cool things you could do with a stick, but they were quite frankly insane and a world away from that realistic Indiana Jones style adventurer that had been asked for. Well, whatever it was about the drawings, something hit a chord - we were asked to go ahead and make the game.

One of Stix' many uses

A little tweaking of the central character - first - a long-necked-green alien, then, a gangly inhabitant of Lancashire in flat cap and string vest named Elvis and finally: Bubba - a hapless handyman. The plot: Bubba gets kidnapped by Waldo - an intergalactic big-game hunter who then crash lands his ship on an alien planet allowing Bubba to escape and befriend a sentient twig called Stix.

There were five levels in all in this platform-puzzler: an alien forest full of man-eating shrubbery, the inside of Waldo's downed spaceship, a volcano (itself a giant balloon factory cranking out a flat-pack inflatable robot invasion fleet), a submerged alien temple and a spaceport. And to say that it was off-the-wall is an understatement with puzzles that required the player to use Stix as a pool cue, boomerang, stirrer, temporary platform, snorkel, wrecking bar, baseball bat and general-purpose prodding device.

The game, although not a massive commercial success proved to be a critical hit and did sport one slightly odd promotional tie-in in the US - with Bubblicious Bubble Gum that required us to add 'idle' animations to the game with Bubba standing around chewing the stuff and blowing bubbles.

This project was a real joy to work on, thanks to the insanity of my co-conspirators on this flight of delightful madness.

Our goofy hero and his friend - an intelligent alien stick - have crash-landed on a weird planet after being captured by an alien spacecraft. In order to get back to Earth, Bubba must use Stix in a variety of different ways to solve puzzles, overcome adversaries and foil the comedic attempts of his kidnapper to recapture him in this multi-directional scrolling puzzle.

Unser etwas dösiger Held und sein Freund - ein intelligenter außerirdischer Stock - sind auf einem merkwürdigen Planeten bruchgelandet, nachdem sie von einem Alien-Raumschiff gefangengenommen wurden. Um wieder zur Erde zurückzugelangen muß Bubba seinen Stock einsetzen. Mit seiner Hilfe kann er Rätsel lösen, Gegner besiegen und seinem Kidnapper, der ihn auf verzwickte Weise in diesem Labyrinth gefangen halten will, einen Strich durch die Rechnung machen.

Notre héros farfêlu et son ami, un bâton alien doué d'intelligence, ont atterri en catastrophe sur une étrange planète après s'être fait capturer par un vaisseau spatial alien. Pour retourner sur Terre, Bubba doit trouver toutes sortes de façons d'utiliser son bâton, afin de résoudre des énigmes, vaincre des adversaires, et déjouer les tentatives comiques de son ravisseur qui veut à tout prix le rattraper. Un jeu d'énigmes à défilement multi-directionnel!

Il nostro sciocco eroe e il suo amico, un intelligente bastone extraterrestre, dopo essere stati catturati da un'astronave aliena, hanno fatto un atterraggio di fortuna su uno strano pianeta. Per ritornare sulla terra, Bubba dovrà usare il bastone per fare un sacco di cose: risolvere dei problemi, sconfiggere gli avversari e sventare i ridicoli attacchi del suo rapitore, che vuole catturarlo di nuovo, il tutto in un rompicapo multi-direzionale.

### Virus Warning

This product is guaranteed by Core Design Ltd to be virus free. Core Design Ltd accept no responsibility for damage caused to this product through virus infection. To avoid the risk of infecting this product with a virus, please follow these simple procedures:-

1. Before loading the disks, make sure that they are write-protected. This prevents any virus writing itself to them.
2. Always switch your machine off for at least 30 seconds before loading the game.
3. Failure to do so may result in virus contamination of the master disks.
4. Never put the disks through a virus killer as this will destroy the information on them.

### Loading Instructions

This Game requires an Amiga with at least 1 Meg of RAM.

1. Turn off your computer.
2. Plug a joystick into port 2.
3. Turn on the computer.
4. Insert the Amiga Kickstart disk if so prompted into the computer's internal drive. (Amiga 1000 only).
5. When the Workbench icon appears, insert disk 1 and follow the on screen instructions.

### Loading Tips

Should the title screen not appear within 45 seconds of turning on your machine, there may be a problem with your computer system. Check your computer connections and that the above instructions have been correctly carried out. If you are sure your computer is functioning correctly (i.e. other software loads successfully) and are still unable to load, then you may have a faulty disk.

Core Design Ltd will replace free of charge any disks that have manufacturing or duplication defects. When returning damaged products, please return **DISKS ONLY** directly to Core Design Ltd for immediate replacement.

### Welcome

Can BUBBA 'n' STIX avoid the cruel clutches of Wieldo and consequently find their way home? - Or will they become permanent residents of Urdrunkle 1, Fobrik's Theme Park and Zoo? Can they stop a lun-balloon animal invasion-fleet from conquering the galaxy? Where is Zitt 'n' Zoff's Magical Furhouse - and who are they anyway? And how can you smuggle wood through Sponnellian customs?

The answers to these burning questions - and many more - are yours to discover when you join BUBBA 'n' STIX in their comically comical quest!

### Joystick Controls

If you'd like Bubba to walk left or right, then push the joystick in that direction. To make Bubba break into a run, from his casual walk, quickly release the joystick and push it back again in the same direction. If you want to make Bubba jump, you simply push the joystick up. To make Bubba crouch down, pull the joystick down.

To make Bubba throw Stix, press and hold down the joystick fire-button until Stix is thrown. To make Bubba swing Stix like a baseball bat, tap the fire-button. Stix can also be used like a pool cue; to do this, tap the fire-button while Bubba's in a crouch. To cause Bubba to use Stix on an object or part of the landscape, push Bubba against the object/landscape and press the fire-button.

## Bubble + (1990)

£25.99 – Infogrammes

*[9/10 – ‘Brilliant, original game, that is, addictive as hell.’]*

This is a graphical update of Bubble Ghost, a fantastically addictive simple game where you play a Ghost controlled with a mouse and must blow the delicate bubble to the exit. The controls are great, left and right mouse button rotates the Ghosts direction and the space button blows the bubble. From this simple premise the game gets delightfully more and more tougher, as you try to negotiate the ever tougher single screen levels. A bona-fide classic that needs to be played.

## Bubble and Squeak (1994)

£24.99 – Audiogenic /

Dev: Fox Williams

*[9/10 – ‘Top Platformer, definitely up there with the best on the Amiga.’]*

**CU: 94%** - ‘This is a very, very playable game. The controls, even on a three button pad, are logically worked out, and you’ll have no trouble completing a couple of levels on your first attempt. Things get pretty hard as the game goes on, but you’ll be having so much fun you won’t even notice. Bubble & Squeak is on of the most playable and original platform games to ever hit the Amiga. If you’re a A1200 owner and don’t buy this, then you probably don’t like games, do you? - ‘The game that redefines platform games Stunning’

**O: 83%** - ‘Basically what you’ve got here is a fine, fine game that appeals on just about every level. It’s not quite the best thing ever, but it’s better than most of what we’ve seen lately. And (I know I’m treading on pretty dodgy ground here) I just love the whole idea of moving a furry monster around the screen by booting them up the jacksy.’

**AA: 90%** - 'This is the best platform game I've played since Soccer Kid. It doesn't quite match that game for originality, but in terms of gameplay and everything else, it's absolutely spot on, and if you have a 1200 or a CD32 then what I say is this: buy it, it's t'rrific.'

**AP: 77%** - [A1200 Review] 'Uppers: A very playable platform game that avoids the obvious faults and is, shockingly enough in these modern times, A lot of Fun. It's got nicely different sub-games, well balanced puzzles, pots of character and, amazingly, good music.'

**Downers :** Bubble and Squeak avoids the obvious faults right enough, but provides a new batch of its own. The clodding imbecility of your sidekick really gets annoying, and the ability to undo all your hard work with one poor jump does the game no favours.

**The Bottom Line:** The bad bits, which are fairly bad, aren't bad enough to smother the good bits, which are very good. Phew.'

**AP: 83%** -[A500 Review] The trouble afflicting the A1200 version – all to do with the infuriating stupidity of the Blue Thing – have been cleaned up in this new improved version. But the water time limit's still overly harsh.'

**AF: 81%** - 'Bubble And Squeak rides a fine line between hair-tearing frustration and endearing platform fun. The characters make the best double act since Morcambe and Wise.'

**AC: 75%** - 'Although it looks nothing new and is the usual platformer type thing with cute sprites and bright cheerful graphics, it does work exceptionally well and is of a very high standard. The backdrops are detailed, the levels set out well and the special effects such as the lightning and the character becoming darker underwater look brilliant. On the bonus level, you take charge of an underwater submarine and this is where the graphics really do excel. Using psychedelic, kaleidoscopic patterns to convey the rippling water, the scenery becomes part of the puzzle as you make your way through the seaweed and foreground and background obstacles. The characters have been nicely animated and add some humorous touches. For example, if Bubble is left standing he will yawn or Squeak will tap his feet.'

I really love this platform game, not only are the characters absolutely adorable, but the game is great fun as well. For those weaned on Mario and Sonic games, this can feel a little sparse, with few enemies in the game. This is because it more about jumping dexterity and solving simple puzzles than your traditional speed through platforming game. My only criticism of this game is that it lacks variety with the levels and puzzles remaining familiar throughout. Having said that, it is marvellously programmed and fun to play in that more chilled out way.

All in all a wonderful platform game, especially on the Amiga and well worth you tracking this game down on the CD32 in particular.

Incidentally I have tried all three Amiga versions of this game (A1200, CD32 and A500) and I personally have no idea what Amiga Power was going on about, when they said the A1200 version had worse AI, as all played identical (apart from the graphics) to me. I suspect they did one of the naughty reviewing an unfinished product again? My favourite version of it, is the CD32 as this game needs a 3 button joystick ideally (although the A1200 can use a CD32 Joypad anyway.)

## Bubble Bobble (1989)

£19.95 – Firebird (Telecomsoft)/

Dev: Software Creations

*[9/10 – ‘Almost identical to the Arcade Original and so awesome to play.’]*

**ACE: 958 /1000** - ‘For their first coin-op conversion, Firebird certainly chose well. Those two bubble blowing, banana eating Brontosauri have been a great success on every machine they have been converted to. The Amiga version of this arcade game is still just as addictive, frustrating and playable as the other versions. Bubble Bobble is one of the best arcade conversions we’re probably ever likely to see.’

**AC: 91%** - [R - £7.99] ‘Best with two players, this is a simple and effective game that no self-respecting games player should be without. At this price it’s the bargain of the century. Snap it up. Nuff said.’

**AA: 90%** - [R - £7.99] ‘If you’ve never been fortunate enough to play this game, buy it now. It’s one of the most fun and addictive games that I’ve ever had the pleasure of playing and at this ridiculous price that can’t be bad, can it?’

**AP: 87%** - [R - £7.99] ‘only weakness is that it’s so much better in two player mode than one.’

**CU: 84%** - [R - £7.99] 'The graphics are very simple and, although it is starting to look dated now, Bubble Bobble still has what it takes in the gameplay stakes. As a one-player game it proves to be extremely playable, but opens up more as a two-player game. There's lots to do and some nasty screens and it all comes with my wholehearted recommendation.'

**CUSR: 7 /10** - 'BB is a competent conversion of a highly enjoyable arcade game and apart from the aforementioned irritants (Ed – complains about music being off and game slowdown), a very accurate one. An extremely playable game which will appeal to a variety of ages.'

**YA: 56%** - 'hardly uses the Amiga's capabilities to the full, there are some nice features that are not on the Atari ST version.'

---

This is a great arcade conversion by David J. Broadhurst. Who would go on to do Assassin on the Amiga, World Cup 98 and Knockout Kings games for EA.

The game is an impressively faithful conversion as one could hope for. There is a few things missing such as the odd animation and the bonus levels, but in the main it is mostly an accurate port to the arcade original. Slight disappointment is the normally brilliant David Whittaker's music, sometimes is off from the original. But beyond that this a great home arcade conversion.

## Bubble Dizzy (1992)

£7.99 – CodeMasters

**[6/10 – ‘Polished but frustrating game. Missing that addictive quality.’]**

**AA: 81%** - ‘CodeMasters’ evergreen favourite fatso Dizzy makes a welcome return to the Amiga buget game. This time our rotund hero finds himself underwater and wanting to get to the surface. Being not the best shape for swimming he finds this far too much hassle and instead relies on bubbles of air that rise up from the sea to float him up top-side. This would be relatively simple but for Dizzy’s great love of pearls (it is the reason that he finds himself in this submarine situation), and these are just too much of a temptation. He gets into all sorts of trouble with octopi, electric eels and jellyfish in trying to get them and is in grave danger of running out of air! Can you deal with these and other problems to save the day? This is a fun game that should amuse you for a fair while. Cheap at half the price!

**AF: 78%** - ‘It’s cute, cheerful, not amazing, and basically a bit of mildly addictive fun.’

**AUI: 65%** - 'Bubble Dizzy first showed up in a CodeMasters compilation some months ago. It's here as a stand alone release. When I reviewed the compilation, I thought that Bubble Dizzy was the weakest of the titles.'

**O: 61%** - 'Bubble Dizzy is not a bad game by any means, although neither is it particularly outstanding one. It plays well, if a little 'rigidly' at times, but the random nature in which bubbles appear means that levels seem to rely on luck rather than skill, provoking a fair amount of frustration on a number of occasions. The music is fairly rhythmic in a bongo kinda way, the graphics are very 'Dizzy' styley, and it will probably provide you with a few weeks of gaming pleasure if you are willing to persevere with what is basically a limited arcade game. All-in-all it's a fair but not essential purchase.'

This game is almost a really good idea. The concept of falling from Bubble to Bubble to make your way to the top is a nice idea (if bloody annoying), the trouble is that the Bubbles are generated randomly and so makes the game more about luck and perseverance as opposed to skill. If only they had made the bubbles always be the same pattern and have less tall levels then this could have been one of the puzzle platform greats, as it stands however, it remains a curio to those who love their Dizzy games (like me), and it is a polished but simple arcade game that is more likely to frustrate than entertain.

## Bubble Ghost (1988)

£19.95 – Accolade /

Dev: Infogrames

*[9/10 – ‘Great original title, really addictive and fun.’]*

**ZZ: 88%** - ‘An enjoyable and amusing game which many gamers will find a bit of a laff.’

**ACE: 797 /1000** - ‘Bubble Ghost is funny, entertaining and quite a challenge. It’s just a pity then that there are only forty odd rooms to get through – given the games immense playability and addictiveness you’re going to complete it all too soon.’

**GM: 78%** - ‘The Amiga version also has a two-player option plus a practice mode where you can attempt any screen with a full compliment of soul bubbles.’

**CVG: 7/10**- ‘Bubble Ghost is a neat little game; the appeal may wane after a while, but until then you’ll be forever blowing bubbles.’

**CU: 60%** - ‘It’s also the easiest version, so twenty quid is definitely too steep.’

**AC: 60%** - ‘Although Bubble Ghost is quite novel and enjoyable, harmless and ever-so mildly addictive, the fun and challenge per pound sterling does not represent a good long-term investment. Nice but at this price not that nice.’

Bubble Ghost is a great little game and although Bubble \_ is probably the one to play (as it's the same game but with improved graphics) the original is still an awful lot of fun. The concept is simple, you play a ghost that needs to blow a bubble the exit, whilst negotiating ever tougher maze like screens, chock full of hazards.

That's it, left and right mouse buttons rotate the ghost and the shift key blows. Its really cute though when the ghost turns red and makes a wheezing, choking sound if you keep blowing too long.

## Bubble Gun (1994)

£24.99 – Daze /

Dev: Weathermine

*[4/10 – ‘cute, but let down by poor jump mechanics.’]*

**CU: 58%** - ‘The controls are a little to fiddly for my liking. The character slides along rather than have any contact with the ground, and while its nice to have a smooth animation of the character turning to face the other direction when you move the joystick, it does take time to perform the animation which slows down the responsiveness of the game. Bubble Gun is a weak title, that lacks the class and polish of any of the recent platform games. I have to say avoid this one, simply because it just isn’t worth the money.’

**O: 38%** - ‘There are a couple of nice ideas hidden deep within the rubbish. The key system works well, and some of the later level graphics are ok in a cheesy sort of way. However, offering infinite ‘continues’ is a bad idea – if you’re brainless enough to want to see the end of the game then it shouldn’t take you too long. That said, the last few levels aren’t too bad and rely more on problem solving than pixel-perfect leaping. But for the rest of the game isn’t worth playing through just for these. Shame.’

This game is quite cute really, but really feels like a game made in the 80's as opposed to 1994. The general idea is waddle your dinosaur around and collect up parts of a key to open chests. Eventually the chest will open with a go to exit. Urm that's it really, the main issue is how bad your dinosaur is when jumping, even my Nan could jump higher than him and she is over 90. This lack of jumping prowess (quite fundamental in a platform game, I think you'll agree.) makes this game annoyingly frustrating to play.

Overall a cute fun, basic platform game. Worth a brief punt, but I guarantee it won't hold your attention for long.

# Bubble Trubble(1994)

Public Domain –  
F1 Licenseware /  
Dev: Generation X

*[6/10 – ‘Really professional, fun arcade game.’]*

**O: 89%** - ‘Bubble Trubble is one of those cute-maze-puzzle-arcade games that we’ve seen so many times before, but this one oozes quality from the instructions and presentation right down to some damn fine level designs. After every few levels a bonus round appears, where a more Pacman-style game takes over, and a number of sweetsies can be collected as long as you’re the same colour and can avoid the bad guys. If there’s one criticism to aim at Bubb Trubb, it’s that the screen often becomes too crowded, and perhaps a little less detail on the level floors would have made things clearer. Apart from this eye-straining prob’, it’s an excellent game, and well worth a handshake or two for professionalism.’

I quite enjoyed this game. I did find it all far too cluttered and far too many rules to remember, for what should be a simple arcade game. Basically the game involves you colliding with the creatures in a bubble the same colour as you and it will pop. Then you can shoot the green popped creature. Shoot enough and you see an exit. The trouble is there is a lot more going on which makes it all unnecessarily complex than it should be. Still, all in all a top effort.

## Buck Rogers(1991)

FREE – Public Domain

*[6/10 – ‘fun blaster, but as Amiga Power states, lacks challenge.’]*

**AP:** - ‘Something’s gone wrong here, I think. Buck Rogers is an uncomplicated shoot-’em-up which looks like Space Harrier and plays like Galaxians. This is all very well and groovy and would make for an addictive zapper if it wasn’t for one thing: You can never have ‘one more go’ in Buck Rogers, because when you lose all your five lives, you er...get another five. And then another five, and so on. This built-in infinite lives cheat spoils the game to quite an extent, but it’s still good for the short time it will take you to get through the various levels. It looks lovely and the sound is pleasingly solid, but unless a proper version comes out, then I can’t honestly say it’s an un-missable purchase.’

---

Reminds me of a simplified version of Segas 1982 arcade game Buck Rogers and the planet of Zoom. Good simple fun, but not a patch, when compared to the arcade original.

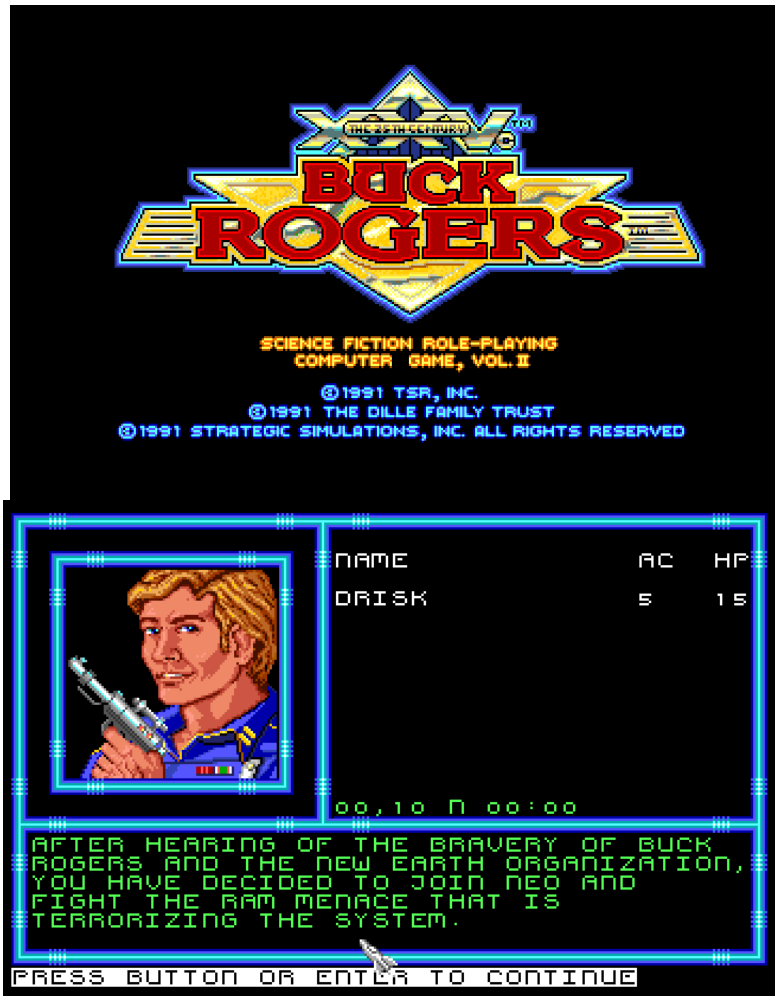

# Buck Rogers – Countdown to Doomsday (1990)

£29.99 – Strategic Simulations Incorporated (SSI)

[9/10 – ‘Brilliant recreation of the tabletop role playing game.’]

**ZZ: 92%** - ‘As it is the primary feature, combat is excellent and will be enjoyed by tacticians everywhere. In addition, due to the large amount of detail provided for each character (both in normal play and during combat), the game quickly becomes absorbing and addictive. Your characters appear more as ‘individuals’ rather than just an assortment of a few re-rolled stats such as charisma and strength. There is no doubt, therefore, that Buck Rogers sits firmly as the king of the ‘Tactical’ RPG castle.’

**ACE: 885** – ‘Heavy going to begin with, like all computer RPG’s, but after creating your party rather than using the default one, you take more interest as your combination of skills begin to determine the gameplay. After a few hours you really get involved and are trying to do everything possible to get more experience points, so you can handle the nastier enemies. Won’t keep you playing until the 25<sup>th</sup> century, but should keep you busy well into 1991.’

**CU: 82%** – ‘Another engrossing RPG from SSI.’

I love a good Dungeons and Dragons style, space RPG and up with the Mega Traveller games this one of the best. Brilliantly written and a great combat system makes this a lot of fun. To warn you now, you will have to invest a lot of hours into this game and ideally have the original so you can read up the two manuals and free novel that came with the game. But it is well worth investing your time with.

The game even came free with an entire free novel.

# WELCOME TO THE 25<sup>TH</sup> CENTURY!

## It is the year 2456.

Humanity has spread across the terraformed planets and satellites of the solar system. Colonies drift through the upper regions of the Jupiter gas clouds and cities have been carved out of asteroids. Mars, the seat of power among the inner worlds, is home to the powerful, despotic Russo-American Mercantile (RAM). Its goal: The enslavement of the solar system.

But what of Earth?

The ancestral home of mankind now struggles to overcome the devastation of war and pollution. All hope for a return to its former glory lies with a daring band of rebels, the New Earth Organization (NEO) led by Buck Rogers.

Now, you and the members of your team can join Buck and his allies to rid the solar system of RAM tyranny!

**COUNTDOWN TO DOOMSDAY** is a detailed computer role-playing game based on TSR's new BUCK ROGERS® XXVc™ role-playing system, and uses a specially enhanced version of SSI's award-winning AD&D® computer fantasy role-playing system.

Assemble a team of Rocketjocks, Warriors, Engineers, Rogues and Medics, recruited from Terrans, Martians, Venusians, Mercurians or genetically engineered Desert Runners and Tinkers.

As your team explores the solar system, characters gain valuable skills such as piloting, zero-G maneuvering or demolition. These skills can prove more valuable than a good laser pistol in the toxic atmosphere of Venus or the sun-blasted surface of Mercury.

But hang on to that laser pistol! The 25th century is a dangerous place — especially for those who join Buck Rogers and NEO in the heroic fight for interplanetary justice and freedom!

## Budokan (1990)

£24.99 – Electronic Arts)

*[7/10 – ‘slow and indepth fighting game, that is genuinely tactical.’]*

**GM: 87%** - ‘A fun beat-em up with the most versatile control system – as many as 37 moves for a single art – Budokan is the pinnacle of pure martial arts software.’

**CU: 87%** - ‘This is very much a game you can pick up and play, providing you don’t want to boost your Karman. But with so much to learn, winning a fight brings a real feeling of accomplishment. Extremely violent and mindlessly destructive. Just perfect.’

**AFC: 85%** - [R £12.99] ‘What a game! This is no ordinary beat-em-up. It’s the first game I’ve seen that captures the true martial spirit. Presentation and animation are faultless throughout, with a characters shadow closely following his movements. Combat involves genuine tactics, and the effects of stamina ensure you can’t just blast away on the fire button and win every time. All in all Budokan is a polished production, and a worthy purchase as a budget outing.’

**AA: 83%** - [R £12.99] 'You only have to take a look at Street Fighter II and Body Blows to realise that the big two beat-'em-ups on the Amiga are vastly overated – especially Body Blows (Mr Controversial – Ed). Having played Budokan many times on the Mega Drive, missing it first time around on this format, I thought "At last, a decent Amiga basher." Budokan is an oriental tournament between the best young athletes of the East, specialising in the four disciplines of Karate, Nunchaku, Bo and Kendo, with great honour bestowed upon the best fighters. In case you're thinking it's simply a matter of entering a tournament and flogging away until you win, let me put you right. The Eastern disciplines need loads of training before any competition can be contemplated seriously, and you will need to perfect your techniques in all four before you are ready to compete. Whilst not as good as it's console cousin, Budokan ranks amongst the best Amiga beat-'em-ups – abudget bargain!'

**ACE: 825 /1000** – 'Martial arts games come and go, and often new efforts are greeted with a huge yawn. Budokan is a refreshingly good martial arts game. There are four arts to train in: Karate, Kendo, Nunchaku and Bo. Training is integrated with traditional warrior culture, and the game culminates in competition at the Budokan. Nice graphics, and the usual finger gymnastics to perform moves. Worth a look if you like this sort of thing.'

**O: 81%** – [R £12.99]'Each art has at least twenty moves, the moe difficult ones performed by moving the joystick through a series of two or three positions. Thankfully, most moves are performed in similar ways across the arts. Once you have completed your training you can enter the competition against some of the baddest dudes this side of Street Fighter 2. This is where things get interesting. Although not as playable as the aforementioned classic, Budokan is still a very enjoyable beat-'em-up, with enough twists to keep you playing. A little dated in places, but still worth getting hold of.'

**AF: 80%** - [R £12.99] 'This is certainly not what you would call a traditional beat-'em-up. There's plenty to get involved in, and you can mix the disciplines – for example Karate vs Kendo. The graphics are quite goofy and the gameplay will keep you going for a while and I haven't even used the word 'grasshopper;. Damn.'

**AP: 64%** – [R £9.99] 'A neat well presented but far too taxing and monotonous hand-to-hand, stick-to-stick martial arts thingy.'

**CU: 35%** - [R £12.99] 'Despite the obvious realism, you're probably better off giving Budokan a miss, especially when it's at a budget price of £12.99. Go for Body Blows or Street Fighter 2 instead, they may be far-fetched, but at least they're fun to play.'

This Martial arts simulator isn't for everyone, it's slow and methodical and it involves a lot of patience to learn all the moves and best way to take on opponents. All this without out the outlandish characters and special moves visual spectacle that other games provide. Still if you like things a bit slower and methodical and one that respects the Martial Arts for once, then this is well worth a try. Just expect a challenge.

# Buffalo Bills Rodeo Games (1989) AKA Buffalo Bills Wild West Games

£24.99 – Tyne Soft

*[8/10 – ‘California Games, set in the Wild West. Fun if you like that kind of game.’]*

**ZZ: 87%** - ‘Tynesoft have had a go once before at an ‘alternative’ multi-event game with Circus Games, which wasn’t up to much. Thankfully Buffalo Bill’ Rodeo Games is a great improvement. None of the events featured would hack it as stand-alone games, but brought together in one package they add up to value all round. Each sub-game is playable, requiring a fair amount of practice to win through, and thankfully you can do just that! This is a good ‘un, across both formats.’

**CU: 81%** - ‘Where the game really wins over is in it’s originality. No doubt dozens of clones will appear, though whether they reach the same level of varying gameplay that makes this game what it is. The small number of events, mixed with the basic simplicity means it will be sort lived, but then again nothing lasts forever. An enjoyable romp, and an excellent venture into an untapped field. I’d check it out.’

I was surprised how much fun I had with this game. The events are all short lived but surprising fun. These events are:

**Knife Throwing** – a game all about timing and skill and not killing your Indian Squaw.

**Trick Shooting** – Shoot only the bad guys and not the innocents or Marshalls. Then a Man throws bottles and you have to shoot them.

**Bronco Riding** – Follow the moves and keep on that bucking bronco as long as possible.

**Stagecoach Rescue** – a beat-'em-up against an Indian.

**Calf Roping** – Lasoo a calf, against the clock.

**Steer Wrestling** – Time you jump from your horse to the bull and then wrestle him do the ground.

## Bug Bash (1990)

£12.99 – MicroTec /

Dev: Mutation

*[5/10 – ‘Average, simple blaster, gets boring quickly.’]*

**CVG: 83%** – ‘Bargain of the month and no mistake! Bug Bash is the main attraction here and beats the pulp out of many full price efforts! Nucleus is a decent ‘freebie’ – so go for it.’

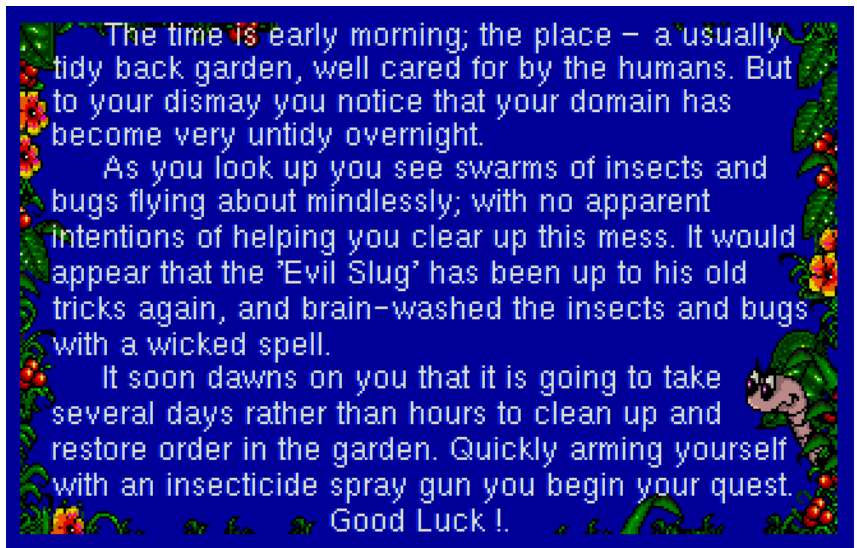

**AP: 3 /5** – [R Free] ‘A curiosity here, in fact I think it’s a first. Bug Bash was once a commercial game (released as part of a two-game package by Mutation Software with a shoot-’em-up called Nucleus), but now it’s entered into the Public Domain (sort of) via an exclusive licensing deal with PD people Amiganuts. The gameplay is pretty elementary, featuring you, the player, as a ladybird with a helicopter jetpac on a mission to clear up lots of rubbish from the garden, all the time being hindered by lots of other insect-type badies. The graphics and sound befit a one-time commercial release but the game itself is simplistic and repetitive, and doesn’t take very long to become boring. Still, as PD you can’t really complain, and the price is a fair reflection on what you’re getting.’

**AF: 65%** – ‘Backed up with a super twee background song, BB looks good and plays reasonably well, it never really makes it into the realm of thrilling, standing firmly in the frustrating camp, this may spur some on to greater Bug Bashing, but most will not see it metamorphosis into a good game.’

I was really chuffed to find this game, the reason is that I have fond memories playing the game Doodlebug by Core, which is the sequel to this game. The sequel was a nice platform game, but this is a fun and simple arcade shooter.

The idea of the game is you play Doodle Bug, a kind of cute Lady Bird who decides to go all Postal and kill all the fellow bugs for leaving rubbish strewn around, so being litter bugs then (You are so fired – Ed)... I will certainly never watch the Wombles in quite the same way, I can tell you that. The game is very basic, and all rather twee and well worth a play for a little bit. Would make a great simple mobile phone game today.

## Bug Bomber (1992)

£25.99 – DMI Design /

Dev: Kingsoft

[7/10 – ‘Bomberman, with more complexity.’]

**AP: 83%** – ‘Slightly better than Dyna Blaster as a one-player game, but not quite as good (although still very good indeed) with a big gang of chums.’

**AF: 83%** – ‘All the options and the different weapons are wholly confusing at first, but perseverance pays off eventually and you’re left with a fun game that can entertain a whole family at once. At first it doesn’t seem to have the same addictive hook as that of Dynablaster – the complicated edge take the edge off it – Vut Bug Bomber will grow on you, give it a second chance and it will impress.’

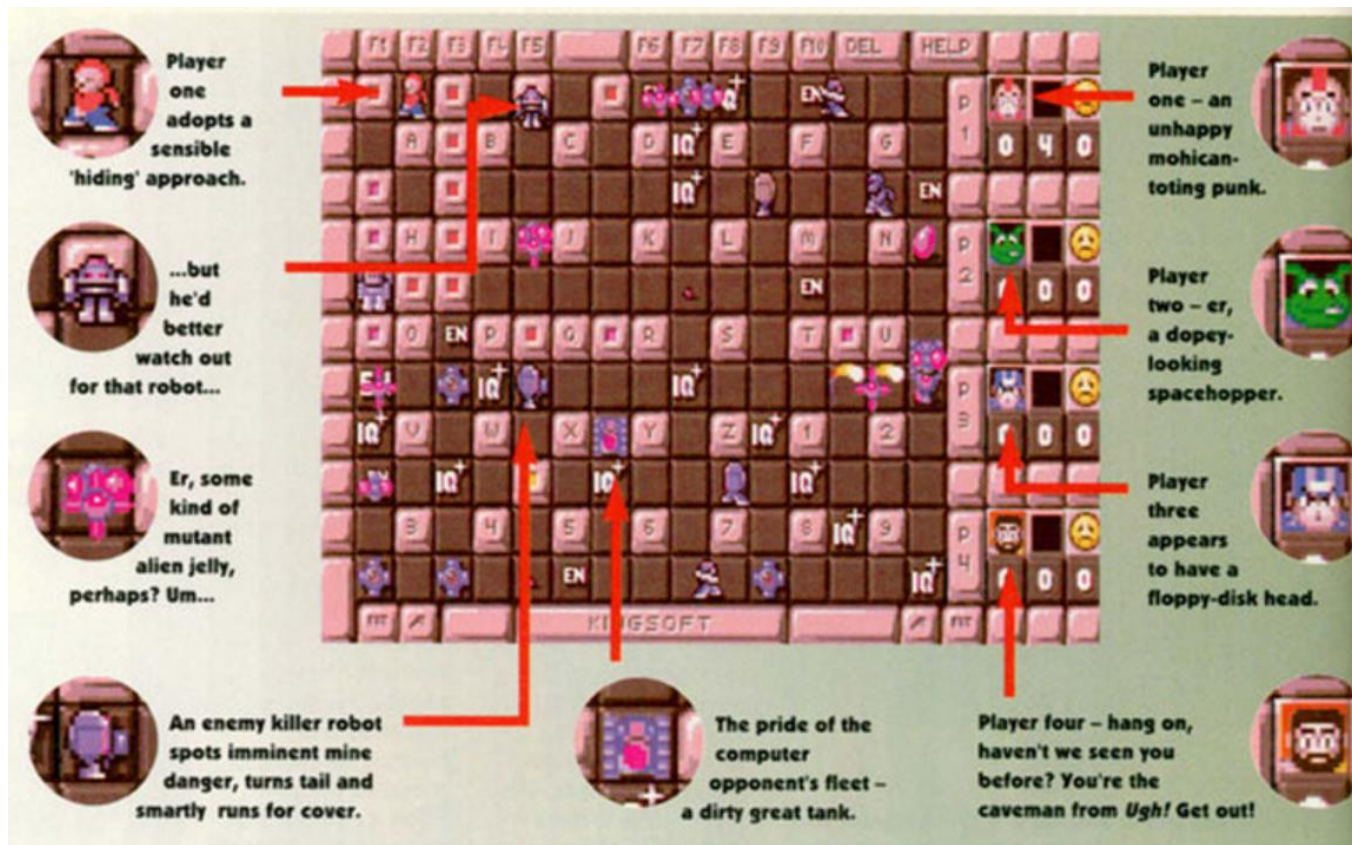

**AA: 83%** – ‘Dyna Blaster’s strong point was its simplicity, unfortunately it was also its downfall. With a group of experienced players a stand off usually resulted as each struggled for dominance. Bug Bomber seeks to alter this situation. The many different way to attack the opposition means that it is almost impossible to avoid death. This makes for a more aggressive game but also one that is a lot more complicated. I personally prefer the hectic, no frills action of Dyna Blaster but if you’re looking for something that bit more challenging, then I suppose this could be the answer.’

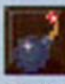

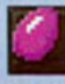

Lay different bombs by pressing a direction on the joystick when you press the fire button.

**O: 81%** – ‘Like Dynablaster, Bug Bomber is a competent but ultimately repetitive one-player game, with the real fun coming from the participation of your friends for simultaneous action. If you can muster the mates, you’d be hard pushed to find a more enjoyable group game concept.’

**CU: 75%** – ‘Okay, the playability is the most important thing, but when the game looks as bad as this, it certainly detracts from the proceedings.’

### ENERGY POINTS THE WAY

<b>BLOCK</b>  Laying a block takes only one unit of energy. Most of your enemies cannot pass through blocks, but nor can you, so be careful, you might end up trapping yourself.	<b>MINE</b>  Placing a mine uses up three units of your precious energy. Once placed, it will detonate if one of your enemies moves on to the square it occupies.
<b>BOMB</b>  Dropping a bomb takes one unit of energy from your score. These only have a range of two squares, so place them with care and don't leave yourself with nowhere to run.	<b>EGG</b>  Laying an egg takes from four to twenty units of energy. There are five different types of egg, including Painters, Crunchers and Hunters, each with their own attributes.

This is a great alternative to Dyna Blasters, which was the name for the Bomberman game on the Amiga. This game follows that simple premise and runs with it, adding multiple types of weapons and rules to the proceedings. I still find Bomberman the far better game here (by along mile), having said that, for those who are fans of that series, and who wants something different and more involved, then this is definitely worth your time.

# BUG BOMBER

**KINGSOFT**

## Buggy Boy (1988)

£24.99 – Elite

[10/10 – ‘My favourite racer on the Amiga.’]

**ZZ: 92%** – ‘I must say I think the 64 version is the best racing game around, so I was holding my breath (don’t try this at home, kids!) In anticipation of the Amiga conversion. I am not disappointed! Amiga Buggy Boy retains all the 8-bit’s playability and, if anything, gains a lot due to its fantastic authenticity to the arcade original. The only graphical differences to Tatsumi’s coin-op are the small reduction in buggy size and a marginally slower screen update. These differences, already minor, aren’t noticed when involved in the totally absorbing races, and – short of a steering wheel, gear stick and accelerator pedal – it’s just like playing the arcade game, as sound, too, is faithful to the original. I was actually swaying in my seat when trying to coax the buggy around the curves – it’s that good! £25 isn’t really an amount of money to spend lightly, but you can buy Buggy Boy safe in the knowledge of dosh well spent.’

**GM: 89%** – [R £9.99 Encore] ‘Although there aren’t any opposing vehicles in Buggy Boy, there’s still plenty to do in Buggy Boy. Dodging obstacles and negotiating curves is enough to fill the stages, often more than enough, then there are flags and point gates to divert you from your path. Interaction with obstacles is useful, logs to make the buggy jump, a tree stump or stone to make it run on two side wheels – useful to get through narrow gaps in walls/barriers – and there’s the infamous football to hit for bonus points. In short, the best budget racer available.’

**ACE: 833 /1000** – ‘The graphics show off the Amiga’s capabilities nicely with lots of smooth, fast action. The buggy is very responsive , accelerates quickly and is animated well. Its initial appeal is high and it’s great fun to play, but there are two problems that drag it down a little. It’s a bit too easy to beat, and with the recent spate of Out Run types games it has aged quite rapidly as a game format. Still a lot of fun but it won’t last that long.’

**AC: 81%** – ‘Nifty sound effects, jolly jingles, bright colours, clean and cute graphics, fast and smooth action and a well varied content makes Buggy Boy a joy to play. The challenge of completing the courses and then trying again and again to better your score ensures that this is a game that will not be consigned to the attic. A lively and lovely, non-violent game. Nice one, Elite.’

**AUI: 8 /10** – ‘It would have been too much to expect Buggy Boy to come up to the standard of the coin-op in terms of speed, but a great job has been done. Control is responsive and everything moves fast enough to be convincing. I never found the coin-op particularly appealing next to the likes of Enduro Racer and Out Run, but in its Amiga Format it makes a much stronger impression.’

**ACE: 8/10** – ‘Presentation is good too, with a neat demo mode, easy to use menu, and a separate hi-score table for each course. But what stunned me, more than any if this, was the totally awesome gameplay. The buggy is soooo responsive, and is such a joy to drive. I found myself loving every minute of my time with it. Even though I hate to use the word, it’s incredibly addictive. You have to play it to believe it. In fact, even though it’s a relatively simple game, I can’t see interest waning for a long time to come. It really is that good. Having played Buggy Boy many a time in the arcade, I can say that Elite have done a marvellous job on the conversion, capturing not just the look, but feel too, and this bodes well for future Amiga conversions, Ikari Warriors and Space Harrier.’

The game conversion was put together by Martin W. Ward who would continue to do solid arcade ports for Elite, with Paper Boy, Commando and Aqua Blast. Fellow coder Richard Frankish would equally go on to do such conversions as Ghost 'N' Goblins, Ikari Warrior, Paperboy and Space Harrier. Sadly they seemed to have both hung up the game programming hats after the Amiga.

People reading my ten out of ten score, combined with such statements as 'it's my favourite racer on the Amiga', may be scratching their heads, convinced that attempting to catalogue every Amiga game has finally tipped me over the edge, and I have gone mad... but you'd be wrong (I think 😊)... Buggy Boy is genuinely my favourite racer on the Amiga and definitely in my top ten all time racers on any format.

For those not in the know, Buggy Boy was based on an arcade game by Tatsumi called Buggy Boy or Speed Buggy as its known in the US. In the game you could race a buggy against the clock on one of five races (Offroad, North, East, South and West.) There are no other fellow racers to contend with but plenty of obstacles strewn all over the place to impede your race. The racing is sublime and really fun, but the genius of the game though is scoring system. Flags and slalom gates offer score (or Time) for riding over or through them and if you collect the flags in the colour order shown in the top right of your screen then all the flags start to flash and you gain a bigger score for all you collect. The game is full of neat things like that, such as if you hit a small slanted rock or tree stump, then your Buggy goes on two wheels, this is tougher to control, but allows you to fit through smaller gaps and crucially gives you more points for any flags or gate you run through. The same goes for jumps, any items collected mid air will also reward extra points. Then you have score boosting footballs dotted around (many disguised as rocks that need to be learned), boot these for mega score. Finally when you complete the track, the game will multiply up any remaining time to make your final score. It is this wonderful, flexible scoring system, that makes it for me. As each time I get my final track score, I am setting off again, convinced I can get an even better one.

This is why I adore this arcade game, its fun, fab and playable.

Incidentally Amiga Kim Lemon channel has done a wonderfully in-depth thirty minute review and play through of the game...

With Buggy Boy, be prepared for the bumpiest ride of your life, over 5 tough courses where the terrain is littered with boulders, trees, brick walls and fences. Use your skills to jump the obstacles by hitting the logs on the track. This either sends you flying, or turns you on to two wheels to enable you to steer through narrow gaps. But be careful; time is against you. Each leg must be completed within a given time limit or you will be disqualified. Additional points are scored by collecting flags and driving through the score gates. Collect the flags in the right order, and a bonus is awarded. Full of thrills and spills, Buggy Boy is the ultimate driving challenge.

## Builderland (1991)

£24.99 – Loricel

*[7/10 – ‘Brat game played from the side view and much better for it.]’*

**AM: 86%** – ‘fun, frustrating addictive game it’s a good little number.’

**AA: 70%** – ‘I did find myself completely absorbed at first and found it difficult to pull myself away from the computer. However any enjoyment soon turns to frustration.’

**AP: 63%** – ‘Fairly interesting Lemmings clone, but so cheaply put together as to be almost embarrassing. Fun though.’

---

I really enjoyed this game, it reminded me a lot of the Amiga game Brat, but having the side perspective made it much more workable. In the game you must move objects around so the boy doesn’t meet an untimely death. It is a compelling concept, but much like the in game music, it’s delightful at first but soon becomes annoying.

# Bully's Sporting Darts (1993)

£9.99 - Alternative

[6/10 – 'Super, Smashing, Terrific.']

**AA: 92%** – 'There is one thing you should know right from the start: I hate darts. As a result of this fact, you would expect me, and rightly so I might add, to tear this effort apart. Well sorry to disappoint you, but I'm not going to! In fact, quite the opposite. This is one of the most addictive, fun to play, downright enjoyable games I have come across in many a long month. Where does the appeal lie? Well instead of just simulating regular darts, Alternative have opted for something slightly different. As well as the popular 501 game and round-the-board versions, you can also play football, golf, tennis, cricket and snooker, all in dart form! It would take too much space to describe how they work here, but rest assured they are all excellently implemented. For £9.99 Bully's Sporting Darts must be one of the best value-for-money games of all time. Buy it today.'

**AFC: 73%** – 'Gameplay just misses the Bulls-eye, but at least there's no Jim Bowden!'

**AF: 72%** – ‘Bullseye – the TV programme responsible for putting a speedboat on every council estate in northern England – enters the Amiga arena with the exotic Bully’s Sporting Darts...[sic]...Bully’s Sporting Darts works best in two player mode playing traditional 501. Good fun if you like darts or competitive two player sports sims.’

**AP: 70%** – ‘Bullseye was always one of the Great British Institutions. The week wasn’t complete until you’d see a nice ordinary couple make complete idiots of themselves on television. Even then they’d fail to win a speedboat or something equally useless. Did anyone ever see a contestant win the speedboat? I certainly never did...[Sic]...Bully’s Sporting darts is rainy afternoon fun, and brilliant to play with your mates when you are too tired to go out. I’ve only one thing to say. Super, smashing, lovely – Just look what you could have won...’

**O: 68%** – ‘Rather than being based on the TV series and including a senile bloke and a load of trivia questions, Alternative has licensed the Bully character on its own, so what we have here is an out-and-out darts simulator.’

**CU: 24%** – ‘Bully’s Darts fails abysmally, in fact it would have trouble cutting it as PD. Avoid.’

I have always found darts a bit daft, and as to why anyone thought... I know we have all these drunk people in a pub, I know lets give them sharp pointy sticks to throw.. was a good idea I will never know. But for computer darts, I have only found one darts game that I adore, and that was 180 by the Pickdord brothers on the Spectrum, all the others have been disappointing. Bully's Sporting Darts isn't a too bad rendition.. The controls felt a little too loose here, making it really tough to line up shots within the time limit. Having said that the variants of darts on offer here is genuinely good fun. All in all an ok darts game, but not a patch on the great 180 spectrum darts game, so play that game instead.

## Bump 'N' Run (1994)

£25.99 - Grandslam

*[8/10 – ‘A suprisingly playable Mario Kart clone.’]*

**AA: 92%** – ‘This is what games should be about. They should be fun and that is exactly what Bump ‘N’ Burn is. Colourful, exciting and highly playable are all phrases that could be used to describe this, along with many other glowing tributes which, if I put them all in would become a bit embarrassing to be honest. Bump ‘N’ Burn may not be the most technologically advanced game around, and it certainly isn’t the most original, but I would say that it is a game that every Amiga owner should have in their collection no matter what.’

**A32: 91%** – [CD32] ‘Without doubt Bump ‘n’ Burn is an Amiga classic. Besides all the glorious details, there’s a superb feel about the cars handling..[sic]..This is the most fun I have had on the CD32 all year, great in one player and unmissable with a friend to join in. Overall a much needed shot in the arm for dejected CD32 owners everywhere. Excellent.’

**O: 90%** – ‘So what we have, in essence, Super Mario Kart – and bloody good it is too!’

**CU: 85%** – [CD32] ‘Bump ‘n’ Burn was a good fun game on the Amiga and it is still a good fun game on the CD32. The graphics are good, the sound excellent, and the overall gameplay is fun. And if you make it to the end of the game a hidden twist unfolds. To find out what, play the game – I’m not telling.’

**O: 82%** – [CD32] ‘though Bump ‘n’ Burn won’t knock your pants off, it’s the closest thing we’ve got to Mario Karts.’

**AF: 79%** – ‘The main problem with Bump ‘n’ Burn is that despite all the wacky competitors on the track you’re racing on your own. You can rattle along for ages without seeing another soul, which can be most disconcerting – and very dull at times. The idea behind it all is nice, but it doesn’t work well enough to take Bump ‘n’ Burn into the pantheon of Amiga Racing Games.’

**AP: 70%** – ‘Mario Kart on the Amiga with the people from Wacky Races? No, not really. Bump ‘n’ Burn borrows heavily from a great game, but doesn’t capture its essential essence. Still has its own special charm though.’

**AC: 40%** – [CD32] ‘Difficulty level and restrictive playing area make it quite frustrating.’

This game was a total shock to me, as I was expecting it to be really bad, and instead, what we have here is quite a solid Mario Kart clone. Now don't get me wrong compared to many Kart racers out there on the consoles this would rank quite lowly. But on the Amiga where competition is less, this holds it head up well.

The game is 6 disks on floppy and no second drive can be used, so the best way to play this game is on the CD32 console. Here you rush around at a fair old pace and have quite a bit of fun (especially in 2 player). The only thing I feel isn't quite right, the tracks can be to narrow and a single crash can be the difference between 1st and Last place. But all in all, yes I really enjoyed it and loved the way you can customize and improve your Kart as you progress. Oh also Music is fab.

# The Racers

\*Taken from Amiga Action

## COLONEL CARNAGE AND THE TIN POT TANK TRAKKER

A strict disciplinarian with attitude, the Colonel hates slackers (like Neil). His vehicle carries a vast arsenal of weaponry, resulting in wider rear view mirrors being made compulsory for all other drivers.

## FRANK 'N' STEINER AND THE TRANSYLVANIAN TURBO-CHARGER

Frank appeared in several horror films before finally realising his ambition of becoming a racing driver. As he is undead, Frank can be bolted back together after any mishap. Steiner keeps an eye over his shoulder as bolts hinder neck movement.

## COUNT CHAOS AND THE SKULL CRUSHER SPECIAL

The Dick Dastardly of Bump 'n' Burn, the Count is the most fearsome contestant ever to enter the Bump n Burn championships, and has never been defeated. Apart from his appearance on the race track, nothing is known about this mysterious man.

## DODGY DINO'S AND THE JURASSIC JALOPY

Seasoned campaigners, the Dino's were once banned for eating other contestants. The use of dentures, removed by officials before each race has allowed their return to the Bump 'n' Burn championships this season.

## ERIC THE ESKIMO AND THE IGLOO EXPRESS

All the way from the freezing fjords (?), Eric is hoping to become the first Bump 'n Burn champion to win in a mobile home. When things hot up this is one cool character who won't melt away!

## LORETTA LAMOUR AND THE LOVE BUG

The darling of the race track, Loretta Lamour and the Love Bug combine glamour, grace and great bodywork. Has been known to give other drivers the horn in sticky situations. (gag)

## BUCK TOOTH BEAVER BROTHERS AND THE DAMBUSTER

Fitness freaks, the Beaver Brothers chew through at least one small rainforest a day. This is not too popular with Green Activists, who have threatened to sabotage the Beavers' race.

## MR. FABULOUS AND THE FLAMING FABMOBILE

With his ultrabright smile, handsome features and immense wealth, Fab is the housewives' favourite. Forced to wear fire proof hair gel after a particularly bad flame out in a previous race.

## Bumpy's Arcade Adventure (1992)

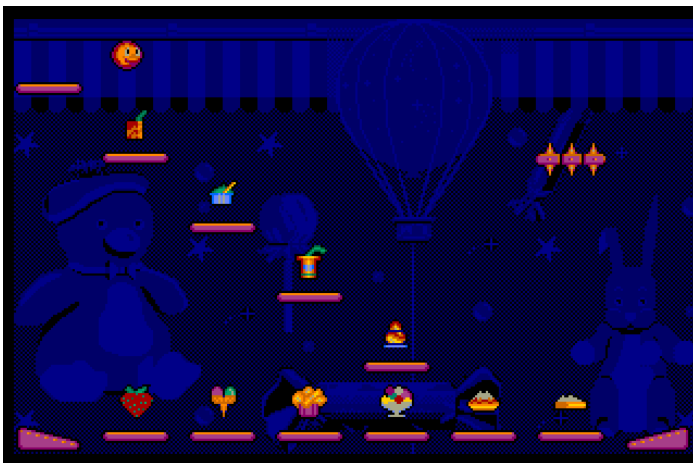

£24.99 – Loricel

*[9/10 – ‘A simple but fantastic platform puzzle game. A real hidden gem.’]*

**MANIA: 74%** – ‘Loricel’s latest arcade game is rather simple. Bumpy, our bouncy spherical hero, wants to impress his girl, Bumpette. To make a lasting impression, he decides to go to the local fair and navigate one hundred different labyrinths contained in 9 different worlds. Well they say the faint heart never won a lady!..[sic]..another hut with this fun, colourful platform game.’

---

Now this is exactly why I am going through every game on the Amiga, its finding hidden gems such as this. The purpose of the game is simple, you play a rubber ball who must bounce around the level and collect up all the items dotted around. Collect everything and then an exit platform shows up which can let you move on to the next level. The game is perfectly balanced, having tearing your hair out on later levels, but always knowing your death was your fault and not the game. Track this game down, although if you can get the trained version with infinite lives it will save your sanity.

## Bunny Bricks(1992)

£24.99 – Daze (publisher in UK) /

Dev: Silmarils

*[4/10 – ‘ Terrible controls ruin a nice idea for a game.’]*

**AF: 78%** – ‘This rather oddly titled game is based around the old classic Arkanoid, itself a variation on Breakout, but features much better graphics. The twist is that instead of a shifting a paddle from side to side to bounce the puck towards the bricks, you control a baseball playing bunny that clubs a ball around the screen to destroy stacks of bricks. Bunny the rabbit has an extensive repertoire of moves, including left and right drives and power shots. There’s also a variety of special items that float down out of the destroyed bricks – machine guns, multiple bats and power-ups for super smash shots. The game is very colourful, especially the well-drawn backgrounds. The animation is good and the cartoon style works well. It’s all very addictive, much like most games of this genre, and the sound makes it enjoyable. It’s not all that original a concept, but who needs originality when there is this much fun on offer. If you haven’t got Arkanoid, or Breakout for that matter, but want something along the same lines, Bunny Bricks is for you.’

**AA: 67%** – ‘I found myself bored with it quickly and after about twenty minutes I lost interest. My advice would be to wait for Transartica.’

**ACAR: 49%** – ‘Bunny Bricks is simply a dressed up version of a tired old game- it may be the first cartoon style arcade, brick-breaking baseball game to feature a rabbit. Ever. And my guess is, it will also be the last. Bunny Bricks is a boring, second rate little game with very few redeeming features. If you’re looking for a Breakout clone, try Arkanoid, or one of the many PD versions.’

**CU: 42%** – ‘However addictive and humorous as it is, disposable fun like this really belongs in the budget price bracket.’

**AP: 36%** – ‘Breakout was a great game largely because of its simplicity and its basic test of skill (perceive where the ball’s likely to go and get there). Bunny Bricks somehow manages to lose all of that, becoming a very dull, convoluted mess. A nicely animated slice of boredom.’

**O: 35%** – ‘BB feels so forced and manic that it becomes a chore to play. A game you have to force yourself to continue with it a game not worth buying. So don’t’

Bunny Bricks was a real disappointment to me. The game is a nice idea, replace a normal bat, in the bat and ball game and replace it with a baseball wielding rabbit. The idea is taken further, with the excellent graphics done by Jean-Christophe Charter who would do lovely art in Transartica and three Ishar games. Sadly, like many Silmaris games the concept is let down by the execution, and Bunny Bricks controls is where the game falls apart. The main issue is the game loses the smooth control of the "bat" and movement often simply fails to respond quickly enough. If that wasn't frustrating enough, the developers replaced the simple fire button, with the player having to do a fire button and a direction simultaneously to determine the type of hit. Although you do get use to it, it never feels intuitive and so robs the game of its enjoyment (for me at least). Which is a shame as visually there is a lot to love about this game.

# BUNNY BRICKS

"BUNNY BRICKS" IS THE FIRST CARTOON-STYLE, ARCADE, BRICK-BREAKING BASEBALL GAME TO STAR A RABBIT. EVER.

In a series of animated features "Bunny" must break every brick he can, helped and hindered by his friends Naf Naf, Cocky, Sharky and the Angel Einstein.

Ducking and diving, Bunny has a many options (MultiBats, MachineGun, SuperBat and more) to assist him but needs more than skill and precision to solve the secret bonuses, puzzles and riddles.

Fast and furious action for hand and brain... this game will make you happier than a bunny in carrot patch !

## LE PREMIER CASSE-BRIQUE BASE-BALL DE L'HISTOIRE

## Bureaucracy (1987)

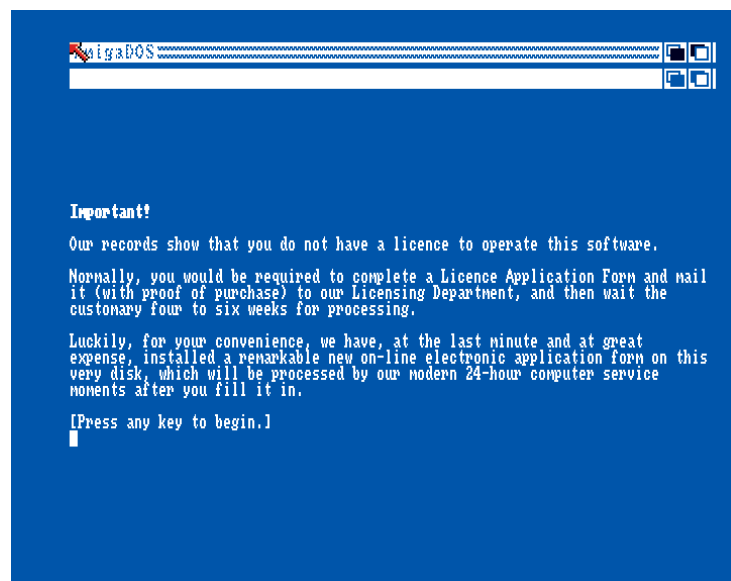

£24.99 – Infocom

*[9/10 – ‘An original Douglas Adams written text adventure, need I say any more?’]*

Sadly I could find no scans of any Amiga reviews for the game.. But some ratings have been listed...

**ACAR: 95%**

**CU : 7 /10**

**ST-Log [US Publication] :** ‘ By Andy Eddy - Everyone, at one point in their life or another, faces the "red tape shuffle," the hideous condition that comes from dealing with big companies and their infernally inefficient ways of doing things. Proof of this malady shows up regularly; blood-boiling examples include having a phone conversation put on hold for a matter of weeks or getting the runaround while trying to straighten out a \$1 million computer error—obviously not in your favour—on your bank account.

Douglas Adams—best known for bringing his twisted, yet realistic, sense of humour to light on the radio, on television, and later via computer disk in the Hitchhiker's Guide To The Galaxy—and Infocom have taken true-to-life horrors like these and turned them into a warped adventure that is called, fittingly enough, Bureaucracy.

The scene is set (based on an actual experience that Adams went through): You have just moved into a new house, as well as acquired a new position in a new company. As if dealing with all that isn't enough, your local bank has misplaced your change-of-address form. So what, you say? Well, the bank has sent your newly renewed, valid credit card to your old address and you're supposed to be on your way to a working vacation in Paris. As you quickly find out, nothing seems to go your way... NOTHING! Needless to say, you're up against a wall—a bare wall, as the moving company has yet to deliver your furniture from your old residence. See what I mean?

Bureaucracy is much like your standard text adventure; you have to find items and their uses to help you in your quest, and certain goals have point values. The difference here is that your progress isn't predominantly monitored by the number of moves you make or your score—after all, how could you score in a life experience like this?

Realistically, you'll know how you're faring by way of an on-screen blood-pressure reading. Everything that goes wrong causes your blood pressure to rise: aggravating bank tellers sending you to closed windows, filling out form after confusing form, phoning your girlfriend/boyfriend to find that they're no longer interested in you, even by using words that the game's parser doesn't understand (though the game sarcastically tells you that you aren't licensed or authorized to use that word).

It gets you right in the mood from the start. The first thing you're told when you boot up is that you aren't licensed to operate the software, but through their kindness you can fill out an on-screen form to straighten out the predicament. You're shown a form, and one by one you're prompted to fill in the entries—albeit in a random order that sets you off balance—and certain slots bring about a snide comment from the game on your answer. Then it proceeds to mangle the information anyway; getting your house number wrong, calling you Ms. instead of Mr., and on and on.

#### Blood Pressure:

vacation.

You're pretty pleased with your new home, too, and don't really mind that the removals company fouled up slightly due to a computer scheduling problem. After all, you won't be using your new place for the next two weeks, and they promised to have everything installed by the time you return.

In fact, the only tiny cloud on the horizon is a silly bit of bother with your bank about a change-of-address card. You know the sort of thing? You send them a change-of-address card, and they say "Oh dearie me, that's not our official change-of-address form, the computer won't like it a bit, you'll have to fill in a proper one, we'll send one to you," and they do, but they send it to your old address along with your new US Excess card and your cheque book...?

Of course you know the sort of thing. It's exactly what has happened to you. But Happitec's enlightened employee policies mean you don't really care. After all, who needs money? Pick up your Happitec cheque, grab a bite of lunch, a cab to the airport and then you'll be living high on the hog at Happitec's expense. What a truly enviable situation you find yourself in, Ms Driscoll.

[MORE]

Bringing the chase into more realistic ambience, Bureaucracy takes the initial form you filled out and tailors the rest of the contest so it closely parallels your life, creating a type of Computer Mad-Libs, if you will. Your entries become the focal point of the story—the bank is located a couple of doors from your house address, your present and past girl/boyfriend's names are listed in your phone book and they later leave disheartening messages on your answering machine, someone will invariably walk by carrying something shaded in your least favorite color.

Best of all is the whimsically sardonic feel to each and every situation you're up against. Meandering through your neighborhood is like a trip to the looney bin, as you meet the strangest group of people and animals that you could possibly imagine. Door-front intercoms spewing forth the weirdest banter, a deaf matron with an elephant gun, a one-winged macaw whose cage is lined with something you'd like to get your hands on. And that's just for starters.

**Back Room**

**Blood Pressure: 130/85**

This is the living room of your new house, a pretty nice room, actually. At least, it will be when all your stuff has arrived as the removals company said they would have done yesterday and now say they will do while you're on vacation. At the moment, however, it's a bit dull. Plain white, no carpets, no curtains, no furniture. A room to go bughouse in, really. Another room is visible to the west, and a closed front door leads outside.

>w

**Back Room**

You're in the back room of your new house, another nice room, at present suitable for lining with latex padding and bouncing off the walls, but likely to be pretty impressive and upwardly mobile once the removals men have sorted out their little problem. The exit leads east to the living room.

You see a combination telephone/answering machine and a table here. On the table you see a hacksaw, an address book, a small case, your Boysenberry computer, a letter and your passport.

>■

You'll laugh and chuckle with everything the game throws your way, but frankly, it gets under your skin after a while because you can relate to what is going on in real terms. This goes beyond the typically wonderful Infocom style, because *Bureaucracy* uses your name, speaks to you directly and tells you, point-blank, what a mess your life is becoming! Why shouldn't you feel edgy and apprehensive laughing about your life going down the tubes—even if it is a game?

*Bureaucracy* is a wild romp through corporate affairs and its interaction on the hapless, helpless "little guy." Send a copy of it to a bank manager near you and then go hide your money in your mattress. Besides having a lesson for big companies in there somewhere, it can be entertaining to us peons as well.'

---

Ok I am hugely excited over this game, as a massive Douglas Adams fan (*Hitch Hikers Guide to the Galaxy*). I was positively salivating when I discovered he had written an original text adventure story for Infocom. The game as well is really good, with humour and observations on the absurdity of life, dripping off every page. So if like me you adore anything that genius of a writer wrote then track this pearl of a game down, you wont be disappointed. I certainly wasn't.

*According to Adams, the premise of the game was inspired by a real-life experience. Before moving from one address to another in London, Adams filled out several change-of-address forms, including one he submitted in person at his bank. Shortly after settling into his new apartment, he found that his credit card no longer worked. The bank had invalidated his current card and sent a new one to his old address. Adams spent weeks trying to get the bank to correct its mistake, filling out several new forms and talking to several bank officials. The bank finally sent a letter apologizing for the inconvenience; naturally, it was sent to his old address.*

*Although *Bureaucracy* showed the unmistakable signs of Adams' humor, the game didn't sell nearly as well as his other collaboration with Infocom, *The Hitchhiker's Guide to the Galaxy*. This may be, at least in part, because Infocom was facing grave financial difficulties in 1987. - Taken from Wikipedia*

# You're ready to move!

**FILLMORE FIDUCIARY TRUST** EST. 1907

## —And WE'RE ready to move with you!

*"Let's not forget the **CHANGE-OF-ADDRESS FORM**, dear."*

One of the nice things about moving is the new friends you'll make. But there's one old friend you can bring along with you—Fillmore Fiduciary Trust! We have offices nationwide, waiting to serve you in your new town. When you fill out a Fillmore Fiduciary Trust change-of-address form, your account will automatically be transferred to the branch office nearest you!

Moving is easy when you plan ahead. Just follow these simple steps. First, contact Mazzotta National Van Lines and Rent-a-Truck well ahead of time, so that a van can be reserved in your name. Second, buy plenty of boxes and packing tape so you don't run out. Third, file your change-of-address forms six to eight weeks before you move to ensure that all mail will be properly forwarded.

Children have feelings, too. Sometimes children feel left out during a move. Their parents are too busy packing and making arrangements to pay attention to a child's fears and

apprehensions, so the little tiny worries grow bigger and bigger until they turn into enormous horrible monsters hiding in the closet just waiting to jump out and gobble you up! The solution is to involve your children in every aspect of your move. Filling out and filing your Fillmore Fiduciary Trust change-of-address form can be a fun activity for the whole family.

**Your friendly bank teller is waiting for you!** Plan a day for your family to visit the bank. Your children will find it an exciting educational experience as you proudly show them the many financial services available. While you're there, why not open a savings account for each child! The minimum opening balance for a Fillmore Fiduciary Trust Regular Savings Account is only \$10 and your children will thrill to the excitement of sound money management as our generous 5% interest adds pennies, nickels, and dimes to their accounts. Don't forget to visit the Change of Address window, where the teller will cheerfully hand you a change-of-address form.

**We make it easy!** It's a breeze to change your address with the Fillmore Fiduciary Trust change-of-address forms. Choose between Short Form 624ZB7M-A and Long Form

## Burger Man (1991)

£???.?? – Byte Back /

Dev : Cloud Nine

*[2/10 – ‘Poor Burger Time  
arcade game rip-off.’]*

Sadly I could find no scans of any Amiga reviews for the game.. But some ratings have been listed...

**AMIGA JOKER: 19%**

The game plays like its on a spectrum. If this was a public domain game (i.e. free) then this would be alright if average. But the fact the game was released commercially is a joke. Best avoid, and go and play the original if you can.

# Burning Rubber(1993)

£25.99 – Ocean /

Dev: Harlequin

*[5/10 – ‘All feels far too rough and sparse to be a good racer.’]*

**AP: 79%** – ‘As long as you don’t expect it to be a Lotus-type all-out arcade racer, Burning Rubber isn’t half bad. It’s technically naff in most ways, but I’ve got a soft spot for it I can’t quite shake off. It’s a different kind of driving game, and that’s no bad thing.’

**AF: 78%** – ‘It’s a car race around the world lacking in humour but with some pleasant graphics and the odd bit of police-car-chase action. An Astra not a Porsche.’

**O: 78%** – ‘Well, lets hope that other bands follow the Utah Saints’ example and negotiate more music/game tie-ins – the intro to Burning Rubber is one of the most impressive things I’ve seen and heard in a long time (although it has to be stressed epilepsy sufferers won’t agree). It’s unfortunate then, that the game doesn’t live up to the high standards set by the gratuitous pop promotion. Harlequin have tried desperately hard to do something different, but the things which should stand out and remove Burning Rubber from the crowd actually work against it. Take the route planning, for example, which in theory is a good idea. Having the opportunity to race the way you want to is all well and good, but because the junctions turns are at 90° to the main road they’re hard to negotiate without crashing so they just get in the way – an Outrun approach would have been much easier to swallow...[sic]..if you’re used to Lotus-style slickness then you’ll be slightly disappointed. Nice idea but a little rough around the edges.’

**AA: 58%** – ‘A massive and reasonably varied racing game sadly let down by some very cheesy music, bog standard graphics and an almost criminal lack of attention to the way the whole thing plays.’

**AUI: 58%** – ‘I suspect that Burning Rubber will crash and burn in the charts and that’s no worse than it deserves. I would have preferred to have just reviewed the intro.’

**CU: 41%** – ‘Burning Rubber should be avoided at all costs, just like Romford on a Friday night.’

---

The first thing that strikes you with this game is the intro, with music by Utah Saints no less and impressive epilepsy inducing dancing and flashing, lifted right from Spaceballs State of the Art music demo. Sadly on playing the game, with its functional graphics and weedy cars, it soon becomes really boring. There is to be fair tons of races around the world, but each felt samey and tedious.. Despite all that I kind of perversely enjoyed it, all in all I couldn’t make my mind up with this game, it races ok, if nothing special and when compared to other Amiga racers, it is severely lacking. Still its worth a little play to see what you think.

< The intro is very cool to this game... its basically the music demo State of the Art, with music done by Utah Saints.

IT'S ILLEGAL!

It's the ultimate road race. It thunders through six European territories and bullets across the U.S.A. It's not just a head-to-head between happy snappin', joy riding, boy racers... this is seriously hot competition against the meanest drivers on the tarmac. Beef up your hatch-back to enhance the speed and handling, plan your route and burn off the bizzies. So fire up your engine and pump up the gas for some fearsomely dangerous road racing. BURNING RUBBER... the sweet smell of victory.

## Burnout (1997)

£19.99 – Vulcan Software /

Dev: Scorpius

*[3/10 – ‘dull and repetitive gameplay, simply not fun to play.’]*

**CU: 43%** – ‘There is a lot about burnout that makes you think Public Domain. Damn fine PD admittedly, but the gameplay just never seems to go anywhere, and amusing as the idea may be, it just doesn’t last. There’s no real progression in the game, no increase in difficulty, and very little sense of long term achievement. Even multiplayer action didn’t seem fun, and looking at those graphics won’t keep you happy forever.’

**AF: 40%** – ‘Four cars, four arenas and very repetitive gameplay and up to a good looking, dull and boring game.’

---

The is simple really, drive around and hit the other cars off the arena before they get you. That’s it, and whilst I am all for simplicity in games (I love combat for example) this game is simply no fun to play both as single player, and surprisingly in multi player.

All in all a game best to avoid.

**Burntime (1993)**

**£24.99 – Max Design**

**[7/10 – ‘Intriguing post nuclear RPG. Needs lots of time and patients though.’]**

**CU: 76%** – ‘Playing Burntime could be described as a depressing experience, because it makes you painfully aware of what is happening in the world around us. It is painfully true to life, a lot of research has gone into this game and the programmers have consulted Greenpeace all along the way. I can’t really describe Burntime in a nutshell, except to say that it’s a very atmospheric RPG, with a message that really makes you sit back and think. Entertaining but disconcerting game.’

**AP: 74%** – ‘It’s an odd, but on the whole satisfactory, jumble is Burntime. The ideas are certainly nothing new. It borrows from everything from the Settlers to that number crunching favourite Kingdom. You get a lot of interesting tussles and sieges, but you also have to contend with trudging around in a half aimless exploratory manner for a fair bit of the game. It’s certainly not outstanding or excellent or anything like that, but it is solid, dependable and performs well.’

**AF: 70%** – ‘An interesting game, but the finished product fails to come together. It will probably appeal to hard-core strategy gamers, but not to many others.’

**O: 59%** – ‘Things improve once you’ve been playing for a fair chunk of time..[sic]..Burntime isn’t a crap game.’

---

I was quite impressed with this game and love the setting of a post nuclear holocaust world, that has been impressively realised and detailed. The trouble is that it perhaps takes itself a little too seriously and realistically.. With far too much emphasis on mundane tasks, such as building up food and water and long tedious treks through the wasteland need to be done, to enjoy the more interesting strategy and siege parts. All in all it is a quirky enjoyable game, than is probably only worth playing today if you have lots of spare time on your hands or played it back in the day. For the rest of us, then it’s probably better to go and boot up one of the Fallout games.

# Bush Buck (1991)

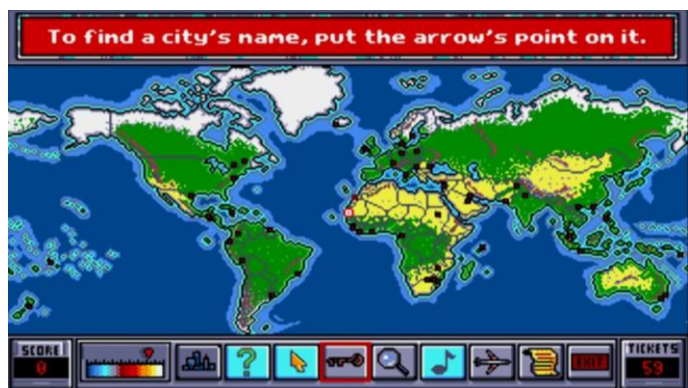

£24.99 – Activision /

Dev: The Disc Company

[4/10 – ‘Dull treasure hunt game. Nice idea though.’]

Hmm this is a strange game and no mistake. It’s a global treasure hunt, where you must follow clues and find items on your list. The trouble is that the game feels very clunky, and so what should be fun ends up very dull to play.

It is a shame really, as if it had been better executed then it could have been good fun. As I love solving puzzles and treasure hunts like this.

# Imagine a treasure hunt in a very exotic neighborhood—the entire world...

In Bangkok, you have found the spectacular Wat Arun Temple and some good luck. This stop has brought you a step closer in your worldwide search for the rare Masai mask. Hidden in a crack in the Temple wall is a slip of paper with this clue: "You'll find the Masai mask hidden in the city where the famous Dr. Livingstone began his explorations." So you hurry back to your airplane with a hunch that the next destination could be the end of your quest.

The year is 2010. Your mission is to collect rare and wonderful artifacts for the year's biggest event, a global "Questival." But your nemesis, the slimy Otto von Slinkenrat, has hidden these treasures in faraway lands, hoping to scoop them up for his own collection. The game is BushBuck, a colorful, musical and animated treasure hunt that takes you on a worldwide adventure.

Equipped with a stack of airplane tickets to anywhere in the world, you'll hop from one exotic locale to the next looking for clues to help in your search. (And von Slinkenrat will never be far behind.) Along the way you will discover spectacular views of famous landmarks and a fascinating travelogue of 206 of the world's most intriguing cities in 175 countries.

Mastering BushBuck provides hours of fun while greatly enhancing an understanding of global geography. A dynamic and exciting game, celebrating the magical places and diverse cultures that make up our world.

Just a few of the 400 items you'll be combing the world for:

Banana-shaped postage stamps · Paint-by-number Rembrandt kit  
 Plate of "drunk shrimp" · Goombay Festival commemorative glass  
 Poda-poda tyre · Coco-pod earrings · Cannibal fork  
 Steering wheel from a jeepney · Mooncake · Rubber warthog nose  
 Snakeskin shampoo · Bouzouki · Avocado ice cream  
 Reindeer-driving license

"I find the game to be both engrossing and educational — a great way to stimulate interest in global geography... Far better than its competitor, which lacks, among other features, the great maps that make PC Globe famous."  
 Bob Mandel,  
 Professor of Social Sciences and contributor to Byte.

# Butchers Hill (1989)

£24.99 – Gremlin /

Dev: Imagitec Design

*[4/10 – ‘Vietnam war game, full of mini arcade shooters and good wander through the jungle 3D sections.’]*

This game is a weird mix really, full of a handful of average mini arcade games, and a some nice wander through the jungle 3D sections (very impressive, considering the games age).

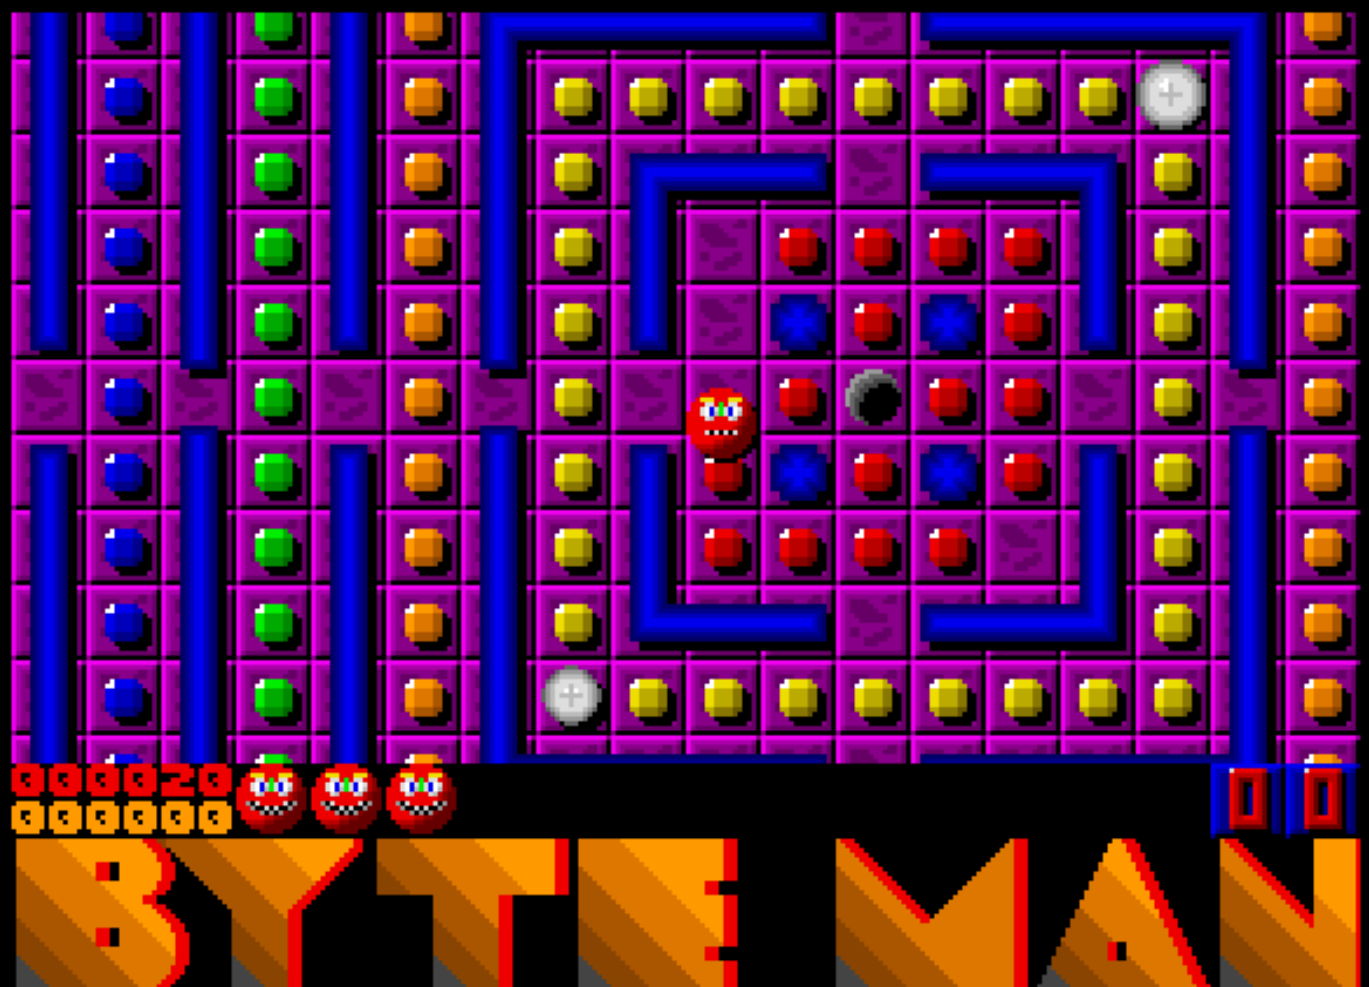

All in all it plays reasonably enough, but it just isn't that much fun to play.

Byteman (1990)  
£24.99 – Odyssey

*[ 5/10 – ‘Fine variant of Pac-Man, still only Public Domain level of game though.’]*

The game plays all right really, its basically Pac-Man with bigger mazes. There isn't a lot more going on here, and it isn't going to hold your attention for long. But well worth cranking it up, particularly if you like Pac-Man style maze games.

**SUPER GAMES PAK CONTAINS THREE BRAND NEW STATE OF THE ART ARCADE GAMES. IT IS NOT A COMPILATION OF THREE OLD GAMES!** This is an incredibly enhanced conversion of the Amiga computer version. Each game has its own cartoon like introduction sequence and the instructions for each game are on disc with graphics and sounds effects. As a Bonus we have also included the LUNAR RESCUE complete introduction sequence at no extra charge. Lunar Rescue is our next CDTV project. This intro runs for about 14 minutes and has some of the best graphics and sound effects ever seen in a computer game!

**JAILBREAK** brings the classic Breakout (TM Atari) theme into the 90's with great graphics and lots of digitized sound effects. 100 levels of fast action fun will leave your fingers and brain cells throbbing. Special bricks and powers add variety and challenge!

**BYTEMAN** puts a BIT-muncher in a giant 8 direction scrolling maze crawling with baddies. Byteman includes multiple levels, digitized sound effects, an ear-gasmic soundtrack, scrolling screens and a simultaneous two-player option (with adapter).

**DEATHBOTS:** You must survive six levels of Deathbots to reach your final goal: The Gamma bomb. The only way to get to the next level is to find the turbo elevator shaft, unfortunately for you, it is guarded by a huge guardian Deathbot. If you can destroy him, use the elevator to descend to the next level with even more dangerous Deathbots! All three games feature great graphics, digitized sounds effects and were written in 100% assembly language for lightning fast execution speed that all arcade gamers demand.
